## NOTES

- (1) Under the provisions of the Act of 1929, P. L. 1676, the unexpended balances of Township Reward appropriations of 1927 and prior at June 1, 1929, were carried forward and made liabilities under the 1929 appropriation, as follows:

Transferred from:  
 1925 Appropriation balance ..... \$ 14,051.32  
 1927 Appropriation balance ..... 331,803.13

Transferred to 1929 Township Reward .. \$ 345,854.95

- (2) Under the provisions of the Act of 1929, P. L. 474, the unexpended balances of State-Aid Highway construction appropriations of 1927 and prior were carried forward and made liabilities under the 1929 appropriation, as follows:

Transferred from:  
 1921 Appropriation balance (General Fund) \$ 435,547.42  
 1925 Appropriation balance (Motor Fund) . 349,714.98  
 1925 Appropriation balance, State-Aid Butler County (Motor Fund) ..... 6,129.61  
 1927 Appropriation balance (Motor Fund) .. 2,413,783.81

Transferred to 1929 State-Aid Highway ..... \$3,205,175.82

- (3) Under the provisions of the Act of 1929, P. L. 1046 (Sec. 5) the Department of Highways is entitled to charge appropriations in specific amounts with stores, equipment and equipment rentals used. The amounts by which these appropriations are reduced become available for general highway purposes.

- (4) Receipts of \$3,271,024.75 credited to this appropriation between June 1, 1929, and December 31, 1930.

- (5) It is estimated that all appropriations will be expended at May 31, 1931, except the following:

Highway Program—Wheeler-Flynn Act .... \$ 650,000.00  
 State-Aid to Cities (except first class) .... 100,000.00  
 State-Aid Highway Construction ..... 1,000,000.00

Total Estimated Specific Appropriation  
 Liabilities, May 31, 1931 ..... \$1,750,000.00

- (1) Prior to this biennium, the appropriation was for rental and service only for buildings rented by the State. In 1929-1931, Property and Supplies was given the appropriation which included in addition to rental and service for rented buildings, fuel, water, power and electric current for the Capitol, the State Arsenal, the Military Reservation at Mt. Gretna, the Agricultural Experimental Farm at Mt. Gretna and the Sanatoria of the Department of Health.

## SUPPLIES FOR OPERATING EQUIPMENT TEMPORARILY ASSIGNED—

Allocation to Department of Property and Supplies for operating automotive equipment permanently assigned for its use or temporarily assigned for the use of other agencies

GRAND TOTAL EXPENDITURES

Beginning June 1, 1929, under the provision of Section 2407 of the Administrative Code, the Department of Property and Supplies took over the control of all State automobiles. This appropriation was made to the Department to enable it to augment or replace automotive equipment for Departments supported from the General Fund.

# During this period the receipts from the operation of these institutions were retained and spent without passing through the State Treasury.

The difference between the cost of operation and these receipts was met by an appropriation from the General Fund.

\* Appropriation for construction made to Property and Supplies this period. Not included in totals.

Harrisburg, Pa.,  
January ...., 1931

To the General Assembly,  
Commonwealth of Pennsylvania,  
Session of 1931.

The Township Law Revision Commission of the Commonwealth of Pennsylvania respectfully submits the following report:

LEGISLATION CREATING THE COMMISSION

At the Session of the General Assembly, in 1929, the following law was duly enacted:

AN ACT

Creating a commission to study the law relating to townships; to revise, restate, and harmonize existing laws, and eliminate inconsistent, overlapping, and redundant provisions of law which appear obsolete, or repealed by implication; and to draft such new laws as may appear necessary; and to consolidate the laws relating to townships, and draft a separate code for each class of townships; and making an appropriation.

Section 1. Be it enacted, &c., That a commission is hereby created, to consist of three commissioners of townships of the first class, one of whom shall be learned in the law, three supervisors of townships of the second class, to be appointed by the Governor, two members of the Senate, one of whom shall be learned in the law, to be appointed by the President Pro Tempore of the Senate, and two members of the House of Representatives, one of whom shall be learned in the law, to be appointed by the Speaker of the House of Representatives. The commission shall select from its membership a chairman, and shall elect a secretary who need not be a member of the commission. It shall be the duty of said commission to study laws of the Commonwealth relating to townships, to revise, restate, and harmonize existing laws, to eliminate inconsistent, redundant, and overlapping provisions of law which appear obsolete or repealed by implication, and to draft such new laws as may appear necessary to the conduct of affairs of townships in a proper economical and efficient manner, and to consolidate such laws as relate to townships into a separate code for each class of townships.

Section 2. The members of the commission shall not receive any compensation for their services, but shall be reimbursed for all expenses incurred in the performance of their duties. The commission shall have power to employ a secretary, and such clerks and stenographers as may be deemed necessary. The commission shall make a report to the General Assembly not later than February first, one thousand nine hundred and thirty-one.

Section 3. The sum of fifteen thousand dollars (\$15,000), or so much thereof as may be necessary, is hereby specifically

appropriated to the commission for the purpose of carrying out the provisions of this act and for the payment of expenses of the commission and the compensation and expenses of the secretary, clerks and stenographers.

Payments from said appropriation shall be made on requisition of the chairman of the commission by warrant of the Auditor General on the State Treasurer.

The commission shall be furnished the necessary stationery and office supplies, and have all necessary printing done by the proper departments of the State, upon requisition of the chairman of the commission.

Approved—The 26th day of April, A. D. 1929.

JOHN S. FISHER

### II

#### APPOINTMENT OF MEMBERS OF THE COMMISSION

In accordance with the terms of this law, the following persons were appointed as members of the Commission: The Governor appointed Charles A. Donnelly, Township Commissioner, of Upper Darby Township, Delaware County; Andrew MacDonald, Township Commissioner of Lower Merion Township, Montgomery County; Clarence W. Scheck, Township Commissioner of Mount Lebanon Township, Allegheny County; R. S. Blackwood, Supervisor of Chippewa Township, Beaver County; Samuel L. Smedley, Sr., Supervisor of Edgemont Township, Delaware County, and E. M. Liddle, Supervisor of Sandy Township, Clearfield County. The President Pro Tempore of the Senate appointed the following Senators: John E. Kunkle of Westmoreland County and John J. McClure of Delaware County. The Speaker of the House appointed the following Members of the House of Representatives: George L. Reed of Dauphin County, and Frederick C. Peters of Montgomery County. Senator George T. Weingartner was subsequently appointed by the President Pro Tempore to fill the vacancy caused by the death of Senator Kunkle.

### III

#### ORGANIZATION OF COMMISSION

Pursuant to the call of the Governor, the members appointed met for organization in the Governor's Reception Room at the State Capitol, Tuesday, October 22, 1929. The Commission organized by electing Senator John E. Kunkle, chairman, Representative George L. Reed as vice chairman, William H. Whitaker as secretary, and Harold A. Thompson as clerk. Later, John H. Fertig, representing the Legislative Reference Bureau, was designated as counsel to the Commission. Just prior to Christmas, 1929, the Commission was saddened by the death of its chairman, Senator John E. Kunkle, and at its meeting in Pittsburgh, January 8, 1930, adopted resolutions of sorrow and sympathy, which were forwarded to his family. At the same meeting, Senator John J. McClure was elected to succeed Senator Kunkle as chairman.

### IV

#### MEETINGS OF COMMISSION AND PUBLIC HEARINGS

At a meeting held in Harrisburg on November 8, 1929, the Commission decided to hold three public hearings, the first in the Lower Merion Township Hall, Ardmore, on December 4, 1929, the second in the Chamber of Commerce Building, Pittsburgh, on January 8, 1930, and the third in the Senate Caucus Room at the State Capitol, Harrisburg, on February 5, 1930.

These meetings were thoroughly advertised through the press and by the mailing of letters from the secretary's office to the township officers of the various townships. The public meetings were well attended, and a number of citizens addressed the Commission, suggesting various changes in and additions to the township laws, and giving the Commission the benefit of much practical experience. Many of the suggestions offered at these meetings were finally incorporated in the drafts of legislation which are herewith submitted for the consideration of the General Assembly.

Members of the Commission, the secretary, and clerk attended the meetings of the State Association of Township Supervisors held at Scranton, February 11 and 12, 1930, and the State Association of Township Commissioners held at Allentown, March 17 and 18, 1930. At these conventions the views of the township officers were obtained and the plans

of the Commission outlined. The clerk to the Commission also attended and addressed forty-two conventions of County Associations of Township Supervisors and Auditors, outlining the work of the Commission. Many valuable suggestions were received from these sources.

Monthly meetings of the Commission in executive session were held, except during the months of July, August, September and October, 1930. At these meetings a careful revision of the township law was undertaken by sub-committees with the assistance of the staff of the Legislative Reference Bureau. Each section of law was read and thoroughly discussed, and such changes, additions and eliminations made as appeared advisable.

### V

#### SCOPE, PLAN, WORK AND RECOMMENDATIONS OF COMMISSION

To facilitate and expedite the work of the Commission in executive session, it was, on motion, decided to divide the Commission into two sub-committees, one to consider and draft a code of laws for townships of the first class, and the other to consider and draft a code of laws for townships of the second class. Such a procedure was necessitated since Section 1 of the Act of April 26, 1929, P. L. 842, which creates the Commission, requires it to consolidate the township laws into "A separate code for each class of townships." While this requirement increases the bulk of the township law, since many provisions are thus duplicated, nevertheless, it serves a useful purpose, and eliminates the necessity of ascertaining to which class or classes of townships a particular provision of the Code applies. This is one of the difficulties experienced in using the Township Code of 1917. The Commission is in hearty accord with the plan codifying separately the law for each class of municipalities.

During the early deliberations of the Commission, it was found necessary to adopt a definite policy with respect to the legislative field which the Commission intended to cover in the legislation to be drafted. The Commission construes the act creating it, as intending to charge it with the duty of revising and bringing to date substantially the law contained in the Code of 1917, and drawing and submitting such other bills on subjects not properly incorporated in the Code as are peculiar to townships. It concluded that it was not justified, under its powers to revise general laws which affect all classes of municipalities, such, for instance, as the law on municipal indebtedness, municipal and tax liens, assessment of property for taxation, collection of taxes, free non-sectarian libraries, etc. All of the municipal codes adopted to date have carefully eliminated these provisions on the theory that they comprehend subjects where uniformity in practice should be preserved among the several classes of municipalities. The same policy is followed in the drafts of legislation herewith submitted. The general municipal law is not disturbed.

A great number of suggestions received referred to the matter of tax assessments and collections. All sorts of ideas were advanced to correct the evils which admittedly exist in our present local tax system. But the Commission felt that it could not, under its powers and policy adopt any of these suggestions. The Commission, however, urges the General Assembly to take cognizance of the inequalities which now exist in the taxation of real property, and heartily favors the modernizing of the local tax laws and the adoption of sound business and administrative methods. The Commission calls attention to the fact that more than \$5,000,000 is expended annually for the collection of local taxes.

The Commission, in preparing its drafts, was not unmindful of the fact that there were fifty-eight townships of the first class in the Commonwealth prior to the 1930 census, most of which are suburbs of large cities in Philadelphia, Allegheny, Luzerne and Lackawanna Counties. Some of these townships have larger populations and area than many third class cities. Thus, an expansion of their corporate powers was deemed necessary to advance the cause of good government and municipal improvements, and to eliminate the restrictions which presently exist. These new powers were carefully framed and amply safeguarded. Practically all of them were taken from existing laws applying to other classes of municipalities.

One matter on which the Commission heard much testimony was the collection of the Liquid Fuels Tax from municipalities. Officials of municipalities feel that the collection of this tax is not justified and is contrary to the practice in other states.

The Commission is aware of the fact that no exemption is granted in the Liquid Fuels Tax Law because the constitutionality of such an exemption is feared. The Commission, however, is of the opinion that the courts of Pennsylvania will, when the matter is accurately presented, follow the theories developed by courts of other states and the United States Supreme Court, to the effect, that the constitutional clause requiring taxes to be uniform applies only to property taxes and not to excises. It, therefore, recommends that the Liquid Fuels Tax Law be amended so as to exempt from the tax liquid fuels purchased by municipalities.

In handling its detail work the Commission has had the constant assistance and services of the Legislative Reference Bureau. This Bureau gathered together, classified, and inserted into the Code of 1917 all legislation enacted since that date; and then prepared for the use of the Commission a code of existing law for each class of townships. With this as a foundation, the sub-committees commenced the work of revision, taking into consideration the suggestions which had been offered, and taking full advantage of the practical experience of the township commissioners and township supervisors who were members of the Commission.

A preliminary draft of the proposed codes was completed, printed in bulletin form and mailed to interested parties throughout the State. The public was generally invited to study the proposed Codes carefully and to submit any further suggestions to the secretary of the Commission not later than November 1, 1930.

At meetings of the Commission held November 18 and 19, 1930, the final revisions were completed and are now submitted to the General Assembly as a part of this report. Immediately following each of the township codes will be found an exposition showing the sources of the various provisions, with such explanatory notes as were deemed necessary to clarify the various sections for those interested. These notes, prepared by the Legislative Reference Bureau staff, will ultimately find their way into the digests of statutory laws where they will be preserved for the future.

## V

### ANNEXATION OF TERRITORY

The Commission has given much time and consideration to the question of the annexation of parts of townships to adjacent boroughs and cities. It realizes that the progress and development of boroughs and cities depends in large measure, upon the expansion of their territories by annexation. But the carving up of townships by annexation frequently leaves the remainder of a township with so low an assessed valuation that it is unable to raise sufficient revenue to carry on its affairs. The injustices resulting in such cases have been appreciated by the public school authorities, and amendments to the School Code vest power in the State Council of Education to preserve existing township school districts where municipal annexations are effected. In the end this system will bring into being conditions similar to those found with respect to local poor districts, where, in many localities, the territory of a poor district is found to overlap municipal and county lines. In the report of the Commission to codify and revise the laws relating to poor districts, submitted to the Legislature of 1925, the Commission says, that "It is frequently impossible, from a search of the laws, to definitely fix the status of many local poor districts or their exact territory. Possibly the worst confusion is caused by municipal incorporations and the annexations of territory. This brings about a changing of municipal lines while the lines of the poor district remain rigid. Thus, the territory of a city or borough, due to its recent incorporation or growth, is found to lie partly in several poor districts." This was one of the evils which the Poor Law Commission attempted to remedy, and was also one of the evils which brought about the enactment of the School Code of 1911, which made municipal and school district lines coextensive.

Since the law governing such annexations is found in the codes relating to boroughs and cities, the Commission is of the opinion that it has no jurisdiction to draw any legislation on the subject, but it respectfully calls the matter to the attention of the General Assembly as one needing correction, and recommends appropriate action.

## VII

### TOWNSHIP REWARD

The reward system for roads in townships of the second class was inserted into the Township Code of 1917 by way of

amendment. The most divergent opinions were registered with respect to this subject. The Commission finally concluded to reframe this law and submit its draft of legislation in the form of a separate bill. The contents of the bill and the changes from the existing system are set forth in the summaries of legislation (Division XI) in a later part of the report. The Commission believes this law is not properly a part of the Township Code, but belongs rather with the laws under which the highway system of the Commonwealth is being developed and improved. Furthermore, the subject is such a debatable one that the inclusion of it in a code might endanger the passage of other needed legislation. The proposals submitted for a township reward system, are, in the opinion of the Commission, sound.

## VIII

### SUMMARY OF IMPORTANT CHANGES PROPOSED IN CODES SUBMITTED

The important changes proposed in the law for townships of the first and second class are numerous, and to facilitate the work of the Legislature in the consideration of the codes, these changes have been summarized in the material which follows. The summary is divided into three parts: first, the changes proposed in the law relating to townships of the first class (Division IX); second, the changes proposed in the law relating to townships of the second class (Division X); and third, an exposition of the proposed Township Reward Law (Division XI).

## IX

### TOWNSHIP OF THE FIRST CLASS

#### Classification of Townships

Existing laws provide that when a township of the second class has a population of at least three hundred inhabitants to the square mile, such township becomes automatically a township of the first class. Consequently, all townships now having this population are designated townships of the first class, and all other townships of the second class.

It is recommended that this method of changing classes be discontinued, and that when a township of the second class has the required population, it shall not become a first class township until the electors have voted for the change.

The present arbitrary system frequently forces a township into the first class when it could be best administered as a second class township. The instant a township goes into the first class it loses all township reward assistance from the Commonwealth.

#### Creation of Townships of the First Class

When townships of the second class reach a population of three hundred inhabitants to the square mile, as ascertained by the United States census or by a special enumeration, the question of becoming a township of the first class is to be submitted to the electors and the change of class is to be governed by their decision. So also the creation of a first class township may be effected by the division of an existing township or by the consolidation of two or more townships, but only when the electors affected by the division or consolidation have voted for the change.

When a township of the first class is created, the township government is organized on the first Monday of January next, by appointed officers who hold office until officers can be elected at the first municipal election.

#### Officers

The minimum number of township commissioners in townships not divided into wards and in townships having less than seven wards was increased from five to seven.

A procedure has been provided to remove township commissioners who refuse to organize.

The compensation of township commissioners was graduated according to population, as follows: less than five thousand, one hundred dollars (\$100); five thousand to twenty-five thousand, two hundred dollars (\$200); above twenty-five thousand, three hundred dollars (\$300).

Specific powers have been conferred to appoint a solicitor and township engineer with such powers as are usually conferred on such officers of municipalities.

Difficulty has been experienced in securing bonds for the treasurer as tax collector in some first class townships, because

the amount required is the face value of the duplicate. This has been reduced to fifty per centum of the duplicate. It is felt that this amount will amply protect the township.

The present compensation of the township treasurer is five per centum of all taxes collected and one per centum of all other moneys, unless a lower rate is fixed by the board of commissioners. The commissioners thus have full power to regulate this compensation, and in some of the townships the commissioners have been materially scaled down. Additional power has been conferred to fix an annual compensation for all services in lieu of a percentage, and a limit of ten thousand dollars (\$10,000) has been imposed which may not be exceeded.

The treasurer will hereafter be required to promptly deposit all moneys of the township in the name of the township and the commissioners are required to name depositories of township funds and require them to give security. This relieves the treasurer and his bond in case of a bank failure.

In connection with the establishment of the office of township engineer, provision was made for the establishment of a deed registry, similar to the kind used in third class cities. This system is not mandatory, but will be of great assistance to assessors wherever established.

The office of township auditor is abolished and in his stead the court of common pleas is required, annually, to appoint a certified public accountant to audit the books of the township, unless the office of controller has been established. Additional power is conferred on the certified public accountant, acting as auditor, to enter any surcharge as a judgment and proceed to its collection for the benefit of the township. Instead of having such an auditor, a township is empowered to create the office of controller.

More specific provisions have been incorporated with regard to the organization, control and regulation of the police force.

#### Corporate Powers

The corporate powers have been materially amplified. Among the new powers conferred are those relating to the creation of offices, positions and departments necessary to administer the affairs of the township; the employment of the assessor and assistant assessors when not engaged on the county assessment; the licensing of shows, circuses, sports, and amusements; the abatement of nuisances; prohibiting manufacture and sale of inflammable and explosive substances; regulating party walls and partition fences; making fire regulations and abating fire hazards; regulating markets and market houses; regulating and licensing junk dealers, pawnbrokers, hucksters, peddlers, vendors, auctions and auctioneers; inspecting milk; numbering buildings; enacting smoke regulations; regulating disorderly conduct; authorizing the insuring of any public liability of the township; making of contracts of group insurance; and erecting comfort and waiting stations and drinking fountains.

#### Board of Health

The law providing for the organization and administration of boards of health have been made a part of the Code.

#### Finance and Taxation

Power has been conferred to make temporary loans not exceeding one year in anticipation of taxes levied and to be collected during the current year.

The township commissioners are required to keep records of sinking fund moneys, and make investments only in State, Federal and their own bonds. The law was restored requiring that when benefits for an improvement are collected, they must be credited to the sinking fund for the retirement of obligations issued for such improvement.

The present law, requiring unanimous action of the board of township commissioners to present a petition to court for an increase in the annual tax levy, was changed so as to require only a majority action, and specific power was conferred to levy a separate tax for interest and sinking fund requirements.

Due to the penalties imposed by Act No. 541 of the Session of 1929, the penalties on township taxes, which were one per centum per month after a fixed date, were limited to the year in which the taxes were levied.

Specific authority was granted to make exonerations of occupation taxes.

#### Contracts

The various general provisions relating to contracts, entered into by townships, having been gathered into one article.

Publications for bids were reduced from three to two weeks. Provision was made exempting from the contractual provisions the purchase of patented articles.

The Act of April 20, 1927, P. L. 350, which prohibits architects and engineers employed by a township from bidding on or being interested in public work generally, has been restricted so as to apply only to public work in the township. The Commission sees no reason why a consulting architect or engineer, by reason of his employment by a township, should be prohibited from bidding on public work where the township has no interest. Similar prohibitions have been extended against township officers and employees.

#### Eminent Domain and the Assessment of Damages and Benefits

The entire law relating to the procedure for the exercise of the right of eminent domain and the assessment of damages and benefits by viewers' proceedings has been revised, and a consolidated procedure modeled on provisions in the borough law has been included. This will materially lessen the bulk of the law and at the same time produce clarity and uniformity in all proceedings of this nature.

#### Roads, Streets and Highways

The laws relating to the improvement of highways are numerous and complicated. Many different systems have been enacted to accomplish the same purpose. To obviate this condition two simple systems have been drafted, one for improvements where the cost of the improvement is assessed against abutting property owners by viewers according to benefits, and the other where the improvement is with or without petition and where the cost of the improvement or part thereof is assessed by the foot-front rule. In both cases the drafts have been modeled on the borough law. Specific provisions have been included for the paving of additional widths, where a defined width is paved by the State or county as a State or State-aid highway or county road.

The proceedings for the laying-out and opening of roads leading to driving parks, fair grounds, etc., have been eliminated as applying to special cases and of no general interest.

Separate proceedings for the grading and construction of curbs and gutters on roads leading to or connecting cities, boroughs, villages and places of public resort, and for the construction of additional widths where the county paves a road, have also been eliminated as covered by the board powers conferred for the improvement of roads and streets.

Provisions relating to ditches, drains and watercourses and private interferences therewith have been re-written and the township consent for such purposes required.

#### Sidewalks

The entire law on this subject has been re-written and power conferred to require abutting owners to construct and keep sidewalks in repair or to have the township do the same and collect the cost. Provisions have also been included to have the townships build sidewalks without requiring the owners to do so.

#### Sewers

No material change has been made in the law relating to sewers, but the provisions have been simplified by eliminating the many sections relating to eminent domain proceedings.

#### Collection by Installment of the Cost of Street Curb, Sewer and Sidewalk Improvements

An article has been incorporated authorizing townships of the first class to collect assessments against property owners for street, curb, sewer and sidewalk improvements by the installment plan. Cities and boroughs have laws on this subject.

#### Revolving Fund for Street and Sewer Improvements

Power is conferred to levy and collect a special tax not to exceed five mills for the purpose of creating a revolving fund to be used by the township in making permanent street, sidewalk and sewer improvements. Assessments against property owners are paid into this fund to reimburse it for expenditures made in paying for an improvement. Similar laws apply in cities and boroughs.

#### Township Planning

An article has been inserted authorizing the creation of a township planning commission. The proposed law is similar to that applying to cities of the third class.

#### Actions By and Against Townships

The law in the existing Township Code, relative to the enforcement of judgments against townships, was eliminated. It

provided a special procedure in such cases different from that in the case of other municipalities, and has been held unconstitutional.

#### Penalties

Practically all of the penalties in the code have been reduced to summary convictions, and the fines directed to be paid to the township treasurer.

#### X

### TOWNSHIPS OF THE SECOND CLASS

#### Classification of Townships

Existing laws provide that when a township of the second class has a population of at least three hundred inhabitants to the square mile as shown by the United States census or by a special enumeration, such township shall become automatically a township of the first class. Consequently all townships having this population are designated townships of the first class, and all others as townships of the second class.

The recommendations is made, in the Code submitted, that this population basis be retained, but that no township with the required population be created a first class township until a majority of the electors vote for a change of classes. The present arbitrary system frequently forces a township into the first class system when it could be best administered as a second class township. The instant a township goes into the first class it loses all township reward assistance from the Commonwealth.

#### Creation of Townships

A uniform procedure has been established for the creation of townships of the second class (a) out of parts of two or more townships, (b) by the division of a township, or (c) by the consolidation of townships. In no case may a township be thus created until the electors in the territory affected have voted favorably on the question of such creation. Likewise by a vote of the electors a township of the first class may be reestablished as a township of the second class, notwithstanding the fact that it has a population of three hundred inhabitants to the square mile. This will enable existing first class townships to return to the second class. Where a township of the first class loses its required population, it automatically returns to the second class.

#### Officers

The secretary and treasurer are required to be the same individual, except where a bank is elected treasurer. In such cases an individual treasurer may be elected.

Two or more townships may join and appoint the same person as township superintendent of roads.

No supervisor acting as superintendent or roadmaster may receive compensation for any day when he is paid for attending supervisors' meetings, unless the meeting is during the evening.

Provision has been made for the prompt deposit of moneys by the township treasurer, in the name of the township, and supervisors have been empowered to appoint banks as depositories of township funds. This provision is, however, not mandatory.

Specific authority has been conferred upon supervisors to appoint a solicitor and an engineer.

Provision has been made for the entry of surcharges by auditors as judgment and for their collection by auditors and taxpayers.

Optional provisions for the postponing of the reports of township auditors, instead of advertising in newspapers, have been incorporated.

#### Fiscal Year

The fiscal year for townships of the second class has been changed from the first Monday of December to the first Monday of January to accord with the fiscal year of other municipalities. The terms of all officers will hereafter begin on the first Monday of January instead of December, except in the case of those first elected where an extra month has been added to the term to cover the gap created by this change.

#### State and County Associations

Township auditors have been eliminated as members of the county association of township supervisors, and the officers of the State association of township supervisors were made ex-officio members of each county association without vote.

The compensation of delegates for attending meetings of State associations was increased from four dollars to six dollars per day.

#### Corporate Powers

Power is conferred on supervisors to purchase, hold, lease, let, and convey such real and personal estate as the purposes of the township shall require.

Specific authority was conferred to expend moneys for workmen's insurance, and to insure any property as well as any public liability of the township, and to take contracts of group insurance.

Power was conferred to purchase or take, by gift, forest lands for recreational purposes, to appropriate moneys to neighboring municipalities and townships for fire protection, and generally to control nuisances.

It was felt that the general corporate powers usually exercised by municipalities could not be conferred since supervisors do not have power to pass ordinances, and so such power was conferred.

#### Contracts

At present all contracts let by townships, involving an expenditure of more than one hundred dollars, must be by contract. This amount was increased to three hundred dollars, and a provision was added making it unlawful to evade these contract provisions by splitting contracts. Road and bridge contracts are not valid until approved by the Department of Highways. A record of all purchases, involving less than three hundred dollars, must be kept and furnished by supervisors in their annual report.

The Act of April 20, 1927, P. L. 350, so far as it relates to townships of the second class, was limited so that it only prohibits architects and engineers, employed by a township, from bidding on or being interested in public work in the township. The Commission sees no reason why a consulting architect or engineer, by reason of his employment by a township, should be prohibited from bidding on public work where the township has no interest.

#### Taxation and Finance

In the budget provisions, power was conferred on supervisors to transfer, by resolution, unexpended moneys from one appropriation item to another. This is a power exercised by other municipalities, and is most important in townships of the second class where the township is uncertain whether reward moneys will be allocated to it by the Commonwealth.

Specific provision requires the tax levy to be made by resolution.

The tax collector is required to settle each annual duplicate not later than the first day of July of the succeeding year. In such settlement he is allowed a credit for all returned taxes, for those which have been liened and those exonerated. Specific provision is made for the exoneration of uncollectible occupation taxes.

The duplicate is required to issue on or before May first instead of June first.

#### Eminent Domain and the Assessment of Damages and Benefits

A uniform procedure for the exercise of eminent domain and the assessment of damages and benefits in all proceedings where the same is required has been drafted, using the law for boroughs as a model. The numerous procedures of this kind found in various portions of the existing code, and attached to specific subjects and powers, have been eliminated. The law in this respect has been greatly simplified.

#### Roads, Streets and Highways

Many records of the original laying-out or dedication of public roads are missing. In some instances public roads were no doubt established by use, without any formal proceeding. To cure this situation a new section has been drafted providing that every road not of record, which has been used for public travel and maintained for a period of at least twenty-one years, shall be deemed a public road of the width of thirty-three feet, notwithstanding there is no public record of the laying-out or dedication of such road. This will validate township expenditures on such roads.

Specific provision has been made for the vacation of abandoned portions of State highways not vacated by the Department of Highways. In such cases the consent of the property owners must be secured and a record of the vacation filed with the court of quarter sessions.

The procedure for the laying-out and opening of roads leading to driving parks, fair grounds, etc., has been eliminated as having been passed for a specific case.

The system of having the Department of Highways grant permits for road crossing of various kinds, has been changed by conferring this power on the supervisors. The cost, which may be imposed by the township, includes the reasonable cost of issuing the permit, the cost of restoring the road and inspecting the work.

The provisions for the vacation of lanes and alleys, declared nuisances by boards of health, have been eliminated since townships of the second class have no such boards.

The township reward system has been entirely omitted in the code, and a separate bill, materially altering the system, is submitted. This bill is elsewhere discussed.

#### Bridges

The penalties for driving over wooden or iron bridges of a span of forty-five feet, faster than a walk, or carrying fire over the same, except in a lantern, and the provisions requiring supervisors to post notice of such penalties, have been eliminated as practically obsolete.

#### Contracts with Railways

The provisions in the Code of 1917, authorizing supervisors to contract with railroad companies, relative to the relocation, change and elevation of railroad beds, has been eliminated because jurisdiction in such matters is now conferred on the Public Service Commission by the Public Service Company Law.

#### Public Buildings

In the erection of a town hall, supervisors were authorized to make provision in any building for community activities.

#### Transient Retail Merchants

The law relating to the licensing of transient retail merchants was changed so as to confer the power of licensure on the supervisors and to pay the license fee to the township. The law was not quite clear as it provided for the granting of the license by "proper authority" and the payment of the license to the county treasurer for the benefit of the school district.

#### Forestry

Provisions similar to those in the law for other classes of municipalities authorizing townships to engage in forest activities were added.

#### Actions By and Against Townships

The law in the existing Township Code, relative to the enforcement of judgments against townships was eliminated. It provided a special procedure in such cases different from that in the case of other municipalities, and has been held unconstitutional as special legislation.

#### Penalties

Practically all of the penalties in the code have been reduced to summary convictions, and the fines and penalties directed to be paid to the township treasurer.

### XI

#### TOWNSHIP REWARD

A separate bill, establishing a township reward system, is submitted to take the place of the existing system. Under present laws applications for township reward do not lapse after they are filed. Since appropriations have been insufficient to take care of the applications filed, the unfilled applications have been steadily growing in number. The bill submitted proposes that the appropriation for the biennium 1931-33 for township reward, shall be applied to applications on file on September 30, 1930, and not to any new ones filed. It is thought that in this manner the Department of Highways will be enabled to take care of most of these applications, some of which were filed as early as 1926. All applications filed in the future, which remain unfilled, must be reaffirmed each biennium, otherwise they will be deemed to have lapsed.

Provision has been made for the establishment, by county commissioners and supervisors, of a primary township road system in each county. No system is deemed established until approved by the Department of Highways. When such a system is established, reward moneys may be expended only on the primary system, except where used for bridges and pipe.

Provision is made for partial payment of reward where the amount of the reward is more than two thousand dollars. In the case of traffic bound roads, the reward is spread over three annual payments.

The limitations on the amount which the Commonwealth contributed towards the cost of a reward improvement have been eliminated and the Commonwealth is required to pay a definite percentage of the actual cost, the percentage varying according to the assessed valuation per mile of road. The percentages adopted are fifty, sixty and seventy-five for townships having valuations of more than thirty thousand dollars (\$30,000); twenty thousand dollars (\$20,000) to thirty thousand dollars (\$30,000); or less than twenty thousand dollars (\$20,000).

The amount of the Commonwealth's share of the maintenance of reward roads, which now is one hundred dollars per mile, was changed by taking into consideration the assessed valuation per mile of road. Generally, the amount of maintenance recommended varies between one hundred dollars (\$100) or one hundred and fifty dollars (\$150) per mile, except in the case of bituminous surface treatment where the amount is increased to four hundred dollars (\$400) and six hundred dollars (\$600) respectively, per mile. The maintenance aid is to be distributed on the same percentage basis as shown above, but retains the dollar limit.

An amendment is recommended to the Act of May 1, 1929, P. L. 1046, which appropriates the moneys in the Motor License Fund, requiring the Department of Highways to set aside annually twenty-five thousand dollars (\$25,000) for the restoration and repair of roads and bridges in emergency cases, to be expended on the township reward plan.

#### In Conclusion

The Commission desires to record its appreciation of the assistance which it has received, not only from public officials, but also from private citizens. Particular acknowledgement is made for the valuable assistance of the Legislative Reference Bureau staff. The services afforded by this Bureau, and the detail work performed by it, made possible this complete report.

Respectfully Submitted,

(c) Highway, the Centre Line of Which Is the Dividing Line Between Townships and Boroughs or Cities in the Same County, ..	2110		

Section 1. Be it enacted by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, and it is hereby enacted by the authority of the same, That the laws relating to townships of the firstclass are hereby amended, revised, consolidated and changed as follows:

## ARTICLE I

## PRELIMINARY PROVISIONS

Section 101. Short Title. This act shall be known, and may be cited, as "The First Class Township Law." This act shall take effect on the first day of July, one thousand nine hundred and thirty-one.

Section 102. Definition. The word "township" or "townships" as used in this act shall mean a township of the first class unless the context indicates otherwise.

Section 103. Excluded Provisions. This act does not include any provisions, and shall not be construed to repeal any acts relating to—

(a) The procedure for the collection of municipal and tax claims by liens.

(b) The method of incurring or increasing bonded indebtedness.

(c) Election officers and the general conduct of elections.

(d) Poor districts.

(e) Public schools and school districts.

(f) Constables.

(g) Justices of the peace.

(h) State roads, State-aid roads, and private roads.

(i) Validation of elections, bonds, ordinances, and acts of corporate officers.

(j) Free non-sectarian libraries.

Section 104. Saving Clauses. The provisions of this act so far as they are the same as those of existing laws are intended as a continuation of such laws and not as new enactments. The repeal by this act of any act of Assembly or part thereof shall not revive any act or part thereof heretofore repealed or superseded, nor affect the existence or class of any township heretofore created. The provisions of this act shall not affect any act done, liability incurred, or right accrued or vested, or affect any suit or prosecution, pending or to be instituted, to enforce any right or penalty or punish any offense under the authority of such repealed laws. All ordinances, regulations, and rules, made pursuant to any act of Assembly, repealed by this act, shall continue with the same force and effect as if such act had not been repealed. Any person holding office under any act of Assembly, repealed by this act, shall continue to hold such office until the expiration of the term thereof, subject to the conditions attached to such office prior to the passage of this act.

Section 105. Constitutional Construction. The provisions of this act shall be severable, and if any of the provisions shall be held to be unconstitutional such decision shall not affect the validity of any of the remaining provisions of this act. It is hereby declared as the legislative intent that this act would have been adopted had such unconstitutional provision not been included therein.

Section 106. Construction of References. Whenever, in this act, reference is made to any act by title, such reference shall also apply to and include any codification wherein the provisions of the act referred to are substantially reenacted.

Section 107. How Act Applies. This act shall apply to all townships of the first class within the Commonwealth, as now existing or hereinafter created.

Section 108. Saving Clauses Where Class of Townships Changed. Whenever any township of the second class is designated a township of the first class, or whenever any township of the first class is reestablished as a township of the second class, or whenever any township is divided, all liabilities incurred, rights accrued, or vested, obligations issued or contracted, and all suits and prosecutions pending or to be instituted to enforce any right or penalty accrued, or punish any offense committed, prior to such change of class or division, and all ordinances, resolutions, rules and regulations shall continue with the same force and effect as if no such change or division had been made.

Section 109. Exception as to Taxation. This act does not provide a complete system for the assessment and collection of township taxes, but the taxation provisions herein contained shall be construed as supplementary to the general local taxation laws. All acts and parts of acts relating to taxation in townships of the first class, not inconsistent with this act, in force prior to the passage of this act, which are not reenacted or specifically repealed by this act, shall remain in force

as to such townships in the same manner as prior to the passage of this act.

## ARTICLE II

## CLASSIFICATION AND CREATION OF TOWNSHIPS OF THE FIRST CLASS

## (a) Classification

Section 201. The townships now in existence and those to be hereafter created are divided into two classes. Townships of the first class shall be those having a population of at least three hundred inhabitants to the square mile, which have been heretofore or may hereafter be created townships of the first class. All townships, not townships of the first class, shall be townships of the second class. A change from one class to the other shall hereafter be made only as provided by this act or the laws relating to townships of the second class.

## (b) Creation of Townships of the First Class from Townships of the Second Class

Section 205. Enrollment of Ascertain Population. At any time not less than one year before the time fixed for taking a decennial census of the United States, whenever the owners of twenty-five per centum of the assessed valuation of the real estate of any township of the second class shall present their petition to the court of quarter sessions, averring that the population of the township is at least three hundred inhabitants to the square mile, and shall give such security as the court may prescribe for the payment of all costs and expenses which may be incurred in any procedure had upon said petition, the court shall appoint a commissioner to perform the duties hereafter prescribed.

The said commissioner shall make an enrollment of the inhabitants of such township, and make report thereof to the court at the next ensuing term. Upon the filing of the report the same shall be confirmed nisi, which confirmation shall become absolute, unless excepted to within thirty days thereafter, during which time notice of the said filing and confirmation shall be advertised in a newspaper published in the county, once a week for three weeks. If exceptions are filed to the report within the said thirty days, the court, upon consideration thereof, shall confirm the report or modify the said finding. After final confirmation the clerk of the court shall certify to the county commissioners and to the township supervisors of the township, the population of the township, as shown by said proceedings. The costs and expenses of the proceedings, including a reasonable fee for the commissioner and attorney, shall be paid by the petitioners or by the township, or partly by each, as the court shall direct.

Section 206. Proclamations by County Commissioners. In addition to the procedure provided in the preceding section, the county commissioners of each county shall, following each decennial census of the United States, ascertain from such census whether any township of the second class in the county has a population of three hundred inhabitants to the square mile, and shall immediately certify the fact that any township has a population of three hundred inhabitants to the square mile to the township supervisors of the township.

Section 207. Submission of Question to Voters. At the first general or municipal election occurring at least ninety days after the ascertainment, by special enrollment or from the United State census, that any township of the second class has a population of at least three hundred inhabitants to the square mile, the question whether such township of the second class shall become a township of the first class shall be submitted to the voters of the township, and the county commissioners shall cause to be printed on separate ballots to be used in such township at such election, a proper question framed in accordance with the election laws of the Commonwealth.

Section 208. Returns of Election and Effect Thereof. The election officers shall compute the votes cast at the election, provided for in the preceding section and make return thereof to the clerk of the court of quarter sessions, who shall tabulate the same and certify the result thereof to the county commissioners and the township supervisors of such township. If a majority of the votes cast at any such election shall be in favor of becoming a township of the first class, the government of the township of the first class shall be organized and become operative on the first Monday of January next suc-

ceeding such election, at which time the terms of the officers of the township of the second class shall cease and terminate. If a majority of the votes cast at any such election shall be in favor of remaining a township of the second class no further proceedings shall be had for a period of two years, after which period the supervisors, by unanimous action may, or upon petition of ten per centum of the registered voters of the township shall resubmit the question to the electors of the township in the manner hereinbefore provided.

(c) Creation of Townships of the First Class by Division and Consolidation

Section 210. Manner in Which Townships of the First Class May be Created. The court of quarter sessions may, upon the presentation of petitions, as hereinafter provided, create new townships of the first class—

(a) By the division of a township of the first class into two townships, or

(b) By the consolidation of two or more townships of the first class located in the same county.

Section 211. Petitions. Petitions for the creation of townships as provided in the preceding section, shall be signed either (a) by the owners of real property representing at least twenty-five per centum of the assessed valuation of the township or each of the townships affected by such division or consolidation, as the case may be, or (b) by registered voters, equal in number to at least twenty-five per centum of the highest total vote cast for candidates for any office in the township or townships affected as the case may be at the last preceding municipal election. Such petitions shall be sworn to and subscribed by at least three of the signers. (c) Petitions for the consolidation of townships may also be presented when signed by a majority of the commissioners of each of the townships proposed to be consolidated and sworn to and subscribed by at least one commissioner from each such township. Such petitions shall set forth the name of any proposed new township and shall specify the reasons for such division or consolidation. Each such petition shall be accompanied by an accurate map or plot prepared by an engineer showing the lines of any township and the division line in case where a township is divided, or the lines of the new township where two or more townships are to be consolidated, and the present division lines between such townships. Where natural marks are on such lines, they shall also be shown.

Section 212. Confirmation Nisi of Petition. Notice of Filing. Upon the presentation of any such petition, the same shall be confirmed nisi, and the court shall, by its order, require such notice to be given by the petitioners to the residents and commissioners of the townships affected as it deems proper.

Section 213. Exception. Confirmation Absolute of Petition. Within thirty days after the filing of such petition, any taxpayer of the township or townships affected, as the case may be, may file exceptions to such petitions, questioning the sufficiency of the number of signers, or the legality of any signatures, or the accuracy or sufficiency of the map or plot attached thereto. The court, upon the filing of any exceptions, shall fix a day for hearing of which such notice shall be given as the court may direct. At such hearing the court shall hear all parties interested and their witnesses. If the exceptions in the opinion of the court are sustained, and the court deems the petition not amendable, it shall dismiss the petition, otherwise it shall confirm the same absolutely, after any amendments permitted by the court have been made.

Section 214. Elections. When any petition is confirmed absolutely, the court shall order an election to be held on the question of the division or consolidation of such township or townships, which shall be held on the day of the next general or municipal election occurring at least sixty days after such order of court. Such election shall be held at the regular polling places in the township or townships affected, as the case may be. At any such election all of the qualified electors of the township or townships affected by such division or consolidation shall have the right to vote. The ballots at any such election shall be furnished by the county commissioners, and the question to be placed thereon shall be framed and printed on the ballots as provided by the election laws of the Commonwealth.

Section 215. Notice of Election. A constable of the township or townships affected, as the case may be, or if there be no constable, then one of the commissioners designated by the court, shall give at least fifteen days' notice of the time and

place of holding such election by posting not less than six written or printed handbills in public places in each of such townships. The notice of election shall contain the reasons for the division or consolidation of such township or townships as set forth in the petition presented to the court.

Section 216. Return of Election. Decree. The election officers, after the polls have been closed, shall count the ballots and certify the number of votes cast for and against such division or consolidation to the clerk of the court of quarter sessions, who shall tabulate and compute the same and lay the result before the court. If it shall appear that a majority of the votes cast in such township or in each of the townships affected are in favor of the division of a township or the consolidation of two or more townships, as the case may be, the court shall order and decree the new township agreeably to the name and lines set forth in the petition, and the government of the new township shall be organized and become effective on the first Monday of January next succeeding such election, at which time the terms of office of township officers in such township shall cease and terminate. If a majority of the votes cast in any such township or in any of the townships affected are against the division or consolidation of such township or townships, no further action shall be had upon said proceedings. No new proceeding shall be entertained by the court for a period of two years.

Section 217. Boundary Monuments. The court shall, when deemed necessary, cause the lines at intervals not exceeding fifteen hundred feet, the cost thereof to be paid by the new township.

Section 218. Classification of Old and New Townships. Townships created by the consolidation or division of townships as herein provided shall be and remain townships of the first class, unless and until by subsequent proceedings in accordance with laws relating to townships of the second class any such township shall be reestablished or proclaimed to be a township of the second class.

Section 219. Costs. When a township of the first class is created as hereinbefore provided, the costs of the proceedings shall be paid by such township, and where any petition is dismissed or a majority of the electors of any one or more townships shall vote against the division or consolidation of any such township, the costs of the proceedings shall be paid by the petitioners.

Section 220. Property Rights and Liabilities Where Townships Consolidated. After the consolidation of two or more townships, the rights, privileges and franchises of each of the townships and all property, real, personal and mixed, and all debts due on whatever account, and other things in action belonging to each of such townships, shall be vested in the new township. The title to real estate vested in either of such townships shall not revert or be in any way impaired by reason of such consolidation. All rights of creditors or liens shall be preserved, and all debts and liabilities of either of such townships shall attach to such new township and be in force against it.

Section 221. Adjustment of Indebtedness When Township Divided. (a) Where a township is divided, the commissioners of the new township and of the existing township affected, shall make a just and proper adjustment and apportionment of all property, both real and personal, including funds and taxes, as well as indebtedness, if any, to and between the new township and the old township. In making such adjustment and apportionment of the property and indebtedness, the old and the new township shall be entitled respectively to share in a division of the property, indebtedness, funds and taxes in the proportion that the assessed valuation of the real estate remaining in the township bears to the assessed valuation of the land in the new township, taken from such township. The adjustment and apportionment, if made shall be reduced to writing and duly executed and acknowledged by the commissioners of the townships affected, and shall be filed in the office of the clerk of the court of quarter sessions of the county.

(b) In case the commissioners of such townships cannot make such amicable apportionment and adjustment of real property and indebtedness within six months after the election for the creation of such new township then any one or more commissioners of either of the townships affected may present a petition to the court of quarter sessions of the county, setting forth the facts. Whereupon, the court shall appoint three disinterested commissioners, taxables of the county, but

not residing in either of the townships affected, who shall give due notice to the commissioner of the townships affected, and shall hold hearings and make a report to the court, making an apportionment and adjustment of all the property, funds, and taxes, as well as indebtedness to and between the new township and the existing township, stating the amount of indebtedness that shall be assumed by the new township and the existing township.

(c) The commissioners shall give at least five days' notice of the filing of their report to the commissioner of the townships affected. Unless exceptions are filed thereto within thirty days by either township, the same shall be confirmed by the court absolutely.

(d) Any sum awarded by the report to a township shall be a legal and valid claim in its favor against the other township, charged therewith. Any property, real or personal, given and adjudged to any township, shall be the property of the township to which it is given and adjudged.

(e) The commissioners shall be allowed ten dollars for each day actually spent by them in the performance of their duties, together with their actual necessary expenses. All costs and expenses of such petitioning shall be apportioned by the court, to and between the townships affected as it shall deem proper.

(f) In case exceptions are filed to the report of such commissioners, the court shall dispose of the same, taking testimony if deemed advisable, and the decision of the court thereon shall be final and binding on the townships unless an appeal is taken within thirty days to the Superior or Supreme Court as in other cases.

#### (d) Officers of Newly Created Townships

Section 225. Officers for New Townships. Whenever a new township of the first class shall be created in accordance with any of the procedures in this article, the court of quarter sessions shall appoint seven commissioners and the other elective officers to which the township is entitled and fix the polling place or places in such township. The officers so appointed shall hold their offices from the first Monday of January following the election creating such township, until the first Monday of January following the municipal election at which officers of the township are elected as hereinafter provided.

Section 226. Election of Commissioners in New Townships. At the first municipal election, following the creation of a township as hereinbefore provided, if such township has not been divided into wards, there shall be elected seven township commissioners at large. Four of such commissioners shall be elected for terms of four years each and three for terms of two years each from the first Monday of January next following such election. The ballots at such election shall designate the term for which each commissioner is elected. Their successors shall be elected for terms of four years in accordance with this act.

Section 227. Election of Treasurer in New Townships. At such municipal election, the qualified electors of such township shall elect a township treasurer for a two or four year term so that his term shall expire at the same time as the terms of treasurers of other townships of the first class under the provisions of this act. Thereafter the term of treasurer of said township shall be four years from the first Monday of January next following his election.

Section 228. Election of Township Assessor and Assistant Township Assessor in New Townships. At such municipal election, one township assessor shall be elected for a term of four years and one assistant township assessor for a term of two years. Thereafter the terms of such township assessor and assistant township assessor shall be four years from the first Monday of January succeeding their respective elections. This section shall not apply to townships in counties having county boards for the assessment and revision of taxes.

This section shall not apply to townships in counties having county boards for the assessment and revision of taxes where assessors under existing laws are appointed.

Section 229. Election of Assistant Triennial Assessors in New Townships. At such municipal election, the qualified electors of such township shall elect two citizens, resident in said township, to be assistant triennial assessors for terms of four years each from the first Monday of January next following such election. This section shall not apply to townships in counties having county boards for the assessment and revision of taxes.

This section shall not apply to townships in counties having county boards for the assessment and revision of taxes where assessors under existing laws are appointed.

#### (e) Certificate of Creation of Townships to be Furnished State Departments

Section 235. Whenever a township of the first class is created, the clerk of the court shall certify such creation to the Secretary of Internal Affairs and Secretary of Highways of the Commonwealth. The clerk of the court shall be allowed a fee of two dollars for his services, to be paid as part of the costs of the proceedings.

### ARTICLE III

#### TOWNSHIP LINES AND BOUNDARIES

Section 301. Center Line of Navigable Stream as Boundary. Whenever any township is bounded by the nearest margin of any navigable stream, and the opposite township, borough, or city, as the case may be, is also bounded by the nearest margin of the same stream, the middle of such stream shall be the boundary between such townships, or township and borough or city. Nothing contained in this section shall be construed to repeal any local or special law providing to the contrary.

Section 302. Petition to Alter or Ascertain Township Lines and Boundaries. The courts of quarter sessions may, upon the presentation of a petition, (a) alter the lines of two or more adjoining townships so as to suit the convenience of the inhabitants thereof; (b) cause the lines or boundaries of townships to be ascertained and established; and (c) ascertain and establish disputed lines and boundaries between two or more townships or between townships and cities or boroughs. When any such petition is presented the court may require the petitioners to file a bond in a sufficient sum to secure the payment of all costs of the proceeding.

Section 303. Appointment and Report of Commissioners. Upon application by petition to the court for any of the purposes set forth in the last preceding section, the court shall appoint three impartial citizens, one of whom shall be a registered civil engineer, to inquire into the prayer of the petition. After having given notice to parties interested as directed by the court, the commissioners shall hold a hearing and view the said lines or boundaries; and they, or any two of them, shall prepare a report together with their opinion of the same and accompany it with a plot or draft of the lines and boundaries proposed to be altered or ascertained and established if the same cannot be fully designated by natural lines or boundaries. Upon the filing of any such report, the same shall be confirmed nisi.

Section 304. Exceptions and Procedure. Exceptions to any such report may be filed by any person interested within thirty days after the filing of the report, and the court may thereupon fix a day for the hearing of such exceptions, of which hearing such notice shall be given as the court shall direct. After hearing, the court shall have power to sustain such exceptions or to dismiss them and confirm the report, or refer the report back to the same or new commissioners with like authority to make another report, on which like legal proceedings may be had. Where no exceptions are filed within thirty days after the filing of the report, the court shall confirm the same absolutely. When any report is confirmed absolutely, the court shall enter a decree altering or ascertaining and establishing the lines and boundaries as shown in said report.

Section 305. Monuments. Whenever such township line or boundary is altered or ascertained and established, the court shall cause the same to be marked with stone monuments placed at intervals not exceeding fifteen hundred feet.

Section 306. Pay of Commissioners, Civil Engineer, and Chain-carriers. Costs. The pay of commissioners appointed to alter or ascertain and establish township lines, shall be ten dollars; the pay of civil engineers shall be twenty dollars; and the pay of chain-carriers shall be five dollars for each day necessarily employed, and five cents per mile for each mile necessarily traveled in the discharge of their duties. The court shall by its order provide how the costs and expenses of any such proceeding, including the furnishing and placing of monuments shall be paid, and may assess them against any township and/or municipalities interested.

Section 307. Adjustment of Indebtedness. Whenever the boundaries of any township have been altered or ascertained

and established upon application of the supervisors, commissioners or the authorities of any school district or poor district, the court of common pleas, sitting in equity, may adjust the taxes, debts and expenses for township, municipal, poor and school purposes between the townships, municipalities, poor and school districts affected.

#### ARTICLE IV

##### WARDS

**Section 401. Petitions to Create, Divide or Re-Divide Wards.** The court of quarter sessions, upon petitions, may divide or re-divide any township, heretofore or hereafter created, into wards, erect any wards out of two or more adjoining wards or parts thereof, divide any wards already erected into two or more wards, or after the lines or boundaries of any two or more adjoining wards, and may cause lines or boundaries of wards to be fixed and established. No township shall be divided or redivided into more than fifteen wards. All wards as heretofore established shall remain as heretofore until altered or divided as provided in this article.

**Section 402. Signing Petition.** Appointment and Powers of Commissioners. The petition shall be signed by at least twenty freeholders, residents of the township or of the ward or wards the limits of which it is proposed to change. Upon the presentation of the petition, the court shall appoint three impartial men as commissioners, one of whom shall be a civil engineer, to inquire into the propriety of granting the prayer of the petitioners. The commissioners, or any two of them, shall make a report to the next term of court, and shall accompany it with a plot showing the boundaries of the township and the wards before and after the proposed change, whenever the same cannot be fully designated by natural lines.

**Section 403. Filing and Confirmation of Report.** Exceptions. When the same is presented, the court shall confirm the report nisi, which confirmation shall become absolute unless exceptions thereto are filed within thirty days after such confirmation nisi. The court may grant a review if in its opinion a better adjudication may thereby be secured. If no exceptions are filed, the court may confirm the report, or make such other order as to it shall be deemed proper. If exceptions are filed the court shall fix a time for hearing, and thereafter shall enter such decree as by it shall be deemed just and proper. From the final decree as entered by the court of quarter sessions there shall be no appeal.

**Section 404. Pay of Commissioners.** The commissioners appointed under the provisions of this act shall receive ten dollars per diem, except the civil engineer, who shall receive twenty dollars per diem. Each commissioner shall also be entitled to mileage at the rate of five cents per mile circular. The compensation of the commissioners, and mileage and reasonable attorney's fees, shall be paid by the township in all cases where the prayer of the petitioners is granted, and in other cases shall be paid by the petitioners.

**Section 405. Election Districts.** The court of quarter sessions may, from time to time, divide any such ward into two or more election districts so as to suit the conveniences of the electors thereof.

**Section 406. Numbering of Wards.** When any township shall be divided or redivided into wards, or when any ward in any township shall be created, divided, or altered, the court shall in its decree fix the number of each of the wards of such township.

**Section 407. Schedule for Election of Commissioners in Townships First Divided Into Wards.** When a township is first divided into wards, the township commissioners then in office shall continue in office until the expiration of their respective terms.

At the first municipal election, occurring at least ninety days after such division into wards, there shall be elected by the qualified electors of each ward of the township, one township commissioner, who need not reside in the ward for which he is elected. At such election the township commissioners elected in even-numbered wards shall be elected for terms of two years each, and those in odd-numbered wards for terms of four years each, or vice versa, as the case may be, in order that the expiration of such terms will harmonize with the expiration of terms of township commissioners elected for such numbered wards under the provisions of this act. Thereafter successors to such commissioners elected by wards shall be elected for terms of four years each at the municipal election imme-

diately preceding the expiration of the terms of ward commissioners.

In the number of wards into which the township has been divided is less than seven, then at the municipal election preceding the expiration of the terms of any commissioner or commissioners theretofore elected at large, if such expiration of terms will leave the township with less than seven township commissioners, there shall be elected at large a sufficient number of township commissioners so that the total number of commissioners elected by wards and at large in the township shall thereafter be seven. If one township commissioner is elected at large at such election he shall be elected for a term of four years. If two township commissioners are elected at large at such election, one shall be elected for a term of two years and one for a term of four years. If three township commissioners are elected at large at such election, two shall be elected for terms of four years each, and one for a term of two years. If four township commissioners are elected at large at such election, two shall be elected for terms of four years each and two for terms of two years each. If five township commissioners are elected at large at such election, three shall be elected for terms of four years each and two for terms of two years each. Successors to such township commissioners elected at large at such election shall be elected for terms of four years each.

All terms of office to township commissioners, elected at large or by wards, shall commence on the first Monday of January next following their election.

**Section 408. Schedule of Election of Commissioners in Newly Created Wards.** Whenever in a township previously divided into wards, a new ward is created, and the number of wards thereafter in such township, including the new ward, is less than seven, then at the municipal election next following the expiration of the term of the commissioner or commissioners elected at large whose terms shall first expire after such creation, there shall be elected by the qualified electors of such new ward one township commissioner, who need not reside in the ward for which he is elected, for a term of two or four years, so that the expiration of his term will harmonize with the expiration of terms of commissioners for such numbered wards under the provisions of this act. Successors to such township commissioners shall be elected for terms of four years. The number of commissioners thereafter elected at large in any such township shall be the difference between the number of wards and seven, and a sufficient number of commissioners shall be elected at large at each municipal election preceding the expiration of terms of commissioners at large, so that the total number of commissioners in the township will at all times be seven.

Whenever, in any township previously divided into wards, a new ward is created, and the number of wards thereafter in such township is seven, then at the municipal election preceding the expiration of the term of office of any commissioner or commissioners elected at large, a township commissioner shall be elected for such ward who need not reside in the ward. Such election shall be for a two or four year term, so that the expiration of his term will harmonize with the expiration of terms of commissioners for such numbered wards, under the provisions of this act. The successor to such ward commissioner shall be elected for a four-year term. No township commissioner shall thereafter be elected at large in such township.

If the number of wards in such township, including the new ward, shall be more than seven, the court of quarter sessions shall appoint a township commissioner for such new ward, who shall hold office until the first Monday in January succeeding the first municipal election at which township commissioners are elected in such numbered wards under the provisions of this act, at which election and every four years thereafter a township commissioner, who need not reside in the ward, shall be elected by the qualified electors of said ward for a term of four years.

All township commissioners elected under this section, shall take office on the first Monday of January next succeeding their election.

**Section 409. Schedule for Election of Commissioners Where Re-Division of Wards Made Under Prior Laws.** In any township where wards were heretofore abolished by law or the reason that the number exceeded fifteen as limited by article four of this act, and where fifteen commissioners were elected at large for two year terms, at the municipal election in one

thousand nine hundred and twenty-nine, pending the redivision of such township into wards, the successors to such commissioners shall be elected by wards as established by such redivision at the municipal election in the year one thousand nine hundred and thirty-one, and the commissioners elected at such election from the even-numbered wards shall be elected for two-year terms and those elected in odd-numbered wards for four-year terms. Thereafter their successors shall be elected for four-year terms as provided by this act.

## ARTICLE V

### ELECTION OF OFFICERS—VACANCIES IN OFFICE

#### (a) General Provisions

Section 501. Electors only Eligible. No person shall be eligible to any elective office in any township, unless he is an elector of the township for which he is chosen.

Section 502. Hold Until Successors Qualified. Officers of townships shall hold their offices until their successors are elected and qualified.

Section 503. Elected Officers Enumerated. The electors of each township shall elect (a) at least seven township commissioners, (b) one township treasurer, (c) one township assessor one assistant township assessor, and two assistant triennial assessors, and (d) one controller where such office has been established.

#### (b) Commissioners

Section 504. Number and Election of Commissioners in Townships having Wards. In townships having less than seven wards, the number of commissioners shall be seven. One such commissioner shall be elected from each ward and the remaining number of commissioners, to which the township is entitled, shall be elected at large. In townships having seven or more wards, one commissioner shall be elected from each ward. Commissioners need not reside in the ward from which elected. Township commissioners shall be elected at municipal elections, preceding the expiration of the terms of commissioners then in office, for terms of four years each, from the first Monday of January succeeding their election. At the election in the year one thousand nine hundred and thirty-one, the commissioners from odd-numbered wards shall be elected and at the election in the year one thousand nine hundred and thirty-three, those from even-numbered wards shall be elected. Elections at large shall be held at the municipal election preceding the expiration of the term of any commissioner elected at large.

Section 505. Number and Election of Commissioners in Townships Not Divided Into Wards. In townships not divided into wards the number of township commissioners shall be seven, who shall be elected at large by the voters of the township. At each municipal election four or three township commissioners, as the case may be, shall be elected for terms of four years each, from the first Monday of January next succeeding, to take the place of the commissioners whose terms then expire.

Section 506. Temporary Schedule. The provisions of this act increase the number of township commissioners in townships not divided into wards and in townships having less than seven wards from five or six to seven. The court of quarter sessions of the county shall upon petition appoint a sufficient number of township commissioners for such townships to hold office until the first Monday of January succeeding the first municipal election occurring at least sixty days after such appointment so that each such township shall have a total of seven township commissioners. At such municipal election additional township commissioners shall be elected for two or four year terms, as the case may be, to harmonize with the system for the election of township commissioners provided by this act, to take office on the first Monday of January succeeding their election. Their successors shall be elected for four-year terms.

Section 507. Election Notices. The notice of any primary election, or nominating caucus, convention, or meeting, held for the purpose of nominating candidates for the office of township commissioner and the notice of any election of township commissioners, shall designate for what ward of the township each commissioner is to be nominated or elected, as the case may be. In case any one or more of the township commissioners are to be elected by vote of the qualified electors of the township at large, the notice shall so state. The

ballots to be cast at any election for township commissioners shall designate, under an appropriate heading, the candidate for office of township commissioner for whom the qualified electors of the ward are entitled to cast their ballots, and under appropriate heading the candidate or candidates for the office of township commissioner which are to be elected by the electors of the township at large.

#### (c) Treasurer

Section 510. Election of Treasurer. At the municipal election in the year one thousand nine hundred and thirty-three, and every fourth year thereafter, the electors of each township shall elect a township treasurer for a term of four years, from the first Monday of January next following his election.

Section 511. Eligibility. The same person may hold the office of township treasurer and treasurer of the school district, but no township treasurer shall hold any other township office except that of tax collector.

#### (d) Assessors

Section 515. Election of Township Assessor and Assistant Township Assessor. At the municipal election preceding the expiration of the term of any township assessor or assistant township assessor, and quadrennially thereafter, one township assessor or one assistant township assessor, or both, as the case may be, shall be elected for four-year terms from the first Monday of January next succeeding their election.

The compensation of the assistant township assessor shall be the same as provided by law for the township assessor, and shall be paid by the county.

This section shall not apply to townships in counties having county boards for the assessment and revision of taxes where assessors under existing laws are appointed.

Section 516. Assistant Triennial Assessors. In all townships the qualified electors shall, at the municipal election preceding the expiration of the term of the assistant assessors now in office, and at the municipal election every four years thereafter, elect two citizens, resident in said township, to be assistant triennial assessors, to take the place of those whose terms expire on the first Monday of January next following such election.

All assistant triennial assessors elected under the provisions of this section shall hold their office for a term of four years from the first Monday of January next following their election. Such assistant triennial assessors shall aid the township assessor only in making the triennial assessment of property during their respective terms of office.

This section shall not apply to townships in counties having county boards for the assessment and revision of taxes where assessors under existing laws are appointed.

Section 517. Election Assessors Saved. The election of assistant assessors provided for in this subdivision shall extend only to the election of assistant assessors for the valuation of property for taxation, and shall not repeal or affect the provisions of any statute providing for the election of assistant or registry assessors for the performance of duties relating to elections.

#### (e) Controller

Section 525. Election of Controller. The qualified electors in every township of the first class, accepting the provisions of this act, relating to the controller as hereinafter provided, shall, at the municipal election in the year one thousand nine hundred and thirty-three, and every four years thereafter, elect as township controller one person, who shall be a competent accountant and an elector of the township for at least four years prior to his election. The person so chosen shall serve for a term of four years from the first Monday of January next succeeding his election.

Section 526. Acceptance of Controller Provisions by Ordinance. The provisions of this act, relating to the controller, shall not become operative or effective in any township until the board of commissioners shall, by ordinance, accept the provisions of this act relating to the office of controller. Such office of controller shall be continued until the acceptance ordinance be repealed, when it shall terminate and the accounts of township officers shall thereafter be audited by a certified public accountant as in this act provided. When any township so accepts the provisions of this act, the court of quarter sessions, upon petition of the board of commissioners, shall appoint a controller, to hold office until the first Monday of January next succeeding the next municipal election at

which a controller may be elected under the provisions of this act.

In all townships of the first class so accepting the provisions of this act, the office of township auditor is abolished.

#### (f) Vacancies in Office

Section 530. Township Commissioners. When a vacancy occurs in the office of township commissioner in any township, by reason of death, resignation, removal from the township or otherwise, the court of quarter sessions, upon the petition of twenty qualified voters of the ward or township, as the case may be, in which the vacancy occurs, may appoint a qualified voter of the township to fill such vacancy. If such petition is not presented to the court within thirty days after such vacancy occurs, the board of township commissioners of the township may appoint a qualified voter of the township to fill the vacancy. In either event the person so appointed shall hold office until the next municipal election, at which election a township commissioner shall be elected for the unexpired term of the person whose place he is elected to fill.

Section 531. Township Treasurer and Controller. The board of township commissioners of townships may fill any vacancy occurring in the office of township treasurer or township controller by death, resignation, removal from the township, or otherwise. The person so appointed shall hold office until the next municipal election, at which election a treasurer or controller shall be elected for the unexpired term of the person whose place he is elected to fill.

Section 532. Assessors. Vacancies in the office of assessor, assistant township assessors, or assistant triennial assessors, in townships shall be filled in the manner provided by law.

### ARTICLE VI

#### GENERAL PROVISIONS RELATING TO TOWNSHIP OFFICERS

##### (a) General Provisions

Section 601. Oath. Every person elected or appointed to any township office in any township shall before entering upon the duties of his office, take and subscribe an oath or affirmation, before some person having authority to administer oaths, to support the Constitution of the United States and of this Commonwealth, and to perform the duties of his office with fidelity. A copy of such oath or affirmation shall, within ten days thereafter, be filed with the township secretary.

Section 602. Bonds. When any officer or employee of any township is required to give bond for the faithful performance of his duties, and such bond is required to be executed by a surety company, the township shall pay the premium on such bond, except in the case of the treasurer, where the township may pay such premium.

Section 603. Compensation. No township shall increase or diminish the salary, compensation or emoluments of any elected officer after his election.

Section 604. Failure of Officer to Perform Duties. If any township officer refuses or neglects to perform his duties, the court of quarter sessions, upon complaint in writing by one hundred citizens, owners of real estate residing in the township, may issue a rule upon such officer to show cause why his office should not be declared vacant and another appointed in his stead. Such rule shall be made returnable not less than two weeks from its date of issue. Upon hearing, and proof that the facts alleged in the complaint are true, the court may declare the office vacant and appoint another in his stead, to hold office until the next municipal election, at which time a person shall be elected for the unexpired term.

##### (b) County Associations of Township Officers

Section 610. Formation of County Associations. Meetings. County associations of township officers may be formed. Such associations, when formed, shall hold annual or semi-annual conventions, when the county-seats of the respective counties or some other suitable place within the county for the purpose of considering and discussing questions and subjects pertaining to the best methods for the construction, improvement, and maintenance of the public highways and bridges, and the administration of township governments.

Section 611. Membership of Association. Expenses of Members. The township commissioners and other officers of the township designated by the township commissioners shall attend such conventions whenever possible. Each township offi-

cer attending such convention shall receive a certificate, signed by the presiding officer and acting secretary of the convention, attesting his presence at the convention. Such certificate shall entitle him to collect from the township treasurer the sum of three dollars per day for each day's attendance and mileage at the rate of five cents per mile traveled, to be computed by the route usually traveled from his place of residence to the place where the convention is held. No township officer shall be paid for more than two days' attendance in any one year. The expenses of holding any such convention shall be paid pro rata by the townships joining therein.

Section 612. Officers of Association. Ex-Officio Membership. The officers of the association shall consist of a president, two vice-presidents, a secretary, and a treasurer; all of whom, except the secretary, shall be members of the association, and shall hold office for one year or until their successors are chosen. If desirable, the secretary may be a person not a regular member of the association, and may be paid for his service such compensation, not exceeding ten dollars per annum, as the other officers may determine. Every township officer attending such convention may vote in the election of officers. The mayor of any city, the burgess of any borough, or their duly appointed representative, the county commissioners, and the judges of the court in the county, the township engineer of the State Highway Department, the assistant engineers of the division of township highways, and the superintendent of State highways in charge of such county, shall be eligible to membership, but shall not be entitled to vote, nor to hold office.

##### (c) State Association of Township Officers

Section 620. Formation of State Association Authorized. The formation of a State association of township commissioners is hereby authorized. Such officers of the township as may be designated by the township commissioners may attend such meeting. The association shall hold annual meetings at such time and place within the Commonwealth as it may designate, for the purpose of discussing various questions and subjects pertaining to the duties of township commissioners, and for the purpose of devising uniform, economical, and efficient methods of administering the affairs of townships of the first class.

Section 621. Delegates from County Associations. Each township shall send one township officer as a delegate to each annual meeting of said State association, who shall be selected by the commissioners of the township of which he is a commissioner.

Section 622. Expenses of Delegates Paid by County Associations. The expenses of the delegates and other officers attending the annual meeting shall not exceed seven dollars and fifty cents per day for each officer attending, for not more than three days, together with the actual mileage at the prevailing rate of railroad fare, and shall be paid by the respective townships.

Section 623. Expenses of Annual Meeting Limited. The expenses of the annual meeting, including expenses of committees, printing, and stenographers, shall be paid by the respective townships jointly in such State association.

### ARTICLE VII

#### TOWNSHIP COMMISSIONERS

Section 701. Organizations. Failure to Organize. The township commissioners shall organize on the first Monday of January of each even-numbered year. They shall assemble for such purpose at their place of meeting at seven-thirty o'clock post meridian. Until otherwise designated by ordinance, the place of meeting shall be the oldest polling place in the township.

The board shall organize by the election of one of their number as president, and one as a vice-president. The president, or in his absence the vice-president, shall preside at all meetings of the board, and perform such other duties as are specified in this act or which may be prescribed by ordinance.

If a majority of the commissioners shall not attend at the organization meeting, those present may adjourn the meeting from day to day until a majority attend.

If the township commissioners of any township shall fail to organize within ten days from the time prescribed by this section, the court of quarter sessions upon the petition of ten taxable inhabitants, verified by the affidavit of five of the petitioners, shall issue a rule upon the delinquent or delinquents to show cause why their seats should not be declared

vacant. The rule shall be returnable not less than five days from the time of its issue, and, after hearing, the court may declare the seats of any delinquents vacant, and appoint others in their stead to hold office until a successor is elected for the unexpired term at the next municipal election occurring at least sixty days thereafter.

Section 702. Monthly Meetings. Quorum. The board shall meet at least once a month, at such time and such place as may be designated by ordinance. A majority of the members of the board shall constitute a quorum.

Section 703. Compensation. Each township commissioner shall receive a salary of one hundred dollars per year in townships having a population of less than five thousand, two hundred dollars per year in townships having a population of five thousand and more but less than twenty-five thousand, and three hundred dollars per year in townships having a population of twenty-five thousand and more, payable quarterly, as full compensation for the duties imposed by the provisions of this act.

Section 704. Reports to State Department of Highways. The township commissioners shall annually, on or before the first day of February in each year, make a sworn statement to the State Department of Highways, on blanks furnished to them by the said Department, of the whole amount of tax levied during the preceding year for road and bridge purposes and the total amount of taxes collected during the year for road and bridge purposes. They shall specify, in such report, the amount expended for maintenance or repairs or roads and bridges, for opening and building new roads and bridges, and for macadamizing or otherwise permanently improving roads, the number of miles of roads thus made, and the total number of miles of township roads in the township. Such report shall also contain such other matters and things pertaining to roads and bridges as the Department may require.

#### ARTICLE VIII

##### TOWNSHIP TREASURER

Section 801. Bond. The treasurer of each township shall give bond, in a sum to be prescribed by ordinance or resolution and at least equal to fifty per centum of the probable amount of the annual township tax. Such bond shall be subscribed by sureties approved by the township commissioners, or by a surety company or companies duly authorized to do business in this Commonwealth. The bond given by the treasurer shall be conditioned for the faithful performance of the duties of his office, for a just account of all moneys belonging to the township funds that may come into his hands from taxation or otherwise, for the payment over thereof only in the manner prescribed by law; for the delivery to his successor in office of all papers, books, documents, and other things held in right of his office, and for the payment to such successor of any balance in money remaining in his hands or charged against him in the settlement of his accounts. Said bond shall be filed with the township commissioners.

Section 802. Compensation. The township treasurer shall receive for his duties as treasurer and tax collector for the township a sum equal to five per centum of all township taxes received or collected by him, and, in addition thereto, a sum equal to one per centum on all other moneys received or collected by him for the township, unless a different rate or annual compensation shall be fixed by ordinance of the township commissioners finally adopted thirty days prior to his election: Provided, that in no case shall the total compensation of the treasurer as treasurer and tax collector for the township exceed the sum of ten thousand dollars (\$10,000).

Section 803. Accounts to Be Kept by Treasurer. Every township treasurer shall take charge of all township moneys from all sources, and promptly deposit the same in a bank, banking institution or trust company in the name of the township, and keep distinct accounts of all sums received from taxes and other sources, which accounts shall at all times be open to the inspection of the commissioners and township auditor or controller. He shall annually state his accounts, and lay the same, together with the books and the vouchers, before the township auditor or controller for audit.

Section 804. Payment of Moneys on Orders. The township treasurer shall pay out the moneys coming into his hands, only on orders numbered in the order of their issue, signed by the president or vice-president and attested by the secretary or assistant secretary of the board, and designating the

appropriation out of which the orders shall be paid. Any township treasurer who shall pay out moneys in his hands, except upon such orders, or shall pay out moneys in excess of the appropriations shall be allowed no credit in the settlement of his accounts for the sum or sums so paid out, nor shall he have any claim or right of action against the township therefor.

Section 805. Powers as Tax Collector. The township treasurer, by virtue of his office as treasurer, shall be tax collector. He shall collect all county, township, school, poor, and other taxes, within such township, levied by authorities empowered to levy taxes. He shall in addition to the powers, duties, and responsibilities enumerated in this act, have all the powers, perform all the duties, and be subject to all the obligations and responsibilities as are now by law vested in conferred upon, or imposed upon, collectors of the several classes of taxes hereinbefore mentioned.

It is the purpose and intent of this section, that no local taxes shall be collected in any township, except by the treasurer of the township.

Section 806. Oath. Bond for County Taxes, Etc. The treasurer of every township shall, before he enters upon the duties of his office as collector of taxes for the county, take and subscribe an oath of office and file the same in the office of the court of quarter sessions, and shall annually enter into a bond to the Commonwealth, in not more than the amount of taxes charged and assessed in the county duplicates, with at least two sufficient sureties or one trust or bonding company. The bond shall be approved by the court of quarter sessions and shall be filed in the office of the clerk of said court. The condition of the bond shall be, that the treasurer shall well and truly pay over or account for the whole amount of taxes charged and assessed in the duplicates which shall be delivered to him. This bond does not cover the collection and payment over of township or school taxes.

Section 807. Special Funds. Penalty. Whenever any moneys are collected in any township, for any special purpose, and are paid into the hands of the treasurer of such township, it shall be unlawful for such treasurer to apply such money, or any part thereof, to any purpose other than that for which such moneys were collected. Every such misapplication shall be a misdemeanor. Upon conviction of such offense, the treasurer shall be punished by a fine of not less than the amount so misapplied, or by imprisonment for not less than three months and not more than one year.

Section 808. Depositories of Township Funds. Selection of Bonds. The board of commissioners shall from time to time, designate, by resolution, a depository or depositories for township funds. Such depository or depositories shall be banks, banking institutions or trust companies located in the Commonwealth.

Depositories so designated shall, upon receipt of notice of their selection as a depository of township funds, furnish a bond to secure payment of deposits and any interest to the township, with a proper warrant to confess judgment in favor of the township, secured by a surety company or individual sureties to be approved by the board of commissioners. Such bonds shall be in a sum to be fixed by ordinance or resolution, at least equal to the probable greatest amount of such deposit at any one time.

The township treasurer shall, upon the designation and qualification of such depository or depositories, immediately transfer thereto the township funds, and shall thereafter keep such deposits solely in such depository or depositories in the name of the township.

No township treasurer, complying with the provisions of this section, nor his surety or sureties, shall be chargeable with losses in township funds caused by the failure or negligence of such depository or depositories.

#### ARTICLE IX

##### TOWNSHIP SECRETARY

Section 801. Election of Secretary. Salary. The board of commissioners in townships shall elect a secretary, who must be a qualified voter of the township, and not a member of the board. He shall act as secretary of the board, shall be the official keeper of the minutes, and shall perform such other duties as are prescribed by ordinance or resolution of the board. He shall provide suitable books, the cost of which shall be paid out of the township funds, wherein he shall enter all matters

of which he is required to keep a record. His salary shall be fixed by ordinance or resolution.

Section 902. Duties. Penalty. The secretary of a township shall keep a record of the appropriations made by the township commissioners and the amounts chargeable thereto. He shall furnish to any person, so requesting, a statement showing the amount available for future charges against any appropriated fund. Any secretary who shall knowingly and willfully furnish an incorrect statement shall be guilty of a misdemeanor, and, upon conviction thereof, shall be sentenced to pay a fine of not more than five hundred dollars.

Section 903. Records Open to Inspection. The minute book and other records and documents of every township shall be open to the inspection of any taxpayer thereof, his, her, or its agent upon demand therefor.

## ARTICLE X AUDITOR

Section 1001. Appointment and Compensation of Auditor. General Duties. The court of common pleas of each county shall, annually on or before the first Monday of January of each and every year, appoint for each township of the first class, within such county not having a controller, an auditor, who shall be an individual or firm licensed as a certified public accountant in this Commonwealth, and who may or may not reside in the township for which appointed. The court shall also fix the compensation of such auditor, which shall be paid by the township. It shall be the duty of the auditor so appointed to audit, settle and adjust the accounts of the township commissioners, township treasurer, tax collector, secretary and other officers and persons receiving and disbursing or authorizing the disbursement of the moneys of the township during the preceding fiscal year. Upon the taking effect of this act the elected office of township auditor as now existing is abolished.

Section 1002. Subpoenas. Power to Administer Oaths. Penalty. The auditor of each township may issue subpoenas to obtain the attendance of the officers and persons whose accounts he is required to adjust, their executors and administrators, and of any persons whom it may be necessary to examine as witnesses, and to compel their attendance by attachment in like manner as any court of common pleas may in cases pending before them, and may also compel the production of all books, vouchers, and papers relative to such accounts. Such subpoena and attachment shall be issued by a justice of the peace and be served and executed by a constable or the township auditor.

The auditor of each township may administer oaths and armations to all persons brought or appearing before him, whether accountants, witnesses, or otherwise. All persons guilty of swearing or affirming falsely on such examination shall be guilty of perjury.

Section 1003. Surcharges. Publication and Filing of Statements. The auditor shall complete his audit, settlement, and adjustment within as short a time as possible. Any officer or person whose act or neglect has contributed to the financial loss of the township shall be surcharged by the auditor with the amount of such loss. He shall, within ten days thereafter, publish, by advertisement in at least one newspaper of general circulation, printed in the township or county, a concise itemized statement of the receipts and expenditures of the several officers for the preceding fiscal year. He shall also within ten days thereafter, file a copy of such statement with the clerk of the court of quarter sessions. When any two offices are exercised by the same person, only one statement shall be required.

Section 1004. Cancelling Orders. The auditor shall cancel all orders and vouchers presented to him, which he finds have been paid, by writing the word "audited" on the face thereof.

Section 1005. Penalty for Failure to Perform Duty. Any auditor neglecting or refusing to comply with the preceding provisions of this article shall pay a penalty of one hundred dollars, to be recovered by suit, instituted in the name of the township, upon the complaint of any taxpayer, in the same manner as debts of like amounts are recoverable. Any penalty recovered shall be paid into the treasury of the township.

Section 1006. Employment and Compensation of Attorney. The auditor, in case of a disagreement with the official or board of officials whose accounts he is required to audit, may employ an attorney. Such attorney shall not be employed, until reasonable effort to reach an agreement has been made, and only

after notice of his intention so to do has been given to said official or board of officials. The compensation for such attorney shall be fixed by the auditor, and shall not exceed the sum of ten dollars per day, nor total in any case more than thirty dollars, unless when an appeal is taken to the courts, in which case the court shall fix the additional compensation for the attorney. The compensation for said attorney shall be paid out of the fund, the settlement of which is in dispute, by a warrant drawn by the auditors upon the treasurer of such fund, immediately upon the final settlement of the account.

Section 1007. Balances Due to Be Entered as Judgments. Any balance, in any report of the auditor, against any officer of the township, shall constitute a surcharge against such officer, as fully as if expressly stated in said report to be a surcharge, and the amount of any balance, and of any express surcharge, shall be entered by the prothonotary as a judgment against such officer and in favor of the township. Unless an appeal is taken as hereinafter provided, the auditor shall direct the clerk of the court of quarter sessions to certify the amount of every balance or surcharge, contained in any such report, to the court of common pleas, for entry thereof by the prothonotary as a judgment.

Section 1008. Collection of Surcharges by Taxpayers. The auditor or any taxpayer of the township may enforce the collection thereof, for the benefit of the township, by action or execution, upon filing in the court of common pleas a bond, with one or more sureties, (in the case only of a taxpayer) conditioned to indemnify the township from all costs which may accrue in the proceedings undertaken by such taxpayer subject, however, to all rights of appeal from the report of the auditor granted by this act.

Section 1009. Appeals from Report. The township, or any taxpayer thereof on its behalf, or any officer or person whose account is settled or audited, by the township auditor, may appeal from any settlement or audit to the court of common pleas, within thirty days after the settlement has been filed in the court of quarter sessions.

Section 1010. Appeal Bond. No appeal by a taxpayer or officer shall be allowed unless the applicant shall enter into recognizance to prosecute the same with effect, and to pay all costs accruing thereon, in case, if the appellant be a taxpayer, he shall fail to obtain a final decision more favorable to the township than that awarded by the auditor, or, in case the appellant be an accounting officer, he shall fail to obtain a final decision more favorable to the officer than that awarded by the auditor.

Section 1011. Intervention by Taxpayers. Whenever an appeal has been taken from the report of the auditor by the township, or by any person charged in such report with any sum of money, any taxpayer of the township may intervene in such appeal, and either prosecute the same on its behalf, or defend it against the appeal of the person so charged. No taxpayer shall intervene unless he shall file in the court of common pleas a bond, with one or more sufficient securities, conditioned to indemnify the township against all costs accruing by reason of such intervention.

Section 1012. Consolidation of Appeals. When more than one appeal from the report of the auditor is taken, whether by the township, an officer or officers thereof, or by a taxpayer, the court shall, upon petition of any party interested, direct the several appeals to be disposed of in a single proceeding.

Section 1013. Testimony and Argument. Any person interested may order the appeal upon the argument list, and evidence may be taken before any person authorized to administer oaths, upon rule for that purpose served upon the opposite party.

Section 1014. Framed Issues. Whenever any matter of fact is in dispute the court of common pleas is authorized to frame an issue for the trial thereof.

Section 1015. Prima Facie Evidence. The accounts of the officer or officers in question may be investigated de novo. The figures and facts found and stated by the auditor in his report of audit shall be taken as prima facie correct, as against any such officer, and the burden shall be upon each officer whose accounts are in question to establish the validity of the credits which he claims.

Section 1016. Judgment. After hearing, the court shall file its findings of fact and law and enter judgment in accordance therewith, and the judgment so entered may be enforced by any appropriate proceedings by the party prevailing.

Section 1017. Costs. In all cases of appeal from the report or audit of the township auditor to the court of common pleas, the costs shall abide the event of the suit as in other cases.

Section 1018. Appeals. Any person interested may except to the rulings of the courts, and may appeal therefrom to the Superior or Supreme Courts, as in other cases.

Section 1019. Counsel Fees. When an appeal is taken from the township auditor's report or settlement of the accounts of any public officer, in accordance with the laws relating thereto, and such appeal results favorable to the appellants in such a manner that money is recovered for any township, the court hearing such appeal shall make an order to pay a counsel fee, which it deems just and reasonable, to the counsel representing such appeal, out of the funds so recovered.

This section shall apply to all such cases now pending or hereafter brought in any court of this Commonwealth.

## ARTICLE XI

### CONTROLLER

Section 1101. Oath and Bond of Controller. The township controller, where such office has been created, shall, before entering upon the duties of his office, take and subscribe the oath prescribed by this act for township officers, and shall give bond to the township, with two or more sureties, or with a surety company, to be approved by the board of commissioners, in the sum of twenty thousand dollars, conditioned for the faithful discharge of his duties, and to adequately protect the township from any illegal or unfaithful action by the controller. The cost of such bond shall be paid by the township.

The township controller may, at the instance of a taxpayer, and by rule upon him for that purpose, be compelled to justify his bond as to the amount thereof, and the responsibility of the sureties, before the court of common pleas.

Section 1102. Salary of Controller. The salary of the controller shall be fixed by ordinance. In townships having a population of fifty thousand or more, the salary of the controller shall not exceed four thousand dollars. In townships having a population of forty thousand or more, but less than fifty thousand inhabitants, the salary of the controller shall not exceed thirty-six hundred dollars. In townships having a population of thirty thousand or more, but less than forty thousand inhabitants, the salary of the controller shall not exceed twenty-four hundred dollars. In townships having a population of twenty thousand or more, but less than thirty thousand inhabitants, the salary of the controller shall not exceed one thousand, five hundred dollars. In townships having a population of fifteen thousand or more, but less than twenty thousand inhabitants, the salary of the controller shall not exceed twelve hundred dollars. In townships having a population of ten thousand or more, but less than fifteen thousand inhabitants, the salary of the controller shall not exceed nine hundred dollars. In townships having a population of less than ten thousand and not less than five thousand, the salary of the controller shall not exceed seven hundred and fifty dollars. In townships having a population of less than five thousand and not less than twenty-five hundred, the salary of the controller shall not exceed five hundred dollars. In townships having a population of less than two thousand, five hundred, the salary of the controller shall not exceed three hundred dollars.

Section 1103. General Powers and Duties of Controller; May Require Attendance of Witnesses; Penalty. The township controller shall superintend the fiscal affairs of the township. He shall examine, audit and settle all accounts whatsoever in which the township is concerned, either as debtor or creditor, where provisions for the settlement thereof are made by law, and where no such provisions or any insufficient provision, has been made, he shall examine such accounts and report to the board of commissioner the facts relating thereto, with his opinion thereon.

The controller in addition to the above audits, shall annually audit, settle, and adjust the accounts for the immediately preceding fiscal year in which the township is concerned, and for any preceding fiscal year of any officer which have not previously been audited, settled and adjusted. He shall finish said audit, settlement and adjustment and file in the office of the clerk of the courts of the county in which such township may be situated a report thereof, within sixty days after the beginning of the current fiscal year, setting forth an itemized statement of the charges against and credits

of said officers and any balance or surcharge against them. The amount of any balance or shortage, or of any expenditure of a kind or made in a manner prohibited or not authorized by statute, or which causes a financial loss to the township, shall be surcharged against any officer against whom such balance or shortage shall appear, or who, by vote, act or neglect, has made, approved or permitted such expenditure. Any balance or surcharge against any such officer shall by direction of the controller be certified by the clerk of the courts to the prothonotary who shall enter the same as a judgment against such officer unless he shall appeal from such report as hereinafter provided.

The township controller shall have supervision and control of the accounts of all departments, bureaus, and officers of the township, authorized to collect, receive or disburse the public moneys, or who are charged with the management or custody thereof. He shall audit their respective accounts and may at any time require from any of them a statement in writing of any moneys or property of the township in their hands or under their control, and he shall, immediately upon the discovery of any default, irregularity or delinquency, report the same to the board of commissioners. He shall also audit and report upon the account of any such officer upon the death, resignation, removal or expiration of the term of the said officer.

In the making of any audit or settlement, and in the authentication of any account or claim or demand against the township, the controller of any township shall have the same power and authority to obtain the attendance before him of parties and witnesses, and the production of books and papers, and to administer oaths and affirmations as are given by law to county and township auditors. All persons guilty of swearing or affirming falsely before him shall be liable to the penalty for perjury.

Section 1104. Controller to Countersign Warrants. The township controller shall countersign all warrants upon the township treasurer, the form thereof to be prescribed by the board of commissioners, but no warrant shall be countersigned unless there is sufficient unencumbered money in the respective appropriation item to pay the same. Whenever a warrant on the treasurer shall be presented to the controller to be countersigned, the person presenting the same shall, if the controller require, produce evidence:

1. That the amount expressed in the warrant is due to the person in whose favor it is drawn.

2. That the supplies or services for payment of which the warrant is drawn have been furnished or performed according to law, and the terms of the contract.

Section 1105. Controller to Prevent Appropriation Over Drafts. The township controller shall not permit any appropriation made by the board of township commissioners to be overdrawn. Whenever an appropriation is exhausted, the object of which is not complete, he shall immediately report the fact to the board of commissioners, and accompany such report with a statement of the moneys which have been drawn on such appropriation and the particular purpose for which they are drawn.

Section 1106. Amount of Contracts to Be Charged Against Appropriations. Every contract involving appropriation of money shall designate the item of appropriation on which it is founded, and the estimated amount of the expenditure thereunder shall be charged against such item and so certified by the township controller on the contract before it shall take effect as a contract, and the payment required by such contract shall be made from the fund appropriated therefor. If the controller shall certify any contract in excess of the appropriation made therefor, the township shall not be liable for such excess, but the controller and his sureties shall be liable for the same, which may be recovered in an action at law by the contracting party aggrieved. It shall be the duty of the controller to certify contracts for the payments of which sufficient appropriations have been made.

Section 1107. Controller's Report. The township controller shall, as often as he may deem expedient or the board of commissioners shall direct, suggest plans to the board of commissioners for the management and improvement of the township finances; and he shall make a report, verified by oath or affirmation, to the board of commissioners, at the first stated meeting in January in each year, of the public account of the township, and of the trusts in its care, exhibiting all the expenditures, thereof respectively, the sources from which the

revenue and funds are derived, and the manner in which the same have been disbursed. Each account shall be accompanied by a detailed statement of the several appropriations made by the board of commissioners, the amount drawn on each appropriation, and the balance standing to the debit or credit of such appropriation. The report shall be published, at the expense of the township, once a week for two weeks in a newspaper circulating generally in the township.

Section 1108. Books to Be Kept by Controller. The township controller shall keep a regular set of books, in which shall be opened and kept as many accounts, under appropriate titles, as may be necessary to show separately and distinctly all the estates and property whatsoever, real and personal, vested in the township, all trusts in the care of the same, all debts due and owing the township, all receipts and expenditures of the various departments of the township government, and all appropriations made by the board of commissioners and the sums under the same respectively.

Section 1109. Appeals from Controller's Report; Bond; Procedure on Appeal. It shall be lawful for the township, or any taxpayer thereof on its behalf, or any officer against whom any sum shall be charged in the report of audit by the controller as filed in the office of the clerk of the court, to appeal therefrom to the court of common pleas within thirty days after the same shall be filed in the prothonotary's office. The appeal shall be filed in the same number and term in which the report has been filed. If the appellant is a taxpayer, or any officer charged as aforesaid, he shall file a bond with one or more sufficient securities, conditioned to pay all costs thereafter accruing in case a decision more favorable to the party on whose behalf the appeal shall be taken than that contained in the report of audit, shall not be obtained.

In case any appeal shall be taken as aforesaid, the same may be placed upon the argument list of said court by either party. Testimony and evidence as to the accounts of any such officer may be taken before said court, or by depositions, as the court may direct, in the course of which the said accounts may be investigated de novo, and the burden shall be upon each officer, whose accounts are involved in the appeal, of establishing, by evidence from original sources, his right to credits, claimed by him, but the opposing party in such appeal may use any facts, figures or findings of the report of audit as prima facie evidence against any officer.

Section 1110. Court to File Conclusions of Fact and Law; Judgment; Appeals. After argument of said appeal, the court shall file its conclusions of fact and law, and answers to any requests, and enter judgment in accordance therewith in favor of and against the proper parties. After argument, the court may direct an issue to be tried by a jury as to any specific disputed questions of fact. Appeals may be taken by any person interested to the Superior or Supreme Court from any such judgment of the court of common pleas, in the same way that appeals are now authorized by law to be taken.

Section 1111. Intervention of Taxpayers. When any appeal to the court of common pleas shall be taken, as aforesaid, by the township or any officers charged in said report with any sum of money, any taxpayer may come into court and intervene in said appeal, and on behalf of the township may cause the same to be prosecuted to final judgment in the same manner and with the same effect as the township authorities could do. Such taxpayer shall, at the time of intervening, file in said court a bond, with one or more sufficient sureties, conditioned to indemnify the township from all costs that may accrue by reason of such intervention subsequently thereto.

Collection of any judgment against any township officer, entered by virtue of a controller's report of audit, or in the course of an appeal therefrom may be enforced against such officer and his sureties by the township, or any taxpayer thereof on its behalf by any appropriate proceedings executory or otherwise.

Section 1112. Consolidation of Appeals. When more than one appeal from a controller's report of audit shall have been taken whether by the township, a township officer or officers, or a taxpayer, or any or all of them, the court of common pleas shall, upon petition of any party interested, direct the several appeals to be disposed of in a single proceeding.

Section 1113. Controller to Retain Books, Documents, Et Cetera, Pending Appeals. Every township controller shall retain in his possession, during the thirty days' period elapsing between the date of filing his report and the expiration of the time for filing the appeal therefrom, all books, documents,

vouchers, checks and other papers which have been procured before him in the course of his audit of the accounts of township officers, and, if any appeal shall be taken, shall continue to hold the same for production in the proceeding to determine the appeal.

## ARTICLE XII

### TOWNSHIP SOLICITOR

Section 1201. Election. Vacancies. The board of commissioners, on the first Monday of January in any even-numbered year, or as soon thereafter as practicable, may elect, by a majority of the members, one person learned in the law, who shall be styled the township solicitor, and who shall serve for the term of two years from the first Monday of January of the even-numbered year in or succeeding which he was elected, and until his successor qualifies. The compensation of the solicitor shall be fixed by the board of commissioners and shall not exceed five thousand dollars per annum. Vacancies in the office of township solicitor shall be filled by the board of commissioners for the unexpired term.

Section 1202. Bond. The township solicitor shall give a bond to the township, with two or more sureties, or one trust or bonding company, to be approved by the board of commissioners, in such sum as it shall by ordinance direct, conditioned for the faithful performance of his duty.

Section 1203. Solicitor to Have Control of Law Matters. The law matters of the township shall be under the superintendence, discretion, and control of the township solicitor, and no official or official body of the township, except as herein otherwise provided, shall employ an additional counsel without the assent or ratification of the board of commissioners.

Section 1204. Duties of Solicitor. The township solicitor shall prepare such bonds, obligations, contracts, leases, conveyances, and assurances to which the township or any department thereof may be a party, as may be directed by ordinance or resolution; he shall commence and prosecute all actions brought by the township for or on account of any of the estates, rights, trusts, privileges, claims, or demands, as well as defend all actions or suits against the township, or any officer thereof, wherein or whereby any of the estates, rights, privileges, trusts, ordinances, or accounts, of the township, may be brought in question before any court in the Commonwealth; and shall do every professional act incident to the office which he may be authorized or required to do by the board of commissioners or by any ordinance or resolution. He shall, whenever required, furnish the board of commissioners, and the committees thereof, with his opinion in writing upon any question of law which may be submitted by any of them in their official capacities.

## ARTICLE XIII

### TOWNSHIP ENGINEER

#### (a) General Provisions

Section 1301. Election of Township Engineer. Term. Filling of Vacancies. The board of commissioners on the first Monday of January in any even-numbered year, or as soon thereafter as may be practicable, may elect, by a vote of a majority of the members, one person as township engineer who shall be a registered civil engineer. He shall serve for a term of two years from the first Monday of January of the even-numbered year in or succeeding which he was elected, and until his successor qualifies. The board of commissioners shall fix the compensation of the engineer. Vacancies in the office of township engineer shall be filled by the board of commissioners for the unexpired term.

Section 1302. Bond. The township engineer shall give a bond to the township, with two or more sureties, or one trust or bonding company, to be approved by the board of commissioners, in such sum as it shall by ordinance direct, conditioned for the faithful performance of his duty.

Section 1303. Control of Engineering Matters. The township engineer shall have the superintendence, direction and control of the engineering matters of the township, and no department of the township shall employ or retain any additional engineer, except with the consent and ratification of the board of commissioners.

Section 1304. Duties. Preparation of Plans. The township engineer shall perform such duties as the board of commis-

sioners shall prescribe as to the construction, reconstruction, maintenance and repair of all streets, roads, pavements, sewers, bridges, culverts and other engineering work. He shall prepare plans, specifications and estimates of all such work undertaken by such township, and shall, whenever required, furnish the board of commissioners, and the committees thereof, with reports, information or estimates on any township engineering work, or on questions submitted by any of them in their official capacity.

Section 1305. Certificate of Commencement and of Completion of Municipal Improvements. The township engineer shall, immediately after the completion of any municipal improvement, the cost of which, in whole or in part, is to be paid by the owner of the abutting property, make certificate in which he shall state the day or time on which the particular improvement was completed, and shall file the same with the township secretary, who shall enter the said day or time of completion of the work in a book to be kept by him for said purpose; and the said day or time mentioned in said certificate shall be conclusive on all parties as to the time the said work was completed. The time of completion of the work, referred to in this section and in other parts of this act, shall be taken to mean the time of the completion of the whole contract for the improvement. He shall also furnish to the township secretary a certificate showing the time at which any such particular improvement was commenced, and such certificate shall be conclusive evidence of the time when the said improvement was begun; and an entry of such date shall be made by said secretary in the book aforesaid.

Section 1306. Surveys. The township engineer shall have the charge and direction of all surveys and regulations authorized by any act of assembly, or ordinance of such township.

#### (b) Real Estate Registry

Section 13010. Provisions for Registration of Real Estate. For the purpose of procuring accurate information in reference to the ownership of all real estate, the board of township commissioners may provide, by ordinance, for the registry thereof in the manner following.

Section 1311. Preparation of Books, Plans and Maps. The township engineer of any township in which such registry shall be established as aforesaid, shall cause to be made all such necessary books, maps and plans as will show the situation and dimensions of each property therein, which books, maps, or plans shall be so prepared as to show the house number, if any, the name of the owner or owners thereof, with blank spaces for the owner of each lot, with provision for the names of future owners, and dates of future transfer of title. For such purpose the township engineer shall have free access, without charge, to any of the public records wherein the necessary information may be obtainable therefor. He may also cause search to be made in any other place for any muniments or evidence of title, not reported to him as hereinafter provided, and requisite for the completion of such books, maps or plans.

Section 1312. Preservation of Records. The said books, maps and plans shall be carefully preserved in the office of the engineer of said township; and shall be so kept, by additions from time to time, or otherwise, as to show the ownership of every lot or piece of real estate, or subdivision thereof, within the township limits, with the successive transmissions of title, from the date of the commencement of such plans; but nothing therein or in this article shall invalidate any municipal or tax claim by reason of the fact that the same is not assessed or levied against the registered owner.

Section 1313. Certified Copies of Entries Admissible as Evidence. Certified copies, under the hand of the said engineer, of any of the entries in said books, or upon said maps or plans, shall be received in evidence in the same manner as the books, maps and plans themselves might be admissible for such purposes; and may be also furnished to any person desiring the same, for such fee or compensation for the use of the township as may be fixed by ordinance.

Section 1314. Duties Imposed on Owners of Real Estate When Registry Established. Penalty. All owners of unregistered real estate within the township limits, within one month from the date of the approval of the ordinance establishing such registry, and every subsequent purchaser, and every devisee or person acquiring title by partition or otherwise, to any real estate therein, within one month after acquiring such title, shall furnish to the said engineer, at his office descrip-

tions of their respective properties, upon blanks furnished by the township, and at the same time, present their conveyance to be stamped by said engineer, without charge, as evidence of the registration thereof. Any person or persons neglecting or refusing to comply with the provisions of this section, for a period of thirty days after public notice of the requirements thereof, shall be liable to a penalty of five dollars, to be recovered, with costs of suit, in the name and for the use of the township, as penalties for the violation of township ordinances are recoverable: Provided, however, That such registration may, within said thirty day period, be also effected by the Recorder of Deeds of the county in accordance with existing law.

Section 1315. Registry of Properties Sold at Judicial Sales. Duty of County Officers. Penalty. The sheriffs of the respective counties in which such townships are situated shall present for registry the deeds of all properties within the township limits sold by them at judicial sales, whether by execution, or in partition or otherwise.

## ARTICLE XIV

### POLICE

Section 1401. Appointment and Compensation of Policemen. The board of township commissioners shall fix, by ordinance or resolution, the number, rank and compensation of the members of the township police force. No policeman shall at the same time hold any public office other than constable and health officer. The board of commissioners shall prescribe all necessary rules and regulations for the organization of the police force.

Section 1402. Chief of Police and Other Officers. The board of commissioners may designate the superintendent or the chief of police and other officers, who shall serve until their successors are duly designated and qualified.

Section 1403. Powers of Policemen. Policemen shall be ex-officio constables of the township and may, without warrant and on view, arrest and commit for hearing any and all persons guilty of a breach of the peace, vagrancy, riotous or disorderly conduct or drunkenness, or who may be engaged in the commission of any unlawful act tending to imperil the personal security or endanger the property of the citizens, or violating any of the ordinances of the township for the violation of which a fine or penalty is imposed.

Section 1404. Service of Process. Fees. Policemen shall have authority to serve and execute all criminal process for the violation of the township ordinances, which may be issued by any justice of the peace of the township, and shall charge the same fees and costs as pertain by law to constables for similar services; but such fees and costs shall be paid to the township treasurer for the use of the township.

Section 1405. Supervision of Police. The chief of police and policemen shall obey the orders of the board of township commissioners or such other person or committee as may be designated by ordinance or resolution of the board for such purposes.

Section 1406. Keepers to Receive Prisoners. The keepers of jails, lockups and station-houses shall receive all persons arrested by policemen for the commission of any offense against the laws of the Commonwealth or the ordinances of the township.

Section 1407. Badge. The police, when on duty, shall wear a badge or shield with the words "Township Police" and the name of the township inscribed thereon.

Section 1408. Not to Receive Fees. Townships employing policemen shall pay to all such policemen a fixed or stipulated salary. It shall not be lawful for any such policemen to charge or accept any fee or other compensation, in addition to his salary, for any service rendered or performed by him of any kind or nature whatsoever pertaining to his office or duties as a policeman, except public rewards and the expenses incurred in the discharge of his duties.

Section 1409. Establishment of Police Pension Fund. Management. Townships may, by ordinance, establish a police pension fund to be maintained by an equal percentage charge against each member of the police force, not exceeding annually four per centum of the pay of such member. The fund shall be under the direction of the township commissioners or such committee as they may designate and shall be applied under such regulations as the commissioners may by ordinance prescribe for the benefit of such members of the

police force as shall receive honorable discharge therefrom by reason of age or disability and the families of such as may be injured or killed in the service. Any allowances made to those who are retired by reason of disability or age shall be in conformity with a uniform scale.

Section 1410. Minimum Service for Retirement. The ordinance, establishing the police pension fund, may prescribe a minimum period of continuous service, not less than twenty years and an age limit, after which members of the force may be retired from active duty, and may be entitled to benefits of such fund. Policemen so retired shall be subject to service as police reserves until unfitted for such service by reason of age or disability, when they may be finally discharged.

Section 1411. Retirement Allowance. The basis of the apportionment of the pension shall be determined by the rate of monthly pay of the member at the date of death, honorable discharge, or retirement, and shall not in any case exceed in any year one-half the annual pay of such member, computed at such monthly rate.

Section 1412. General Funds of Township not Liable. Payments made for retirement allowances shall be a charge on no other fund in the treasury of the township or under its control other than the police pension fund.

Section 1413. Township Appropriations. Gifts. Management. Any township may make contributions to the police pension fund and may take by gift, grant, devise, or bequest any money or property, real, personal or mixed in trust for the benefit of such police pension fund. The care, management, investment, and disposal of such trust funds or property shall be vested in such officers as the township commissioners shall by ordinance, direct and shall be governed by such officers, subject to any directions not inconsistent therewith, as the donors of such funds and property may prescribe. Any township may also make contributions to any incorporated police pension fund extending retirement benefits to police officers of the township, subject to such conditions as the township commissioners may impose.

Section 1414. Reasons for Denying Retirement Allowance. No person participating in such police pension fund established by ordinance, and becoming entitled to receive a benefit therefrom, shall be deprived of his rights, except for failing to comply with some general regulation relating to the management of such fund which may be made by ordinance and which provides that a failure to comply therewith shall terminate the right to participate in the pension fund, after such notice and hearing as it shall prescribe.

## ARTICLE XV

### CORPORATE POWERS

Section 1501. Suits. Property, Townships of the first class may—

I. Sue and be sued by the name of the township of .....

II. Acquire, hold, lease, let and convey such real and personal estate as the purpose of the township shall require. Such real and personal estate shall be taken and held only for the benefit of the inhabitants of the township, and for such objects and purposes as township rates and levies are authorized by law to be laid for.

Section 1502. The corporate power of a township of the first class shall be vested in the board of township commissioners. The board shall have power—

I. Ordinances and Resolutions. To adopt resolutions and ordinances prescribing the manner in which the powers of the township shall be carried out, and generally regulating the affairs of the township. All such ordinances, unless otherwise provided by law, shall be published at least once in one newspaper of general circulation in the township. Such ordinance shall not become effective until ten days after the publication aforesaid. In any case in which maps, plans or drawings of any kind are adopted as part of an ordinance, the commissioners may, instead of publishing the same as part of the ordinance, refer in publishing the ordinance to the place where such maps, plans or drawings are on file and may be examined.

II. Fines for Violation of Ordinances. To prescribe fines and penalties not exceeding three hundred dollars in any instance, for the violation of township ordinances, which fines and penalties may be collected by suit brought in the name of the township before any justice of the peace, in like manner as debts of like amount may be sued for by existing laws.

III. Officers, Positions and Departments. To create any office, position or department which may be deemed necessary for the good government and interests of the township; to fix the compensation of persons appointed thereto; and to employ the township assessor and any assistant township assessor to perform work for the township in connection with the assessment and valuation of property and occupations for taxation purposes, or to perform other work when not engaged for the county, and to fix their compensation payable by the township.

IV. Township Manager. To create, by ordinance, the office of township manager, and in like manner to abolish the same.

The powers, duties, term of office, and compensation of the township manager shall be regulated by ordinance. The commissioners may delegate, subject to recall, any of their respective non-legislative and non-judicial powers and duties to the township manager. He shall give a bond to the township, with one or more sureties, or one bonding company, to be approved by the commissioners, in such sum as it shall, by ordinance, direct, conditioned for the faithful performance of his duties.

V. Police Force. To establish, equip, and maintain a police force, and to define the duties of the same.

VI. Lockups and Commitments. To provide for the erection or purchase of lockups in the township for the detention and confinement of vagrants and persons arrested by the police officers, until the persons so arrested can be taken before a justice of the peace for hearing; but no person shall be detained therein for a longer time than twenty-four hours (Sunday excepted) except upon order of a justice of the peace legally authorized, who may commit any such person for further hearing.

VII. Committing Magistrate. To designate from time to time one of the justices of the peace to sit at the police station or town hall as a committing magistrate.

VIII. Vagrants. To arrest and confine, and to set to work on the roads or elsewhere, all vagrants found in the township.

IX. Disorderly Practices. To define and prohibit disorderly practices within the limits of the township.

X. Public Safety. To take all needful means for securing the safety of persons or property within the township.

XI. Road Implements. To purchase tools, implements, machinery, timber, and materials necessary for the making, paving, and repairing of streets, highways, side-walks and other public work; to employ sufficient number of laborers to make and repair the same and to lease or lend such tools, implements, and machinery to other townships, boroughs, or cities.

XII. Lights. To establish lights along the highways, including State and county highways, wherever deemed expedient, and on and along State highways and county highways, running through such townships. No such lights shall be established upon State highways until a permit has first been obtained from the State Department of Highways, or upon county highways until a permit has first been obtained from the county commissioners.

XIII. Lighting Tax. On the petition of the owners of a majority of the lineal feet frontage along any highway or portion thereof in any village within the township, to enter into contracts with electric, gas or other lighting companies to light and illuminate the streets, highways, and other public places in said village with electric light, gas light, or other illuminant.

The township commissioners may levy for the maintenance of said lights an annual special tax upon all the property, including factories and places of business, abutting upon said highways, based upon the assessment for county purposes. Such tax shall be collected in the same manner as other taxes. The township treasurer shall receive the same commission as on other township taxes. No such tax shall be levied against any farm land, but vacant lots between built-up sections, whether tilled or untilled, shall not be deemed to be farm lands. The township treasurer shall keep all such taxes collected for lighting the highways in a separate account and pay out the same only upon orders signed by the president or vice-president of the township commissioners, attested by the secretary or assistant secretary. The treasurer shall make a report to the auditor or controller of the township annually.

XIV. Water Supplies. To enter into contracts with any person or corporation to supply water for fire protection and other purposes for a period not exceeding twenty years. No

such contract shall be exclusive as against the right of any other water company, nor interfere with the right of such township to erect, maintain, and operate its own waterworks.

XV. Fire and Water Districts. Bond Issues and Taxes. To create by ordinance, fire and water districts in any portion or portions of townships when, in their opinion, the same is necessary for the safety and convenience of the inhabitants of said township, to issue bonds restricted to the districts so created, for the purpose of procuring and maintaining the necessary supply of water to said district, and to levy such special tax restricted to said district as may be necessary to redeem any bonds so issued. In lieu of the foregoing, provisions relating to the issue of bonds the township commissioners may charge for any such water supply by an assessment of a special water tax on all properties located in the water district, which tax shall be based on the assessment for county purposes as established for general taxation. Such tax may be levied for a single year or for a term of years as the township commissioners may determine, and shall be collected in the same manner as other taxes.

XVI. Fire Regulations. To make regulations as may be deemed proper relative to the cause and management of fires and the prevention thereof; to take measures for the extinguishment of fires, either by making annual appropriations towards the maintenance of fire companies or in such other manner as said board of commissioners may deem proper; to ordain rules and regulations for the government of such fire companies and their officers, and to regulate the method to be followed in the extinguishment of fires; to purchase and maintain apparatus for the extinguishment of fires; and to make rules and regulations for the management of same.

XVII. Fire Houses. To provide and maintain suitable places for the housing of engines, hose carts, and other apparatus for the extinguishment of fires. No such building shall be erected or maintained without obtaining the assent of the electors thereof, expressed at an election to be held at the place, time, and under the same regulations, as provided by law for holding of municipal elections. At such election the judges, inspectors, and clerks shall receive ballots from the electors, which shall be prepared in the manner prescribed by the general election law. In receiving and counting and in making returns of the votes cast the inspectors, judges, and clerks of said election shall be governed by the laws of this Commonwealth regulating municipal elections, and the vote shall be counted by the court as is now provided by laws for municipal elections. The constables of the township, by direction of the board of township commissioners, shall issue proclamation, ten days prior to date of the municipal election, stating that the qualified electors will vote "For or against a fire-engine house."

XVIII. Building Regulations. To make regulations for the construction of new buildings and the alteration and repair of old ones, and to require that before the work begins municipal approval of the plans and specifications therefor be secured; to classify buildings or parts of buildings according to the use to be made of them; to specify the mode of construction of such different classes of buildings; and to require that before any use of occupancy be changed from any classification to a different classification as to which more stringent regulations are prescribed under the provisions of any ordinance relating thereto, municipal approval of the plans and specifications therefor be secured.

Building Sanitation Regulations. In addition to other remedies provided by law, and in order to promote the public health, safety, morals, and the general welfare, to enact and enforce suitable ordinances to govern and regulate the construction, alteration, repairs, occupation, maintenance, sanitation, lighting, ventilation, water supply, toilet facilities, drainage, use and inspection of all buildings or parts of buildings constructed, erected, altered, designed, or used in whole or in part for human habitation, and of the sanitation and inspection of land appurtenant thereto. In case any building or structure is constructed, reconstructed, altered, repaired, converted, or maintained, or any building or land is used, in violation of any ordinance enacted under authority conferred hereby, the corporate authorities of the township in addition to the penalties provided by ordinances enacted herewithin, may institute appropriate actions or proceedings at law or in equity to prevent and restrain such unlawful construction, reconstruction, alteration, repairs, conversion, maintenance, or use, and to restrain, correct, or abate such violation and to prevent

the occupancy of said building or structure. The ordinances enacted pursuant to this clause shall not be inconsistent with the provisions of any statute governing the same matter; but all regulations prescribed by such ordinances, which are additional or supplementary to the statute law and not inconsistent therewith, or enacted for the purpose of carrying into effect the provisions of the statute law, shall be valid and binding.

XX. Building Inspectors. To provide for the inspection of the construction and repair of buildings, including the appointment of one or more building inspectors; to prescribe limits wherein none but buildings of noncombustible material and fireproof roofs shall be erected or substantially reconstructed or removed thereinto; to provide penalties for the violation of such regulations. Any building erected, reconstructed, or removed contrary to the provisions of any ordinance passed for any of the purposes herein specified, is declared to be a public nuisance and abatable as such.

XXI. Building Lines. To establish, by ordinance, and maintain uniform building lines upon any or all public streets, roads, highways, lanes and alleys of the township.

XXII. Numbering Buildings. To provide for and regulate the naming of streets, courts and public squares; and to require and regulate the numbering of buildings.

XXIII. Insurance. To make contracts with any fire insurance company, including mutual companies, insuring any building or property of the township; to make contracts with any insurance company insuring any public liability of the township; to expend public funds to secure workmen's compensation insurance for the benefit of its employees, including volunteer firemen killed or injured while going to or returning from or attending fires within the township or territory adjacent thereto; and to enter into contracts of group insurance for the benefit of its employees.

XXIV. Markets, Market Houses and Peddling. To provide and enforce regulations for markets and market houses, whether for individual use or for sale or resale; and to acquire and own ground for and to erect, establish and maintain market houses and market places, for which latter purposes, parts of any streets or sidewalks may be temporarily used as specified by the township commissioners; to contract with any person, firm or corporation for the erection, maintenance and regulation of market houses and market places on such terms and conditions, and in such manner as the board of commissioners may prescribe; to provide for the payment of the cost and expense of providing markets and market houses, either in whole or in part from township funds; and to levy and collect a license tax from every person who may be authorized to occupy any portion of said market houses or places.

XXV. Milk Inspection. To provide for the inspection of milk and milk products; and to make regulations concerning the character and kind of milk which may be sold.

XXVI. Nuisances. To make regulations, respecting pigpens, slaughterhouses, manure pits, drains, dumps, cesspools, and similar conditions, and to prohibit and remove any noxious or offensive manufacture, art or business or dangerous structure or weeds or any other nuisance whatsoever on public or private grounds, prejudicial to the public health or safety, or to require the removal of the same by the owner or occupier of such grounds, in default of which the township may cause the same to be done and collect the cost thereof, together with a penalty of twenty per centum of such cost in the manner provided by law for the collection of municipal claims, or by action of assumpsit without the filing of a claim.

XXVII. Garbage and Rubbish. To prohibit accumulations of garbage and rubbish upon private properties; and to provide, by contract or otherwise, for the collection, removal and disposition, through incinerating works, garbage plants or otherwise, of ashes, garbage, and rubbish. Any such contract may be made for a period not exceeding three years.

XXVIII. Inflammable and Explosive Articles. To prohibit the manufacture, sale or exposure of fireworks and other inflammable and explosive articles; to prescribe the quantities of inflammable and explosive articles that may be kept in any place; and to prescribe such other safeguards as may be deemed necessary.

XXIX. Smoke Regulations. To regulate the emission of smoke from chimneys, smokestacks and other sources, except locomotive smokestacks.

XXX. Animals. To prohibit or regulate the running at large of animals.

XXXI. Amusements. To regulate, license and prohibit shows, circuses, sports and amusements of all sorts.

XXXII. Party Walls and Fence Regulations. To make regulations respecting foundations, party walls and partition fences; and to prescribe reasonable fees for the services of its officers and agents in the adjustment of party walls, partition fences and the like, and to enforce payment of the same.

XXXIII. Watering Troughs. To erect watering troughs along the highways, at an expense not exceeding twenty dollars each, and to keep the same in repair.

XXXIV. Motor Ambulances. To acquire and to operate and maintain a motor ambulance for the purpose of conveying sick and injured persons of such municipality and the vicinity to and from hospitals, and, for such purposes, to appropriate and expend moneys of the township.

XXXV. Display of Flags. To display the flag of the United States, of the Commonwealth of Pennsylvania, and of any county, city, borough or township on the public buildings or any property of the township.

XXXVI. Memorial Day Appropriations. To appropriate moneys for the expenses of Memorial Day services.

XXXVII. Care of Memorials. To maintain and keep in good order and repair at the expense of the township, and it shall be their duty so to do, any soldiers' monument, gun, or carriage or other similar memorial when there is not in existence any person, body or organization to care for and maintain the same, and when such memorials were not erected by the government of the United States, the Commonwealth of Pennsylvania, any other state, or by the commissioners of any county; and to receive from persons or organizations, funds for such purposes.

XXXVIII. Soldiers' Cemeteries. To purchase plots of ground in any cemetery or burial ground, for the interment of such deceased service men, who shall hereafter die within such township, or shall die beyond such township and shall have a legal residence within such township at the time of their death, and whose bodies are entitled to be buried by the county under the provisions of existing laws. Such plots of ground shall be paid for out of the treasury of such township.

XXXIX. Appropriations to Civic Associations. To annually appropriate a sum not exceeding two hundred dollars for the support of any voluntary association composed of electors of the several townships within such county, or any of them, which association is formed for the study and investigation of the welfare, economics, management, and government of townships, and for the protection and safeguarding of the rights and franchises of townships, and for the purpose of recommending legislation beneficial to townships, or any one or more of such purposes.

XL. Armory Buildings. To appropriate moneys or convey land, either independently or in connection with any county, city, town, borough, or township to the Commonwealth of Pennsylvania, for the purpose of assisting the Armory Board of the Commonwealth in the erection of armories for the use of the National Guard, and to furnish water, light, or fuel, free of cost to the Commonwealth for use in any armory, and to do all things necessary to accomplish the purpose of this clause.

XLI. Land for Armories. To take by right of eminent domain, for the purpose of appropriating to themselves, for the use of the National Guard of Pennsylvania, such public lands, easements, and public property as may be in their possession or control, and used or held by them for any other purpose. Such right, however, shall not be exercised as to any street or highway or wharf, but all other public easements and property may be appropriated and used for the purpose herein provided, any limitation of the use thereof by the township, either by donation, dedication, appropriation, statue, or otherwise, to the contrary notwithstanding.

XLII. Land for Armory Purposes. To acquire, by purchase or by gift or by the right of eminent domain, any land for the use of the National Guard of Pennsylvania, and to convey such lands so acquired to the Commonwealth of Pennsylvania to assist the Armory Board in the erection of armories. The proceedings for the condemnation of lands under the provisions of this act, and for the assessment of damages for property taken, injured, or destroyed shall be taken in the same manner as is now provided by this act for the condemnation of lands. The power conferred by this clause shall not be exercised to take any church property, graveyard, cemetery, or any

dwelling house, or the curtilage of the same, in the actual occupancy of the owner.

XLIII. Junk Dealers, Pawnbrokers, Auctions, Etc. To regulate and license junk dealers, pawnbrokers, hucksters, peddlers, vendors, and public auctions and auctioneers.

XLIV. Fire Prevention. To take measures for the prevention of fires by inspecting, regulating, and abating fire hazards.

XLV. Comfort and Waiting Stations and Drinking Fountains. To acquire property for the purposes of providing, maintaining and operating thereon comfort and waiting stations and drinking fountains; and to construct and maintain such stations and fountains in any of the highways of the township.

## ARTICLE XVI

### PUBLIC HEALTH

#### (a) Boards of Health

Section 1601. Appointment of Boards of Health and Health Officers. The administration of the health laws in townships shall be enforced by a board of health, or by a health officer or officers, as the case may be, appointed by the township commissioners.

Where township commissioners elect to appoint a health officer or officers, the said health officer or officers shall have the same powers and duties, and exercise the same authority, as is now prescribed for boards of health in townships. All health officers, whether appointed by boards of health or township commissioners, shall have had some experience or training in public health work in accordance with rules and regulations established by the advisory health board of the State Department of Health. Such health officers shall not enter upon the performance of their duties until they are certified so to do by the Secretary of Health of the State Department of Health.

Section 1602. Members of Board. Terms. Secretary. Where the township commissioners decide to appoint a board of health said board shall be composed of five members, at least one of whom shall be a reputable physician of not less than two years' experience in the practice of his profession; one resides within the township. The members of the board shall be appointed by the township commissioners. At the first appointment, one member shall be appointed to serve for one year, one for two years, one for three years, one for four years, and one for five years; and thereafter one member shall, in like manner, be appointed each year, to serve for five years. The members of the board of health shall serve without compensation: Provided, however, if any member of the board shall be elected to the office of secretary, he shall be entitled to receive a salary, fixed by the board for that office.

Section 1603. Organization of Board. Salary of Secretary. Bonds of Members. Fees and Penalties. Power to Administer Oaths. The members of the board shall, severally, take and subscribe to the oath prescribed for township officers; and shall annually organize by electing a president from among the members of the board, a secretary who may or may not be a member of the board, and a health officer who shall not be a member of the board. The secretary and the health officer shall receive such salary as may be fixed by the board, and ratified by the board of commissioners of the township, and shall serve for a period of one year, or until such time thereafter as their successors may be elected and qualified. They shall severally give bond to the township, in such sums as may be fixed by ordinance, for the faithful discharge of their duties, and shall also take and subscribe to the oath required by members of the board.

All fees which shall be collected or received by the board or by any officer thereof in his official capacity, shall be paid over into the township treasury monthly, together with all penalties which shall be recovered for the violation of any regulation of the board. The president and secretary shall have full power to administer oaths or affirmations in any proceeding or investigation touching the regulations of the board, but shall not be entitled to receive any fee therefor.

Section 1604. Duties of Secretary. The secretary of the board shall keep the minutes of their proceedings; shall keep accurate accounts of the expenditures of the board; shall transmit all bills to the board of township commissioners for payment in the same manner as other bills of the township are paid; shall render statements of the expenditures of the board at each stated meeting or as frequently as they may re-

quire; shall prepare, under the directions of the board, the annual report to the township commissioners, together with the estimate of appropriation needed for the ensuing year; shall report to the State Department of Health at the end of each week, and for the fraction of each week occurring at the end of each month, the cases of communicable disease reported to the board of health, on the form provided for that purpose by the State Department of Health; shall also make an annual report to the State Department of Health; and shall make such other reports and perform such other duties as the board of health may require.

Section 1605. Duties of Health Officer. It shall be the duty of the health officer to attend all stated and special meetings of the board of health, and at all times be ready and available for the prompt performance of his official duties. He shall placard and quarantine all premises upon which cases of communicable disease exist, which have been reported to the board of health or of which he or the board of health may have knowledge, which are required, by law, or by regulation of the State Department of Health or of the local board of health, to be placarded and quarantined; and shall disinfect such premises upon the expiration of the quarantine period, and the recovery of the last person therein suffering from such disease. He shall serve written notice on teachers and persons in charge of public, parochial, Sunday, and other schools, requiring the exclusion from school of children who are suffering from or who reside in the same premises with other persons who are suffering from communicable diseases; shall make sanitary inspection; shall execute the orders of the board of health; and shall in the performance of his duties have the power and authority of a policeman.

Section 1606. Powers of Board of Health. The said board of health shall have the power, and it shall be their duty, to enforce the laws of the Commonwealth, the regulations of the State Department of Health, and any ordinances of the township relating to health work, and to make and enforce such additional rules and regulations to prevent the introduction and spread of infectious or contagious diseases, by the regulation of intercourse with infected places, by the separation of infected persons, and persons who shall have been exposed to any infectious or contagious disease, and by abating and removing all nuisances which it shall deem prejudicial to the public health; to mark infected houses or places, to prescribe rules for the construction and maintenance of house drains, wash pipes, soil pipes and cesspools; and make all such other rules and regulations as they shall deem necessary for the preservation of the public health, and such other powers relating to health work as may be delegated by the township commissioners. The board shall also have power, with the consent of the township commissioners, in case of a prevalence or apprehended prevalence of any contagious or infectious diseases in its township, to establish one or more emergency hospitals, and to make provisions and regulations for the maintenance and management of the same.

The board shall also have the power to make, enforce, and cause to be published, all necessary rules and regulations for carrying into effect the powers and functions with which they are invested by law, and the power and authority relating to the public health conferred on townships. Such rules and regulations, when approved by the township commissioners, and when advertised in the same manner as other ordinances, shall have the force of ordinances of the township. All penalties or punishments prescribed for the violation thereof, as well as the expenses actually and necessarily incurred in carrying such rules and regulations into effect, shall be recoverable, for the use of the township in the same manner as penalties for violation of the ordinances of the township, and subject to the like limitations as to the amount thereof.

Section 1607. Entry of Premises. The board of health shall have the power, as a body or by committee, as well as the health officer, together with their assistants, subordinates, and workmen, under and by order of the said board, to enter at any time upon any premises in the township upon which there is suspected to be any infectious or contagious disease, or nuisance detrimental to the public health, for the purpose of examining and abating the same, and for any other purpose arising in connection with or in the performance of their duties.

Section 1608. Inspections. The board of health may inspect house drains, waste and soil pipes, cesspools, water-closets, slaughterhouses, hogpens, stables, stable yards, and any condi-

tions or places whatsoever, in the township, which may constitute a nuisance or a menace to public health. Whenever any condition or place in the township is found by them to be a nuisance or a menace to the health of the people of the township, they shall issue a written order of abatement, directed to the owner, or agent of the owner of the premises, or to the occupant thereof, stating that the conditions specified therein constitute a nuisance or a menace to health, and ordering an abatement thereof within such time as may be specified by them in such order. In case such order of abatement is not obeyed within the time specified therein they shall thereupon issue a further written order to the health officer, directing him to remove or abate the same; which order shall be executed by him and his subordinates and workmen, and the expense thereof shall be recoverable from the owner of the premises upon or from which the nuisance or menace to health is abated or removed, in the same manner as debts of like character are now collected by law; or the said board of health may proceed to enforce such other remedy, or inflict such penalty, as may by ordinance of the township, be provided.

Section 1609. Budget. Appropriations. It shall be the duty of the board of health or appointed health officer or officers to submit annually, to the township commissioners, before the commencement of the fiscal year, an estimate of the probable expenditures of the board during the ensuing year; and the township commissioners shall then proceed to make such appropriations as may be deemed necessary; and the said board of health, health officer or officers, shall, in the month of January of each year, submit a report, in writing, to the township commissioners, of its appropriation and expenditures for the preceding year, together with such other information on subjects relative to the sanitary conditions or requirements of the township as may be necessary, and council or township commissioners shall publish the same in their official journal.

Section 1610. Co-operation in Health Work. Any township may co-operate with the county, or with any city, borough, township or school district, as well as with the State Department of Health, in the administration and enforcement of health laws.

Section 1611. Powers of Secretary of Health. Whenever, in the opinion of the Secretary of Health of the Commonwealth, conditions found by him to exist in any township shall constitute a menace to the lives and health of people living outside the corporate limits of such township, or if it be known to him that any township is without an existing or efficient board of health, or health officer or officers, the Secretary of Health may enter, and take full charge of, and administer the health laws, regulations, and ordinances in such township, and may continue in charge thereof until he shall decide that a competent and efficient board of health, or health officer or officers, has been appointed and qualified for such township, and is ready, able and willing to assume and carry into effect the duties imposed upon it by law.

Section 1612. Expenses Incurred by Board or Secretary of Health. All expenses incurred by any local board of health, its officers or employees, in the performance of the duties imposed upon it by law, and all expenses incurred by the Secretary of Health in accordance with the provisions of the preceding section, shall be paid by the township wherein such duties are performed, in the same manner as other expenses of such township are paid.

Section 1613. Suits by State Secretary of Health to Recover Expenses. Whenever expenses incurred by the State Secretary of Health in the administration of health laws in any township, in accordance with the provisions of this act, shall remain unpaid by said township for a period of more than three months after a statement of such expense has been rendered by him to such township, and demand for payment by him made, he shall, with the approval of the Governor, institute, in the name of the Commonwealth as plaintiff, an action of assumpsit against such township, for the collection of such expense from the township, in the same manner as debts of like amount are collected by law. Provided, however, That, upon the trial of any such action of assumpsit, the reasonableness of the expenditures made by the Secretary of Health shall be submitted to the jury for its determination.

Section 1614. Payment of Expenses Recovered Into State Treasury. All expenses incurred by the State Secretary of Health in the administration of health laws in any township, when paid to him by such township, or when collected by

him, shall be returned by him to the State Treasurer, who shall credit the amount so received to the appropriation made to the Department of Health.

(b) Vacation of Lanes and Alleys Declared Nuisances by Board of Health

Section 1620. Petitions to Vacate Nuisances. Whenever the board of health shall declare as a nuisance any public alley, lane, or passageway, any two or more owners of property adjacent or abutting upon the same may present their petition, verified by oath or affirmation, to the court of quarter sessions, setting forth the facts regarding such nuisance and praying that said alley, lane, or passageway may be vacated. Such petition shall be accompanied by a certificate of the board of health, setting forth that they have declared such alley, lane, or passageway to be a public nuisance.

Section 1621. Jury of View. The court shall thereupon appoint a jury of view of three men of the county. The jury, being sworn or affirmed to faithfully perform its duties, shall give notice to all parties likely to be affected by the proceedings, of the time and place of the first meeting, in such manner as the court shall direct.

Section 1622. Hearings and Report. After the first meeting, the jury shall proceed to view the premises, hear all parties, interested and their witnesses, and shall prepare a report of finding and recommendations as to whether or not such alley, lane, or passageway, or part thereof, should be vacated; and in such report shall award damages and assess benefits to the property affected.

Section 1623. Notice of Filing Report. The jury shall give notice, in writing, to all parties affected by their report, at least ten days before the same is filed in court. The notice shall state the time and place where such report will be open to inspection.

Section 1624. Exceptions to Report. Any person aggrieved by such report may file exceptions thereto with the jury, whereupon the jury shall reconsider their report, with the exceptions, and change the same as justice may require. The report as finally prepared shall be filed in court.

Section 1625. Appeals From Report. Any person affected by the report shall have the right of an appeal to the court of common pleas, within thirty days after the report is filed, and the procedure on such appeal shall be the same as in actions of trespass.

Section 1626. Confirmation of Report. At the end of the period allowed for an appeal, the report shall be absolutely confirmed by the court as to such awards or assessments from which no appeals have been taken.

Section 1627. When Vacation Proceedings Not To Be Had. No alley, lane, or passageway shall be vacated in any case where the vacating deprives any lot abutting thereon of the sole means of ingress or egress, otherwise than to or from the front line thereof; nor where it was created by grant or contract and not theretofore accepted by the public.

## ARTICLE XVII

### FINANCE AND TAXATION

Section 1701. Budget. The board of township commissioners of townships shall each year, within sixty days after the first Monday of January, estimate the several amounts of money which will be required for the several specific purposes of township government and expenses during the current fiscal year, and by ordinance appropriate, out of the revenues available for the year, the specific sums required. The tax levied by the township authorities shall be fixed at such figure, within the limit fixed by law, as, with all other sources of revenue, will meet and cover said appropriations. The total appropriation shall not exceed the revenues available for the fiscal year. If the funds available from taxation and other sources shall be estimated to be in excess of the requirements of the current fiscal year, and appropriation may be made for the payment of township orders or indebtedness of the previous years.

Section 1702. Appropriations Not To Be Exceeded. Changes in Appropriations. No work shall be hired to be done, no materials purchased, no contracts made, and no orders issued for the payment of any moneys, by the authorities of any township, in any amount which will cause the sums appropriated to specific purposes to be exceeded. No change in the purpose of the appropriations shall be made, unless by an ordinance, which shall set out the reasons for and character of such change. If any work shall be done for, or materials

furnished to any township contrary to the provisions of this section, the township commissioners are hereby prohibited from authorizing payment therefor as a moral obligation or otherwise, unless ordered or directed so to do by the court of common pleas or the court of quarter sessions of the county in which such township is situate.

Section 1703. Certain Contracts, Etc., Invalid. No contracts, hirings, or purchases made, or orders or warrants issued, not provided for by an appropriation by the township commissioners as is required by law, or which would cause any appropriation to be exceeded, shall be valid.

Section 1704. Power to Create Indebtedness. Sinking Fund. Temporary Indebtedness. The board of township commissioners may, by ordinance, borrow money and issue evidences of indebtedness therefor to the extent, and in the manner, in which municipal districts are now authorized to incur or increase the same, for the purpose of permanent improvements, but the total indebtedness so created shall not exceed two per centum of the county valuation of the property within the township without the assent of the electors of the township. The rate of interest on such indebtedness shall not exceed six per centum. In authorizing the issue of obligations or securities for such loans, the township commissioners shall provide that moneys subsequently derived from assessments upon parties benefited by such improvements shall be deposited in the sinking fund for the payment of the principal and interest of said obligations or securities.

Whenever the township funds have been exhausted the township commissioners may borrow, on the credit of the township, money in anticipation of taxes levied and to be collected for the current fiscal year and issue a certificate of indebtedness payable on a certain date not exceeding one year from the date of issue, to the end that work may be performed in proper season.

Section 1705. Sinking Fund. Regulations and Investments. It shall be the duty of the board of commissioners to cause accounts of the sinking fund and other accounts relating to the indebtedness of the township to be kept; and to see to the proper application and superintend the investment of moneys therein in accordance with law. The commissioners shall meet as often as may be necessary, and keep a record of the proceedings. The board of commissioners shall not direct the investment of any moneys to the credit of the sinking fund, except in loans of the township, the loans of the Commonwealth, or the loans of the United States, and the income derived from such investments or on any bank balances credited to the sinking fund shall be credited and applied only to the sinking fund.

Section 1706. Indebtedness and Orders of Previous Years. No orders or indebtedness of any previous years shall be paid out of the funds of any fiscal year, unless the funds available from taxation and other sources shall be estimated to be in excess of requirements for the current fiscal year, in which case an appropriation may be made for such purpose to the extent of such excess, or unless after the close of the fiscal year, it shall be ascertained that the funds appropriated and available therefor are in excess of the amount required, in which case, such surplus may be applied to such former orders of indebtedness.

Section 1707. Sale of Securities. When any township shall borrow money and issue bonds or other securities therefor, except in the case of the giving of notes for temporary loans as may be authorized by law, the commissioners shall sell the same to the highest bidder after public notice by advertisement once a week for three weeks, in at least one newspaper of general circulation published in the county in which such township shall be situated. No bid for such bonds or securities at less than their par value shall be accepted. Where bonds and securities shall be advertised for sale, as provided in this section, and no bids have been received, then it shall be lawful for such township to sell the same at private sale for not less than par and accrued interest.

Section 1708. Disbursements to Pay Indebtedness. All disbursements in discharge of township indebtedness duly incurred shall be made by the township treasurer or his deputy, by virtue of warrants or orders drawn on him by the order of the board of township commissioners, signed by the president or vice-president and attested to by the secretary or assistant secretary of the board. The board shall prescribe by ordinance the manner in which bills for township indebtedness shall be approved for payment.

Section 1709. Tax Levies. The board of township commissioners may levy taxes upon all property and upon all occupations within the township made taxable for township purposes, as ascertained by the valuation for county purposes made by the assessors of the several counties of this Commonwealth for the year for which the township taxes are levied, for the purposes and at the rate hereinafter specified: Provided, however, That such valuation shall be subject to correction by the county commissioners of the several counties, and to appeal by the taxable persons in accordance with existing laws.

One. An annual tax for general township purposes, not exceeding ten mills, unless the board of township commissioners by majority action shall, upon due cause shown by resolution, petition the court of quarter sessions, in which case the court may order a rate of not more than five mills additional to be levied: Further provided, That if, at the hearing before the court of quarter sessions upon said petition, of which notice shall be given as the court may direct which hearing shall be held not less than ten nor more than fifteen days after said petition shall be presented, the owners of real estate having assessed valuation of fifty per centum of the total assessed valuation of real estate in said township shall, by petition, object to the making of an order for any additional tax levy, the court shall thereupon deny the prayer of said petition.

Two. A tax for the purpose of building and maintaining suitable places for the housing of fire apparatus; the receipts from said tax for maintenance to be divided among the places maintained.

Three. An annual tax, not exceeding one-tenth of one mill, for the purpose of caring for trees planted under the supervision of the shade-tree commission, and for the purpose of publishing notices of meetings to consider the planting, removing, or changing of trees. In lieu of the tax provided for in this clause, the township commissioners may, by specific appropriation, provide for the maintenance of such trees from the general funds of the township.

Four. An annual tax so long as necessary not exceeding fifty per centum of the rate of assessment for township purposes, for the purpose of procuring a lot and/or erecting a building thereon for a townhouse, and for the payment of indebtedness incurred in connection therewith: Provided. The total indebtedness for the payment of which any such tax shall be levied shall not exceed one-half of one per centum of the assessed value of real estate in the township.

Five. An annual tax sufficient to pay interest on indebtedness and sinking fund charges.

This section does not include the levy of any taxes upon particular districts, or parts of any township for particular purposes, nor special levies otherwise provided for in this act.

Section 1710. Tax Rates to be Expressed in Dollars and Cents. Whenever the commissioners of any township shall, by ordinance, fix the rate of taxation for any year at a mill rate, such ordinance shall also include a statement expressing the rate of taxation in dollars and cents on each one hundred dollars of assessed valuation of taxable property.

Section 1711. Special Levies to Pay Indebtedness. In addition to the levies hereinbefore provided for, when it is shown to the court of quarter sessions that the debts due by any township exceed the amount which the township commissioners may collect in any year by taxation, the court, after ascertaining the amount of indebtedness of any such township, may by a writ of mandamus direct the township commissioners, by special taxation, to collect an amount sufficient to pay the same. If the amount of such indebtedness is so large as to render it unadvisable to collect the same in any one year, taking into consideration other necessary taxation, the court may direct the same to be levied and collected by annual instalments, and may order such special taxes to be levied and collected during such successive years as may be required for payment of the same.

Section 1712. Delivery of Duplicates. As soon as possible after the receipt of the duplicate from the county commissioners, the board of township commissioners shall deliver a duplicate of the assessment of township taxes to the township treasurer, together with their warrant for the collection of the same.

Section 1713. Public Notice of Delivery of Duplicate. As soon as possible after the receipt of the duplicate, the treasurer shall give public notice thereof by at least ten written

printed notices, to be posted in public places in the township, and by advertisement in a newspaper of general circulation in the township, if any such there be, that the duplicate has been issued and delivered to him.

Section 1714. Tax Notices. Duties of Treasurer. The township treasurer, within thirty days after receiving the tax duplicate, shall notify every taxable whose name appears on such duplicate. Such notice shall contain the rate of taxation, the valuation of the property of such taxable, the occupation of such taxable, and the full amount of taxes for which said taxable is liable for the current year. Such notice shall further state that such taxes are payable, designate a place and time when they shall be paid, and when an additional percentage will be added as penalty. Such notice shall be mailed to the last known post office address on each taxable.

Before any allowance is made by the township auditor or controller for commissions due to the township treasurer for taxes collected, the treasurer shall make an affidavit setting forth that he has sent such notice to each taxpayer.

Section 1715. Penalties. All persons who fail to make payment of any tax charged against them in the duplicate within the period of sixty days from the date of notice thereof by the township treasurer, shall be charged with a penalty of two per centum additional on the amount of tax and thereafter an additional penalty of one per centum for each month, or fractional part thereof, during the remainder of the fiscal year for which the tax is levied, which penalties shall be added to the tax by the treasurer, and collected by him or his deputy.

Section 1716. Collection of Taxes. The treasurer shall proceed to collect all taxes from the taxpayers, and to that end may appoint one or more deputy collectors. The treasurer and his deputies shall have and exercise all powers conferred by existing laws on collectors of county and township taxes.

Section 1717. Expenses of Collector. The township treasurer may retain, out of the taxes collected, such actual printing and postage expenses as shall be incurred in performing the duties prescribed in this article. Such amounts shall be adjusted by the township auditor or controller, as the case may be, at the time of auditing the treasurer's accounts.

Section 1718. Exonerations. The township commissioners shall at all times make abatements or exonerations for occupation taxes, mistakes, indigent persons, unseated lands, deaths, removals, et cetera, as to them shall appear just and reasonable. The township secretary shall enter in a book or books, to be kept for that purpose, the names of all persons abated or exonerated, together with the reason why, the amount of the tax, and date when levied, and give to the treasurer a certificate stating the nature of the tax and the amount exonerated.

Section 1719. Audit of Collectors' Accounts. The accounts of collectors of taxes shall be audited by the township auditors or controller, as the case may be. The treasurer shall state a separate account for each different tax collected by him.

## ARTICLE XVIII

### CONTRACTS

Section 1801. Power to Make Contracts. Townships shall have power to make such contracts as may be necessary for carrying into execution the provisions of this act and the laws of the Commonwealth.

Section 1802. General Regulations Concerning Contracts. All contracts or purchases made by any township, involving the expenditure of over five hundred dollars, shall be in writing, and shall be made only after notice by the secretary, published once a week for two weeks in one or more newspapers of the county circulating in the township. All plans and specifications shall be on file at least fifteen days in advance of opening bids. This section shall not apply in the case of any township repairing its public highways, except as to any purchases of materials or equipment for the purpose of such repairs.

In every instance in which any contract for any public work, construction, materials, supplies, or other matters or things, for any township, shall be awarded upon competitive bids, it shall be the duty of the authorities authorizing the same to award said contract to the lowest responsible bidder. Any published notice for bids shall contain full plans and specifications, or refer to the places where copies thereof can be obtained, and give the time and place of meeting of the township commissioners at which meeting bids shall be

publicly opened and read. If, through lack of a quorum or other reason, no meeting shall be held at such time and place, notice of the same kind shall be repeated once at least six days before the meeting of the subsequent time and place fixed, and the foregoing provisions as to bids shall apply. The same course shall be pursued until a meeting shall actually be held for receiving and opening bids. Any contract made in violation of the provisions hereof shall be void.

Section 1803. Patented Articles. The authorities of townships shall not be required to prepare specifications and advertise for the purchase of articles or parts thereof which are patented products, apparatus or appliances nor in such cases shall they be required to exact a bond; Provided, That this section shall not apply to road materials.

Section 1804. Contracts for Protection of Labor and Materialmen. It shall be the duty of all townships, in the erection, construction and/or repair of any public work or improvement of any kind whatsoever to require of the contractor or contractors, employed in or about said works or improvements, and additional bond, with sufficient surety or sureties, providing for the payment of all labor and material entering into the said works or improvements.

The labor and materialmen furnishing labor and material in and for said works or improvements, upon the contract of said contractor, shall have the right according to law to sue in an action of assumpsit, in the name of the obligee for his or their use, upon said bond, upon proof of said contractor's failure to pay for said labor or material.

Section 1805. Separate Specifications for Branches of Work. In the preparation of specifications for the erection or alteration of any public building, when the entire cost of such work exceeds one thousand dollars, the architect, engineer, or person preparing such specifications shall prepare separate specifications for the plumbing, heating, ventilating, and electrical work, and the township shall receive separate bids upon each of such branches of work, and award the contract for the same to the lowest responsible bidder.

Section 1806. Workmen's Compensation Insurance. All contracts executed by any township, which involve the construction or doing of any work involving the employment of labor, shall contain a provision that the contractor shall accept, in so far as the work covered by any such contract is concerned, the provisions of the Workmen's Compensation Act of 1915, and any supplements or amendments thereto, and that the said contractor will insure his liability thereunder, or file with the township, with which the contract is made, a certificate of exemption from insurance from the Bureau of Workmen's Compensation of the Department of Labor and Industry.

Every officer of any township who shall sign, on behalf of the township, any contract requiring in its performance the employment of labor, shall require, before the said contract shall be signed, proof that the said contractor with whom the contract is made shall have accepted the Workmen's Compensation Act of 1915, and any supplements or amendments thereto, and proof that the said contractor has insured his liability thereunder in accordance with the terms of the said act, or that the said contractor has had issued to him a certificate of exemption from insurance by the Bureau of Workmen's Compensation of the Department of Labor and Industry.

Any contract executed in violation of the provisions of this act shall be null and void.

Section 1807. Engineers and Architects Not to Be Interested in Contracts. It shall be unlawful for any architect or engineer, in the employ of a township, and engaged in the preparation of plans, specifications or estimates, or for any officer or employe of the township directly or indirectly, to bid on any public work at any letting of such work in such township.

It shall be unlawful for the officers of a township, charged with the duty of letting any public work, to award a contract to any such architect, engineer, officer or employe in the employ of the township.

It shall be unlawful for any architect, engineer, officer or employe, in the employ of any township, to be in any wise interested in any contract for public work in such township or to receive any remuneration or gratuity from any person interested in such contract.

Any person or persons violating these provisions, or any one of them, shall forfeit his office, and shall be guilty of a misdemeanor, and, on conviction thereof, shall be sentenced to

pay a fine not exceeding five hundred dollars, or to undergo imprisonment of not less than six months, or both, in the discretion of the court.

## ARTICLE XIX

### EMINENT DOMAIN; ASSESSMENT OF DAMAGES AND BENEFITS

#### (a) General Provisions Relating to Eminent Domain

Section 1901. Scope of Article. Whenever, under the provisions of this act, the right of eminent domain and/or the ascertainment and assessment of damages and benefits in viewer proceedings is provided for, the proceedings shall be as set forth in this article.

Section 1902. Restrictions as to Certain Property. In addition to the restrictions made by other provisions of this act in particular cases, no township shall exercise right of eminent domain as against land now occupied by any building which was used during the Colonial or Revolutionary period as a place of Assembly by the Council of the Colony of Pennsylvania, the Supreme Executive Council of the Commonwealth of Pennsylvania, or the Congress of the United States; or as against the land occupied by any fort, redoubt, or blockhouse, erected during the Colonial or Revolutionary period, or any building used as headquarters by the Commander-in-Chief of the Continental Army; or as against the site of any building, fort, redoubt, blockhouse, or headquarters, which are preserved for their historic associations and not for private profit. The Colonial and Revolutionary period shall be taken as ended on the third day of September, one thousand seven hundred and eighty-three.

Section 1903. Possession of Property Upon Tender of Bond. Whenever, in any condemnation proceeding, any township has tendered a bond to secure the payment of damages, and the same has been filed in, and approved by the court, the township shall have the right to immediate possession of the property.

Section 1904. Notice to Quit; Possession; Procedure. If the owner, lessee, or occupier shall refuse to remove his personal property or give up possession, the township may serve written notice upon such owner, lessee, or his agent, or the occupier to remove his personal property and give up, possession of such property, within sixty days from the date of the service of such notice.

If the owner, lessee, or occupier shall refuse to remove his personal property and give possession, upon proof of the service of the notice, a writ of habere facias possessionem shall forthwith issue, directing the sheriff to give to the township possession.

Section 1905. Bond of Township Without Surety Sufficient. Whenever any court shall order any township to enter security for the payment of damages for the taking, injury, or destruction of land, property or materials by right of eminent domain, the bond of the township shall be taken without sureties.

Section 1906. Value of Land not to be Assessed as Benefits; Exceptions. In all cases of the appropriation of land for public use, other than for roads or streets, it shall not be lawful to assess any portion of the damage done to or value of the land so appropriated, against the other property adjoining or in the vicinity of the land so appropriated.

Section 1907. Right to Damages. The right to damages against townships is given to all owners or tenants of lands, property, or material abutting on, or through which pass, roads, streets, lanes, or alleys, injured by the laying out, opening, widening, vacating, extending, or grading of such roads, streets, lands, or alleys, or the changing of the grades or lines thereof, by such townships; the construction and the vacation by such townships of bridges and piers, abutments, and approaches therefor, and the construction by such townships of sewers over, upon or through such lands or property.

Section 1908. Viewers' Report. Viewers or juries of view appointed by any court to assess damages and benefits, due to the taking, injury, or destruction of private property in and by the construction or enlargement of any public work, highway, or improvement shall make their reports within a time which the court shall fix when appointing them, but, if any of the viewers or juries of view shall, for any reason appearing sufficient to the court, be unable to file its report within the period so fixed, the court may, either before or after the expiration of the time fixed, extend the time for the filing of such report.

Section 1909. Plans of Properties Condemned to be Furnished to Viewers. In all proceedings to assess damages for the taking, injury, or destruction of private property for public use, the township taking, injuring, or destroying property for said purpose, shall furnish the board of viewers with a correct plan of all properties affected, showing all buildings or other structures thereon, their width, length, elevation, and cubical contents, names of all owners, tenants, or occupiers thereof, the topography of the land, and the grades and widths of all highways running through or abutting on said properties, and all other data necessary for a proper determination of the amount of damages caused by the taking, injury, or destruction of said private property.

Said plans shall be prepared and ready for use of the viewers at their first meeting, and copies thereof shall be furnished to all owners, tenants, and occupiers of the property and all other parties affected thereby, without charge.

Section 1910. Condemnation Petition to Specify Liens; Exception. In all proceedings instituted for the condemnation and appropriation of land and property by the exercise of the right of eminent domain, excepting proceedings to ascertain damages and benefits by reason of township street or sewer improvements, the petition for the appointment of viewers therein shall contain allegations specifying any judgments, mortgages, or other claims (herein designated "liens") which are liens upon the land and property sought to be appropriated or condemned as aforesaid.

Section 1911. Findings of Facts as to Liens. Testimony shall be taken in said proceedings to ascertain the amounts of said liens and the dates of the entry of the same, and the amounts of said liens and the dates of entry thereof shall be found as facts by the viewers in said proceedings. Certified lists of liens, from the courts of the Commonwealth and the United States, shall be prima facie evidence of the existence, dates, amounts, dates of entry, and places of record, of said liens, and, unless modified or overcome by oral or documentary evidence, shall be conclusive upon the parties thereto as to item just specified.

Section 1912. Reports of Viewers as to Liens; Appeals; Distribution to Lien Creditors; Discharge of Liens. Where it appears that liens exist as aforesaid, which are liens upon property sought to be condemned and appropriated as aforesaid, a report of the facts found as aforesaid shall be made to the court having jurisdiction of the proceeding, which report shall be subject to exceptions in manner to be regulated by the Supreme Court, by general rule prescribed, amended, and published from time to time, and, upon the findings in relation to said liens being finally found by said court having jurisdiction of said proceedings, said court shall make an order directing the payment and distribution of the amount found to be payable as compensation to the parties entitled thereto, first to the owners of said liens, then to the owners of the property appropriated as aforesaid: Provided, however, That the parties interested shall have the right of appeal from said order of distribution to the Superior or Supreme Courts of the Commonwealth, as shall be determined by the amount distributed to said parties respectively, in manner now provided by law. Payment in accordance with said order of distribution shall absolutely discharge the party making said payment from all claims of whatsoever nature by any person, firm, corporation, or claimant, as against said property, when the payment thereof shall be evidenced by a receipt of record in said proceedings; and, in said receipt and on the record thereof, any claimant may reserve the right to pursue the owner of said property for any balance due upon his lien against any other property or assets of the said owner.

Section 1913. Vesting Title. Upon payment of the compensation for land or property appropriated as aforesaid, in accordance with said order of distribution, title to the land of property appropriated shall vest in the taker thereof in accordance with provisions of the law under which such appropriation is made, and all claims for compensation shall be deemed paid and satisfied as herein provided.

Section 1914. Competency of Evidence as to Market Value of Property. In all proceedings arising from the exercise of the right of eminent domain, it shall be competent for all witnesses called, when duly qualified, to state their opinion as to the market value of the property before the exercise of the right of eminent domain and as unaffected by it, and its market value immediately after the exercise of the right of eminent domain and as affected thereby.

(a) To state, in detail and costs, all the elements of benefit or damage which they have taken into consideration in arriving at their opinion;

(b) In arriving at their opinion as to the market value immediately after the exercise of the right of eminent domain, to add to their opinion of the market value before such exercise, the cost or value of all the element of benefit or advantage, and to deduct therefrom all disadvantage or damage in order to arrive at the market value after such exercise of the right of eminent domain and as affected thereby.

(c) In all proceedings to assess damages or benefits for the opening of any street, alley, or other highway, to take into consideration as one of the elements of advantage or disadvantage, the cost of street improvement.

In all claims for damages against a township, arising from the exercise of the right of eminent domain, it shall be competent for the party or parties claiming damages to offer in evidence, as a declaration against interest, the value of the property affected as assessed for the purpose of taxation.

Section 1915. Proceedings Where Assessments by Viewers Waived. In any proceeding to ascertain the damage caused to any owner of lands, by reason of the appropriation of a right of way or easement by any township, where the owner and township cannot agree upon the amount of damage done, the parties may, by agreement, waive the right to have such damages assessed, and the owner may file his claim in the court of common pleas of the county, and rule the defendant to plead thereto within fifteen days from the service of such rule upon the township, and the suit shall be proceeded with as if an award of viewers had been filed and an appeal had been taken therefrom.

Either party to such an action may, on motion, have the jury visit and view the premises over or through which the proposed right of way or easement may extend.

Section 1916. Appeals in Eminent Domain Proceedings; Payment of Money Into Court. In all cases of damages assessed against any township for property taken, injured, or destroyed by the construction or enlargement of their works, highways, or improvements, whether such assessment shall have been made by viewers, or otherwise than upon trial in court and an appeal is not provided for, an appeal may be taken by either party to the court of common pleas of the county within thirty days from the filing of the report.

Any such appeal taken shall be signed by the party taking the same or by his agent or attorney, and shall be accompanied by an affidavit of the party appellant, or of the agent or attorney, that the same is not for the purpose of delay, but because the affiant firmly believes that injustice has been done.

When no such appeal is taken and judgment is entered, and the party to whom damages have been awarded refuses to accept payment of such award or judgment, then it shall be lawful for such township, upon petition to the court after notice as ordered by court, to pay the amount of the award and costs into the court. The court, upon such payment, shall order the satisfaction of the award or judgment.

(b) Procedure for the Exercise of Eminent Domain and for the

#### Assessment of Damages and Benefits

Section 1920. Petition for Viewers; Time of Meeting. Except as in this act otherwise provided, in case the compensation for damages or benefits accruing from the exercise of the right of eminent domain and/or from the erection and construction of public improvements have not been agreed upon, the court of common pleas, or any law judge thereof in vacation, on application thereto by petition by the township or any person interested, shall appoint three viewers, from the board of viewers of the county, and appoint a time, not less than twenty nor more than thirty days thereafter, when the viewers shall meet upon the line of the improvement and view the same and the premises affected thereby.

Section 1921. When Viewers May be Appointed. The viewers provided for in the preceding section may be appointed before or after the entry, appropriation, or injury of any property or materials for constructing such improvements.

Section 1922. Notice of Meeting of Viewers. Except when otherwise in this act provided, the viewers shall give at least ten days' notice of the time of their first meeting, by publication in one or more newspapers of general circulation in the township, and by handbills posted upon the premises, or otherwise as the court shall direct.

Section 1923. Swearing Viewers; Hearings; Schedules of Damages and Benefits. The viewers, having been sworn or

affirmed faithfully, justly and impartially to decide and a true report to make concerning all matters to be submitted to them and in relation to which they are authorized to inquire, and having viewed the premises and examined the property, shall hear all parties interested and their witnesses and shall determine the damages for property taken, injured, or destroyed, if any, and to whom the same is payable, and having determined the damages, together with the benefits, they shall prepare a schedule thereof.

Section 1924. Assessment of Damages and Benefits. The damages may be paid in whole or in part by the township, or may be assessed in whole or in part upon the property benefited. In the latter case, the viewers, having first determined the damages apart from the benefits, shall assess the total cost of the improvement, or so much thereof as may be just and reasonable, upon the properties peculiarly benefited, including in the assessment all parties for which damages have been allowed, and shall report the same to the court. The total assessments for benefits shall not exceed the total damages awarded or agreed upon.

Section 1925. Assessment Awards. In proceedings to assess damages and benefits, if the property is both benefited and damaged by such improvements, the excess of damages over benefits, or the excess of benefits over damages, or nothing in case the benefits and damages are equal, shall be awarded to or against against the several owners of property affected thereby.

Section 1926. Separate Reports of Damages and Benefits. The proceeding section shall not prevent the viewers from a separate report of the damages and benefits, respectively. In such event, if the damages to the property of any person be greater than the benefits, or if the benefits be greater than the damages, or if the damages and benefits be equal, in either case the viewers shall strike a balance and carry the difference forward to another column, so that the assessment shall show what amount is to be received or paid by the property owner and the difference only shall be collectible of or paid to such property owner. Appeals taken from the report of the board of viewers shall be from such net amounts only.

Section 1927. Notice When Schedules Will be Exhibited. The viewers shall give notice to all parties to whom damages are allowed, or upon whom assessments for benefits are made, of a time not less than ten days thereafter, and of place where the viewers will meet and exhibit their schedule and hear all exceptions thereto.

Section 1928. Service of Notices. Such notice shall be given, in the manner provided by law for the service of a summons in a personal action, if the parties can be found in the township; or upon an adult person residing upon the property affected by the assessment, in case the owner or reputed owner cannot be found; and to all others by publication in the newspaper or newspapers in which the first notices of the view was published, and by posting conspicuously on the premises. The board of commissioners may, by ordinance, provide by whom the notice shall be served and posted and fix the compensation for such service.

Section 1929. Report of Viewers; Plan of Improvements. After making whatever changes are necessary, the viewers or a majority thereof shall report to the court, showing the damages and/or benefits allowed and assessed in each case, and file therewith a plan, to be secured or prepared by the viewers, showing the improvement, the properties taken, injured, or destroyed, and properties benefited.

Section 1930. Notice of Filing of Report. When the report is filed, notice thereof shall immediately be given by publication once in the newspapers publishing the notice provided for in this article. Such notice shall state the date of filing of the report, contain a schedule of the damages allowed and benefits assessed, and shall state that, unless exceptions be filed thereto or an appeal to the court of common pleas is taken therefrom within thirty days from the date of filing, the report will be confirmed absolutely.

Section 1931. Township to Pay Costs of Proceedings. The cost of the proceedings, including court costs, except the compensation of the viewers, shall be paid by the township.

Section 1932. Bond of Township. Except when in this act otherwise provided, in all cases where the parties have not agreed upon the damages claimed, or where, by reason of the absence or legal incapacity of the owner, no such agreement can be made, the township may tender sufficient security to the party entitled to damages, or to the attorney or agent of

any persons absent, or to the agent or officer of a corporation, or to the guardian or committee of any one under legal incapacity.

Section 1933. Condition of Bond; Notice of Filing in Court. The condition of the security shall be that the township shall pay or cause to be paid such amount of damages as the party shall be entitled to receive, after the same shall have been agreed upon by the parties or assessed in the manner provided for by this article. In case the party claiming damages refuses to accept the security tendered, the township shall give the party or his agent, attorney, guardian, or committee, a written notice of the time when the same will be presented in court.

Section 1934. Filing Bond; Recovery Thereon. If approved by the court, the security shall be filed for the benefit of those interested, and recovery may be had thereon for the amount of damages assessed. If the damages be not paid, they may be collected by execution on the judgment in the issue framed to try the question. Upon the approval of the security, the township may proceed with the improvement.

Section 1935. Exceptions to Report of Viewers. Within thirty days after the filing any report, any party interested may file exceptions to the same; and the court shall confirm, modify, or change the same, or change the assessments made therein or refer it back to the same or new viewers.

Section 1936. Confirmation of Report of Viewers. When the report is filed, the prothonotary shall mark it confirmed nisi. In case no exceptions are filed thereto, he shall enter a decree that the report is confirmed absolutely.

Section 1937. Effect of Exceptions on Confirmation of Report. When exceptions are filed which affect the entire report, the same shall not be confirmed absolutely as to any part thereof until the exceptions have been finally disposed of; when the exceptions do not affect the entire report, the court shall confirm the assessments to which exceptions have not been taken.

Section 1938. Appeals from Confirmations after Exceptions. Within three months after the confirmation of any report, following the filing of exceptions thereto, any party interested may appeal from the decree of the court below to the Superior or Supreme Court, as the case may be.

Section 1939. Effect of Appeals. When any appeal is taken from the action of the court confirming any viewers' report or part thereof, if the appeal affects the entire report, it shall have the effect of suspending the absolute confirmation thereof until the appeal is finally disposed of; but where the appeal is to matters which do not affect the entire report, or any other assessment, such appeal shall affect only the particular assessment for which the appeal is taken.

Section 1940. Filing Assignments of Errors, Et Cetera. In order to determine whether any appeal affects the entire report, or any particular assessment, the appellant shall file in the court below, before or at the time of filing his writ of certiorari, a copy of his specifications or assignments of error or grounds of appeal. Upon failure so to do, the township or any party interested may, by notice or rule upon the appellant, cause such specifications, assignments of error, or grounds of appeal to be filed.

Section 1941. Certificate of Judge of the Court Below. Upon the request of the township, or any party interested, the court below or and judge thereof in vacation, shall certify whether the appeal affects the entire report, and said certificate shall be conclusive. Where the court or judge certifies that the appeal will affect the entire report, no further proceedings shall be taken in the court below until after the final action of the appellate court; but where the court or judge certifies that the appeal will affect only a particular assessment, then the confirmation of all other assessments shall be final.

Section 1942. Effect of Affirmation of Decree of Court Below. If, on any appeal, the action of the court below is affirmed, the date of the decree or judgment of the appellate court shall be taken as the day on which the report was finally confirmed.

Section 1943. Consolidation of Appeals. Where any appeal is taken to the Supreme Court, and an appeal is also taken to the Superior Court, and the appeals in both cases are substantially the same, the Superior Court may certify such appeal to the Supreme Court to be heard with the other appeals from the same report.

The Supreme Court shall consolidate all such appeals and hear them as one case. Where several appeals are taken from the confirmation of the same report, either to the Superior

or Supreme Court and the grounds of appeal are similar, the appellate court may consolidate the appeals.

Section 1944. Appellants May Unite in Appeals; Effect Thereof. Several parties may unite in a single appeal, either to the Superior or Supreme Court, where the grounds of appeal are similar, but the uniting of the appellants shall not unite the amounts or change the jurisdiction. When the appeal, if taken by each appellant singly, would be to the Superior Court, then the appeal shall be to that Court, but, if the appeal of any one appellant would be to the Supreme Court, then the joint appeal shall be to that court. If an appeal has been taken to the Supreme Court, any other party without regard to the amount involved, if the grounds of appeal are similar, may appeal to the same court and join in such appeal.

Section 1945. Appeals from Reports of Viewers for Jury Trial. Within thirty days after any report of viewers is filed in court, any party whose property is taken, injured, or destroyed, or who is assessed benefits, may appeal to the court of common pleas and demand a trial by jury. Where an appeal is taken as to a portion of the report, the portion not appealed from shall be confirmed absolutely, at the expiration of thirty days after the report is filed in court.

Section 1946. Reasons for Appeals to be Stated. The appeal, as provided in the last preceding section, shall state the grounds upon which it is taken, and shall be signed by the appellant, or by his agent or attorney; and shall be accompanied by an affidavit that it is not taken for the purpose of delay, but because the appellant believes that injustice has been done.

Section 1947. Costs. Upon the trial of any such appeal, in case the party appellant does not obtain a verdict more favorably than was the report of the viewers as finally confirmed, the appellant shall not recover any costs.

Section 1948. Notices. Appeals from the Court Below. The court of common pleas shall order what notices shall be given in connection with such proceedings, and may, by rule or otherwise, prescribe the form of pleadings. After verdict and final judgment, either party may, within three months, appeal to the Superior or Supreme Court.

Section 1949. Appeals to the Wrong Court. Should any appeal under this article be made to the wrong court, such court shall certify the appeal to the court to which it should have been taken.

Section 1950. Appeals not to Prevent Filing Liens. No appeal taken under this article shall prevent the filing of liens by any township for any assessment made by any such report, but, upon the final termination of the issue, the court shall make such order as to the lien filed as shall appear right and proper.

Section 1951. Discontinuance of Proceedings. If any township shall repeal any ordinance, or discontinue any proceeding, providing for any improvements, prior to the entry upon, taking, or injury to any property or materials, the township shall not be liable to pay any damages which have been assessed, but all costs upon any such proceeding shall be paid by the township, together with any actual damage sustained by reason of such proceeding.

Section 1952. Assessments to Bear Interest. All assessments for benefits, costs, and expenses shall bear interest at the expiration of thirty days after they shall have been finally ascertained, and shall be payable to the treasurer of the township.

Section 1953. Damages to Bear Interest. The amount of damages allowed in a report of viewers for the taking, injury or destruction of property by the exercise of the right of eminent domain shall, as finally confirmed, bear interest at the rate of six per centum per annum from the date of the confirmation nisi of the report.

## ARTICLE XX

### ROADS, STREETS AND HIGHWAYS

#### (a) Plans of Streets

Section 2001. Every township shall have a general plan of its streets and alleys, including those which have been or may be laid out, but not opened. Such plan shall be filed in the office of the engineer or other proper officer of the township, and all subdivisions of property thereafter made shall conform thereto. No streets or alleys, or parts thereof, laid out or accepted and confirmed on such plan, shall afterwards be altered without the consent of the commissioners of the township. No person shall be entitled to recover any damages for any improvements placed or constructed within the lines of

any street or alley after the same has been located or ordained on the plan provided for by this section.

(b) Laying Out, Opening, Widening, Straightening, Vacating and Relaying Out Roads, Et Cetera. Repairs and Detours

Section 2005. Power to Lay Out, Open, Widen, Vacate, Et Cetera. The board of township commissioners may enact, ordain, survey, lay out, open, widen, straighten, vacate, and relay all roads, streets, lanes and alleys and parts thereof which are wholly within the township, upon the petition of a majority in interest of the owners of property or properties through whose land such road, street, lane or alley passes, or upon whose land it abuts, or without petition of the owners of abutting property if in the judgment of the board of commissioners it is necessary for the public convenience. Such power shall include authority to vacate in whole or in part roads, streets, lanes and alleys laid out by the Commonwealth where the same have remained unopened for a period of thirty years; and also the authority to lay out and open a public road which will be a continuation or extension of a street already opened by an adjacent city or borough.

Section 2006. Burial Grounds, Et Cetera, Saved. No such roads, street, lane, or alley shall be laid out and opened through any burial ground or cemetery, nor through any grounds occupied by a building used as a place for public worship, or as a public or parochial school or educational or charitable institution or seminary, unless the consent of the owner or corporation or person controlling the premises is first secured.

Section 2007. Notice of Hearing. The board of commissioners shall give ten days' notice to the property owners affected thereby of the time and place when and where all parties interested may meet and be heard. Witnesses may be summoned and examined by the board and by the parties interested, at such meeting or any adjournment thereof.

Section 2008. Draft. Report. After such hearing and a consideration of the matter, should the board of commissioners, or a majority thereof, decide in favor of exercising the power so conferred, they shall make written report, together with a draft or survey of the road, street, lane, or alley, fixing the width thereof, and noting the improvements along the line thereof and the names of the owners of property through which the same shall pass or whereon it shall abut. Such report and draft shall be filed in the office of the clerk of the court of quarter sessions.

Section 2009. Exceptions to Report. Any citizen or freeholder of the township may, within thirty days after the filing of the report of the board of commissioners, upon entering in the court sufficient surety to indemnify the board for all costs incurred in the proceedings, file exceptions to the report, together with a petition for a review.

Section 2010. Appointment of Viewers. Upon favorable action on such matter by the board of commissioners, and after the expiration of the term allowed for filing exceptions, or upon the order of the court, upon the disposition of any exceptions, if in either case the compensation for the damages or benefits accruing therefrom have not been agreed upon the court of common pleas or any law judge thereof in vacation, on application by petition by the board of commissioners or any person interested, shall appoint three viewers from the county board of viewers, to assess the damages and benefits occasioned by the proceeding in the manner provided by this act for such proceedings.

Section 2011. Notices to be Posted Along Improvement. After the passage or approval of any ordinance by the board of commissioners, for the opening, widening, straightening, extending, or vacating any road, street, or alley, notice shall within ten days thereafter be given by handbills posted in conspicuous places along the line of the proposed improvement. Such notice shall state the fact of the passage or approval of the ordinance, and the date of the passage or approval.

Section 2012. Width of Public Roads. The width of a public road in townships of the first class shall not be less than thirty-three feet or more than one hundred and twenty feet: Provided, That the limits of width shall not be construed to include the width required for necessary slopes in cuts or fills, when the limits of the road and the extra width required for such slopes exceed the limits of widths herein specified.

Section 2013. Opening and Repairing Roads. Public roads or highways laid out by lawful authority in townships, shall as soon as may be practicable, be effectually opened and con-

stantly kept in repair. All public roads or highways shall at all seasons be kept reasonably clear of all impediments to easy and convenient traveling, at the expense of the township.

Whenever proceedings have been heretofore or may hereafter be begun for the opening and laying out of any public road in any township, such public road shall be physically opened upon the ground for use by the public within the period of five years next after the completion of such proceedings, and if not so opened, then such proceedings shall be deemed to be void and of no effect, and the land proposed to be taken shall revert to the owners of the land, as in the case of the vacation of a public road free of any easement or right of the public to use the same.

Section 2014. Detours. Except in the case of emergencies wherein the safety of the public would be endangered, no public road or highway in any township shall be closed to vehicular traffic, except upon order of the authorities having charge of the maintenance of such highways, nor for a longer period than is necessary for the purpose for which such order is issued: Provided, however, That no public road or highway shall be closed to vehicular traffic when the same has been designated as a detour by the State Department of Highways, unless the written consent of the Department of Highways has first been obtained, or unless the authorities having jurisdiction over said road or highway shall, by resolution duly recorded on their minutes, declare such closing necessary for the protection of the public safety.

When any public road or highway shall be closed, as heretofore provided, it shall be the duty of the authorities authorizing the closing to immediately designate or lay out a detour, on which they shall erect or cause to be erected and maintained while such detour is in use, legible signs at each public road intersection throughout its entire length, indicating the direction to the main highway. During the period when such detour is in use, it shall be the duty of the authorities closing the main highway to maintain such detour in safe and passable condition. It shall also be the duty of the authorities closing the main highway and maintaining the detour to immediately remove all detour signs when the highway originally closed is opened for traffic. Said authorities shall, as soon as possible, repair the road designated as a detour, and place same in a condition at least equal to its condition when designated as a detour. Whenever necessary in the creation of a detour, as aforesaid, the authorities responsible for laying out the detour may enter into agreement with the owners of private lands, covering the acquisition of right-of-way privileges over private property for the period when the main highway shall be closed to traffic. In the exercise of the rights conferred by this section, the authorities responsible are hereby empowered to pay for the necessary maintenance, subsequent repair, and land rental, out of such funds as are available for the construction and/or maintenance of the highways in their charge.

Any person who shall wilfully remove, deface, destroy or disregard any barricade, light, danger sign, detour sign, or warning of any other character whatsoever, erected or placed under authority of this section, or who shall drive on, over or across any highway which has been closed by proper authority, shall, upon conviction thereof in a summary proceeding before a magistrate, alderman or justice of the peace, be sentenced to pay a fine of not less than twenty-five dollars nor more than one hundred dollars, and the costs of prosecution, and, in default of the payment thereof, shall be imprisoned one day for each dollar of fine and costs unpaid: Provided, however, That persons who have no outlet due to the closing of a highway may drive on, over or across such highway, with the consent in writing of, and subject to such conditions as may be prescribed by, the authorities responsible for the closing, or their agents or contractors, without being subject to the penalties imposed by this section.

In addition to the penalties herein provided, the authorities responsible for the maintenance of a highway which has been closed to vehicular traffic, or their agents or contractors, may, in an action at law, recover damages from any person or persons who have damaged a highway by driving on, over or across same when it is closed to vehicular traffic in accordance with the provisions of this act.

All fines collected under the provision of this section shall be paid by the officer receiving the same to the treasurer of the township in which the offense was committed.

The commissioners of any township may temporarily close any township road, when in their opinion excessive or unusual conditions have rendered such road unfit or unsafe for travel, and immediate repair, because of the time of year or other conditions, is impracticable. The road or portion of road so closed shall be properly marked at its extremities, and a means of passage for the customary users of such road shall, whenever possible, be provided.

Anyone using such road or portion thereof after the same has been properly closed and marked, without a permit from the commissioners, shall be subject to a penalty of not more than one hundred dollars, to be recovered in a summary proceeding. The penalties so recovered shall be payable to the treasurer of the township wherein the offense was committed.

Section 2015. Laying out Roads Under the General Road Law. All roads partly within townships of the first class, where one of the termini of such roads is without the township, shall be laid out, widened, changed, or vacated only by the courts of quarter sessions, as heretofore, in the manner provided by the general road law and the amendments, additions, and supplements thereto. But no such road shall be opened, changed, widened, altered, or vacated unless and until the board of commissioners of the township shall have passed a resolution consenting and approving thereto, and shall have filed with the clerk of said court, a copy of such resolution duly certified by the township secretary. All damages and benefits occasioned by such laying out and the subsequent opening thereof, or by any such widening, changing, or vacation, shall be assessed, collected, and paid in the manner provided by the general road law and the amendments, additions, and supplements thereto: Provided, That all damages occasioned by such laying out, and the opening thereof, or by the widening, changing, or vacating of all roads within townships of the first class shall be assessed, collected, and paid by such townships of the first class.

#### (c) Dedicated Roads, Streets, Lanes, Alleys and Drainage Facilities

Section 2020. Plans of Dedicated Roads and Streets. No person shall construct, open, or dedicate any road, street, lane, or alley, or any drainage facilities in connection therewith, for public use or travel in any township, without first submitting plans thereof to the township commissioners for their approval. Such plans shall be prepared in duplicate in accordance with such rules and regulations as may be prescribed by the commissioners and shall show the profiles of such roads, streets, lanes, or alleys, the course, structure, and capacity of any drainage facilities, and the method of drainage of the adjacent or contiguous territory, and also any other or further details that may be required under the rules and regulations adopted by the township commissioners. Before acting upon any such plans, the commissioners may, in their discretion, arrange for a public hearing, after giving such notice as they may deem desirable in each case. The township commissioners are authorized to alter such plans, or order the same to be altered, and to specify any changes or modifications of any kind which they, in their discretion, may deem necessary with respect thereto, and may make their approval of such plans subject to any such alterations, changes or modifications, but no plans shall be approved until there is a solicitor's report as to municipal liens. Any plans when so approved shall be signed, in duplicate, on behalf of the township by such officer as the commissioners may designate and an approved duplicate copy shall be filed in the township engineer's office or other proper office, where the same shall be available to public inspection. No road, street, lane, or alley, or any drainage facilities in connection therewith, shall be opened, constructed, or dedicated for public use or travel except in strict accordance with plans so approved by the commissioners, or with further plans subsequently approved by them in the same manner, nor until such plan, and the approval thereof, has been recorded as hereinafter provided.

Section 2021. Appeals Where Commissioners Refuse Approval. In any case where the township commissioners shall refuse to approve any plans submitted to them in accordance with this act, any person aggrieved by the action of the commissioners may, within thirty days after such action, appeal therefrom by petition to the court of quarter sessions of the county, which court shall hear the matter de novo, and, after hearing, may enter a decree affirming, reversing, or modifying the action of the commissioners as may appear just in the premises. The court shall designate the manner in which

notices of the hearing of any such appeal shall be given to all parties interested. The decision of the court shall be final.

The action of the township commissioners, or of the court on appeal, in approving any such plans, and an approval duplicate copy of such plans shall be recorded by the person applying for such approval in the office of the recorder of deeds of the county.

**Section 2022. No Responsibility on Township Where Plans Not Approved.** If any road, street, lane, or alley, or any drainage facilities in connection therewith, shall be opened, constructed, or dedicated for public use or travel, except in strict accordance with plans approved, as provided in this subdivision, neither the township commissioners nor any public authorities shall place, construct, or operate any sewer, drain, water pipe, or other facilities, or do any work of any kind, in or upon such road, street, lane, or alley; and neither the township commissioners, nor any other public authorities, shall have any responsibility of any kind with respect to any such road, street, lane, alley, or drainage facilities, notwithstanding any use of the same by the public, unless such road, street, lane, alley, or drainage facilities are accepted by ordinance: Provided, however, That nothing herein contained shall prevent the laying of trunk sewers, drains, water or gas mains, if required, by engineering necessity for the accommodation of other territory.

**Section 2023. Entry of Lands.** The township commissioners and their representatives and workmen may enter upon any land and property, and maintain marks and monuments, so far as the commissioners deem necessary in carrying out their powers and duties of this subdivision.

**Section 2024. Penalty.** Any person copartnership, or corporation who or which shall construct, open, or dedicate any road, street, lane, or alley, or any drainage facilities in connection therewith, for public use or travel in any township, without having first complied with the provisions of this subdivision, and of any ordinances or resolutions of the township authorities adopted pursuant hereto, shall be guilty of a misdemeanor, and, upon conviction thereof, such person or the members of such copartnership or the officers of such corporation responsible for such violation, shall be sentenced to suffer imprisonment not exceeding two years, or pay a fine not exceeding one thousand dollars, or both, in the discretion of the court.

**Section 2025. Powers of State and Counties Preserved.** Nothing contained in this subdivision shall be held to restrict or limit the State Department of Highways, or any county, in the exercise of any of its duties, powers, and functions under the provisions of any act of Assembly now in force or hereafter to be enacted.

**(d) Relocation, Alteration and Vacation of Roads in or Near State Parks**

**Section 2030. Agreements to Relocate, Alter and Vacate Roads.** Whenever a public road or highway within a park or public ground, title to which park or public grounds is vested in the State of Pennsylvania, is laid out, located, relocated, altered, or vacated, in such manner that a public road or highway, approaching, leading into, or contiguous to such park or public grounds, shall become either useless, inconvenient, or burdensome, such public road or highway, approaching, leading into, or contiguous to such park or public grounds, may be altered, relocated, or vacated, by the township commissioners, charged with the duty of maintaining such roads or highways, in whole or in part for the purpose of making it convenient and suitable as an approach to the roads and highways within said park or public grounds, upon the consent and agreement of: (a) the commissioners or officials charged with the care and management of said park or public grounds; (b) the township commissioners charged with the duty of maintaining said roads or highways, approaching, leading into or contiguous to said park or public grounds; and (c) the property owners owning the majority of the frontage of land abutting upon the relocated portion of the roads or highway approaching, leading into, or contiguous to said park or public grounds.

**Section 2031. Agreement to be Filed in Court. Effect of Filing.** The filing of the consent and agreement of commissioners or officials charged with the care and management of such park or public grounds, the township commissioners charged with the maintenance of said roads and highways, and of the property owners, provided for in the preceding section, in the court of quarter sessions of the county or

counties in which the altered, relocated, or vacated road or highway is situate, shall have the same force and effect as the filing and the approval and absolute confirmation by the court of quarter sessions of a report of viewers appointed in accordance with the general road law, and shall have the same force and effect as though said viewers had laid out, located, relocated, altered, or vacated such road or highway in accordance with the agreement filed as aforesaid, and the report of said viewers had been filed, approved and absolutely confirmed by the court.

The filing of said agreement in the court of quarter sessions shall be conclusive as to the question of the necessity for the laying out, location, relocation, alteration, or vacation of said roads or highways, as contained in the said agreement, and that the portion or portions of said road or highway abandoned or vacated were useless, inconvenient and burdensome.

**Section 2032. Altered and Relocated Roads Declared Township Roads.** Such road or highway, when altered or relocated, shall be maintained and repaired in the same manner as other township roads are maintained and repaired.

**Section 2033. Assessment of Damages.** The owner of any land through which any public road or highway may be so relocated, may apply by petition to the court of quarter sessions of the proper county, setting forth the injury which he or she may have sustained by reason of the relocation of the said public road or highway, and the proceedings relative to the assessment and payment of damages of said land owner shall be in accordance with the provisions of this act for proceedings for the assessment of damages and benefits.

**(e) Elimination of Curves**

**Section 2035.** Any township may acquire, by purchase or by the right of eminent domain, such property and lands situate along or adjacent to any township highway, as in the opinion of the commissioners of such township may be necessary to eliminate dangerous curves.

Upon any such purchase or condemnation the township commissioners may, from time to time, abate or remove, or cause to be abated or removed, any such dangerous curve or curves to the extent of the property and land so acquired.

The proceedings for the condemnation of such property and lands under the provisions of this section, and for the assessment of damages for property taken, injured, or destroyed, shall be taken in the same manner as is provided by this act for the condemnation of land by townships.

**(f) Acquisition of Unobstructed Views at Curves and Intersections**

**Section 2040.** Any township may acquire, by purchase or by the right of eminent domain, a free and unobstructed view down and across such lands located at or near the intersection of any two highways, or a highway and a railroad or railway, or at any curve in any highway, as may be necessary to assure a free and unobstructed view in all directions at such crossings, and to so prevent the use of such lands for any purpose or in any manner which may interfere with or obstruct the vision of any person or persons traveling upon any such highway.

Upon any such condemnation the township commissioners having had such view condemned, may, from time to time, abate or remove or cause to be abated or removed, any obstruction to such view over and across such lands.

The proceedings for the condemnation of such view over and across such lands under the provisions of this act, and for the assessment of damages for property taken, injured, or destroyed, shall be taken in the same manner as is provided in this act for the condemnation of land by townships.

Upon the condemnation of a view over and across any such lands, the owner of such lands may make every such use thereof as will not interfere with a free and unobstructed view at such dangerous crossing or curve, and unless specially provided for in such condemnation proceedings, such condemnation shall not be construed to prevent the owner thereof from using such land for pasture or the growing of grass, oats, wheat, or other crops which will not obstruct the vision more than wheat.

**(g) Changing or Altering Roads by Agreement with Property Owners**

**Section 2045.** Whenever the commissioners of any township deem it advisable to construct, change, or alter any part of any public road under their supervision, and can agree with the property owners affected by such change as to damages, they may, upon payment of damages agreed upon, change or

alter such part of such public road as contemplated in such agreement without the formality of a view.

No such change or alteration of any part of any public road shall be made, the costs and expenses of which, to such township, including damages, shall exceed three hundred dollars. A petition setting forth the facts, accompanied by a map or draft of such proposed change, shall be presented to the court of quarters sessions for approval before such actual change is made; whereupon the new location, approved by the court, shall be taken to be the public road and the old location shall be vacated.

Nothing contained in this section shall be construed to prohibit a township from paying for curbs, gutters, sidewalks and retaining walls necessitated by such construction, change, alteration or widening in cases where the land necessary therefor is dedicated to the township for public use.

(h) Grading, Draining, Curbing, Paving, Macadamizing Roads or Streets on Petition and Assessment of Benefits by Viewers.

Section 2050. Proceedings on Petition. Upon the petition of a majority of property owners in interest or number, abutting on the line of any proposed improvement, to be verified by the affidavit of at least one of the petitioners, a majority in interest of owners of undivided interests in any piece of property to be treated as one person, a township may grade, curb, pave, or macadamize, or otherwise improve any road, street or alley, or part thereof, or which may be, in whole or in part, boundaries thereof, and provide for the necessary drainage thereof; and may also provide for the improvement of any street, road, lane, or alley, and any sections or parts thereof, in length, in the space between the curb, gutter, or actual carriage-way line and the property line, either by an original work or improvement thereon, or by a change, repair, renewal, or alteration in the said highway, curb, parking spaces, or shade trees, or by changing, altering, renewing, replanting, pruning, or otherwise improving the same, in any or all of said particulars. The majority in interest or number required for such petitions shall be fixed as of the date of such petition.

Section 2051. Grading Restrictions. In grading a road, street, lane or alley, it shall be unlawful to raise the highway above the ordinary grade when a drain or culvert is constructed under such highway, or where a highway is constructed over such drain or culvert.

Section 2052. Notice. After the passage of any ordinance for the grading, curbing, paving, or macadamizing, or otherwise improving any street or alley, notice shall be given, within ten days thereafter, by handbills posted in conspicuous places along the line of the proposed improvement.

Section 2053. Contents of Notice. The notice shall state the fact and the date of the passage of such ordinance, that the petition for the improvement was signed by a majority in interest and number of owners of property abutting on the line of the proposed improvement, and that any person interested, denying the fact that said petition was so signed, may appeal to the court of common pleas of the county within thirty days from the passage of the ordinance.

Section 2054. Appeals from Ordinance. Any person interested may, within thirty days from the passage of such ordinance, present a petition to the court of common pleas of the county, setting forth the facts; whereupon the court shall determine whether such improvement was petitioned for by the requisite majority. If the court shall find that it was not so petitioned for, it shall quash the ordinance; but if it shall find that it was so petitioned for, it shall approve the same. If no appeal shall be taken, or if the court, on appeal, shall approve the ordinance, the township may proceed with the improvement, and thereafter all parties shall be estopped from denying the fact that such petition was properly signed.

Section 2055. Assessment of Damages and Benefits by Viewers. On petition, viewers shall be appointed, as provided in this act, who shall assess the damages, costs, and expenses of such grading, curbing, paving, or macadamizing, or parking, shade tree planting, or changing or altering, renewing, replanting, pruning or improving, including the expenses for necessary drainage, upon the property benefited, according to benefits, if sufficient can be found; but, if not, the deficiency, when ascertained, shall be paid by the township. The proceedings of the viewers and the proceedings on their report shall be as provided in this act for such proceedings.

Section 2056. Assessments to Bear Interest. Collection. All such assessments for benefits if not paid within thirty days

shall bear interest as provided by the act in such cases; and if any such assessment remains unpaid it shall be the duty of the township solicitor to collect the same with interest, by action of assumpsit, or by a lien to be filed and collected in the manner provided by law for the filing and collection of municipal claims. When an owner has two or more lots against which there is an assessment for the same improvement, all of such lots may be embraced in one claim.

(i) Grading, Draining, Curbing, Paving or Macadamizing Streets and Collection of Cost by Foot Front Rule

Section 2060. Proceedings With or Without Petition. Townships, with petition or without petition, may grade, curb, gutter, pave, macadamize, or otherwise improve, roads, streets, lanes, and alleys, or parts thereof, or a particular width or additional widths thereof, with or without the assistance or contribution of the State, county, or a corporation occupying the thoroughfare, and may assess and collect the whole cost thereof, or the whole cost not thus aided or contributed, or any part thereof, from the owners of real estate abutting on the improvement, by an equal assessment on the foot-front, including the expense of the necessary drainage. Such power may be exercised as to any township road, street, lane, or alley or any State or State-aid highway or county road or highway. The board of commissioners may make equitable adjustments for corner lots, or lost of irregular shape, where an assessment for full frontage would be unjust. Property not otherwise assessable shall become assessable by the petition of the owner or the owner's representative. In all cases where the whole width of the highway is being paved, without State or county aid, and more than two-thirds of the total cost is proposed to be assessed on abutters, the township shall, for this purpose, be considered as owner of non-assessable property, of street and alley intersections, and of the deducted frontage on equitable adjustments. On petition of owners representing two-thirds of the number of feet of assessable properties abutting on the proposed improvement, the total cost of the improvement, or a lesser amount if the township desires, may be assessed on the assessable properties abutting, without any deduction for non-assessable property, or street and alley intersections, or for the equitable adjustments aforesaid: Provided, That the petition states that the total cost may be assessed on the abutters.

Section 2061. Grading Restrictions. In grading a road, street, lane or alley, it shall be unlawful to raise the highway above the ordinary grade when a drain or culvert is constructed under such highway, or where a highway is constructed over such drain or culvert.

Section 2062. Notices of Assessments. The secretary of the township shall cause thirty days' notice of the assessment to be given to each party assessed, either by service on the owner or his agent, or left on the assessed premises.

Section 2063. Collection of Assessments. If any assessment shall remain unpaid at the expiration of the notice, it shall be the duty of the township solicitor to collect the same, with interest from the time of completion of the improvement, by action of assumpsit, or by a lien to be filed and collected in the same manner as municipal claims. When an owner has two or more lots, against which there is an assessment for the same improvement, all of such lots shall be embraced in one claim.

(j) Road Material, Ditches, Drains and Watercourses

Section 2065. Power to Enter Lands. When road material cannot be conveniently obtained by contract at reasonable prices, the commissioners of townships may enter upon any land or enclosure within their township, lying near the road, and dig, gather, and carry upon the road any stones, sand, or gravel which they think necessary to make, maintain, or repair the road. In exercising such right they shall do no unnecessary damage to the owners of the land, and shall repair any breaches of fences which they make.

Section 2066. Viewers to Fix Damages. Whenever the commissioners and the owners of any such materials cannot agree upon the price to be paid therefor, the value of such materials shall be assessed by viewers to be appointed and to make report as provided in this act in the case of eminent domain proceedings.

Section 2067. Ditches, Drains and Watercourses. Approval of Plans. No person shall stop, fill up, confine, pave or otherwise interfere with any drain, ditch, watercourse, or drainage facilities, in a township without first submitting suitable plans

thereof to the township commissioners for their approval. Such plans shall be prepared in accordance with such rules and regulations as may be prescribed by the commissioners, and shall show the exact nature of the work to be performed. Before acting upon any such plan, the commissioners may, in their discretion, arrange for a public hearing, after giving such notice as they may deem desirable in each case. The commissioners are authorized to alter such plans, and to specify any changes or modifications of any kind which they, in their discretion, may deem necessary with respect thereto, and may make their approval of such plans, subject to any alterations, changes or modifications. Any plans, when so approved, shall be signed on behalf of the township by such officer as the commissioners may designate, and shall be filed in the township offices where the same shall be available for public inspection. No drain, ditch, watercourse, or drainage facilities, shall be constructed, altered, stopped, filled up, confined, paved, or otherwise interfered with, except in strict accordance with plans so approved by the Commission, or with further plans subsequently approved by them in the same manner. No township shall have any responsibility with respect to conditions arising as a result of the failure on the part of any person to comply with the requirements of this act.

The township commissioners may enter upon any lands or enclosures and cut, open, maintain, and repair such drains or ditches through the same as, in their judgment, are necessary to carry the water from the roads, streets, lanes or alleys.

If any person shall stop, fill up, or confine, pave, or otherwise interfere with any such drain or ditch, watercourse, or drainage facilities, or shall divert or change the course thereof without the approval of the commissioners as herein provided, such person shall be guilty of a misdemeanor and, upon conviction thereof, shall be sentenced to pay a fine not exceeding one thousand dollars, or suffer imprisonment not exceeding two years, or both, in the discretion of the court.

Nothing contained in this section shall be held to restrict or limit the State Department of Highways or any county in the exercise of any of its powers and duties under the provisions of any law of this Commonwealth.

#### (k) Trees and Shrubbery Within Limits of Highways

Section 2070. Saving Trees and Shrubbery. Where any highway passes through or along forested lands, wild lands, or uncultivated lands, no trees growing within the limits of such highway at a distance beyond fifteen feet on either side of the center line thereof, and which measure four inches or over in diameter at a point two feet from the surface of the ground, shall be cut down or destroyed by the commissioners or persons employed by them or any other person, without first obtaining the consent of the abutting owners.

Whenever any highway, running through improved or cultivated lands, has been opened, and there are growing, along the roadsides and within the road limits, shrubs or trees not interfering with public travel, no commissioners or other persons in their employ, shall remove, cut, injure, or destroy, or in any other manner interfere with such shrubs or trees. If such removal or cutting is absolutely necessary for the purpose of maintaining the highway at its highest efficiency the commissioners or other persons in their employ, may so cut or remove such shrubs or trees, after notifying the abutting property owners and entering into an agreement with them relating to the removal, cutting or interference with said shrubs or trees.

Section 2071. Court Orders for Removals. In either of the cases set forth in the preceding section, if the consent or agreement of the abutting property owners cannot be obtained, the board of commissioners may appeal to a judge of the court of common pleas. The judge shall inquire into the facts of the case, and after hearing all parties in interest, shall make such order as seems just, having due regard for the demand for road improvement as well as for the preservation of the trees or shrubs. From such order there shall be no appeal.

Section 2072. Logs and Cordwood Property of Owner. All logs, cordwood, branch wood, or other forms of wood which shall be derived from the destruction or removal of any trees growing along the highways, shall be surrendered to and remain the property of the abutting owners.

Section 2073. Brush and Refuse. The commissioners may clear out brush and other refuse from along the sides of the road to the legal width thereof. All such clearing and removal of brush and refuse shall be confined to growth that is within

the limits hereinbefore described, and to the removal of branches that in any way interfere with public travel. No other injury, by fire, cutting, abrasion, or otherwise, shall be done to the standing timber.

Section 2074. Penalty. If any commissioner, or person in their employ, or any other person, shall cut down, kill, or injure any living tree, growing as aforesaid, and of a size four inches in diameter or greater at a point two feet from the surface of the ground, or shall violate any other provisions of the preceding sections of this subdivision, he shall, upon conviction thereof in a summary proceeding, be subject to a penalty of not more than five dollars for every tree so cut, injured, or destroyed, with costs of suit. Such penalty shall be paid to the township treasurer. If any defendant, upon conviction for any offense, fails or refuses to pay the fine and costs imposed, or does not give bond with approved surety to pay the same within ten days, he shall be committed to the county jail for not more than thirty days or until he has paid the fine and costs in full.

Section 2075. Removal of Obstruction. Nothing in this subdivision of this act shall be so construed as to prevent the commissioners, or other persons in their employ, from removing such roadside trees which may be thrown down by the wind or lodged in such position as to be a menace to public travel, or which by reason of any other cause become a source of danger to the public. Every such act of removal shall be made with due regard to the circumstances of the case, so as to preserve the true intent and purpose of this subdivision.

#### (l) Protection of Highways from Snowdrifts

Section 2078. Whenever any roads, streets or highways, in townships, are so located as to render them liable, on account of high wind during the winter season, to be filled with snow as to make them impassable, and in the judgment of the commissioners, such drifts of snow can be avoided by the removal of any fence erected along either side of such road, street or highway and replacing the same by a fence constructed of posts, wire and boards, or rail, combined, such commissioners may agree with the owners of such fences upon a plan for the erection of a fence constructed of posts, wire and board, or rail, combined. The township may pay the owners of such fences a sum not to exceed the first cost of the wire used in the construction of such fences. The wire used in the construction of such fences shall be without barbs. This section shall not apply to any stone wall, hedge, or ornamental fence.

Any township which is responsible for the maintenance of any public road or highway, shall have authority to enter upon private property adjacent to such public road or highway, and place thereon a snow fence, at any point as may be deemed necessary, to within a limit of one hundred (100) feet from the right-of-way line of such public road or highway, in order to eliminate snow drifting on the traveled portion of the public road or highway.

No such snow fence authorized shall be placed prior to November first, nor shall the same remain in place after April first of the succeeding year, unless the written consent of the owner of the adjacent property is obtained, agreeing to an extension of time for the removal of said snow fence.

If the township shall not be able to enter into an agreement with the owner of adjacent property occupied by such snow fence as to the amount of damages sustained as a result of said fence being placed and removed, the owner may petition the court of common pleas of the county for the appointment of viewers to ascertain the amount of damage incurred in such case, in the manner provided in this act for eminent domain proceedings. Such damages, if any, when ascertained, shall be paid by the township. Any funds available for the construction and maintenance of public roads or highways shall be available for the payment of such damages.

#### (m) Guideposts and Index Boards

Section 2080. Duty to Erect. The commissioners of townships shall erect posts at the intersection of all public roads, and at one of the angles where any public road crosses another public road, and shall firmly fix thereon boards or metal signs, with index hands pointing to the direction of such roads, providing that if a tree, trolley pole, telephone pole, telegraph pole or building is so erected that it can be used in place of a post and permission has been secured from the owner thereof, such tree, pole, or building may be used in place of a post.

On such boards and signs shall be inscribed, in large and legible characters, the name of the town, village, or place to which such roads lead, and the distance thereto computed in miles: Provided, That where any public highway intersects or crosses a State highway, application for a permit shall be made by the commissioners to the State Department of Highways for the erecting of such signs.

Section 2031. Penalty for Destroying. It shall be unlawful for any person to wilfully destroy, remove, injure, or deface any guide post or sign or index board erected upon or near any public street, road, or bridge by the authorities of any township, or erected, with the consent of the authorities having jurisdiction over such street, road, or bridge, by any club, association, or other organized body for the direction, guidance or safety of travelers. Any person violating any of the provisions of this section shall upon conviction, in a summary proceeding, be sentenced to pay a fine of not less than ten dollars and not more than twenty-five dollars, with all costs of prosecution, together with the value of such sign so destroyed, removed, or defaced. Fines and moneys so collected shall be paid to the township treasurer. In default of payment of said fine, costs, and expenses, he shall undergo an imprisonment in the county jail for not less than five nor more than sixty days.

(n) Highways Crossing Railroads. Special Uses of Highways.

Section 2083. Railroad Crossings. Every township constructing a highway across a railroad shall construct the same above or below the grade thereof, unless permitted by the Public Service Commission to construct the same at grade.

Any such crossing of a railroad by a highway, or any vacation of any highway crossing a railroad, shall be constructed only in the manner prescribed by and under the jurisdiction of the Public Service Commission. The compensation for damages to the owners of adjacent property, taken, injured, or destroyed, shall be ascertained, fixed, and paid in the manner prescribed in the Public Service Company Law.

Section 2084. Highway Permits. No railroad or street railway shall hereafter be constructed upon any township highway, nor shall any railroad or street railway crossings, nor any gas pipe, water pipe, electric conduits, or other piping be laid upon or in, nor shall any telephone, telegraph or electric light or power poles or any coal tipples, or any other obstructions, be erected upon or in, any portion of a township highway, except under such conditions, restrictions and regulations, and subject to the payment of such fees for permits as may be prescribed and required by the board of township commissioners, not exceeding the reasonable cost of issuing the permit and expense of inspecting the work authorized by such permit upon completion thereof. All fees so collected for permits shall be paid into the township treasury.

(o) County-aid in the Improvement of Township Roads

Section 2086. Whenever the owners of the majority of the assessed valuation of real property within any township desire any principal road or highway within the township to be improved and maintained at the joint expense of the county and township, they may petition the commissioners of the township for said improvement and require them to make application to the county commissioners for such improvement and maintenance in accordance with the provisions of existing law.

In all cases where the township commissioners refuse to act upon, or unduly delay action on, any petition for the improvement and maintenance of any road or highway, any citizen taxpayer of the township or county may, by petition, present the facts of the matter to the court of quarter sessions, requesting the court to order such action thereon as the case may require. If after due hearing had before said court it shall appear that the truth of the matters alleged in the petition are sustained, the court shall make an order directing the township commissioners to forthwith act upon said application or applications, and that the said application or petition for the improvement be forthwith forwarded to the county commissioners.

(p) Penal Provisions

Section 2088. If any person working upon any road or highway in any township, or if any one in company with such person, shall ask money or reward, or by any means whatever shall extort or endeavor to extort any money, intoxicating drink, or other thing, from any person traveling upon or near

such road or highway, the person so offending shall for every such offense forfeit and pay a sum not exceeding five dollars.

If any township commissioner shall connive with any person so asking, demanding, or contriving to extort money, intoxicating drink, or any other thing from any person traveling as aforesaid, such commissioner shall, for every such offense, forfeit and pay a sum not exceeding ten dollars.

If any person shall stop or obstruct any public road or highway in any township, or shall commit any nuisance thereon by felling trees, making fences, turning the road, or in any other way, and shall not on notice given by the township commissioners, forthwith remove the obstruction or nuisance and repair the damages done to such road, such person shall, for every such offense, forfeit and pay a sum not more than twenty-five dollars. Nothing in this section shall debar an indictment for any such nuisance, as in case of misdemeanor at common law.

All penalties provided for in this section shall be recovered by summary proceeding for the use of the township.

(q) Opening, Making, Amending, and Repairing Highways and Bridges by Contracts with Taxpayers

Section 2090. Taxpayers' Rights. Any one or more taxpayers of any township may acquire the right to furnish all the materials and labor necessary for opening, making, amending, and repairing the public highways and bridges of such township, in the manner and under the conditions set forth in this subdivision of this act.

Section 2091. Petition to Court. To acquire such right such taxpayers shall, before the beginning of the township fiscal year, present to the court of quarter sessions a petition setting forth that he, she, it or they, are the owners of property assessed and taxed for road purposes in such township, the approximate number of miles of public road in such township, and the ability of the petitioner or petitioners to lay out, open, make, amend, and repair the public highways and bridges of such township wholly at his, her, its, or their own expense, for the ensuing township fiscal year, and to pay the other expenses of such township as hereinafter provided, without any right against or claim upon such township for or by reason of the materials, labor, or moneys so furnished.

Section 2092. Bond of Petitioners. The petitioners shall, with the petition, present a bond to the township, in a sum equal to five hundred dollars for each mile of public road in the township, with one or more sufficient sureties, to be approved by the court, conditioned for the faithful performance by said petitioner or petitioners of his, her, its, or their duty, and to save the township harmless from any loss or claim by reason of failure so to perform said duty.

Section 2093. Notice to Commissioners and Auditors. Notice of the intention of presenting the petition and bond, and of the time when said petition and bond will be presented to the court, shall be given to the commissioners and auditor or controller of the township, at least ten days before the same are presented.

Section 2094. Contracts. Stipulations. When the petition, bond, and proof of the notice required in the preceding section, are presented to the court, the same shall be ordered filed; and the court being satisfied of the good faith of the petitioners and the sufficiency of the petition, bond, and notice, shall order and direct the commissioners, on behalf of the township, to enter into a contract with the petitioner or petitioners. In such contract the petitioner or petitioners shall bind him, her, or itself or themselves:

First. To open, make, amend, and repair the public highways and bridges of the township for the ensuing fiscal year in a lawful and workmanlike manner, wholly at the expense of the petitioner or petitioners, and without creating thereby any claim upon or right against the township for or by reason of the materials, labor, or money for persons employed.

Second. To indemnify and save harmless the township from all claim, damage, cost, or expense of whatever kind, for or by reason of any act of omission of said petitioner or petitioners whereby any claim, suit, or other demand may be set up or recovered against the township.

Third. To pay, within sixty days from the beginning of the fiscal year to the following officers of such township, the following sums, to be received by said officers in full for all demands against such township for their respective services as such officers of the township for the fiscal years for which the said contract is made, which shall be in lieu of the compensation otherwise in this act provided for such officers:

namely—To each township secretary, the sum of fifty dollars; to the auditor or controller of such township, the sum of twenty-five dollars; to an attorney, to be elected by such commissioners as counsel for the township, the sum of fifty dollars; to each commissioner, the sum of one hundred dollars.

Section 2095. No Road Tax to be Levied. In consideration of the obligations set out in the preceding section to be assumed and performed by the petitioner or petitioners, the commissioners, on behalf of such township, shall stipulate that the township will not assess, levy, or collect any tax for road purposes during the fiscal year for which such contract is made.

Section 2096. Inspection. The commissioners shall view and inspect the making and repairing of the roads in such townships, at least once during every month, and satisfy themselves that the petitioners have fully complied with their contract, before final settlement and expiration of contract. If, at any time, the commissioners shall see that any portion of the roads need repair, they shall notify the petitioners to repair the same. In case said petitioners fail to repair said road within five days after notice, the commissioners are empowered to purchase such materials and employ such men as may be necessary to repair such road, and charge the same to the petitioners.

## ARTICLE XXI

### BOUNDARY ROADS AND HIGHWAYS

#### (a) Opening, Repairing and Improving on Division Line of Townships

Section 2101. Roads or highways laid out on a line which divides two townships shall be opened, made, kept clear and in repair, at the joint and equal charge of such townships. Any township necessarily incurring more than its due proportion of such charge may recover the excess so incurred from the other township.

When any public road is laid on the line of two townships, if the commissioners or supervisors of either township neglect or refuse to join with the commissioners or supervisors of the other township in opening or repairing such road, the commissioners or supervisors of the other township shall open, amend, and repair the road, and are authorized to collect a just proportion of the cost of the opening and repairing of such road from the township so neglecting or refusing to join in such opening or repairing. The commissioners or supervisors so neglecting or refusing shall be liable to a penalty of not less than four dollars and not exceeding fifty, to be recovered in a summary proceeding. All such penalties when recovered shall be paid into the township road fund.

#### (b) Maintenance of Roads Between Township and Cities or Boroughs

Section 2105. Whenever any road or street is on the boundary line between any township and any city or borough, such road or street shall be maintained jointly by the city or borough and the township. For the purpose of maintaining any such road or street, the authorities of any such township are hereby directed to enter into agreements with such city or borough, providing the manner in which the same shall be maintained, and providing for the division of the cost of maintenance between the city or borough and township. If any such city or borough and township shall fail or refuse to enter into any such contract, or if the city or borough and township cannot agree, any taxpayer of the corporate authorities of the township may present a petition to the court of quarter sessions of the county, setting forth the facts, and the court, after hearing, of which such notice shall be given to all parties interested, as the court may direct, shall make an order directing the manner of such maintenance and the division of the cost of maintenance between the city or borough and the township. The action of the court shall be final.

#### (c) Highway, the Centre Line of Which Is the Dividing Line Between Townships and Boroughs or Cities in the Same County.

Section 2110. Whenever the centre line of any highway constitutes the dividing line between a township and any city or borough located in the same county, the commissioners of the township, may, jointly with the county, enter into a contract with the city or borough providing for the grading, curbing, and macadamizing or paving of such highway.

Such alterations or improvement shall be constructed, and subsequent repairs shall be made, under the supervision of the proper authorities of the city or borough, in compliance with the laws governing the construction of such alterations or improvements in such city or borough, and with plans and specifications to be agreed upon in writing between the commissioners of the township and the city or borough and the commissioners of the county.

The cost of any alteration or improvement shall be borne one-half by the city or borough and one-half by the county and township in equal portions.

The cost of repairs shall be borne one-half by the city or borough and one-half by the township, or by the county and township in equal portions, or such other proportions as are agreed upon in the joint contract of the township with the county.

#### (d) Highway, the Centre Line of Which Is the Dividing Line Between Townships and Cities in an Adjacent County

Section 2115. Whenever the centre line of any highway constitutes a dividing line between a township and a city located in an adjacent county, it shall be lawful for the township commissioners, to enter into a contract with the county in which it is located, and with the city, providing for the grading, curbing, macadamizing, or paving of the roadway of said highway, the cost thereof to be borne one-half by the city, and one-half by the township and the county in which such township shall be situated in equal portions.

The said alteration or improvement shall be constructed, and subsequent repairs shall be made, under the supervision of the proper authorities of the said city, in compliance with existing laws governing such construction or improvement of such city, and in further compliance with plans and specifications to be agreed upon in writing between such city and the commissioners of the county and the township commissioners of the said township. The cost of repairs shall be borne one-half by the city and one-half by the township or by the county and township in equal portions or such other proportions as may be agreed upon by the county and township.

In all cases in which it shall be found impossible to enter into such contract or agreement as is provided for in this section, or where either the city or the township or the county in which such township is situated shall refuse to enter into such contract or agreement, it shall be lawful for the township to present its petition to the court of common pleas of either county, setting forth the facts and the circumstances, including the condition of the highway from which the necessity or desirability for the grading, curbing, macadamizing, or paving of the roadway appears, and the estimated cost thereof, and that the terms of the said contract as provided for in this section cannot be agreed upon by the said city and the county or township, or either or any of them or that the county or township, or either or any of them or that either such city or the county or township, or any or either of them refuses to enter into such contract. Such petition may pray that such court may, after hearing all the parties concerned, make its order or decree, defining the nature and character of the improvement reasonably necessary or desirable to be made to the roadway, and requiring the parties hereinabove specified to enter into a contract or contracts for the making and constructing of the same as herein provided for. A copy of the said petition, duly certified, shall be served upon the city or the county and township concerned, other than the petitioner, with notice of such day as may be fixed by the court for the hearing. Thereupon either or both of the parties served with such notice shall be entitled, on or before such date, to file in the said court its answer to the said petition, setting forth its version of the facts or such other matters in relation thereto as may be deemed necessary or proper by it. The said court, upon the date so fixed or at such other time as it may appoint, shall hear the evidence of the parties, or it may refer the matter to a master, who shall hear the testimony of the parties and report his findings, in the same manner and under the same procedure as provided by the rules in equity in similar cases, to the said court, which may reject, confirm, or modify the same, and may make its decree or order directing the making of such alterations or improvements to the roadway as may be deemed reasonably necessary or desirable and providing for the sharing of the cost of such improvements, one-half by the city, and one-half by the county and township in equal

portions. The said order or decree may further provide that the repairs to such alterations and improvements subsequently required shall be borne one-half by the city, and one-half by the county or township in equal portions or such other proportions as between the county and the township as such court may find to be legal and proper; and thereupon the said grading, curbing, macadamizing, or paving of the roadway of such highway shall proceed in accordance with the decree or order of the said court in the same manner as if the contract or agreement provided for in this section had been entered into and duly executed.

(e) Improvements of Street Where More Than One-Half of Width is in Township. Assessment of Property Outside Limits

Section 2120. Whenever any street, alley, or highway more than one-half the width of which it within the limits of any township shall divide the said township from any other municipality or township located within the same county, such street, alley, or highway may be improved by the township within which the greater width is located in the same manner as if the said street, alley, or highway were entirely located within the limits of said township.

The property abutting on the side of said street, alley, or highway which is located outside the limits of the township making such improvements shall, for a depth of one hundred and fifty feet plus one-half the width of said street, alley, or highway from its centre line be assessed for any and all municipal improvements to or on the said street, alley, or highway in the same manner as such property would be assessed under this act if it were entirely located within the limits of such township.

(f) Assessment of Property Outside Limits of Township for Street Improvements

Section 2125. Whenever any street or alley, entirely within the limits of any township, shall divide such township from any other municipality or township located in the same county, the property on the side of the street or alley, opposite the line of such township shall, for a depth of one hundred and fifty feet, be assessed for municipal improvements on such streets or alleys on which property shall abut. Such assessment shall be made in the same manner and in the same proceeding as is used for the assessment of property within such township for such improvement.

(g) Grading, Curbing, Paving, Macadamizing Boundary Street, Et Cetera

Section 2130. Townships may enter into agreements with adjoining boroughs for the grading, paving and curbing, or macadamizing of streets and alleys which may be boundaries between such townships and boroughs; and may provide in such contract that the damages, costs, and expenses of such improvement shall be divided between such townships and boroughs in proportions agreed upon.

In grading, paving and curbing, or macadamizing any such streets or alleys, townships shall exercise such power only upon petition of the majority of the property owners in interest and number, abutting the line of the proposed improvement within the township limits, to be verified by the affidavit of one of the petitioners; a majority in interest of owners of undivided interest in any piece of property to be treated as one person asking that such improvement be made.

The portion of the damages, costs, and expenses agreed to be paid by any township shall be ascertained, and the benefits incident thereto shall be assessed and collected, in the manner provided in this act for the assessment of damages and benefits by viewers.

## ARTICLE XXII

### BRIDGES AND VIADUCTS

(a) As Part of Road, Street, Highway, Lane, or Alley

Section 2201. Whenever, in the opening, grading, or improving of any road, street, highway, lane, or alley, in any township, it is necessary to erect or construct any bridge and the piers, abutments and approaches therefor, the same may be erected and constructed by the township as part of such road, street, highway, lane, or alley. In any such erection or construction, the township may take, use and occupy private property. All damages shall be awarded and benefits assessed as part of the proceeding to open, grade, or

improve the road, street, highway, lane, or alley of which the bridge is a part.

(b) Over Railroads

Section 2205. Power to Construct. Townships may build or purchase existing bridges or viaducts over railroads, rivers, creeks, streams, and private property, or over railroads and any of them, or over railroads only, whether the bridge or viaducts are wholly or partly within the township limits, for the purpose of uniting two or more streets or highways or separate portions of the same street or highway. Such bridges and viaducts must in all cases cross railroads. Such bridges and viaducts and the approaches thereto shall be constructed and the damages in connection therewith paid as provided by the Public Service Company Law.

Section 2206. Maintenance. Such viaduct or bridge shall be maintained as a township structure, and the township is authorized to contract with any party interested, except the county, for the maintenance of the same.

(c) Over Marshy or Swampy Grounds, Creeks, Rivulets, Gullies, Canals and Railroads

Section 2210. Power to Make and Maintain. The commissioners of townships, in making and repairing the roads, shall make and maintain within their township sufficient bridges over all small creeks, rivulets, deep gullies, canals, and railroads, where the same is necessary for the ease and safety of travelers.

Such bridges over canals or railroads shall not obstruct the railroad or canal over which it is built. Nothing in this section shall release railroad or other companies or the Commonwealth from the requirements of existing laws.

Section 2211. Damages. In the construction and maintenance of such bridges, all damages shall be awarded and benefits assessed as part of the proceeding to lay out, open, make or repair the road of which the bridge is a part.

(d) Over Streams, Railroads, and Canals on Township Boundaries

Section 2220. Bridges on Division Line of Townships. Where a small creek or a railroad or canal, over which a bridge is necessary is on the boundary line of two townships, the bridge shall be built and maintained at the joint and equal expense of the townships, by their respective commissioners or supervisors, in the manner directed by this act in the case of public roads which may be the division line of townships.

Section 2221. Bridges Between Townships and Municipalities. Whenever a creek, railroad, or canal, over which a bridge is necessary, is on the division line of a township and a municipality, the township shall unite with such municipality in the construction and maintenance of such bridge and pay an equal share of the expenses incident thereto.

Section 2222. Bridges Over Railroad or Canal. If a bridge is built over such boundary railroad or canal by virtue of the provisions of the preceding section of this act, such bridge shall not obstruct the railroad or canal over which it is built. Nothing in said sections shall release railroad or other companies or the Commonwealth from the requirements of existing laws.

(e) Maintenance, Repair, and Rebuilding of Bridges Built by County

Section 2225. Whenever a bridge or part thereof has been built by the county, or the whole or part of the money necessary to build it has been furnished by the county, and the bridge has not been entered on record as a county bridge, such bridge shall be maintained, kept in repair, and rebuilt, when necessary, by the township or townships in which, or on the boundary line of which, it is located, without rendering the county liable for the same.

## ARTICLE XXIII

### SIDEWALKS

Section 2301. Power to Lay Out, Ordain and Establish Grades. Townships may lay out, ordain and establish sidewalks upon any of the roads, streets, lanes and alleys of the township and may establish grades for such sidewalks, which grades may be separate and apart from the grade established for the highway.

Section 2302. Width. The width of any sidewalk shall be fixed by the township commissioners by ordinance.

Section 2303. Paving and Curbing Sidewalks. Townships may, upon such notice as may be provided by ordinance, require owners of property abutting on any public road, street, lane, or alley, including State and State-aid highways and county roads, to construct, pave, curb, repave, and recurb the sidewalks along such property with such materials, at such grades and under such regulations as may be prescribed by ordinance, and upon failure of such owners to comply with such notice, or without notice to the property owners as above provided, the townships shall in either case have power to cause the same to be done by the township, and to levy and collect the cost thereof from such owners of property abutting such sidewalk.

The cost of any such grading, paving, curbing, repaving and recurbing shall be a lien upon the premises from the time of the commencement of the work, which date shall be fixed by the township engineer and shall be filed with the township secretary. Any such lien may be collected by action in assumpsit or by lien filed in the manner provided by law for the filing and collection of municipal claims.

The cost of any such paving, curbing, repaving and recurbing may, in any case, be borne in whole or in part by the township.

No sidewalks shall be established and constructed upon any State highway without the consent of the State Department of Highways, or upon any county road without the consent of the county commissioners.

Section 2304. Repair of Sidewalks. The owner of the abutting property shall keep the sidewalk, together with any portion of his property paved and used as a sidewalk or public walk, immediately in front of his property, in good order and repair, and at all times free and clear of all obstruction to safe and convenient passage, and free of any merchandise placed there for display, if the removal thereof is ordered by the township commissioners. If the owner of any property neglects to perform the duty so required of him, the township commissioners may serve written notice upon him requiring him to do what is necessary. If such property owner fails to comply with the requirements of such notice within thirty days from date of its service, the township commissioners may make the necessary repairs or remove any obstruction. The cost of the same, together with a penalty of ten per centum, shall be paid by the delinquent property owner, and may be collected by action of assumpsit, or the township commissioners may file a municipal lien against the property. The notice provided for in this section may be served on the property owner by leaving the same at his place of residence, or, if he has no residence in the township, then by posting the same on the premises and mailing a copy thereof to the owner at his last known address.

## ARTICLE XXIV

### SEWERS AND DRAINS

#### (a) Establishing and Constructing Sewer and Drainage Systems, Sewer Connections, and Rates; Disposal of Sewage; Assessment of Cost of Construction

Section 2401. Power to Establish and Construct Sewers and Drains. Sewer Rentals. Townships may establish and construct a system of sewers and drainage, locating the same, as far as practicable, along and within the lines of the public roads of the township, as seem advisable to the commissioners. The township commissioners may permit, and, where necessary for the public health, require, adjoining and adjacent property owners to connect with and use the same. All persons so connecting may be required to pay, in addition to the cost of making such connections, a monthly or annual rate prescribed by ordinance. Such monthly or annual rate shall constitute a lien, until paid, against the property so connecting with such system, and the amount thereof may be recovered by due process of law.

Nothing in this section shall be construed to repeal or modify any of the provisions of the Public Service Company Law.

Section 2402. Location of Sewers on Private Property. Where it is reasonably impracticable, in the judgment of the commissioners, in any part of such system, to carry such sewers or drains along the lines of public roads, the commissioners may locate and construct so much of the same as is necessary through private lands.

Section 2403. Treatment Works and Facilities Therefor. The commissioners shall make the necessary provision for the disposition of the sewage and drainage within, or for carrying the

same beyond, the limits of the township; and, to this end, they are hereby authorized to enter into contracts with other municipalities and other corporations or persons, to purchase, acquire, enter upon, take, appropriate, occupy, and use such lands, rights, and interests therein, within the corporate limits of other townships or boroughs, as shall be necessary for the proper location, construction, maintenance, use and operation of sewer, main drains or disposal plants, including such lands, rights, and interests therein as shall be necessary for future additions to and enlargements of such sewage facilities, and as may be necessary to carry out the plans and specifications upon which a permit has been issued by the Secretary of Health, in accordance with the provisions of the act of April twenty-second, one thousand nine hundred and five, entitled "An act to preserve the purity of the waters of the State for the protection of the public health," and of "The Administrative Code."

Section 2404. Entry on Lands to Mark Sewer Routes. Damages. In the event of inability to agree with the owners, either for the land necessary for so much of the line of sewers and drains as are not located upon public roads, or for so much land as is required for the disposition of the sewage, the commissioners may enter upon said land and mark thereon the route and width necessary for the construction of the line of sewers or drains, or the boundaries of so much land as is necessary for disposition of such sewage, and occupy the said land for such purposes. For all damage done or suffered, or which accrues to the owner or owners of such land, by reason of the taking of the same, the funds of the township raised by taxation shall be pledged and deemed as security. Such damages shall be determined by viewers in the manner provided in this act for eminent domain proceedings.

Section 2405. Enforcement of Judgment for Damages. The damages as awarded when the report of viewers is finally confirmed shall be entered as a judgment, and if the same is not paid within thirty days after the entry thereof, execution to enforce the collection thereof may be issued, as in other cases of judgment against townships.

Section 2406. Cost of Construction. How Paid. The cost of construction of any system of sewers or drains constructed by the authority of this subdivision of this act shall be charged upon the properties accommodated or benefited thereby to the extent of such benefits. Any amount not legally chargeable upon properties benefited shall be paid out of the general township fund.

Section 2407. Sewer Districts. Whenever a sewer system is constructed by a township for the accommodation of a certain portion only of the township, the commissioners of such township may constitute the territory accommodated into a sewer district or divide it into several sewer districts. In every such case of division into several districts, the commissioners shall make an estimate of the proportion of the cost of the sewer system which should equitably be charged on each of said districts, and declare and establish such apportionment by ordinance. No district shall be charged with more than its due proportion of the cost of the main sewers, pumping stations, et cetera, used jointly by more than one district. The aggregate amount charged on property in any such district shall not exceed the amount of such estimate. Where the whole of the township is accommodated by the system, it may also be treated as a single district or divided into districts, and be subject to the foregoing provisions.

Section 2408. Manner of Assessment. The charge for any such sewer construction in any township shall be assessed upon the properties accommodated or benefited in either of the following methods:

(a) By an assessment, pursuant to township ordinance, of each lot or piece of land in proportion to its frontage abutting on the sewer, allowing such reduction in the case of properties abutting on more than one sewer as the ordinance may specify. No assessment by frontage shall be made on properties of such a character as not to be lawfully subject to such manner of assessment, and each abutting property shall be assessed with not less than the whole amount of the benefit accruing to it and legally assessable.

(b) By an assessment upon the several properties abutting on the sewer in proportion to benefits. The amount of the charge on each property shall be ascertained as provided in this act for the assessment of benefits.

When a township is divided into sewer districts, the assessment in each district may be by different methods.

Section 2409. Procedure for Assessment of Benefits. In all cases where the township commissioners shall select the method provided by subdivision (b) of the foregoing section, they shall petition the court of common pleas for appointment of viewers to assess benefits. In all cases where they shall neglect for a period of three months after the completion of the sewer system to either ordain assessments by frontage or present petition for appointment of viewers, taxpayers of the township, whose property valuation as assessed for taxable purposes within the township shall amount to fifty per centum of the total property valuation as assessed for taxable purposes within the township, may present a petition to the court of common pleas of the proper county for the appointment of viewers to assess benefits; and in all cases where such taxpayers shall, within three months of the adoption of any ordinance levying an assessment under the method provided by subsection (a) of said section, by petition state to said court that such assessment insufficiently represents the benefits accruing to abutting properties, they may include in such petition a prayer for the appointment of viewers to assess benefits. In either case the said court shall thereupon appoint three disinterested persons from the board of county viewers, neither of whom shall be a resident of that portion of the township which is accommodated by the sewer in question, and the viewers so appointed shall proceed as provided in this act for proceedings for the assessment of damages and benefits by viewers. The aggregate of the assessments in any sewer district shall not exceed the amount charged in such district for its share of the cost of sewer construction, unless the same shall, by petition of taxpayers whose property valuation as aforesaid shall amount to fifty per centum of the total property valuation as assessed for taxable purposes within the township, presented within three months after the adoption of an ordinance providing for an assessment by frontage, be stated to insufficiently represent the amount of benefits to such properties, in which case the proceedings by taxpayers authorized shall be applicable. Upon the filing of such a petition, by taxpayers as aforesaid, for appointment of viewers, any assessment made by the commissioners and any proceedings thereunder shall be null and void.

Section 2410. Lien for Assessments. Cost of Proceedings. After the amount of the assessment charged upon the several properties has been established, either by ordinance making assessments according to frontage or by confirmation of any report of viewers in whole or in part, it shall be the duty of the township commissioners to file municipal liens for the assessments covered by such ordinance or confirmation within the time and in the manner provided by law; the same to be subject in all respects to the general law providing for the filing and recovery of municipal liens. The amounts of all assessments shall be payable to the township treasurer for the use of the township. The commissioners shall also make out bills for the amount charged against each property, which shall be forthwith sent to all property owners residing in the township, and mailed to all such owners residing elsewhere whose address is known. The cost of publication of notices in proceedings before viewers shall be paid by the township, upon presentation of bills approved by the court.

(b) Acquisition of Sewer System from Private Interests.  
Distribution of Costs

Section 2415. Any township in which any person, firm, or corporation is maintaining sewers and culverts, with the necessary inlet and appliances for surface and under-surface and sewage drainage, may become the owner of such sewers, culverts, inlet, and appliances, by paying therefor the actual value of the same at the time of the taking by the township.

In case the commissioners of the township cannot agree with the owners of such sewers as to the price to be paid therefor, the commissioners may enter upon and take possession of such sewers, culverts, inlets and appliances. For all damages done or suffered, or which accrues to the owner or owners of such sewer by reason of the taking of the same, the funds of the township, raised by taxation, shall be pledged and deemed as security, such damages to be determined by viewers in the manner provided by this act for eminent domain proceedings. If any sewer or sewer system is acquired by purchase, under the provisions of this section, the cost of such acquisition may be distributed or assessed in the same manner as if such sewer or sewer system had been constructed by such township under the provisions of this act.

(c) Contracts With Individuals or Corporations for Construction and Maintenance of Sewer and Drainage Systems

Section 2420. In any case where, under the authority of section two thousand four hundred and one of this act, a system of sewage and drainage covering any township in whole or in part shall have been approved and authorized by ordinance, the commissioners may enter into a contract with any responsible individual or individuals, or corporation, for the construction of such system of sewage or drainage, at the expense of such individual or individuals, or corporation. He, they, or it shall be entitled, under such contract, to exercise all the powers of the township in the construction, maintenance, and operation of such system of sewage or drainage with the right to collect such charges in connection therewith as the commissioners prescribe, in as full manner as the same might have been collected by the township or the commissioners. In such contract the commissioners shall reserve to the township the right at any time, or after a prescribed time, to itself take possession of such system of sewage and drainage and its appurtenances, at a price and upon terms to be fixed in the contract.

Nothing in this section shall be construed to repeal or modify any of the provisions of the Public Service Company Law.

(d) Sewers and Drains in Streets or Alleys, or Over Private Property; Assessment of Costs of Construction According to Benefits

Section 2425. Townships may construct sewers and drains in any street or alley, or through or on or over private property. The costs, damages, and expenses of the construction of any such sewers or drains shall be assessed upon the properties accommodated or benefited in either of the following methods:

(a) By an assessment, pursuant to township ordinance, of each lot or piece of land in proportion to its frontage abutting on the sewer allowing such reduction in the case of properties abutting on more than one sewer as the ordinance may specify. No assessment by frontage shall be made on properties of such a character as not to be lawfully subject to such manner of assessment, and each abutting property shall be assessed with not less than its proportion, aforesaid, of the entire cost and expense of such construction.

(b) By an assessment upon the several properties abutting on the sewer in proportion to benefits, the amount of the charge on which property shall be ascertained and the rights of taxpayers conferred in connection therewith as provided in this act for the assessment of damages and benefits by viewers.

(e) Sewers Under State and County Highways

Section 2430. Consent Necessary. Townships may construct sewers and drains in and under any county or state highway within the township boundaries. In case of the construction of sewers upon county highways, the consent of the county commissioners of the county shall first be obtained; and in case of the construction of sewers upon any state highway, the consent of the State Department of Highways shall first be obtained.

Section 2431. Assessment of Cost. Whenever sewers have been or shall be laid or constructed by any township in and under such highways, such township may ascertain, levy, and collect the costs and expenses of the construction thereof from the abutting property holders, by viewers in accordance with provisions of this act relating to the assessment of damages and benefits by viewers.

(f) Connecting With Sewer of Adjoining Municipality

Section 2435. Connection by Agreement or Petition. Appointment of Viewers. Whenever any township shall desire to connect with the existing sewer of any adjacent municipality, the two municipalities so joining may enter into an agreement for such purposes, or if no agreement has been reached between such township and the adjacent municipality, then such township shall proceed in the following manner:

An application shall be made by the board of commissioners to the court of quarter sessions, setting forth the desire of the township to connect with the sewer of the municipality. If the court shall be of the opinion that such connection can be made without impairing the usefulness of the existing sewer, it shall appoint three viewers, who shall view the premises, and investigate the facts of the case, and shall, in the manner provided by this act for such proceedings, assess the proportionate part of the expense of building the original sewer upon the

petitioning township, and shall fix the proportion of the expense for repairs which the municipality and such township shall thereafter bear and determine all other questions which are likely to arise in connection therewith.

Section 2436. Notice of Contemplated Construction. Protests by Property Owners. No sewer, system of sewers, or drain shall be constructed under the provisions of this subdivision, unless a resolution of the board of commissioners authorizing the same shall be published in a newspaper of general circulation published in the county in which the township is situated once a week for three successive weeks. If within twenty days after the last publication, or at any time during the period of publication, taxpayers of the township, whose property valuation within the township shall amount to fifty per centum of the total property valuation as assessed for taxable purposes within the township, shall sign, and file in the office of the prothonotary of the court of common pleas of the county in which the township is located, a written protest against the construction of such sewer, sewer system, or drain, then the construction authorized by such resolution shall not be undertaken or proceeded with.

#### (g) Joint Sewers and Drains

Section 2440. Agreements for Joint Sewers. Townships may enter into agreements with municipalities or other townships for the purpose of building sewers, including trunk-line sewers or drains and sewage-disposal plants. Such agreement shall provide for the joint maintenance of the same.

Section 2441. State Permit. No such sewer or plant shall be constructed until plans and specifications have been submitted to the State Department of Health and approved, in accordance with provisions of the act of April twenty-second, one thousand nine hundred and five (page two hundred and sixty), entitled "An act to preserve the purity of the waters of the State for the protection of the Public Health."

#### ARTICLE XXV

#### COLLECTION BY INSTALMENT OF THE COST OF STREET, CURB, SIDEWALK AND SEWER IMPROVEMENTS

Section 2501. Ordinances for Instalment Payments. When any township shall authorize the grading, subgrading, or the permanent paving and improvement, of any streets or alleys, or parts thereof, or the construction of curbs, sidewalks or sewers, and the entire cost, or any part thereof, shall be assessed against the properties abutting on such improvement, whether by the foot front rule or according to benefits, the board of commissioners may provide in the ordinance that the assessment or any of them may be paid in semi-annual or annual instalments. Such instalments shall bear interest, at a rate not exceeding six per centum, to be fixed by the board of commissioners in the ordinance, from the date of the commencement of the work or the construction of such improvement.

Section 2502. Issue of Bonds. In order to provide for the payment of the cost and expenses of such improvement, the board of commissioners may, from time to time, issue bonds, in sums equal to the amount of assessments. The bonds shall bear the name of the street or alley to be improved, or the curb, sidewalks or sewer constructed; and shall be payable at periods not exceeding ten years from the date of their issue, to be provided in the ordinance directing the improvement.

Section 2503. Sale of Bonds; Interest. The bonds shall bear interest at a rate not exceeding six per centum per annum, payable semi-annually or annually, as the ordinance shall direct; and shall be negotiated at not less than par, and the proceeds thereof applied solely to the payment of such improvement.

Section 2504. Entry of Liens. Liens to secure the assessments or any part thereof remaining due shall be entered in the prothonotary's office of the county, in the same form and collected in the same manner as municipal claims are filed and collected.

Section 2505. Assessments; Where Payable. Such assessments shall be payable at the office of the township treasurer, or such other place as the ordinance shall provide, in semi-annual or annual instalments, with interest at the rate provided from the date from which interest is computed on the amount of the assessments. The moneys so received by the township shall be applied to the payment of such bonds exclusively.

Section 2506. Default in Payment of Instalment. In case of default in the payment of any instalment and interest for a period of sixty days after the same shall become due, the entire assessment and accrued interest shall become due; and the township solicitor shall proceed to collect the same under the general laws relating to the collection of municipal claims.

Section 2507. Payments in Full; Subdivisions of Property. Any owner of property, against whom any such assessment has been made, may pay the same in full, at any time, with interest thereon to the next semi-annual or annual payment, and such payment shall discharge the lien. If any owner shall subdivide any property after the lien attaches, he may, in like manner, discharge the same upon any subdivided portion thereof by paying the amount for which such part would be liable.

#### ARTICLE XXVI

#### REVOLVING FUND FOR STREET AND SEWER IMPROVEMENTS

Section 2601. Special Tax. The several townships are hereby empowered to levy and collect annually a tax upon all property, taxable for township purposes, not to exceed five mills on the dollar in any one year, for the purpose of creating and maintaining a revolving fund, to be used by such township in making permanent street, sidewalk or sewer improvements, and to pay contract prices for permanent street, sidewalk or sewer improvements, prior to the collection of the cost and expense or any part thereof from the property owners adjoining or abutting thereon by such townships under existing laws.

Section 2602. Repayments Into Revolving Fund. When the cost and expense, or any part thereof, of the construction of any permanent street, sidewalk or sewer improvement, which has been made under existing laws, and which has been aided in its construction from the said revolving fund hereby provided for, shall have been assessed and collected from the owners of the property adjoining or abutting upon such improvement, it shall be applied to the credit of the said revolving fund, to the extent of the withdrawal therefrom for such purpose.

#### ARTICLE XXVII

#### WATER SUPPLY AND WATERWORKS

##### (a) Acquisition, Construction and Maintenance

Section 2701. Contract with Water Companies and Municipality. Townships may contract with any adjoining municipality, owning a waterworks, or with a private company, for a supply of water for public and private uses to be delivered into the lines of the township at or near or within the boundaries thereof.

This section does not authorize a contract between a township and a municipality, or a private company, for the supply of water in territory being supplied by any other private company.

Section 2702. State Permit. A township making such contract may, by ordinance, provide and regulate and protect a system of distribution of the water, after a certified copy of the plans and surveys for such system, with a description of the sources from which it is proposed to derive the supply, are filed in the Department of Health, and a written permit for the construction of such system obtained from the Secretary of Health in accordance with existing law.

Section 2703. Occupation of Highways. In providing for, regulating, and protecting and extending its system of distribution of water, the township may occupy public highways, and may take, injure, or destroy private property. No highway under the jurisdiction of the State Department of Highways shall be occupied until a permit therefor has been obtained from the State Department of Highways. Property belonging to or used as a cemetery or a place of public worship, or any public or parochial school, or other educational or charitable institution or seminary, shall not be taken, injured, or destroyed by virtue of this act.

Section 2704. Property Damages. Bond by Township. If the compensation and damages arising from such taking, injury, or destruction of private property cannot be agreed upon, the township may tender its bond as security to the party claiming or entitled to any damages, or to the attorney or agent of any absent person, or to the agent or other officer of a corporation, or to the guardian or committee of any person under legal incapacity. The condition of the bond shall be that the town-

ship shall pay or cause to be paid such amount of damages as the party shall be entitled to receive, after the same shall have been agreed upon or as assessed in the manner provided in the following sections of this article.

In case the party or parties claiming damages refuse or do not accept the security so tendered, the township shall give the party, his or their agent, attorney, guardian, or committee, at least ten days' written notice of the time when the same will be presented to the court of common pleas for approval.

Thereafter the township may present its bond to the court, and when approved the bond shall be filed in court for the benefit of those interested. Recovery may be had thereon for the amount of damages finally determined, if the same is not paid or cannot be collected by execution on the judgment in the issue formed to try the question. Upon the approval of such security the township may enter into possession.

Section 2705. Appointment of Viewers. In case the compensation for damages accruing from such taking, injury, or destruction has not been agreed upon by parties in interest, the court of common pleas, or any law judge thereof in vacation, on application thereto by the township or any person interested in the property, shall appoint three members of the board of viewers of the county who shall assess the damages as provided in this act for eminent domain proceedings.

(b) Construction, Acquisition, and Maintenance of Waterworks in Connection with Boroughs

Section 2710. Joint Maintenance of Works With A Borough. Any township may unite with a borough in the construction or acquisition and maintenance of works for the supply of water.

Section 2711. State Permit. The construction of waterworks, as provided for in the preceding section, shall be after plans for such waterworks have been filed with the Secretary of Health, and a permit issued in accordance with existing law.

Section 2712. Commission of Waterworks. Whenever any township unites with a borough in the construction or acquisition and maintenance of waterworks, the commissioners of such township, after the passage of an ordinance or resolution to that effect, may join with the councils of such boroughs, now authorized by section two thousand four hundred and sixty-two of the General Borough Act, approved the fourth day of May, one thousand nine hundred and twenty-seven, (P. L. 519), so to join and apply to the court of common pleas for the appointment of a commission of waterworks. Such commission shall be composed of citizens of each of the boroughs and townships so uniting.

## ARTICLE XXVIII

### PUBLIC BUILDINGS

Section 2801. Town Hall. The commissioners of townships may procure a suitable lot of ground, and/or erect a suitable building thereon for a townhouse in which to hold elections, store road machinery, hold meetings of township officers, and for other township uses. For the purpose of procuring a lot of ground and erecting a town hall, the commissioners may borrow money at a rate of interest not exceeding six per centum and issue bonds therefor.

Section 2802. Unloading and Warehouses. The commissioners may purchase or lease land adjacent to the tracks or right of way of any railroad or street railway, within or without the limits of such township, and erect thereon suitable unloaders, warehouses, or other buildings as may be necessary for unloading, handling, and storing road materials and supplies.

Section 2803. Appropriation of Property. Townships may enter upon and appropriate private property, and also land heretofore granted or dedicated to public or other use, within the limits of such township, and which is no longer used for the purpose for which the same was granted or dedicated, for the erection thereon of a town hall, fire house, lockup, and such other public buildings as are necessary for public purposes.

No land or property used for any cemetery, burying ground, public or parochial school, educational or charitable institution, seminary, or place of public worship shall be taken or appropriated by virtue of any power contained in the preceding section.

Section 2804. Ordinance of Commissioners. Whenever the commissioners desire to acquire, enter upon, take, use and ap-

propriate private property or lands for public buildings, they shall declare such intention by an ordinance duly enacted.

Section 2805. Assessment of Damages. The compensation and damages arising from such taking, using, and appropriating of private property for such purposes shall be considered, ascertained, determined, awarded, and paid in the manner provided in this act, for eminent domain proceedings.

Section 2806. Use of Public Lands Acquired for Other Purposes. Whenever the commissioners desire to take any lands heretofore granted or dedicated to a use or purpose for which they are no longer used, they shall pass an ordinance declaring such intention, and shall thereupon petition the court of common pleas for leave to file the bond of such township for the purpose of securing any person or persons who may be injured by the taking of such lands. The court shall thereupon direct notice to be given by publication in at least two newspapers of the county. If no exceptions are filed to the bond on or before the day fixed in the notice, the court shall approve the same. The court may increase the amount of the bond, and hear and determine all exceptions that are filed against the approval thereof. Upon the approval of such bond, the commissioners may enter upon and take such lands for the purposes of erecting public buildings. The bond, which shall be in the name of the Commonwealth, for the use of any person or persons who are entitled to damages by reason of the taking of the lands, shall remain on file for their use and benefit. In case the compensation for damages, accruing from any such appropriation, has not been agreed upon by the parties in interest, the same may be assessed by viewers in accordance with the provisions of this act for the assessment of damages in eminent domain proceedings.

## ARTICLE XXIX

### LICENSES AND LICENSE FEES

#### (a) Transient Retail Merchants

Section 2901. Every township shall have power, by ordinance, to regulate and license each and every transient, retail business within such township, for the sale of goods, wares and/or merchandise, and to prohibit the commencement or doing of any such business until or unless the license required by such ordinance has been procured from the proper authorities by the person, firm or corporation desiring to commence such transient retail business; and to enforce such ordinances by penalties not exceeding three hundred dollars and/or by other appropriate means. The amount of any such license shall not exceed two hundred dollars for each month or fractional part thereof, during which any such sale is continued.

Nothing contained in this section shall be construed to apply to farmers selling their own produce; or to the sale of goods, wares, and merchandise, donated by the owners thereof, the proceeds whereof are to be applied to any charitable or philanthropic purpose.

#### (b) Restrictions

Section 2910. Agents for Licensed Dealers Not to be Licensed. It shall be unlawful for any township to levy any license fee or mercantile tax upon any persons taking orders for merchandise, by sample, from dealers or merchants, for individuals or companies who pay a license or mercantile tax at their chief places of business. Nothing in this section shall authorize any person to sell by retail to other than dealers or merchants.

Section 2911. Insurance Agents and Brokers Not to be Licensed. It shall be unlawful for any township to impose or collect any license fee upon insurance companies or their agents, or insurance brokers, authorized to transact business under the Insurance Laws of this Commonwealth.

Section 2912. License Fees on Residents Not to Exceed Those on Nonresidents. It shall be unlawful for any township to impose by ordinance or exact or collect under the provisions of any ordinance heretofore or hereafter enacted any license tax or fee upon or from any manufacturer or the agent, representative, or employee of any manufacturer who is a resident of the Commonwealth for soliciting orders for, or for selling any goods, merchandise, or wares manufactured within this Commonwealth that is not or cannot legally be imposed upon or exacted from any manufacturer or dealer or the agent, representative, or employee of any manufacturer who is a nonresident of the Commonwealth for soliciting orders for or for selling any goods, merchandise, or wares manufactured without the Commonwealth.

## ARTICLE XXX

## PARKS, RECREATION CENTERS, SHADE TREES AND FORESTS

## (a) Public Parks, Playgrounds, and Recreation Centers

Section 3001. Right of Acquisition. Townships may dedicate and set apart lands not dedicated to other public uses or purposes and may enter upon, appropriate, and acquire, by gift, devise, purchase, lease, or otherwise, private property, for the purpose of making, enlarging, and maintaining public parks, parkways, playgrounds, playfields, gymnasiums, public baths, swimming pools, or indoor recreation centers and may borrow money and issue bonds for such purpose. The provisions of this section shall not authorize the appropriation of private property outside the township limits, nor the appropriation of any property belonging to or used as a cemetery or place of public worship, or any public or parochial school, or other educational or charitable institution or seminary.

Section 3002. Limitation of Expenditures. No appropriation, purchase, or lease shall be made, pursuant to the preceding section of this article, whereby any township shall obligate itself to raise, by taxation in the aggregate, any sum exceeding one-half mill annually on the dollar on the assessed valuation of all property, offices, professions, and persons in the township, without the consent of a majority of the electors obtained as hereinafter provided. Such limitation of obligation shall only apply to funds which it is necessary to raise by taxation, and not to funds unappropriated which may, at the time of the lease or purchase, be in the township treasury, either derived from taxes in previous years, or from gifts or donations.

Section 3003. Submission of Question to Voters. Whenever any township shall, by ordinance, provide for the appropriation, purchase, or leasing of private property, for the purposes aforesaid, and the amount required by taxation in any year shall exceed one-half mill on the dollar of valuation, as provided in the preceding section, the township commissioners shall cause the question of such appropriation, purchase, or leasing to be submitted to the electors of the township at the municipal or general election next occurring after the expiration of ninety days from the date of such ordinance.

Section 3004. Notice of Election. The township commissioners shall give notice of the proposed submission of such question by weekly advertisements, in not more than three newspapers of general circulation in the township, for a period of three weeks immediately preceding the day of election.

Section 3005. Form of Ballot. For the purpose of having such question appear upon the ballot, the township commissioners shall certify the question to the county commissioners at least twenty-one days before the day of the election. The question may be stated substantially as follows:

Shall the township of ..... acquire by purchase or condemnation, or both, at a price not exceeding ..... dollars (or by lease for not more than ..... years, at an annual rental of not more than ..... dollars), property for the purpose of making (or of enlarging) public parks, parkways, playgrounds, playfields, gymnasiums, public baths, swimming pools, or indoor recreation centers within the locality bounded by .....

The board of commissioners may, at their discretion, omit the designation of the locality.

Section 3006. Result of Election. Resubmission of Question Limited. The result of the vote on such question shall be ascertained and certified in the same manner as the vote on the election of officers of the township. No such question, determined negatively by the voters, shall be again submitted until one municipal or general election shall intervene.

Section 3007. Liability of Township for Property Taken. The appropriation of private property for the purpose of making, enlarging, and maintaining public parks, parkways, and playgrounds is declared to be the taking of private property for public use, and for all damage suffered by the owners of any property so taken the funds of the township raised by taxation shall be pledged as security.

Section 3008. Appointment of Viewers. Whenever any township appropriates private property under the provisions of this article, and is unable to agree with the owners or lessees for the amount of compensation, or whenever, by reason of the absence or legal incapacity of any owner or lessee, no

such compensation can be agreed upon, the courts of common pleas, or any law judge thereof in vacation, on application thereto by the township or any person interested, shall appoint three viewers from the county board of viewers, who shall proceed to assess the damages as provided in this act for eminent domain proceedings.

Section 3009. Power to Maintain Park and Recreation Boards. Township may improve, maintain, and regulate public parks, parkways, playgrounds, playfields, gymnasiums, public baths, swimming pools, and indoor recreation centers.

The authority to supervise and maintain parks, playgrounds, playfields, gymnasiums, public baths, swimming pools, or indoor recreation centers may be vested in any existing body or board or in a park board or recreation board, as the township commissioners may determine. The local authorities of any such township may equip, operate and maintain the parks, playgrounds, playfields, gymnasiums, swimming pools, public baths or indoor recreation centers as authorized by this act. Such local authorities may, for the purpose of carrying out the provisions of this act, employ play leaders, recreation directors, supervisors, superintendents, or any other officers or employees as they deem proper.

Section 3010. Park or Recreation Boards. Appointment and Personnel of. If the township commissioners shall determine that the power to equip, operate, and maintain parks, playgrounds, playfields, gymnasiums, public baths, swimming pools, or recreation centers shall be exercised by a park board or recreation board, they may establish in said township, such park board, or recreation board, which shall possess all the powers, and be subject to all the responsibilities of the respective local authorities under this act. Such boards, when established, shall consist of five persons. The members of such boards shall be appointed by the commissioners of such township, and shall serve for terms of five years or until their successors are appointed, except that the members of such board first appointed shall be appointed for such terms that the term of one member shall expire annually thereafter. Members of such board shall serve without pay. Women shall be eligible for appointment. Vacancies in such board, occurring otherwise than by expiration of term shall be for the unexpired term, and shall be filled in the same manner as original appointments.

Section 3011. Organization of Boards. The members of a park board or recreation board, established pursuant to this act, shall elect their own chairman and secretary and select all other necessary officers, to serve for a period of one year, and may employ such persons as may be needed as authorized by this act. Such boards shall have power to adopt rules and regulations for the conduct of all business within their jurisdiction.

Section 3012. Expenses of Operation and Maintenance. All expenses incurred in the operation of such parks, playgrounds, playfields, gymnasiums, swimming pools, public baths, and indoor recreation centers, established as herein provided, shall be payable from the treasury of such township. The township commissioners may cause to be raised by special taxation, such tax, not to exceed two mills on the dollar of the assessed valuation of taxable property in such township, for the purpose of maintaining and operating parks, playgrounds, playfields, gymnasiums, public baths, swimming pools, and recreation centers.

Section 3013. Joint Acquisition and Maintenance of Public Parks, Playgrounds, Recreation Centers, Et Cetera. Townships may, jointly with cities, counties, boroughs, other townships of either class, or any combination or number of such units, acquire property for, operate and maintain, any parks, playgrounds, playfields, gymnasiums, public baths, swimming pools, or indoor recreation centers.

## (b) Shade Tree Commission

Section 3020. Right of Establishment. Townships may establish a commission to be known as the Shade Tree Commission of such township.

Section 3021. Personnel of Commission. Appointment. Terms. Vacancies. The commission shall be composed of three freeholders of the township, who shall be appointed by the township commissioners and shall serve without compensation.

Whenever a shade tree commission is established by any township, the township commissioners shall appoint three freeholders—one for a term of three years, one for a term of four years, and one for a term of five years.

On the expiration of the term of any shade tree commissioner, a successor shall be appointed by the township commissioners, to serve for a term of five years.

Vacancies in the office of shade tree commissioner shall be filled by the township commissioners, for the unexpired term.

Section 3022. Acceptance of Provisions of Act. Whenever, in any township, there exists a commission for the care of public parks, the township commissioners may, by a majority vote, accept the provisions of this act so far as they relate to the subject of the shade tree commission, and thereafter the park commission shall have all the powers and be subject to all the duties prescribed by this article for the shade tree commission.

Section 3023. General Powers of Commission. The commission shall have exclusive custody and control of the shade trees in the township, and is authorized to plant, remove, maintain, and protect shade trees on the public highways in the township.

Section 3024. Hiring of Employees. Legislative Power of Commission. The commission may, with the approval of the township commissioners, employ and pay such superintendents, engineers, foresters, tree wardens, or other assistants, as the proper performance of the duties devolving upon it shall require, and may make, publish and enforce regulations for the care and protection of the shade trees of the township. No such regulation shall be in force until it has been approved by the township commissioners and until it has been published at least twice in one or two newspapers of the township.

Section 3025. Report of Commission. The shade tree commission shall annually report in full to the township commissioners its transactions and expenses for the last fiscal year of the township. The park commission, in townships accepting this article, may incorporate such transactions and expenses in its regular report to the township commissioners.

Section 3026. Notice of Commission's Activities. Planting or Removal of Shade Trees. Whenever any shade tree commission or park commission in townships, accepting these provisions, proposes to plant, transplant, or remove shade trees on any highway, notice of the time and place of meeting at which such work is to be considered shall be given in one or more newspapers of general circulation in the township, once a week for two weeks, immediately preceding the time of the meeting. The notice shall specify in detail the highways or portions thereof, upon which trees are proposed to be so planted, replanted, or removed.

Section 3027. Landholders Liability for Costs. The cost of planting, transplanting, or removing any shade trees in the highways of the township, of the necessary and suitable guards, curbing, or grading for the protection thereof, and of the replacing of any pavement or sidewalk necessarily disturbed in the execution of such work, shall be paid by the owner of the real estate in front of whose property the work is done.

The amount each freeholder is to pay shall be ascertained and certified by the commission to the township commissioners and to the township treasurer.

Section 3028. Notice to and Collection of Costs from Property Holders. Upon the filing of the certificate with the township commissioners, the township secretary shall cause thirty days' written notice to be given to the persons against whose property an assessment has been made. The notice shall state the amount of the assessment and the time and place of payment, and shall be accompanied by a copy of the certificate.

The amount assessed against the real estate shall be a lien from the time of the filing of the certificate with the township commissioners, and, if not paid within the time designated in the notice, a claim may be filed and collected by the township, in the same manner as municipal claims are filed and collected.

Section 3029. Procedure Costs Paid by Township. Funds for. The cost and expenses of caring for such trees after having been planted, and the expense of publishing the notice provided in the preceding section, shall be paid by the township.

The needed amount shall each year be certified by the shade tree commissioners to the township commissioners, and shall be drawn against as required by the commission, in the same manner as money appropriated for township purposes.

The township commissioners, instead of levying the tax authorized under the general tax levying powers of this act, may provide for the expense of caring for trees already planted and of publishing the notice required by the preceding section,

by appropriation equal to the amount certified to be required by the shade tree commission.

Section 3030. Penalties. The commission may assess penalties for the violation of its regulations, and of this article so far as it relates to shade trees. Any penalty so assessed shall be a lien upon the real estate of the offender, and may be collected as municipal claims are collected.

Section 3031. Disposition of Penalties. All penalties or assessments imposed under this article shall be paid to the township treasurer, to be placed to the credit of the shade tree commission, subject to be drawn upon by the commission for the purposes of the preceding sections.

#### (c) Forests

Section 3040. Right of Acquisition of Forest Lands. Townships may acquire by purchase, gift, or lease, and hold, tracts of land covered with forest or tree growth, or suitable for the growth of trees, and administer the same under the direction of the township. Such tracts may be of any size suitable for practices and principles of scientific forestry, for the benefit of the township. Such tracts may be of any size suitable for the purpose, and may be located within or without the township limits.

Section 3041. Approval of Secretary of Forests and Waters. Before the passage of any ordinance for the acquisition of land to be used as township forests, the township commissioners shall submit to the Secretary of Forests and Waters, and secure his approval, of the area and location of such land.

Section 3042. Ordinance and Notice. Whenever the township commissioners deem it expedient to acquire any lands for forests they shall so declare in an ordinance, wherein shall be set forth all facts and conditions relating to the proposed action, which proposed ordinance shall be advertised once a week for three weeks prior to its passage.

Section 3043. Appropriation for Acquisition. All money necessary for the purchase of such tracts shall be appropriated in the same manner as appropriations for township purposes, and such funds may be provided from the current revenue or by the proceeds of a sale of bonds in accordance with existing law.

Section 3044. Control of Forests by Secretary of Forests and Waters. Upon the acquisition of any forests or lands suitable for forests, the township commissioners shall notify the Secretary of Forests and Waters, who shall make such rules for the government and proper administration of the same as may be necessary; and the secretary shall publish such rules, declare the uses of the forest in accordance with the intent of this article, and make such provision for its administration, maintenance, protection, and development as shall be necessary or expedient. The rules governing the administration of such forests shall have for their main purpose the producing of a continuing township revenue by the sale of forest products.

Section 3045. Appropriation for Maintenance. All moneys necessary to be expended for the administration, maintenance, protection, and development of such forests shall be appropriated and applied as is now done for township purposes. All revenue and emoluments arising from such forests shall be paid into the township treasury to be used for general township purposes.

Section 3046. Use of Township Forests as Outing Grounds. Township forests may be used by the public as general outing or recreation grounds, subject to the rules governing their administration.

Section 3047. Disposition of Township Forests. Procedure. Ordinance. Submission of Question. Whenever the township commissioners deem it expedient to alienate any forests, or part thereof, they shall so declare in an ordinance, wherein shall be set forth all the facts and conditions relating to the proposed action, which proposed ordinance shall be advertised once a week for three weeks prior to its passage. No ordinance shall be effective in legalizing such alienation until it has been approved by a majority vote of the people at the next ensuing election.

Section 3048. Appropriation of Moneys to Forestry Organizations. The commissioners of any township may appropriate moneys from their respective treasuries to any forest protection association co-operating in forest work with the State Department of Forests and Waters, or to be expended in direct co-operation with said Department of Forests and Waters in forest work.

## ARTICLE XXXI

## ZONING

Section 3101. Grant of Power. For the purpose of promoting health, safety, morals or the general welfare of townships, the boards of township commissioners, are hereby empowered to regulate and restrict the height, number of stories, and size of buildings and other structures, and percentage of lot that may be occupied, the size of yards, courts, and other open spaces, the density of population, and the location and use of buildings, structures, and land for trade, industry, residence, or other purpose; and may also establish and maintain building lines and set back building lines upon any or all public streets, roads, highways, lanes and alleys.

Section 3102. Districts. For any or all said purposes, the board of township commissioners, may divide the township into districts of such number, shape, and area as may be deemed best suited to carry out the purpose of this act; and, within such districts, it may regulate and restrict the erection, construction, reconstruction, alteration, repair, or use of buildings, structures, or land. All such regulations shall be uniform for each class or kind of buildings throughout each district, but the regulations in one district may differ from those in another district.

Section 3103. Purpose in View. Such regulations shall be made in accordance with a comprehensive plan, and designed to lessen congestion in the streets, to secure safety from fire panic and other dangers, to promote health and the general welfare, to provide adequate light and air and to prevent the overcrowding of land, to avoid undue concentration of population, to facilitate the adequate provision of transportation, water, sewerage, schools, parks, and other public requirements. Such regulations shall be made with reasonable consideration, among other things, to the character of the district and its peculiar suitability for particular uses, and with a view to conserving the value of buildings and encouraging the most appropriate use of land throughout such township.

Section 3104. Method of Procedure. The board of township commissioners of such townships, shall provide, by ordinance, the manner in which such regulations and restrictions and the boundaries of such districts shall be determined, established, and enforced, and, from time to time, amended, supplemented, or changed. However, no such regulation, restriction, or boundary shall become effective until after a public hearing in relation thereto, at which parties in interest and citizens shall have an opportunity to be heard. At least fifteen days' notice of the time and place of such hearing shall be published in an official paper or a paper of general circulation in such township of the first class.

Section 3105. Changes. Such regulations, restrictions, and boundaries may, from time to time, be amended, supplemented, changed, modified, or repealed. In case, however, of a protest against such change, signed by the owners of twenty per centum or more, either of the area of the lots included in such proposed change, or of those immediately adjacent in the rear thereof extending one hundred feet therefrom, or of those directly opposite thereto extending one hundred feet from the street frontage of such opposite lots, such amendment shall not become effective except by the favorable vote of three-fourths of all the members of the board of township commissioners of such township. The provisions of the previous section relative to public hearings and official notice shall apply equally to all changes or amendments.

Section 3106. Zoning Commission. In order to avail itself of the powers conferred by this article, the board of township commissioners, shall appoint a commission of five citizens to be known as the Zoning Commission, to recommend the boundaries of the various original districts and appropriate regulations to be enforced therein. Such commission shall make a preliminary report and hold public hearings thereon before submitting its final report; and such board of township commissioners shall not hold its public hearings or take action until it has received the final report of such commission.

Section 3107. Board of Adjustment. Such board of township commissioners may appoint a board of adjustment, and, in the regulations and restrictions adopted pursuant to the authority of this article, may provide that said board of adjustment may, in appropriate cases and subject to appropriate conditions and safeguards, make special exceptions to the terms of the ordinance in harmony with its general purpose and intent

and in accordance with general or specific rules therein contained.

The board of adjustment shall consist of three members, one of whom shall be designated to serve until the first day of January following the adoption of the zoning ordinance one until the first day of the second January thereafter, and one until the first day of the third January thereafter. Their successors shall be appointed on the expiration of their respective terms, to serve three years. The members of the board shall be removable for cause, by the appointing authority, upon written charges and after public hearing. Vacancies shall be filled for the unexpired term of any member whose term becomes vacant.

The board shall adopt rules in accordance with the provisions of any ordinance adopted pursuant to this act. Meetings of the board shall be held at the call of the chairman, and at such other times as the board may determine. Such chairman, or in his absence, the acting chairman may administer oaths, and compel the attendance of witnesses. All meetings of the board shall be open to the public. The board shall keep minutes of its proceedings, showing the vote of each member upon each question, or if absent or failing to vote, indicating such fact, and shall keep records of its examinations and other official actions, all of which shall be immediately filed in the office of the board and shall be a public record.

Appeals to the board of adjustment may be taken by any person aggrieved, or by any officer, department, board, or bureau of the township affected by any decision of the administrative officer. Such appeal shall be taken within a reasonable time, as provided by the rules of the board, by filing with the officer from whom the appeal is taken, and with the board of adjustment, a notice or appeal specifying the grounds thereof. The officer from whom the appeal is taken shall forthwith transmit to the board all the papers constituting the record upon which the action appealed from was taken.

An appeal stays all proceedings in furtherance of the action appealed from, unless the officer from whom the appeal is taken certifies to the board of adjustment, after the notice of appeal shall have been filed, with him, that, by reason of facts stated in the certificate, a stay would, in his opinion, cause imminent peril to life and property. In such case proceedings shall not be stayed otherwise than by a restraining order which may be granted by the board of adjustment or by a court of record on application, on notice to the officer from whom the appeal is taken, and due cause shown.

The board of adjustment shall fix a reasonable time for the hearing of the appeal, give public notice thereof, as well as due notice to the parties in interest, and decide the same within a reasonable time. Upon the hearing any party may appear in person or by agent or by attorney.

The board of adjustment shall have the following powers:

(1) To hear and decide appeals where it is alleged there is error in any order, requirement, decision, or determination made by an administrative official in the enforcement of this act or of any ordinance adopted pursuant thereto;

(2) To hear and decide special exceptions to the terms of the ordinance upon which such board is required to pass under such ordinance;

(3) To authorize, upon appeal, in specific cases, such variance from the terms of the ordinance as will not be contrary to the public interest, where, owing to special conditions, a literal enforcement of the provisions of the ordinance will result in unnecessary hardship, and so that the spirit of the ordinance shall be observed and substantial justice done.

In exercising the above mentioned powers such board may, in conformity with the provisions of this article, reverse or affirm, wholly or partly, or may modify the order, requirement, decision, or determination appealed from, and may make such order, requirement, decision, or determination as ought to be made, and, to that end, shall have all the powers of the officer from whom the appeal is taken.

Any person or persons, jointly or severally, aggrieved by any decision of the board of adjustment, or any taxpayer, or any officer, department, board, or bureau of the township, may present to the court of common pleas of the county a petition, duly verified, setting forth that such decision is illegal in whole or in part, specifying the grounds of the illegality. Such petition shall be presented to the court within thirty days after the filing of the decision in the office of the board.

Upon the presentation of such petition, the court may allow an appeal directed to the board of adjustment, to review such

decisions of the board of adjustment, and shall prescribe therein the time within which a return thereto must be made and served upon the relator's attorney, which shall not be less than ten days, and may be extended by the court. The allowance of the writ shall stay proceedings upon the decision appealed from, but the court may, on application, on notice to the board, and on due cause shown, grant a restraining order.

The board of adjustment shall not be required to return the original papers acted upon by it, but it shall be sufficient to return certified or sworn copies thereof, or of such portions thereof, as may be called for by such writ. The return shall concisely set forth such other facts as may be pertinent and material to show the grounds of the decision appealed from and shall be verified.

If, upon the hearing, it shall appear to the court that testimony is necessary for the proper disposition of the matter, it may take evidence, or appoint a referee to take such evidence as it may direct and report the same to the court with his findings of fact and conclusions of law, which shall constitute a part of the proceedings upon which the determination of the court shall be made. The court may reverse or affirm, wholly or partly, or may modify the decision brought up for review.

Costs shall not be allowed against the board, unless it shall appear to the court that it acted with gross negligence or in bad faith or with malice in making the decision appealed from.

All issues in any proceedings under this section shall have preference over all other civil actions and proceedings.

Section 3108. Remedies. In case any building or structure is erected, constructed, reconstructed, altered, repaired, converted, or maintained, or any building, structure, or land is used in violation of this article or of any ordinance or other regulation made under authority conferred hereby, the proper local authorities of the township, in addition to other remedies, may institute any appropriate action or proceedings to prevent such unlawful erection, construction, reconstruction, alteration, repair, conversion, maintenance, or use, to restrain, correct, or abate such violation, to prevent the occupancy of said building, structure, or land, or to prevent any illegal act, conduct, business, or use in or about such premises.

Section 3109. Conflict With Other Laws. Whenever the regulations made under authority of this act require a greater width or size of yards, courts, or other open spaces, or require a lower height of buildings or less number of stories, or require a greater percentage of lot to be left unoccupied, or impose other higher standards than are required in any other statute or local ordinance or regulation, the provisions of the regulations made under authority of this article shall govern. Wherever the provisions of any other statute or local ordinance or regulation require a greater width or size of yards, courts, or other open spaces, or require a lower height of building or a less number of stories, or require a greater percentage of lot to be left unoccupied, or impose other higher standards than are required by the regulations made under authority of this article, the provisions of such statute or local ordinance or regulation shall govern.

Section 3110. Act Not to Apply to Certain Buildings of Public Service Corporations. This article shall not apply to any existing or proposed building, or extension thereof, used or to be used by public service corporations, if, upon petition of the corporation the Public Service Commission shall, after a public hearing, decide that the present or proposed situation of the building in question is reasonably necessary for the convenience or welfare of the public.

## ARTICLE XXXII

### TOWNSHIP PLANNING COMMISSION

Section 3201. Power to Create Planning Commission. Residence of Commissioners. Employees. Rules and Regulations. The township commissioners may create by ordinance and appoint a Planning Commission, consisting of five persons. In the first instance, one member of said commission shall be appointed for one year, one for two years, one for three years, one for four years, and one for five years, and annually thereafter a member of said commission shall be appointed for a term of five years. An appointment to fill a vacancy shall be for the unexpired portion of the term. All members of the commission shall reside within the zone of jurisdiction of said commission, as hereinafter defined. The Planning Commission may make and alter rules and regulations for their own

organization and procedure, consistent with the ordinance of the township and the laws of the Commonwealth. They shall serve without compensation, and make annually to the township commissioners a report of their transactions. The Planning Commission may, with the consent of the township commissioners, employ engineers and other persons, whose salaries and wages, and other necessary expenses of the commission, shall be provided for through proper appropriation by the township commissioners.

Section 3202. Commission to Receive Copies of Certain Ordinances. Action of Commission Thereon. The township secretary shall, upon introduction, furnish to the Planning Commission, for its consideration, a copy of all ordinances and bills, and all amendments thereto, relating to the location of any public building of the township; and to the location, extension, widening, narrowing, enlargement, ornamentation, and parking of any street, boulevard, parkway, park, playground, or other public ground; and to the relocation, vacation, curtailment, changes of use, or any other alteration of the township plan, with relation to any of the same; and to the location of any bridge, tunnel, and subway, or any surface, underground, or elevated railway. The said commission shall have the power to disapprove any of the said ordinances, bills, or amendments, which disapproval, however, must be communicated to the township commissioner in writing within ten days from the introduction of said ordinances; but such disapproval shall not operate as a veto.

Section 3203. Preparation of Maps and Recommendations. The Township Planning Commission may make or cause to be made, and lay before the township commissioners, and at its discretion cause to be published, maps of the township or any portion thereof, including territory extending three miles beyond the township limits, showing the streets, and highways and other natural and artificial features, and also locations proposed by it for any new public buildings, civic center, street, parkway, park, playground, or any other public ground or public improvement, or any widening, extension, or relocation of the same, or any change in the township plan by it deemed advisable, and it may make recommendations to the township commissioners, from time to time, concerning any such matters and things aforesaid, for action; and, in so doing, have regard for the present conditions and future needs and growth of the township and the distribution and relative location of all the principal and other streets and railways, waterways, and all other means of public travel and business communications, as well as the distribution and relative location of all public buildings, public grounds, and open spaces devoted to public use.

Section 3204. Recommendations of Commission. The Planning Commission may make recommendations to any public authorities, or any corporations or individuals in the township, with respect to the location of any buildings, structures, or works, to be erected or constructed by them.

Section 3205. Plans and Plots. Jurisdiction of Commission in Certain Cases. All plans, plots, or re-plots of lands laid out in building lots, and the streets, alleys, or other portions of the same intended to be dedicated to public use or for the use of purchasers or owners of lots fronting thereon or adjacent thereto, and located within the township limits, or for a distance of three miles outside thereof, shall be submitted to the Planning Commission and approval by it before it shall be recorded. It shall be unlawful to receive or record such plan in any public office unless the same shall bear thereon, by endorsement or otherwise, the approval of the Planning Commission. The disapproval of any such plan by the Planning Commission shall be deemed a refusal of the proposed dedication shown thereon. The approval of the commission shall be deemed an acceptance of the proposed dedication; but shall not impose any duty upon the township concerning the maintenance or improvement of any such dedicated parts, until the township commissioners shall have made actual appropriation of the same by entry, use, or improvement. No sewer, water, or gas main, or pipes, or other improvement, shall be voted or made within the area under the jurisdiction of said commission, for the use of any such purchasers or owners; nor shall any permit for connection with or other use of any such improvement existing, or for any other reason made, be given to any such purchasers or owners until such plan is so approved. Where the jurisdictional limit of three miles, outside of the township limits, as provided in this section, may conflict with the zone of similar character

connected with another township or city, the jurisdiction of said commission shall extend only to the point equidistant between the township and city.

Section 3208. Power to Confer Planning Commission Powers on Other Bodies. Eligibility of Members. It shall be proper for townships to provide, by ordinance, for the exercise of all rights and powers herein conferred upon the Planning Commission, by a park commission, or kindred municipal bureau or commission, authorized under existing laws. And no person holding office under the government of any of the townships, except the township commissioners, shall be ineligible to serve as a member of the Planning Commission.

#### ARTICLE XXXIII

##### ENFORCEMENT OF ORDINANCES

Section 3301. Proceedings for Violation of Township Ordinances. All proceedings for the violation of township ordinances, and for the collection of fines and penalties imposed thereby, may be commenced by warrant or by summons, at the discretion of the justice of the peace before whom the proceeding is begun. No warrant shall be issued except upon complaint, on oath or affirmation, specifying the ordinance for the violation of which the same is issued. All proceedings shall be directed to and be served by any policeman or constable of the township, who shall execute the same anywhere within the State as may be provided by law. Warrants shall be returnable forthwith, and, upon such return, like proceedings shall be had in all cases as in summary convictions, with the same right of appeal from any final judgment entered therein, except where otherwise provided by existing laws.

Section 3302. Arrests on View. Complaints. When any person is arrested on view, a complaint, on oath or affirmation, shall be immediately made, whereupon the like proceedings shall be had as upon a warrant issued.

Section 3303. Disposition of Fines and Penalties. All fines or penalties collected for the violation of township ordinances shall be paid over to the township treasurer.

Section 3304. Incarceration of Violators of Township Ordinances. Collection of Fines and Penalties. Any person arrested for the violation of a township ordinance may be committed to the township lockup pending a hearing or trial. In case there is no suitable lockup or place in which to detain prisoners, the person arrested may be committed to the county jail. No person shall be committed pending a hearing for a longer period than twenty-four hours except where Sunday intervenes. Upon judgment against any person by summary conviction or by proceedings by summons, on default of the payment of the fine or penalty imposed by said judgment and the costs, the defendant may be sentenced and committed to the township lockup for a period not exceeding five days, or to the county jail for a period not exceeding thirty days. No fine or penalty shall exceed three hundred dollars for any single violation of any ordinance. In case the defendant has goods or property of any kind whatsoever, out of which said judgment. Whenever it is deemed necessary the court may or other process, the plaintiff in the action may elect to proceed to collect the said judgment by such proceedings.

Section 3305. Township's Liability for Costs of Prisoners to County. When a prisoner is committed to any county jail or prison, either for the nonpayment of a fine or penalty imposed for the violation of any ordinance of a township, or while awaiting a hearing upon any charge for the violation of any ordinance of a township, the costs of proceedings and the expenses of maintaining such prisoner during his confinement by virtue of any such commitment shall be paid by the township whose ordinances were alleged to have been violated or to which any such fines or penalties are payable. The county shall not be liable to the sheriff for any maintenance or to any officer or person for any costs.

#### ARTICLE XXXIV

##### ACTIONS BY AND AGAINST TOWNSHIPS

Section 3401. Commissioners to Bring and Defend Suits. All suits by a township shall be brought and conducted by the township commissioners. In all suits against a township, process shall be served upon and defense made by the township commissioners.

Section 3402. Rights of Taxpayers to Inquire Into Judgments. Any taxpayer of any township may inquire into the

validity of any judgment, or defend the township in any suit or judgment, upon filing a petition with the court of common pleas of the county in which such suit is pending or judgment exists, accompanied by an affidavit that the taxpayer believes that injustice will be done to the township in such suit or judgment. Whenever it is deemed necessary the court may order such taxpayer to file a bond, with one or more sureties, to be approved by court, to save harmless the township from all costs that may accrue in such proceeding subsequent to the filing of such petition.

Section 3403. Appeals by Taxpayers. Whenever a judgment is rendered by any justice of the peace or alderman against any township, and a right of appeal is given to such township, and for ten days immediately after the rendition of such judgment the township officials neglect to perfect an appeal, any taxpayer of such township may take an appeal, in behalf of the township, from such judgment to the court of common pleas of the county within the time prescribed for the taking of such appeal.

Section 3404. Affidavit and Bill by Taxpayers. In taking the appeal, the taxpayer shall make affidavit that the same is not taken for the purpose of delay, but because he verily believes that injustice has been done. The taxpayer shall pay the costs of the appeal, and enter sufficient bail for the payment of all costs before the justice of the peace or alderman and all costs in the court of common pleas.

Section 3405. Taxpayers Parties to Suits. Upon the filing of such appeal in the court of common pleas of the county, the taxpayer shall be made a party to the suit and shall have the right to defend such township therein.

Section 3406. Recovery of Municipal Claims by Suit. In addition to the remedies provided by law for the filing of liens for the collection of municipal claims, townships may proceed for the recovery and collection of municipal claims by action of assumpsit against the person or persons who were the owner or owners of the property at the time of the completion of the improvement, notwithstanding the fact that there was a failure on the part of any such township or its agents, to enter any such municipal claim as a lien against the property assessed for the improvement, and for the recovery of which the action of assumpsit was brought. Any such action in assumpsit shall be commenced within three years after the completion of the improvement from which said claim arises.

This section shall extend to all municipal claims where the improvement was heretofore made, where the action of assumpsit has been instituted under the provisions of prior acts of Assembly, and where the claim is not barred by the statute of limitation affecting actions of debt or assumpsit.

#### ARTICLE XXV

##### REPEALS

Note: The specific acts and section to be cited for repeal are not printed, but will be attached to the bill introduced.

##### EXPOSITION SHOWING SOURCES OF THE VARIOUS PROVISIONS OF THE PROPOSED FIRST CLASS TOWNSHIP LAW

Note: The word 'Code' as used herein refers to the Township Code of July 14, 1917, P. L. 840.

Sec. 101 from Sec. 1, Code.

Sec. 102. New.

Sec. 103 from Sec. 2, Code.

Sec. 104 from Sec. 3, Code.

Sec. 105 from Sec. 4, Code.

Sec. 106 from Sec. 5, Code.

Sec. 107 from Sec. 6, Code.

Sec. 108 from Sec. 7, Code.

Sec. 109 from Sec. 9, Code.

Sec. 201 from Sec. 15, which came from Sec. 6, April 28, 1899, P. L. 104, as amended by May 11, 1901, P. L. 160; April 1, 1905, P. L. 97, and May 29, 1907, P. L. 305. The section has been redrafted since classification will not depend alone on population, but a change of classification requires also the consent of the electors.

Sec. 205 from Sec. 30, Code, which came from Sec. 2, April 28, 1899, P. L. 104, as amended by Sec. 1, March 24, 1902, P. L. 56.

Sec. 206 from Sec. 31, Code, which came from Sec. 2, April 28, 1899, P. L. 104, as amended by March 24, 1909, P. L. 53. This section was altered and Secs. 207 and 208 (new)

were added to change the existing law which makes the transition of a township the second class to a township of the first class mandatory upon the ascertainment of the fact of sufficient population. Under the terms of the proposed bill, the consent of the voters is required to make such transition.

Secs. 210 to 229, inclusive, provide uniform system for the creation of a new township of the first class by either (a) the division of a township of the first class into two townships; or (b) the consolidation of two or more townships of the first class located in the same county; and the adjustment of indebtedness and organization of townships affected.

The Code provided for three procedures:

(1) Designation of segregated township areas as townships of the first class; (2) division of townships; and (3) consolidation of townships. The first procedure, being very apparently a special enactment to meet a given situation and having apparently accomplished its purpose is omitted. The second and third are consolidated as already stated.

The existing law which is covered by the above sections is as follows:

Secs. 29a 29b and 29c of the Code as added by April 27, 1925, P. L. 303 (omitted); Secs. 40 and 41, of the Code, which came from April 15, 1834, P. L. 537, Sec. 42 of the Code which came from April 26, 1854, P. L. 489, Secs. 43, 45 and 46 of the Code which came from March 14, 1857, P. L. 93; Sec. 44 of the Code, which came from April 24, 1857, P. L. 304; Secs. 50, 51 and 52 of the Code, which came from April 22, 1905, P. L. 288; Sec. 55, Code, which came from Sec. 1, April 4, 1907, P. L. 44 and Sec. 1, May 8, 1876, P. L. 136; Sec. 60, Code, which came from April 12, 1866, P. L. 109; Sec. 65, Code, as amended by April 21, 1927, P. L. 336, Secs. 66, 67, 68 and 69, Code, as added by amendment of May 16, 1921, P. L. 573, Act of May 8, 1919, P. L. 130, Act of April 29, 1925, P. L. 359, Sec. 110, Code, as amended by April 26, 1921, P. L. 286, and April 20, 1921, P. L. 186, 115, Code, which came from April 28, 1899, P. L. 104. Sec. 235 is a consolidation of the Acts of May 8, 1919, P. L. 120 and April 1, 1925, P. L. 359.

Sec. 301 from Sec. 95, Code, which came from Sec. 1, May 24, 1887, P. L. 203.

Secs. 302 to 307 inclusive consolidate into one system the two systems provided for in the Code to (a) alter the lines of two or more adjoining townships (b) cause the lines or boundaries of townships to be ascertained and established, and (c) ascertain and establish disputed lines and boundaries between two or more townships or between townships and cities or boroughs. The Code sections superseded are as follows: Secs. 70 and 71 which came from April 15, 1834, P. L. 537; Sec. 72 which came from April 26, 1854, P. L. 489; Sec. 73 which came from May 1, 1861, P. L. 539; Secs. 80, 81, 82 and 83, which came from June 3, 1893, P. L. 284; Sec. 90 which came from Sec. 1, April 4, 1907, P. L. 44; sec. 1, May 8, 1876, P. L. 136, and Sec. 3, June 3, 1893, P. L. 284.

Secs. 401, 402, 403 and 405 from Code, Sec. 33, as added by April 20, 1921, P. L. 186, and amended by March 13, 1929, P. L. 22.

Secs. 405 and 406 from part of Sec. 34, Code, as added April 20, 1921, P. L. 186, and amended by March 13, 1929, P. L. 22.

Secs. 407 and 408, new and apparently necessary to provide adequate machinery for the election or appointment of township commissioners when (a) a township is first divided into wards, and (b) when new wards are created.

Sec. 409, new, drafted to cover provisions of the amendment to Code, Sec. 34, by March 13, 1929, P. L. 22, and to fit the penal provisions thereof into the general law.

Sec. 501, from Sec. 100, Code, which came from Sec. 84, April 15, 1834, P. L. 537.

Sec. 502, from Sec. 101, Code, which came from Sec. 4, April 28, 1899, P. L. 104.

Sec. 503, from Sec. 102, Code.

Secs. 504 and 505 from Sec. 110, Code, as amended by April 29, 1921, P. L. 186; April 26, 1921, P. L. 286 and April 30, 1925, P. L. 399; original Code section from April 28, 1899, P. L. 104, as amended by June 1, 1915, P. L. 684. The sections are redrafted in order to simplify the language. The provisions relating to elections when townships are created, have been incorporated in Article II.

Sec. 506 is new, and was necessitated by increasing the minimum number of commissioners from five to seven.

Sec. 507 from Sec. 111, Code, which came from Sec. 5, April 27, 1909, P. L. 187.

Secs. 510 and 511 from Sec. 115, Code, as amended by May 13, 1927, P. L. 1001. The Code material is from Sec. 4, April 28, 1899, P. L. 104, as amended by Sec. 1, May 13, 1915, P. L. 303. Matter referring to newly organized townships carried in Article II.

Sec. 515 from Sec. 120, Code, as amended by June 18, 1919, P. L. 501, Code material is from Sec. 5, April 28, 1899, P. L. 104. Redrafted to conform with existing office holders. The provisions of the Code section are most confusing.

Secs. 516 and 517, from Sec. 121, Code, which came from April 23, 1903, P. L. 284. Matter referring to newly organized townships transferred to Article II.

Secs. 525 and 526 from Sec. 126, Code, as added by amendment of May 1, 1929, P. L. 1194.

Sec. 530 from Sec. 130, Code, which was from Sec. 4, June 3, 1911, P. L. 628. The expiration of appointed officers in this and following section is altered.

Sec. 531 from Sec. 131, Code, which was from Sec. (3), June 3, 1911, P. L. 628. Provisions of section extended to include controller.

Sec. 532 from Sec. 133, Code.

Sec. 601 from Sec. 190, Code, which came from Sec. 86, April 15, 1834, P. L. 537.

Sec. 602 from Sec. 191, Code, which came from Sec. 1 May 25, 1907, P. L. 225. In accord with April 26, 1923, P. L. 105.

Sec. 603 from May 13, 1927, P. L. 992.

Sec. 604 from Secs. 192 and 193, Code, which came from March 22, 1907, P. L. 27.

Secs. 610 to 613 from Secs. 195 to 198, Code, as amended April 4, 1925, P. L. 125, June 29, 1923, P. L. 916, and April 28, 1927, P. L. 482. Code sections came from May 8, 1913, P. L. 159.

Secs. 620 to 623 from April 4, 1925, P. L. 126, as amended April 21, 1929, P. L. 339.

Secs. 701 and 702 from Secs. 210 and 211, Code, which came from Sec. 6, April 28, 1899, P. L. 104, as amended by Sec. 1, June 5, 1913, P. L. 424. To Sec. 701 has been added a clause to provide for the removal of township commissioners who refuse to organize.

Sec. 703 from Sec. 212, Code, which came from Sec. 4, April 28, 1899, P. L. 104, as amended by Sec. 1, June 1, 1915, P. L. 684.

Sec. 704 from Sec. 213, Code, which came from Sec. 10, April 28, 1899, P. L. 104.

Sec. 705 from Sec. 214, Code, as added by amendment of May 16, 1921, P. L. 564.

Sec. 801 from Sec. 270, Code, which came from Sec. 13, April 28, 1899, P. L. 104, and Sec. 5, April 27, 1909, P. L. 193. The amount of bond required is reduced one-half.

Sec. 802 from Sec. 271, Code, which came from Sec. 14, April 28, 1899, P. L. 104, as amended by Sec. 1, June 7, 1907, P. L. 452.

Sec. 803 from Sec. 272, Code, which came from Sec. 13, April 28, 1899, P. L. 104.

Sec. 804 from Sec. 273, Code, which came from Sec. 2, April 27, 1909, P. L. 198.

Sec. 805 from Sec. 274, Code, which came from Secs. 1 and 2, May 28, 1907, P. L. 273.

Sec. 806 from Sec. 275, Code, which came from Sec. 1, June 25, 1885, P. L. 187, as amended by Sec. 1, May 8, 1909, P. L. 474, and Sec. 1, June 6, 1893, P. L. 333.

Sec. 807 from Sec. 260, Code, which came from Sec. 1, May 16, 1857, P. L. 535.

Sec. 808, new. Requiring the Board of Commissioners to designate banking institutions as depository for township funds. Requiring bonds from such depositories. Requiring the township treasurer to keep township funds in such depositories and relieving the treasurer from certain responsibilities.

Sec. 901 from Sec. 300, Code, which came from Sec. 19, April 28, 1899, P. L. 104 and Sec. 100, April 15, 1834, P. L. 537.

Sec. 902 from Sec. 301, Code, which came from Sec. 1, June 3, 1911, P. L. 626.

Sec. 903 from Sec. 302, Code, which came from Sec. 3, June 3, 1911, P. L. 626, and Sec. 101, April 15, 1834, P. L. 537.

Sec. 1001, new. The section makes the township auditor an individual or firm licensed as a certified public accountant.

- and appointed by the court which shall also fix the compensation. The powers of such officer are practically the same as the elective officers under the Code. The following section conform with such changes.
- Sec. 1002 from Sec. 326, Code, which came from Secs. 50, 51 and 105, April 15, 1934, P. L. 537.
- Sec. 1003 from Sec. 327, Code, which came from Sec. 2, May 3, 1909, P. L. 392 and Sec. 2, June 9, 1911, P. L. 865, as amended by Sec. 3, May 20, 1913, P. L. 254. The right to surcharge township officers is new.
- Sec. 1004 from Sec. 328, Code, which came from Sec. 5, May 3, 1909, P. L. 392.
- Sec. 1005 from Sec. 329, Code, which came from Sec. 6, May 3, 1909, P. L. 392.
- Sec. 1006 from Sec. 330, Code, which came from Secs. 1 and 2, April 27, 1909, P. L. 261.
- Sec. 1007, new. Provides for entry of unappealed surcharges.
- Sec. 1008 from Sec. 331, Code, which came from Sec. 1, May 31, 1913, P. L. 394.
- Sec. 1009 from Sec. 332, Code, which came from Sec. 3, June 9, 1911, P. L. 865, as amended by Sec. 4, May 20, 1913, P. L. 254.
- Sec. 1010 from Sec. 333, Code, which came from Sec. 3, June 9, 1911, P. L. 865, as amended by Sec. 4, May 20, 1913, P. L. 254.
- Sec. 1011 from Sec. 334, Code, which came from Sec. 2, May 31, 1913, P. L. 394.
- Sec. 1012 from Sec. 335, Code, which came from Sec. 2, April 21, 1915, P. L. 162.
- Sec. 1013 from Sec. 336, Code, which came from Sec. 3, May 31, 1913, P. L. 394.
- Sec. 1014 from Sec. 337, Code, which came from Sec. 3, June 9, 1911, P. L. 865, as amended by Sec. 4, May 20, 1913, P. L. 254, and Sec. 3, May 31, 1913, P. L. 394.
- Sec. 1015 from Sec. 338, Code, which came from Sec. 1, April 21, 1915, P. L. 162.
- Sec. 1016 from Sec. 339, Code, which came from Sec. 3, May 31, 1913, P. L. 394.
- Sec. 1017 from Sec. 340, Code, which came from Sec. 6, May 6, 1844, P. L. 564.
- Sec. 1018 from Sec. 341, Code, which came from Sec. 4, June 9, 1911, P. L. 865.
- Sec. 1019 from April 22, 1929, P. L. 630.
- Secs. 1101, 1102, 1103, 1104, 1105, 1106, 1107, 1108, 1109, 1110, 1111, 1112 and 1113 from Secs. 342 to 354 inclusive, Code, as added by May 1, 1929, P. L. 1194. The requirements as to the bond of the controller and the amount of his salary are altered.
- Secs. 1201, 1202, 1203 and 1204 are new. The sections provide for the appointment, bond, powers, duties and compensation of a township solicitor. Patterned after similar provisions in the Borough Code.
- Secs. 1301, 1302, 1303, 1304, 1305 and 1306 are new. The sections provide for the qualification, appointment, bond, powers, duties and compensation of a township engineer. Patterned after similar provisions in the Act of June 27, 1913, P. L. 568, Third Class City Law, and brought in accord with 1921, May 16, 649.
- Secs. 1310, 1311, 1312, 1313, 1314, and 1315 are new. The sections provide for the adoption of a complete system of real estate registration in townships, supplanting the inadequate system contained in Sec. 303 of the Code. Patterned after similar provisions in the Act of June 27, 1913, P. L. 568, Third Class City Law.
- Secs. 1401, 1402, 1403, 1404, 1405, 1406 and 1407 are in the main new, establishing a new system for the appointment, control, duties and powers of township police, superseding the system provided for in Secs. 355, 356, 357 and 358 of the Code. The basic provisions other than the means of appointment are incorporated herein.
- Sec. 1408 from Sec. 1, July 14, 1897, P. L. 266.
- Secs. 1409, 1410, 1411, 1412, 1413 and 1414 from April 30, 1925, P. L. 384.
- Sec. 1501 from Sec. 380, Code, which came from Sec. 3, April 15, 1834, P. L. 537. The provisions as to contracts is carried under Article XVIII.
- Sec. 1502 from Sec. 381, Code, which came from Sec. 7, April 29, 1899, P. L. 104.
- Clause I from Clause I, Code, as amended by April 25, 1929, P. L. 769, Code. Material is from Clause XIII, Sec. 7, April 28, 1899, P. L. 104. The period of advertising ordinances has been shortened.

- Clause XXVII from Clause XII, Code, as amended by April 6, 1925, P. L. 153. Code material is from Sec. 1, June 25, 1913, P. L. 561. Section extended to control garbage disposal.
- Clause XXVIII new.
- Clause XXIX new.
- Clause XXX from Clause IX, Code, which came from Clause IV, Sec. 7, April 28, 1899, P. L. 104.
- Clause XXXI from Clause VII, Code, which came from Clause V, Sec. 7, April 28, 1899, P. L. 104, as amended by Sec. 1, July 9, 1901, P. L. 627. The right to license has been added.
- Clause XXXII new.
- Clause XXXIII from Clause XIII, Code, which came from Sec. 3, April 28, 1876, P. L. 51.
- Clause XXXIV from April 27, 1927, P. L. 460.
- Clause XXXV from June 5, 1913, P. L. 419.
- Clause XXXVI from Clause XX, Code, which came from Sec. 1, June 25, 1895, P. L. 298.
- Clause XXXVII from April 30, 1925, P. L. 371.
- Clause XXXVIII from May 3, 1923, P. L. 136.

- Clause XXXIX from May 5, 1921, P. L. 381.  
 Clause XL from Clause XXI, Code, which came from Sec. 1, March 15, 1909, P. L. 33.  
 Clause XLI from Clause XXII, Code, which came from Sec. 1, June 20, 1895, P. L. 332.  
 Clause XLII from May 12, 1921, P. L. 544.  
 Clause XLIII new.  
 Clause XLIV new.
- Secs. 1601 and 1602 from Secs. 1 and 2, Act of June 12, 1913, P. L. 471, as amended by Secs. 1 and 2, Act of April 7, 1927, P. L. 155.
- Secs. 1603, 1604 and 1605 from Secs. 3, 4 and 5, Act of June 12, 1913, P. L. 471. The last paragraph of Sec. 1603 is new.
- Sec. 1606 from Sec. 6 Act of June 12, 1913, P. L. 471, as amended by Act of April 14, 1915, P. L. 114.
- Secs. 1607 and 1608 from Secs. 7 and 8, Act of June 12, 1913, P. L. 471.
- Sec. 1609 from Sec. 9, Act of June 12, 1913, P. L. 471, as amended by Sec. 3, Act of April 7, 1927, P. L. 155.
- Sec. 1610 from Sec. 9A, Act of June 12, 1913, P. L. 471, as added by Sec. 4, Act of April 7, 1927, P. L. 155.
- Secs. 1611, 1612, 1613 and 1614 from Secs. 10, 11, 12 and 13, Act of June 12, 1913, P. L. 471.
- Secs. 1620, 1621, 1622, 1623, 1624, 1625, 1626 and 1627 from Secs. 775 to 782, Code, which came from Act of April 17, 1905, P. L. 193, as amended by Act of June 20, 1911, P. L. 1087. Act of June 8, 1907, P. L. 503, as amended by Act of June 19, 1911, P. L. 1036, also supplied.
- Sec. 1701 from Sec. 390, Code, which came from Sec. 1, Act of April 27, 1909, P. L. 198, which supplemented Act of April 28, 1899, P. L. 104.
- Sec. 1702 from part of Sec. 391, Code, as amended by Act of March 28, 1929, P. L. 107. Code material from Sec. 3, April 27, 1909, P. L. 198, supplementing Act of April 28, 1899, P. L. 104.
- Sec. 1703 from Sec. 392, Code, which came from Sec. 2, Act of June 3, 1911, P. L. 626, which supplemented Act of April 28, 1899, P. L. 104.
- Sec. 1704 from part of Sec. 391, Code, as amended by Act of March 28, 1929, P. L. 107 and Sec. 395, Code, as amended by March 17, 1921, P. L. 36, Code source matter from Sec. 2, Act of June 3, 1911, P. L. 626, which supplemented Act of April 28, 1899, P. L. 104. Part of amendatory matter of 1929 eliminated as restrictive rather than broadening.
- Sec. 1705. New.
- Sec. 1706 from Sec. 394, Code, which came from Sec. 4, Act of April 27, 1909, P. L. 198. Penal provision as to treasurer omitted.
- Sec. 1707 from part of Sec. 395, Code. In accord with Act of April 11, 1929, P. L. 518.
- Sec. 1708 from Sec. 396, Code, which came from Sec. 8, Act of April 28, 1899, P. L. 104.
- Sec. 1709 from Sec. 397, Code, as amended by Acts of May 16, 1921, P. L. 575, May 7, 1925, P. L. 556 and April 22, 1929, P. L. 625. The Code source matter is from Sec. 7, Act of April 28, 1899, P. L. 104, Sec. 1, Act of March 18, 1909, P. L. 40, and Sec. 5, Act of May 31, 1907, P. L. 349, and Sec. 3, Act of June 26, 1895, P. L. 324.
- Sec. 1710 from Sec. 1, Act of May 4, 1927, P. L. 738.
- Sec. 1711 from Sec. 398, Code, which came from Sec. 1, Act of March 31, 1864, P. L. 162.
- Sec. 1712 from Sec. 399, Code, which came from part of Sec. 15, Act of April 28, 1899, P. L. 109. The limitation to first day of June is from Act of June 29, 1923, P. L. 965.
- Sec. 1713 from Sec. 400, Code, as amended by Act of May 11, 1921, P. L. 482. Code source matter from part of Sec. 15, Act of April 28, 1899, P. L. 104.
- Sec. 1714 from Sec. 401, Code, as amended by Act of May 11, 1921, P. L. 482. Code source matter from Secs. 1, 3 and 4, Act of May 20, 1913, P. L. 248. The forfeiture clause relating to the township treasurer is eliminated.
- Sec. 1715 from Sec. 402, Code, as amended by Act of May 11, 1921, P. L. 482. Code source matter from Sec. 1, Act of June 4, 1901, P. L. 361. Per centum penalty after expiration of year is removed.

- Sec. 1717 from Sec. 404, Code, which came from Sec. 2, Act of May 20, 1913, P. L. 248.
- Sec. 1718 from Sec. 405, Code, which came from part of Sec. 48, Act of April 15, 1834, P. L. 409.
- Sec. 1719 from Sec. 406, Code, which came from part of Sec. 11, Act of June 25, 1885, P. L. 187.
- Sec. 1801 from Cl. III, Sec. 380, Code, which came from Sec. 3, Act of April 15, 1834, P. L. 537.
- Sec. 1802 from Sec. 393, Code, which came from Sec. 4, Act of June 3, 1911, P. L. 262, as amended by Sec. 1, Act of May 23, 1913, P. L. 306.
- Sec. 1803. New.
- Sec. 1804 from Act of May 10, 1917, P. L. 158, Sec. 1 of which was amended by Act of March 28, 1929, P. L. 106.
- Sec. 1805. New.
- Sec. 1806 from Act of July 18, 1917, P. L. 1083.
- Sec. 1807 from Act of July 18, 1917, P. L. 1083.
- Sec. 1807 from Act of April 22, 1927, P. L. 350. Restriction in this section limited to the township alone.
- Secs. 1901, 1902, 1903, 1904, 1905, 1906, 1907, 1908, 1909, 1910, 1911, 1912, 1913, 1914, 1915, 1916, 1920, 1921, 1922, 1923, 1924, 1925, 1926, 1927, 1928, 1929, 1930, 1931, 1932, 1933, 1934, 1935, 1936, 1937, 1938, 1939, 1940, 1941, 1942, 1943, 1945, 1946, 1947, 1948, 1949, 1950, 1951, 1952 and 1953 composing Article XIX, include a complete system for eminent domain and the assessment of damages and benefits to cover all cases under the proposed Code in which such right is exercised and such procedure necessary. Portions of the provisions herein contained are taken from the numerous and varying provisions under the existing Code, others from a similar article in the Borough Code, upon which this article is modeled.
- Sec. 2001 from Sec. 625, Code, as amended by Act of May 16, 1921, P. L. 634. Code material from Sec. 7, Act of May 23, 1913, P. L. 348.
- Sec. 2005 from Sec. 495, Code, as amended by Act of April 30, 1929, P. L. 876. Code material from Sec. 1, Act of June 7, 1901, P. L. 516. Power included to vacate unopened roads, and connect with roads of adjacent municipalities, as covered in Sec. 511, Code, which came from Sec. 1, Act of March 18, 1901, P. L. 51.
- Sec. 2006 from Sec. 496, Code, which came from Sec. 1, Act of April 5, 1849, P. L. 397.
- Sec. 2007 from Sec. 497, Code, which came from Sec. 1, Act of June 7, 1901, P. L. 510.
- Sec. 2008 from Sec. 498, Code, as amended by Act of April 30, 1929, P. L. 876. Code material from Sec. 1, June 7, 1901, P. L. 510.
- Sec. 2009 from Sec. 499, Code, which came from Sec. 1, Act of June 7, 1901, P. L. 510.
- Sec. 2010 from Sec. 500, Code, as amended by Act of April 30, 1929, P. L. 876. Code material from Sec. 2, Act of June 7, 1901, P. L. 510.
- Sec. 2011 from Sec. 509, Code, which came from Sec. 6, Act of June 7, 1901, P. L. 510.
- Sec. 2012 from Sec. 510, Code, as amended by Act of May 16, 1921, P. L. 666. Code material came from Sec. 7, Act of June 13, 1836, P. L. 551, as amended by Sec. 1, Acts of June 7, 1907, P. L. 452, and April 13, 1927, P. L. 184.
- Sec. 2013 from part of Sec. 660, Code, as amended by Act of April 28, 1927, P. L. 493. Code material from Sec. 6, Act of June 13, 1836, P. L. 551, and Sec. 9, Act of April 28, 1899, P. L. 104, and Act of April 1, 1925, P. L. 100.
- Sec. 2014 from part of Sec. 660, as amended by Act of April 28, 1927, P. L. 493. Code material from Sec. 6, Act of June 13, 1836, P. L. 551, and Sec. 9, Act of April 28, 1899, P. L. 104.
- Sec. 2015 from Sec. 640, Code, as amended by Act of April 24, 1929, P. L. 654. The portion requiring the consent of the township commissioners is from Act of May 16, 1921, P. L. 635.
- Secs. 2020 and 2021 from Sec. 850, Code, as added by Act of May 13, 1925, P. L. 673, and amended by Acts of March 22, 1927, P. L. 55, and April 25, 1929, P. L. 769.
- Secs. 2022, 2023, 2024 and 2025 from Secs. 851, 852 and 854, Code, as added by Act of April 25, 1929, P. L. 769.
- Sec. 2030 from Sec. 1, Act of May 1, 1919, P. L. 93.
- Sec. 2031 from Secs. 2 and 3, Act of May 1, 1919, P. L. 93.
- Sec. 2032 from Sec. 4, Act of May 1, 1919, P. L. 93.
- Sec. 2033 from Sec. 5, Act of May 1, 1919, P. L. 93.

- Sec. 2035 from Secs. 1, 2, 3 and 4, Act of March 17, 1925, P. L. 38. The provisions as to widening roads omitted as already covered.
- Sec. 2040 from Secs. 1, 2, 3 and 4, Act of June 14, 1923, P. L. 801.
- Sec. 2045 from Secs. 685 and 686, Code, which came from Sec. 1, Act of May 5, 1911, P. L. 123, as amended by Act of July 11, 1917, P. L. 777. Costs of curbs, gutters, sidewalks and retaining walls exempted from the provisions of this section.
- Sec. 2050. New. Drawn after similar provisions in Borough Code.
- Sec. 2051 from Sec. 810, Code, which came from Sec. 1, Act of June 15, 1911, P. L. 982.
- Secs. 2052, 2053, 2054 and 2055. New. Drawn after similar provisions in Borough Code. The provisions of Secs. 2050, 2052, 2053, 2054 and 2055 were covered by Secs. 550 to 565 in the Code.
- Sec. 2056. New. Covers provisions of part of Sec. 564, Code, which came from Secs. 5 and 6, Act of May 23, 1913, P. L. 348.

- Sec. 2061 from Sec. 810, Code, which came from Sec. 1, Act of June 15, 1911, P. L. 982.
- Sec. 2065 from Sec. 695, Code, covering provisions of Sec. 28, Act of June 13, 1836, P. L. 551.
- Sec. 2066 from Sec. 696, Code, which came from Sec. 29, Act of June 13, 1836, P. L. 551. The provisions as to viewers is changed.
- Sec. 2067. First part new. Last two paragraphs from Sec. 699, Code, as amended by Act of May 10, 1921, P. L. 427. Code material from Secs. 32 and 67, Act of June 13, 1836, P. L. 551. Proviso new.
- Sec. 2070 from Sec. 830, Code, which came from Secs. 1 and 2, Act of April 1, 1909, P. L. 97.
- Sec. 2071 from Sec. 831, Code, which came from Sec. 1 and 2, Act of April 1, 1909, P. L. 97.
- Sec. 2072 from Sec. 832, Code, which came from Sec. 3, Act of April 1, 1909, P. L. 97.
- Sec. 2073 from Sec. 833, Code, which came from Sec. 1, Act of April 1, 1909, P. L. 97.
- Sec. 2074 from Sec. 834, Code, which came from Sec. 6, Act of April 1, 1909, P. L. 97.
- Sec. 2075 from Sec. 835, Code, which came from Sec. 4, Act of April 1, 1909, P. L. 97.
- Sec. 2078 from Sec. 750, Code, which came from Sec. 1, Act of May 26, 1897, P. L. 93.
- Sec. 2080 from Sec. 735, Code, as amended by Act of May 16, 1921, P. L. 564. Code material from Sec. 61, Act of June 13, 1836, P. L. 551.
- Sec. 2081 from Sec. 737, Code, which came from Sec. 1, Act of April 23, 1909, P. L. 171, and Sec. 739, Code, which came from Sec. 1, Act of April 23, 1909, P. L. 171, and Sec. 69, Act of June 13, 1836, P. L. 551.
- Sec. 2083 from Secs. 725 and 726, Code, as added by amendment of May 16, 1921, P. L. 564.
- Sec. 2084 from Sec. 727, Code, as amended by Acts of May 16, 1921, P. L. 564, June 14, 1923, P. L. 773, April 29, 1925, P. L. 365, and April 21, 1927, P. L. 337.
- Sec. 2086 from Secs. 1 and 2, Act of May 22, 1923, P. L. 315.
- Sec. 2088 from Secs. 845 and 846, Code, which came from Act of June 13, 1836, P. L. 551.
- Sec. 2090 from Sec. 710, Code, which came from Sec. 1, Act of June 12, 1893, P. L. 451.
- Sec. 2091 from Sec. 711, Code, which came from Sec. 2, Act of June 12, 1893, P. L. 451.
- Sec. 2092 from Sec. 712, Code, which came from Sec. 3, Act of June 12, 1893, P. L. 451.
- Sec. 2093 from Sec. 713, Code, which came from Sec. 4, Act of June 12, 1893, P. L. 451.
- Sec. 2094 from Sec. 714, Code, which came from Sec. 5, Act of June 12, 1893, P. L. 451.
- Sec. 2095 from Sec. 715, Code, which came from Sec. 6, Act of June 12, 1893, P. L. 451.
- Sec. 2096 from Sec. 716, Code, which came from Sec. 2, Act of June 12, 1893, P. L. 451.
- Sec. 2101 from Secs. 670 and 671, Code, which came from Secs. 10 and 33, Act of June 13, 1836, P. L. 551.
- Sec. 2105 from Act of April 4, 1929, P. L. 149.
- Sec. 2110 from Secs. 672, 673 and 674, Code, which came from Secs. 1 and 2, Act of May 20, 1913, P. L. 267.
- Sec. 2115 from Act of June 20, 1919, P. L. 513.
- Sec. 2120 from Act of May 1, 1925, P. L. 428.
- Sec. 2125 from Sec. 820, Code, which came from Act of May 28, 1907, P. L. 287.
- Sec. 2130 from Secs. 600, 601 and 602, Code, which came from Act of July 10, 1901, P. L. 637.
- Sec. 2201 from Sec. 855, Code, which came from Sec. 1, Act of May 23, 1913, P. L. 348.
- Sec. 2205 from Sec. 865 and part of Sec. 869, Code, which came from Secs. 1 and 5, Act of June 15, 1911, P. L. 987. The other Code sections on this section are eliminated, it being regulated by the Public Service Commission Law.
- Sec. 2210 from Sec. 890, Code, which came from Sec. 31, Act of June 13, 1836, P. L. 551.
- Sec. 2211 from Sec. 891, Code.
- Sec. 2220 from Sec. 900, Code, which came from Sec. 34, Act of June 13, 1836, P. L. 551.
- Sec. 2221 from Sec. 901, Code, which came from Sec. 34, Act of June 13, 1836, P. L. 551, and Sec. 1, Act of April 12, 1855, P. L. 220.
- Sec. 2222 from Sec. 902, Code, which came from Sec. 1, Act of April 12, 1855, P. L. 220.
- Sec. 2225 from Sec. 910, Code, which came from Sec. 1, Act of June 11, 1879, P. L. 146, as amended by Sec. 1, Act of June 15, 1911, P. L. 970, also from Sec. 2, Act of June 11, 1879, P. L. 146.
- Sec. 2301. New. The section gives general authority to the township which was in part covered by Code.
- Sec. 2302 from Sec. 960, Code, which came from Sec. 4, Act of June 26, 1895, P. L. 324.
- Sec. 2303. New.
- Sec. 2304 from Sec. 1025, Code, as amended by Act of May 1, 1923, P. L. 127. Code material from Sec. 1, Act of June 19, 1911, P. L. 1066; also from Secs. 1026 and 1027, Code, which came from Secs. 2 and 3, Act of June 19, 1911, P. L. 1066.
- Sec. 2401 from Sec. 1070, Code, which came from Clause III, Sec. 7, Act of April 28, 1899, P. L. 104, as amended by Sec. 1, Act of May 24, 1901, P. L. 294.
- Sec. 2402 from Sec. 1071, Code, which came from Clause III, Sec. 7, Act of April 28, 1899, P. L. 104, as amended by Sec. 1, Act of May 24, 1901, P. L. 294.
- Sec. 2403 from Sec. 1072, Code, which came from Clause III, Sec. 7, Act of April 28, 1899, P. L. 104, as amended by Sec. 1, Act of May 24, 1901, P. L. 294.
- Sec. 2404 from Sec. 1073, Code, which came from Clause III, Sec. 7, Act of April 28, 1899, P. L. 104, as amended by Sec. 1, Act of May 24, 1901, P. L. 294.
- Sec. 2405 from Sec. 1077, Code, which came from Clause III, Sec. 7, Act of April 28, 1899, P. L. 104, as amended by Sec. 1, Act of May 24, 1901, P. L. 294.
- Sec. 2406 from Secs. 1078 and 1080, Code, as amended by Act of July 9, 1919, P. L. 797, and Act of May 16, 1921, P. L. 641. Code material from Sec. 1, Act of February 23, 1905, P. L. 22.
- Sec. 2407 from Sec. 1079, Code, as amended by Act of May 16, 1921, P. L. 641. Code material from Sec. 2, Act of February 23, 1905, P. L. 22.
- Sec. 2408 from Sec. 1081, Code, as amended by Act of July 9, 1919, P. L. 797, and Act of May 16, 1921, P. L. 641. Code material from Sec. 3, Act of February 23, 1905, P. L. 22.
- Sec. 2409 from Sec. 1082, Code, as amended by Act of July 9, 1919, P. L. 797, and Act of May 16, 1921, P. L. 641. Code material from Sec. 4, Act of February 23, 1905, P. L. 22.
- Sec. 2410 from Secs. 1084 and 1085, Code as reenacted by Sec. 7, Act of May 16, 1921, P. L. 641. Code material from February 23, 1905, P. L. 22.
- Sec. 2415 from Sec. 1086, Code, as added by Act of May 11, 1927, P. L. 966. In accord with Act of April 19, 1901, P. L. 82.
- Sec. 2420 from Sec. 1095, Code, which came from Clause III, Sec. 7, Act of April 28, 1899, P. L. 104, as amended by Sec. 1, Act of May 24, 1901, P. L. 294.
- Sec. 2425 from Sec. 1105, Code, as amended by Act of May 1, 1923, P. L. 121. Code material from Sec. 1, Act of May 23, 1913, P. L. 348.
- Sec. 2430 from Sec. 1115, Code, which came from Sec. 1, Act of May 23, 1913, P. L. 353.

- Sec. 2431 from Sec. 1116, Code, which came from Sec. 2, Act of May 23, 1913, P. L. 353.
- Sec. 2435 from Sec. 1, Act of April 27, 1927, P. L. 410.
- Sec. 2436 from Sec. 3, Act of April 27, 1927, P. L. 410.
- Sec. 2440 from Sec. 1140, Code, which came from Secs. 1 and 2, Act of May 1, 1909, P. L. 306, as amended by Act of June 15, 1911, P. L. 966.
- Sec. 2441 from Sec. 1141, Code, which came from Sec. 1, Act of May 1, 1909, P. L. 306, as amended by Sec. 1, Act of June 15, 1911, P. L. 966.
- Secs. 2501, 2502, 2503, 2504, 2505, 2506 and 2507, comprising Article XXV, and providing a system for the collection by instalments, of the costs of improvements, are new and are drafted generally from similar provisions in the Borough Code.
- Secs. 2601 and 2602, comprising Article XXVI, are new and are drafted after similar provisions in the Borough Code.
- Sec. 2701 from Sec. 1180, Code, as amended by Act of April 6, 1925, P. L. 156. Code material from Sec. 1, Act of April 9, 1915, P. L. 70.
- Sec. 2702 from Sec. 1181, Code, which came from Sec. 2, Act of April 9, 1915, P. L. 70.
- Sec. 2703 from Sec. 1182, Code which came from Sec. 3, Act of April 9, 1915, P. L. 70.
- Sec. 2704 from Sec. 1183, Code, which came from Sec. 4, Act of April 9, 1915, P. L. 70.
- Sec. 2705 from Sec. 1184, Code, which came from Sec. 5, Act of April 9, 1915, P. L. 70.
- Sec. 2710 from Sec. 1205, Code, which came from Sec. 1, Act of June, 1911, P. L. 541.
- Sec. 2711 from Sec. 1206, Code, which came from Sec. 2, Act of June, 1911, P. L. 541.
- Sec. 2712 from Sec. 1207, Code, which came from Sec. 10, Act of June 5, 1913, P. L. 445.
- Sec. 2801 from part of Sec. 1220, Code, which came from Sec. 1, Act of June 26, 1895, P. L. 324, also from Sec. 1221, Code, as amended by Act of May 16, 1921, P. L. 575. Code material from Sec. 2, Act of June 26, 1895, P. L. 324.
- Sec. 2802 from part of Sec. 1220, Code, as amended by Act of April 10, 1929, P. L. 469.
- Sec. 2803 from Secs. 1222 and 1223, Code, which came from Sec. 1, Act of June 10, 1901, P. L. 555, as amended by Sec. 1, Act of April 15, 1913, P. L. 66.
- Secs. 2804 and 2805 from Secs. 1224 and 1225, Code, which came from Sec. 1, Act of June 10, 1901, P. L. 555, as amended by Sec. 1, Act of April 15, 1913, P. L. 66.
- Sec. 2806 from Secs. 1228 and 1229, Code, which came from Secs. 3 and 4, Act of June 10, 1901, P. L. 555.
- Sec. 2901 from Act of May 24, 1923, P. L. 442, as amended by Act of May 15, 1925, P. L. 642, but the form of the law has been changed.
- Sec. 2910 from Sec. 1270, Code, which came from Sec. 1, Act of May 17, 1883 P. L. 31.
- Sec. 2911 from Sec. 1271, Code, which came from Sec. 1, Act of May 3, 1915, P. L. 217.
- Sec. 2912 from Act of May 14, 1925, P. L. 745.
- Sec. 3001 from Sec. 1296, Code, which came from Sec. 1, Act of May 3, 1909, P. L. 401; as amended by Sec. 1, Act of May 20, 1913, P. L. 257. The subject matter other than parks and playgrounds and the right to dedicate existing public parks is from Sec. 1, Act of July 8, 1919, P. L. 784, as amended by Sec. 1, Act of May 11, 1921, P. L. 484 and Sec. 1, Act of March 24, 1927, P. L. 56. The bond issue provisions are from Sec. 6, Act of July 8, 1919, P. L. 784 as amended by Sec. 5, Act of May 11, 1921, P. L. 484, and Sec. 6, Act of March 24, 1927, P. L. 56.
- Sec. 3002 from Sec. 1297, Code, which came from Sec. 1, Act of May 3, 1909, P. L. 401, as amended by Sec. 1, Act of May 20, 1913, P. L. 257.
- Sec. 3003 from Sec. 1298, Code, which came from Sec. 2, Act of May 3, 1909, P. L. 401.
- Sec. 3004 from Sec. 1299, Code, which came from Sec. 2, Act of May 3, 1909, P. L. 401.
- Sec. 3005 from Sec. 1300, Code, which came from Sec. 2, Act of May 3, 1909, P. L. 401.
- Sec. 3006, from Sec. 1301, Code, which came from Sec. 2, Act of May 3, 1909, P. L. 401.
- Sec. 3007 from Sec. 1302, Code, which came from Sec. 4, Act of May 3, 1909, P. L. 401.
- Sec. 3008 from Sec. 1305, Code, which came from Sec. 5, Act of May 3, 1909, P. L. 401.
- Sec. 3009 from Sec. 1295, Code, which came from Sec. 3, Act of May 3, 1909, P. L. 401. Added subject matter from Sec. 2, Act of July 8, 1919, P. L. 784, as amended by Sec. 2, Act of May 11, 1921, P. L. 484 and Sec. 2, Act of March 24, 1927, P. L. 56.
- Sec. 3010 from Sec. 3, Act of July 8, 1919, P. L. 784, as amended by Sec. 3, Act of May 11, 1921, P. L. 484, and Sec. 3, Act of March 24, 1927, P. L. 56.
- Sec. 3011 from Sec. 4, Act of July 8, 1919, P. L. 784, as amended by Sec. 5, Act of March 24, 1927, P. L. 56.
- Sec. 3012 from Sec. 7, Act of July 8, 1919, P. L. 784, as amended by Sec. 6, Act of May 11, 1921, P. L. 484, and Sec. 7, Act of March 24, 1927, P. L. 56.
- Sec. 3013 from Sec. 5, Act of July 8, 1919, P. L. 784, as amended by Sec. 4, Act of May 11, 1921, P. L. 484, and Sec. 5, Act of March 24, 1927, P. L. 56. The provision permitting joinder of school districts is dropped.
- Sec. 3020 from Sec. 1330, Code, which came from Sec. 1, Act of May 31, 1907, P. L. 349.
- Sec. 3021 from Sec. 1331, Code, which came from Secs. 1 and 2, Act of May 31, 1907, P. L. 349.
- Sec. 3022 from Sec. 1332, Code, which came from Sec. 1, Act of May 31, 1907, P. L. 349.
- Sec. 3023 from Sec. 1333, Code, which came from Sec. 1, Act of May 31, 1907, P. L. 349.
- Sec. 3024 from Sec. 1334, Code, which came from Sec. 6, Act of May 31, 1907, P. L. 349.
- Sec. 3025 from Sec. 1335, Code, which came from Sec. 2, Act of May 31, 1907, P. L. 349.
- Sec. 3026 from Sec. 1336, Code, which came from Sec. 3, Act of May 31, 1907, P. L. 349.
- Sec. 3027 from Sec. 1337, Code, which came from Sec. 4, Act of May 31, 1907, P. L. 349.
- Sec. 3028 from Sec. 1338, Code, which came from Sec. 4, Act of May 31, 1907, P. L. 349.
- Sec. 3029 from Sec. 1339, Code, which came from Sec. 5, Act of May 31, 1907, P. L. 349.
- Sec. 3030 from Sec. 1340, Code, which came from Sec. 6, Act of May 31, 1907, P. L. 349.
- Sec. 3031 from Sec. 1341, Code, which came from Sec. 7, Act of May 31, 1907, P. L. 349.
- Sec. 3040 from Sec. 1355, Code, which came from Sec. 1, Act of April 22, 1909, P. L. 124.
- Sec. 3041 from Sec. 1356, Code, which came from Sec. 1, Act of April 22, 1909, P. L. 124.
- Sec. 3042 from Sec. 1357, Code, which came from Sec. 2, Act of April 22, 1909, P. L. 124.
- Sec. 3043 from Sec. 1358, Code, which came from Sec. 2, Act of April 22, 1909, P. L. 124.
- Sec. 3044 from Sec. 1359, Code, which came from Secs. 3 and 5, Act of April 22, 1909, P. L. 124.
- Sec. 3045 from Sec. 1360, Code, which came from Sec. 4, Act of April 22, 1909, P. L. 124.
- Sec. 3046 from Sec. 1361, Code, which came from Sec. 5, Act of April 22, 1909, P. L. 124.
- Sec. 3047 from Sec. 1362, Code, which came from Sec. 6, Act of April 22, 1909, P. L. 124.
- Sec. 3048 from Sec. 1, Act of April 26, 1923, P. L. 90.
- Secs. 3101, 3102, 3103, 3104, 3105 and 3106 from Secs. 1, 2, 3, 4, 5 and 6, Act of June 29, 1913, P. L. 957.
- Sec. 3107 from Sec. 7, Act of June 29, 1923, P. L. 957, the first clause of which was amended by Act of April 17, 1929, P. L. 529.
- Secs. 3108, 3109 and 3110 from Secs. 8, 9 and 10, Act of June 29, 1923, P. L. 957.
- Secs. 3201, 3202, 3203, 3204, 3205 and 3206 are new, and are modeled after the third class city law of July 16, 1913, P. L. 752.
- Sec. 3301 from Sec. 1381, Code which came from Sec. 2, Act of June 10, 1901, P. L. 551.
- Sec. 3302 from Sec. 1382, Code, which came from Sec. 2, Act of June 10, 1901, P. L. 551.
- Sec. 3303 from Sec. 1383, Code which came from Sec. 2, Act of June 10, 1901, P. L. 551.
- Sec. 3304 from Sec. 1384, Code, which came from Sec. 3, Act of June 10, 1901, P. L. 551.
- Sec. 3305 from Sec. 1385, Code, which came from Sec. 1, Act of July 7, 1911, P. L. 677.
- Sec. 3401 from Sec. 1395, Code, which came from Sec. 5, Act of April 15, 1934, P. L. 537.

Sec. 3402 from Sec. 1397, Code, which came from Sec. 1, Act of March 23, 1877, P. L. 20.  
 Sec. 3403 from Sec. 1398, Code, which came from Sec. 1, Act of May 11, 1911, P. L. 208.  
 Sec. 3404 from Sec. 1399, Code, which came from Sec. 1, Act of May 11, 1911, P. L. 208.  
 Sec. 3405 from Sec. 1400, Code, which came from Sec. 2, Act of May 11, 1911, P. L. 208.  
 Sec. 3406 from Secs. 1 and 2, Act of April 17, 1929, P. L. 527.

# PROPOSED CODE OF LAWS FOR TOWNSHIPS OF THE SECOND CLASS

An Act concerning townships of the second class; and amending, revising, consolidating and changing the law relating thereto.

## CONTENTS

Article	Sections

Section 1. Be it enacted by the Senate and House of Rep-	
representatives of the Commonwealth of Pennsylvania in General	
Assembly met, and it is hereby enacted by the authority of	

the same. That the laws relating to townships of the second class are hereby amended, consolidated, revised and changed as follows:

## ARTICLE I

### PRELIMINARY PROVISIONS

Section 101. Short Title. This act shall be known, and may be cited, as "The Second Class Township Law." This act shall take effect on the first day of July, one thousand nine hundred and thirty-one.

Section 102. Definitions. The word "township" or "townships" as used in this act shall mean a township of the second class, unless the context indicates otherwise.

Section 103. Excluded Provisions. This act does not include any provisions, and shall not be construed to repeal any acts, relating to—

- (a) The procedure for the collection of municipal and tax claims by liens.
- (b) The method of incurring or increasing bonded indebtedness.
- (c) Election officers and conduct of elections.
- (d) Poor districts.
- (e) Boards of health.
- (f) Public schools and school districts.
- (g) Constables.
- (h) Justices of the peace.
- (i) State roads, State-aid roads, and private roads.
- (j) Township reward.
- (k) Validations of elections, bonds, ordinances, and acts of corporate officers.

- (l) Free non-sectarian libraries.

Section 104. Saving Clause. The provisions of this act so far as they are the same as those of existing laws are intended as a continuation of such laws and not as new enactments. The repeal by this act of any act of Assembly or part thereof shall not revive any act or part thereof heretofore repealed or superseded, nor affect the existence or class of any township heretofore created. The provisions of this act shall not affect any act done, liability incurred, or right accrued or vested, or affect any suit or prosecution, pending or to be instituted, to enforce any right or penalty or punish any offense under the authority of such repealed laws. All resolutions, regulations, and rules, made pursuant to any Act of Assembly repealed by this act, shall continue with the same force and effect as if such act had not been repealed. Any person holding office under any Act of Assembly repealed by this act shall continue to hold such office until the expiration of the term thereof, subject to the conditions attached to such office prior to the passage of this act.

Section 105. Constitutional Construction. The provisions of this act shall be severable, and if any of the provisions shall be held to be unconstitutional, such decision shall not affect the validity of any of the remaining provisions of this act. It is hereby declared as the legislative intent that this act would have been adopted had such unconstitutional provision not been included therein.

Section 106. Construction of References. Whenever, in this act, reference is made to any act by title, such reference shall also apply to and include any codification wherein the provisions of the act referred to are substantially reenacted.

Section 107. How Act Applies. This act shall apply to all townships of the second class within the Commonwealth as now existing or hereafter created, established or reestablished.

Section 108. Saving Clauses Where Class of Township Changed. Whenever any township of the second class is designated a township of the first class, or whenever any township of the first class is reestablished as a township of the second class, or whenever any township is divided, all liabilities incurred, rights accrued or vested, obligations issued or contracted, and all suits and prosecutions pending or to be instituted to enforce any right or penalty accrued or punish any offense committed prior to such change of class or division, and all resolutions, rules and regulations shall continue with the same force and effect as if no such change or division had been made.

Section 109. Exception as to Taxation. This act does not provide a complete system for the assessment and collection of township taxes; but the taxation provisions herein contained shall be construed as supplementary to the general local taxation laws. All acts and parts of acts relating to taxation in

townships of the second class, not inconsistent with this act, in force prior to the passage of this act, which are not reenacted or specifically repealed by this act shall remain in force as to such townships in the same manner as prior to the passage of this act.

## ARTICLE II

### CLASSIFICATION AND CREATION OF TOWNSHIPS OF THE SECOND CLASS

#### (a) Classification of Townships

Section 201. The townships now in existence and those to be hereafter created are divided into two classes. Townships of the first class shall be those having a population of at least three hundred inhabitants to the square mile which have been heretofore or may hereafter be created townships of the first class. All townships not townships of the first class shall be townships of the second class. A change from one class to the other shall hereafter be made only as provided by this act, or the laws relating to townships of the first class.

#### (b) Creation of Townships

Section 205. Manner in Which Townships May be Created. The courts of quarter session may, upon the presentation of petitions as hereinafter provided, create new townships:

(a) Out of parts of two or more townships of the second class located in the same county.

(b) By the division of a township of the second class into two townships.

(c) By the consolidation of two or more townships of the second class located in the same county.

Section 206. Petitions. Petitions for the creation of townships in the manner hereinbefore provided, shall be signed either (a) by the owners of real property representing at least twenty-five per centum of the assessed valuation of the township or each of the townships affected by such creation, division, or consolidation, as the case may be, or (b) by registered voters equal in number to at least twenty-five per centum of the highest total vote cast for candidates for any office in the township or townships affected as the case may be at the last preceding municipal election. Such petition shall be sworn to and subscribed by at least three of the signers.

(c) Petitions for the consolidation of townships may also be presented when signed by a majority of the supervisors of each of the townships proposed to be consolidated and sworn to and subscribed by at least one supervisor from each such township. Such petitions shall set forth the name of any proposed new township, and shall specify the reasons for such creation, division or consolidation. Each such petition shall be accompanied by an accurate map or plot prepared by an engineer showing the lines of any new township proposed to be erected out of parts of two or more townships, and the lines of the existing township as affected by such creation, or the lines of any township and the division line in case where a township is divided, or the lines of the new township where two or more townships are to be consolidated, and the present division lines between such townships. Where natural marks are on such lines, they shall also be shown.

Section 207. Confirmation Nisi of Petition. Notice of Filing. Upon the presentation of any such petition, the same shall be confirmed nisi and the court shall, by its order, require such notice to be given by the petitioners to the residents and supervisors of the townships affected as it deems proper.

Section 208. Exceptions. Confirmation Absolute or Petition. Within thirty days after the filing of such petition, any taxpayer of the township or townships affected, as the case may be, may file exceptions to such petition, questioning the sufficiency of the number of signers, or the legality of any signatures, or the accuracy or sufficiency of the map or plot attached thereto. The court, upon the filing of any exceptions, shall fix a day for hearing, of which such notice shall be given as the court may direct. At such hearing the court shall hear all parties interested and their witnesses. If the exceptions in the opinion of the court are sustained and the court deems the petition not amendable, it shall dismiss the petition, otherwise it shall confirm the same absolutely, after any amendments permitted by the court have been made.

Section 209. Elections. When any petition is confirmed absolutely, the court shall order an election held on the question

of the creation, division or consolidation of such township or townships, which shall be held on the day of the next general or municipal election occurring at least sixty days after such order of court. Such election shall be held at the regular polling places in the township or townships affected, as the case may be. At any such election of all the qualified electors of the township or townships affected by such creation, division or consolidation shall have the right to vote. The ballots at any such election shall be furnished by the county commissioners, and the question to be placed thereon shall be framed and printed on the ballots as provided by the election laws of the Commonwealth.

Section 10. Notice of Election: The constable of the township or townships affected, as the case may be, or if there be no constable, then one of the supervisors designated by the court, shall give at least fifteen days' notice of the time and place of holding such election by posting, not less than six written or printed handbills in public places in each of such townships. The notice of election shall contain the reasons for the creation, division or consolidation of such township or townships as set forth in the petition presented to the court.

Section 211. Return of Election. Decree. The election officers, after the polls have been closed, shall count the ballots and certify the number of votes cast for and against such creation, division or consolidation to the clerk of the court of quarter sessions, who shall tabulate and compute the same and lay the result before the court. If it shall appear that a majority of the votes cast in such township or in each of the townships affected are in favor of the creation of a new township or the division of a township or the consolidation of two or more townships, as the case may be, the court shall order and decree the new township agreeably to the name and lines set forth in the petition, and the government of the new township shall be organized and become effective on the first Monday of January succeeding such election. If a majority of the votes cast in any such township or in any of the townships affected are against the creation, division or consolidation of such township or townships, no further action shall be had upon said proceedings. No new proceeding shall be considered for a period of two years.

Section 212. Boundary Monuments. The court shall, when considered necessary, cause the lines of any such new township to be marked with stone monuments placed at intervals not exceeding fifteen hundred feet, the cost thereof to be paid by the new township.

Section 213. Classification of Old and New Townships. The parts of a township remaining after the division of a township, or the parts remaining of townships out of which parts have been taken for the creation of a new township, shall remain townships of the second class. The new township created shall also be a township of the second class, unless and until by subsequent proceedings, in accordance with laws relating to townships of the first class, and having the required population, it shall be created a township of the first class.

Section 214. Costs. When a new township is created as hereinafore provided, the cost of the proceedings shall be paid by the new township and where any petition is dismissed or a majority of the electors of any one or more townships shall vote against the creation, division or consolidation of any such township, the cost of the proceedings shall be paid by the petitioners.

Section 215. Property Rights and Liabilities where Townships Consolidated. After the consolidation of two or more townships, the rights, privileges and franchises of each of the townships and all property, real, personal and mixed, and all debts due on whatever account, and other things in action belonging to each of such townships shall be vested in the new township. The title to real estate vested in either of such townships shall not revert or be in any way impaired by reason of such consolidation. All rights of creditors or liens shall be preserved, and all debts and liabilities of either of such townships shall attach to such new township and be in force against it.

Section 216. Adjustment of Indebtedness when Township Created or Divided. (a) Where any township is created out of parts of two or more townships, or where a township is divided, the supervisors of the new township and of the existing township, or townships affected, shall make a just and proper adjustment and apportionment of all property, both real and personal, including funds and taxes, as well as indebtedness, if any, to and between the new township and the old town-

ship or townships. In making such adjustment and apportionment of the property and indebtedness, the new and the old township or townships shall be entitled respectively to share in a division of the property, indebtedness, funds and taxes in proportion that the assessed valuation of the land or lands remaining in the township or townships bears to the assessed valuation of the land in the new township, taken from such township or townships. The adjustment and apportionment, if made, shall be reduced to writing and duly executed and acknowledged by the supervisors of the townships affected, and shall be filed in the office of the clerk of the court of quarter sessions of the county.

(b) In case the supervisors of such townships cannot make such amicable apportionment and adjustment of real property and indebtedness within six months after the election for the creation of such townships, then any one or more supervisors of any of the townships affected, may present a petition to the court of quarter sessions of the county, setting forth the facts. Whereupon, the court shall appoint three disinterested commissioners, taxables of the county but not residing in any of the townships affected, who shall give due notice to the supervisors of all of the townships affected and shall hold hearings and make a report to the court, making an apportionment and adjustment of all the property, funds and taxes as well as indebtedness to and between the new township and the existing township, stating the amount of indebtedness that shall be assumed by the new township and the existing township or townships.

(c) The commissioners shall give at least five days' notice of the filing of their report to the supervisors of the townships interested. Unless exceptions are filed thereto within thirty days by any township, the same shall be confirmed by the court absolutely.

(d) Any sum awarded by the report to a township shall be a legal and valid claim in its favor against the other townships, charged therewith. Any property, real or personal, given and adjudged to any township, shall be the property of the township to which it is given and adjudged.

(e) The commissioners shall be allowed ten dollars for each day actually spent by them in the performance of their duties, together with their actual necessary expenses. All costs and expenses of such petitioning shall be apportioned by the court, to and between the townships affected as it shall deem proper.

(f) In case exceptions are filed to the report of such commissioners, the court shall dispose of the same, taking testimony if deemed advisable, and the decision of the court thereon shall be final and binding on the townships unless an appeal is taken within thirty days to the Superior or Supreme Court as in other cases.

#### (c) Reestablishment of Townships of the Second Class

Section 225. By Special Enumeration of Population. At any time not less than two years before the time fixed for taking a decennial census of the United States, whenever twenty or more freeholders residing in any township of the first class shall present their petition to the court of quarter sessions, averring that the township no longer has a population of three hundred to the square mile, and shall give such security as the court may prescribe for the payment of all costs and expenses which may be incurred in any proceedings had upon petition, the court shall appoint a commissioner to make an enrollment of the inhabitants of the township. The commissioner shall make an enrollment of the inhabitants of such township, and make report thereof to the court at the next ensuing term. Upon the filing of the report, the same shall be confirmed nisi. This confirmation shall become absolute unless excepted to within twenty days thereafter, during which time notice of the said filing and confirmation shall be advertised, once a week for three weeks, in a newspaper published within the county, in general circulation in the district to be affected. If exceptions are filed to the report within said twenty days, the court, upon consideration thereof, shall confirm the report or modify the finding. After final confirmation the clerk of the court shall certify to the county commissioners and to the township commissioners the finding, as shown by the proceedings. The costs and expenses of the proceedings, including a reasonable fee for the commissioner, shall be paid by the petitioners or by the township, or partly by each, as the court shall direct.

If such report as finally confirmed shows that the township of the first class has less than three hundred inhabitants to the square mile, it shall become a township of the second class on the first Monday of January following such ascertainment.

at which time the terms of office of the existing officers shall cease and terminate, and the officers appointed by the court as hereinafter provided shall take office.

Section 226. By County Commissioners' Proclamation Following Census. The county commissioners in every county of the Commonwealth shall, by proclamation issued prior to the first day of January of each year, designate the townships, if any, which, since the last preceding proclamation, have been ascertained to have less than three hundred inhabitants to the square mile and to be townships of the second class in accordance with the last preceding section or from the last decennial census of the United States. The governments of such townships of the second class shall be organized on the first Monday of January succeeding such ascertainment at which time the terms of office of the existing officers shall cease and terminate, and the officers appointed by the court as hereinafter provided, shall take office.

Section 227. By Vote of Qualified Electors. A township of the first class may, irrespective of population, be re-established a township of the second class in the manner hereinafter provided.

The board of commissioners of such township, on its own initiative, may, or within fifteen days after the receipt of a petition signed by at least twenty-five per centum of the qualified electors of such township shall, pass a resolution and record it on its minutes, submitting the question of whether such township of the first class shall be re-established a township of the second class to the qualified electors of such township.

At the general or municipal election occurring at least ninety days after the passage of such resolution, the question whether such township of the first class shall be re-established a township of the second class shall be submitted to the voters of the township, and the county commissioners shall cause to be printed on separate ballots to be used in such township at such election a proper question framed in accordance with the election laws of the Commonwealth.

The election officers shall compute the votes cast at the election and make return thereof to the clerk of the court of quarter sessions of the county wherein such township is situate, who shall compute the same and certify the result thereof to the county commissioners and the board of township commissioners of such township. If a majority of the votes cast at any such election shall be in favor of the re-establishment of such township as a township of the second class the government of the township of the second class shall be organized and become effective on the first Monday of January next succeeding such election at which time the terms of the officers of the township of the first class shall cease and terminate, and the officers appointed by the court for such township, as hereinafter provided shall take office. If a majority of the votes cast at any such election shall be in favor of re-establishing a township of the first class, no further proceeding shall be had for a period of two years after which proceedings de novo may be had.

#### (d) Officers for New Townships

Section 235. Whenever a new township is created out of parts of two or more townships, or by the division of a township or by the consolidation of townships, or when a township is re-established the court of quarter sessions shall appoint the elective officers for the new township and fix the polling place or places in such new township. The officers so appointed shall hold their offices until the first Monday of January following the next municipal election occurring at least ninety days after such appointments. At such municipal election, an assessor and a tax collector shall be elected for regular four-year terms. If such election occurs in the year when such officers are elected for regular terms, and if not, then such officers shall be elected for terms of two years each and their successors shall be elected for four-year terms. At said first municipal election one supervisor and one auditor shall be elected for terms of six years each, one supervisor and one auditor for terms of four years each, and one supervisor and one auditor for terms of two years each. All such officers shall take office on the first Monday of January next following their election.

#### (e) Certificate of Creation of Townships to be Furnished to State Departments

Section 240. When a township of the second class is created or re-established, the clerk of the court of quarter sessions

shall certify such creation or re-establishment to the Secretary of Internal Affairs of the Commonwealth. The clerk shall be allowed a fee of one dollar for his services, to be paid as part of the costs of the proceedings.

The clerk of the court of quarter sessions shall also certify to the State Department of Highways the creation or re-establishment of all such townships within thirty days after the establishment of such township. For each such certificate furnished, the clerk shall receive a fee of three dollars and fifty cents, to be paid by the State Treasurer upon warrant of the Auditor General. The failure or neglect of any clerk to furnish such certification to the Department of Highways shall be deemed a misdemeanor, and upon conviction, such clerk shall be sentenced to pay a fine of not more than fifty dollars.

### ARTICLE III

#### Township Lines and Boundaries

Section 301. Center Line of Navigable Stream as Boundary. Whenever any township is bounded by the nearest margin of any navigable stream, and the opposite township, borough, or city, as the case may be, is also bounded by the nearest margin of the same stream, the middle of such stream shall be the boundary between such townships, or township and any other borough or city. Nothing contained in this section shall be construed to repeal any local or special law providing to the contrary.

Section 302. Petition to Alter or Ascertain Township Lines and Boundaries. The courts of quarter sessions may, upon the presentation of a petition, (a) alter the lines of two or more adjoining townships so as to suit the convenience of the inhabitants thereof; (b) cause the lines or boundaries of townships to be ascertained and established; and (c) ascertain and establish disputed lines and boundaries between two or more townships or between townships and cities or boroughs. When any such petition is presented, the court may require the petitioners to file a bond in a sufficient sum to secure the payment of all costs of the proceeding.

Section 303. Appointment and Report of Commissioners. Upon application by petition to the court for any of the purposes set forth in the last preceding section, the court shall appoint three impartial citizens, one of whom shall be a civil engineer, to inquire into the prayer of the petition. After having given notice to parties interested as directed by the court, the commissioners shall hold a hearing and view the said lines or boundaries; and they, or any two of them, shall make a plot or draft of the lines and boundaries proposed to be altered or ascertained and established if the same cannot be fully designated by natural lines or boundaries. The commissioners, or any two of them, shall make report to the court, together with their opinion of the same. Upon the filing of any such report, the same shall be confirmed nisi.

Section 304. Exceptions and Procedure. Exceptions to any such report may be filed by any person interested within thirty days after the filing of the report, and the court may thereupon fix a day for the hearing of such exceptions, of which hearing such notice shall be given as the court shall direct. After hearing, the court shall have power to sustain such exceptions or to dismiss them and confirm the report, or refer the report back to the same or new commissioners, with like authority to make another report, on which like legal proceedings may be had. Where no exceptions are filed within thirty days after the filing of the report, the court shall confirm the same absolutely. When any report is confirmed absolutely, the court shall enter a decree altering or ascertaining and establishing the lines and boundaries as shown in said report.

Section 305. Monuments. Whenever any such township line or boundary is altered or ascertained and established, the court shall cause the same to be marked with stone monuments placed at intervals not exceeding fifteen hundred feet.

Section 306. Pay of Commissioners, Civil Engineers, and Chaincarriers. Costs. The pay of commissioners appointed to alter or ascertain and establish township lines, shall be ten dollars; the pay of the civil engineer shall be twenty dollars; and the pay of chaincarriers shall be five dollars for each day necessarily employed, and five cents per mile for each mile necessarily traveled in the discharge of their duties. The court shall by its order provide how the costs and expenses of any such proceeding, including the furnishing and placing

of monuments, shall be paid, and may assess them against any township and/or municipalities interested.

Section 307. Adjustment of Indebtedness. Whenever the boundaries of any township have been altered or ascertained and established upon application of the supervisors, commissioners or the authorities of any school district or poor district, the court of common pleas, sitting in equity, may adjust the taxes, debts and expenses for township, municipal, poor and school purposes between the townships, municipalities, poor and school districts affected.

#### ARTICLE IV

##### ELECTION OF OFFICERS; VACANCIES IN OFFICE

###### (a) General Provisions

Section 401. Township Officers to be Electors. No person shall be eligible to any township office unless he is an elector of the township for which he is chosen.

Section 402. Officers to be Elected. The electors of each township shall elect (a) three township supervisors, (b) one township assessor, (c) three township auditors, and (d) one tax collector.

###### (b) Election of Officers

Section 410. Supervisors. At each municipal election the qualified electors of each township shall elect one township supervisor to serve for a term of six years from the first Monday of January next following his election.

Section 411. Auditors. At each municipal election the qualified electors of each township shall elect one township auditor to serve for a term of six years from the first Monday of January next following his election.

No auditor shall at the same time hold any other elective or appointive township office.

Section 412. Assessor. At the municipal election in the year one thousand nine hundred and thirty-three, and at the municipal election every four years thereafter, the qualified electors of each township shall elect one township assessor to serve for a term of four years from the first Monday of January next following his election.

Section 413. Election Assessors Saved. The provisions of the preceding section relating to the election of assessors, shall not repeal nor affect the provisions of any act providing for the election of assistant or registry assessors for the performance of duties relating to elections.

Section 414. Tax Collector. At the municipal election in the year one thousand nine hundred and thirty-three and at the municipal election every four years thereafter, the qualified electors of each township shall elect one tax collector to serve for a term of four years, from the first Monday of January next succeeding following such election.

Section 415. Temporary Election Schedule. Notwithstanding the provisions of preceding sections relating to the terms of township officers and the dates when such terms shall commence, it is hereby provided that all tax collectors and assessors elected in the year one thousand nine hundred and thirty-three shall commence their respective terms of office on the first Monday of December, one thousand nine hundred and thirty-three, and continue in office until the first Monday of January, one thousand nine hundred and thirty-eight. The supervisors and auditor elected in the year one thousand nine hundred and thirty-one shall commence their respective terms of office on the first Monday of December, one thousand nine hundred and thirty-one, and continue in office until the first Monday of January, one thousand nine hundred and thirty-eight. The supervisor and auditor elected in the year one thousand nine hundred and thirty-three shall commence their respective terms of office on the first Monday of December, one thousand nine hundred and thirty-three, and continue in office until the first Monday of January, one thousand nine hundred and forty. The supervisor and auditor elected in the year one thousand nine hundred and thirty-five shall commence their respective terms of office on the first Monday of December, one thousand nine hundred and thirty-five, and continue in office until the first Monday of January one thousand nine hundred and forty-two.

The purpose of the schedule in this section and its interpretation shall be to temporarily modify the preceding sections relating generally to the terms of office and dates when such terms shall commence in townships; such terms under the laws in force prior to the passage of this act commencing and ending on the first Monday of December.

###### (c) Vacancies in Office

Section 420. Supervisors. If the electors of any township shall fail to choose a township supervisor, or if any person elected to such office shall neglect or refuse to serve therein, or if a vacancy shall occur in the office by death, resignation, or otherwise, the two remaining supervisors may appoint a successor to fill the office for the unexpired term. When a vacancy is so filled, the supervisors shall within fifteen days thereafter, certify such appointment to the clerk of the court of quarter sessions.

If the two remaining supervisors, in the event of a vacancy as aforesaid, shall be unable to agree on such appointment for a period of thirty days after such vacancy occurs, the court of quarter sessions shall, upon the presentation of a petition signed by a supervisor, and not less than ten voters who are owners of real estate in the township, appoint a person to fill the vacancy for the unexpired term.

Section 421. Auditors. When a vacancy occurs in the office of township auditor in any township by reason of death, resignation, removal from the township, or otherwise, the court of quarter sessions shall, upon the petition of the electors, appoint a suitable person to fill such vacancy for the unexpired term of the person whose place he is appointed to fill.

Section 422. Assessor. Vacancies in the office of assessor in townships shall be filled in the manner provided by law.

Section 423. Tax Collector. If the electors of any township of the second class shall fail to choose a tax collector, or if any person elected to such office shall fail to qualify, or if a vacancy shall occur in the office by death, resignation, or otherwise, the court of quarter session shall, upon presentation of a petition of any citizen who is a resident of the township, setting forth the facts, appoint a person to fill the vacancy for the unexpired term of the person whose place he is appointed to fill.

In cases when the person elected to the office shall fail to qualify, the court, before making the appointment, shall declare the office vacant.

Whenever a vacancy exists in the office of tax collector, and no person resident within the township can be found within thirty days to accept the appointment to fill such vacancy, the authorities authorized to levy and assess taxes in the township may petition the court of quarter sessions for the appointment of a tax collector, whereupon the court may appoint any citizen of the county to collect such taxes.

#### ARTICLE V

##### TOWNSHIP OFFICERS

###### (a) General Provisions

Section 501. Oath of Office. Every person elected or appointed to any township office in any township shall, before entering upon the duties of his office, take and subscribe an oath or affirmation before some person having authority to administer oaths, to support the Constitution of the United States and of this Commonwealth, and to perform the duties of his office with fidelity. A copy of such oath or affirmation shall, within ten days thereafter, be filed with the township secretary.

Section 502. Bonds. When any officer or employee of any township is required to give bond for the faithful performance of his duties, and such bond is required to be executed by a surety company, the township may pay the premium on such bond.

Section 503. Penalty for Failure to Perform Duties. If any township officer refuses or neglects to perform his duties, the court of quarter sessions, upon complaint in writing by twenty-five citizens, owners of real estate residing in the township or district, may issue a rule upon such officer to show cause why his office should not be declared vacant and another appointed in his stead. Such rule shall be made returnable not less than two weeks from its date of issue. Upon hearing, and proof that the facts alleged in the complaint are true, the court may declare the office vacant and appoint another in his stead, to hold office during the term of the officer deposed.

Section 504. Road Complaints. If such complaint shall allege that the public roads and highways of any township are not maintained in accordance with law, the court may appoint three persons, who shall examine said highways and report to the court their findings. In all such cases the complainants shall first enter security, in such sum as the court may fix, to pay all costs.

## (b) Township Supervisors, Township Superintendent and Roadmasters

Section 510. Supervision of Road Affairs. The general supervision of road affairs in every township shall be in the hands of three qualified electors of the township, who shall be styled township supervisors.

Section 511. Organization Meeting. Appointment of Secretary and Treasurer. The supervisors of each township shall meet, at a convenient time and place, on the first Monday in January of each year. The township supervisors shall organize as a board by electing one of their number as chairman. The board shall appoint a treasurer and a secretary, who shall be the same person, and who may or may not be a member of the board, except where the board selects a trust company or a banking institution to act as treasurer, in which case it may elect an individual as secretary.

Section 512. Monthly Meetings. Quorum. Rent and Expenses. The township supervisors shall meet for the transaction of business at least once and not more than twice each month, at a time and place to be fixed by the board. Two members shall constitute a quorum. Necessary expenses incurred in such meetings, including office rent, stationery, light and fuel, shall be paid out of the township road funds.

Section 513. Minutes and Records. The board of township supervisors shall keep minutes of its proceedings, and such other books as they may find necessary in the performance of their duties. All such books shall be open for the inspection of any taxpayer or any representative of the Department of Highways at all reasonable times, and shall be submitted to the township auditors when they meet to audit the accounts of the treasurer and other township officers. The township supervisors shall deliver such books, papers, and accounts to their successors.

Section 514. Road Districts. Superintendents and Roadmasters. The board of township supervisors, immediately after their organization shall divide the township into one or more road districts. They shall employ a superintendent for the entire township or a roadmaster for each district. Township supervisors may require such superintendents or roadmasters to give bond, with approved security, for the faithful performance of their duties. The superintendent or roadmasters shall be subject to removal by the board of supervisors. The supervisors shall fix the wages to be paid per hour to the superintendent, or roadmasters, and laborers for work on the roads and bridges.

This section shall not prohibit the township supervisors from being employed as superintendents or roadmasters. In such case they shall not be required to employ a superintendent or roadmasters.

Two or more townships may joint and appoint the same person as superintendent.

Section 515. Compensation of Supervisors. Supervisors shall receive from the township road funds, as compensation, not less than two dollars and fifty cents nor more than four dollars for each meeting which they attend. The amount of the compensation for attending meetings shall be determined by the township auditors. The township auditors shall also allow to the supervisors reasonable compensation for making a semi-annual inspection of the roads and bridges. The compensation of supervisors, when overseeing or working on roads, shall be fixed by the township auditors, and shall be not less than three nor more than six dollars per day; but no supervisor shall receive compensation as a superintendent or roadmaster for any day he receives compensation for attending a meeting of supervisors unless such meeting is held during the nighttime.

Section 516. Powers and Duties of Supervisors, Township Superintendents and Roadmasters. The township supervisors, or in cases where duties are not specifically required of supervisors, then the township superintendent or the roadmasters, under the direction of the board of supervisors, or the supervisors acting as superintendent or roadmasters, shall:

(a) Have the general care and superintendence of the improvement of the highways and bridges in the township, except as otherwise specially provided;

(b) Cause such highways and bridges to be kept in repair and reasonably free from all obstructions, and give the necessary directions therefor;

(c) Inspect all highways and bridges during the months of April and October of each year, or at such other times as the board of supervisors or the superintendent may direct;

(d) Divide the township into as many sections as may be necessary for the maintenance and repair of the highways and the opening of highways obstructed by snow;

(e) Employ or hire such persons, teams and implements as may be necessary for the maintenance and repair of highways and bridges, and the removal of obstructions caused by snow, and provide for the organization and supervision of the persons so employed, and work on the roads themselves when directed to do so by the board of supervisors. Records shall be kept, and reports made and filed, giving the names of all persons employed, including supervisors, superintendent or roadmasters; dates on which work was done, with compensation paid to each person and the capacity in which he is employed;

(f) Construct and keep in repair all sluices and culverts, and keep the waterways, bridges, and culverts open;

(g) Cause loose stones lying in the beaten track of every highway to be removed. Stones so removed shall be conveyed to some place from which they will not work back or be brought back into the track by other implements used in repairing or maintaining such highways;

(h) Report monthly to the board of supervisors, which report shall contain the matter in the form to be prescribed by the Department of Highways;

(i) Attend road meetings and conventions when directed to do so by the board of supervisors;

(j) Perform such other duties and have such other powers as may be imposed or conferred by law or the rules and regulations of the Department of Highways.

Section 517. Road Contracts. The board of township supervisors may make a contract for the improvement and keeping in repair of not more than ten miles of road. No such contract shall extend over a period of more than four years, nor shall it be given unless approved of and signed by at least two members of the board of township supervisors. Every contractor for road work shall give bond for the amount of such contract, and sign specifications furnished by the township supervisors for the building and care of such contract roads.

Section 518. Annual Reports to State Department of Highways. The board of township supervisors shall annually, on or before the first day of February in each year, make a sworn statement to the State Department of Highways, on blanks furnished to them by the Department, of the whole amount of tax levied during the preceeding year for road purposes and the total amount of road taxes collected during the year. They shall specify in such report the amount expended for maintenance or repairs of roads, for opening and building new roads, and for macadamizing or otherwise permanently improving roads; the number of miles of roads thus made, and the total number of miles of township roads in the township. Such reports shall also contain the names and addresses of the chairman, members, and secretary and treasurer of the board, and such other matters and things as the State Department of Highways may require.

Section 519. Applications for County Road Aid. Whenever the owners of the majority of the assessed valuation of real property within any township desire any principal road or highway within the township to be improved and maintained at the joint expense of the county and township, they may petition the supervisors of the township for said improvement, and require them to make application to the county commissioners for such improvement and maintenance in accordance with the provisions of existing law.

In all cases where the township supervisors refuse to act upon, or unduly delay action on, any petition for the improvement and maintenance of any road or highway, as herein provided, any citizen taxpayer of the township or county may, by petition, present the facts of the matter to the court of quarter sessions, requesting the court to order such action thereon as the case may require. If after due hearing had before said court it shall appear that the truth of the matters alleged in the petition are sustained, the court shall make an order directing the township supervisors to forthwith act upon said application or applications, and that the said application or petition for the improvement be forthwith forwarded to the county commissioners.

Section 520. Penalty. Interest in Contracts and Purchases. It is unlawful for any township supervisor, superintendent, or road master to be interested, directly or indirectly, in any purchase made or contract relating to roads and bridges, except as provided for in this act, or to furnish any materials therefor,

Any such person knowingly violating the provisions of this section shall be guilty of a misdemeanor. Upon conviction thereof, any such person shall be sentenced to pay a fine not exceeding five hundred dollars (\$500), or to be imprisoned for a term not exceeding six months, or both, and shall forfeit his office.

Section 521. Penalty. Violation of Act Generally. Any township supervisor, township superintendent, roadmaster, or contractor, employed to work on the roads, bridges, and highways of any township, who shall violate any of the provisions of this act, other than those for the violation of which specific penalties are provided, or who shall fail, neglect, or refuse to carry out the provisions of this act, shall upon conviction in a summary proceeding, be sentenced to pay a fine of not more than fifty dollars. All such fines shall be paid to the township treasurer, for the use of the road fund.

#### (c) Township Treasurer

Section 530. Bond. The treasurer appointed by the board of township supervisors, if an individual, shall give bond, with at least two sufficient sureties or a surety company to be approved by the auditors of the township, conditioned that the treasurer shall well and truly account for and pay over all moneys collected or received for the township, and all moneys paid by the State and received by him, only upon a written order signed by two members of the board of supervisors; for the delivery to his successor in office of all books, papers, and documents; for the payment to him of any balance of money belonging to the township that may remain in his hands; and for the faithful performance of the duties of his office.

Section 531. Compensation. The township treasurer shall receive, as compensation for his services, a certain percentage on all moneys received and paid by him, which rate shall be settled by the supervisors of the townships, with the approbation of the township auditors.

In no case shall the combined amount paid to the secretary and treasurer exceed two per centum of the money paid out by the treasurer, except when the amount would be less than ten dollars (\$10.00); and the calculation of such maximum compensation shall not include any percentage upon money paid out by the treasurer for the repayment of loans, notes, certificates, or other evidences of indebtedness, or other borrowed moneys.

Section 532. Duties. The township treasurer shall receive all moneys due the township and deposit the same promptly upon receipt thereof in a bank, banking institution or trust company in the name of the township. He shall keep distinct accounts of all sums received from taxes and other sources which accounts shall at all times be open to the inspection of the supervisors of the township. He shall pay out all moneys received by him only on orders drawn by the supervisors of the township. All orders shall be on blanks prepared and furnished by the State Department of Highways. He shall annually state his accounts, and lay the same, together with the vouchers, before the township auditors for settlement.

Section 533. Use of Special Funds. Penalty. Whenever any moneys are collected in or received by any township, for any special purpose, and are paid into the hands of the treasurer of such township, it shall be unlawful for such treasurer to apply such moneys, or any part thereof, to any purpose other than that for which such moneys were collected. Every such misapplication shall be a misdemeanor. Upon conviction of such offense, the treasurer shall be punished by a fine of not less than the amount so misapplied, or by imprisonment for not less than three months and not more than one year.

Section 534. Penalty for Failure to Perform Duties. If any township treasurer shall neglect or refuse to perform any of the duties of his office, upon conviction in a summary proceeding, he shall be fined in a sum not exceeding one hundred dollars, and shall be disqualified from holding the office.

Section 535. Depositories of Township Funds. The township supervisors may, on the first Monday of January of each year, or as soon thereafter as is practicable, designate, by resolution, a depository or depositories for township funds. Such designation shall be valid for a period of one year or until such time as another depository or other depositories shall be designated by similar action of the township supervisors.

Such depository or depositories shall be banks, banking institutions or trust companies located in the Commonwealth.

Depositories so designated shall, upon receipt of notice of their selection as a depository of township funds, furnish a bond to secure payment of deposits and any interest to the

township, with a proper warrant to confess judgment in favor of the township, secured by a surety company or individual sureties to be approved by the township supervisors.

Such bonds shall be in a sum at least equal to the probable greatest amount of such deposit at any one time.

The township treasurer shall, upon the designation and qualification of such depository or depositories, immediately transfer thereto the township funds, and shall thereafter keep such deposits solely in such depository or depositories in the name of the township.

No township treasurer, complying with the provisions of this section, nor his surety or sureties, shall be chargeable with losses of township funds caused by the failure or negligence of such depository or depositories.

#### (d) Township Secretary

Section 540. Duties and Compensation. The secretary in each township shall be clerk to the board of supervisors. He shall keep a record of the proceedings of said officers, and shall receive such compensation therefor as shall be fixed by the township auditors. The combined amount paid to the secretary and treasurer shall not exceed two per centum of the money paid out by the treasurer, except where the same would amount to less than ten dollars (\$10.00); and the calculation of such maximum compensation shall not include any percentage upon moneys paid out by the treasurer for the repayment of loans, notes, certificates, or other evidences of indebtedness or other borrowed moneys.

Section 541. Books Furnished by Department of Highways. The secretary shall provide a suitable book or books for the purpose of entering therein all matters of which he is required to keep a record. Such books shall be furnished by the State Department of Highways.

Section 542. Books Open to Inspection. The minute book and other records and documents of every township shall be open to the inspection of any taxpayer thereof, his, her or its agent, upon request therefor.

#### (e) Township Auditors

Section 545. Meeting. Duties. Quorum. Surcharges. Compensation. The auditors of townships shall meet annually, on the day following the day which is fixed by this act for organization of the township supervisors; and shall audit, settle, and adjust the accounts of the supervisors, superintendents, roadmasters, treasurer, and tax collector of the township. Two auditors shall constitute a quorum.

Any officer whose act or neglect has contributed to the financial loss of any township, shall be surcharged by the auditors with the amount of such loss.

Each auditor shall receive five dollars per diem for each day necessarily employed in the duties of his office, to be paid out of the funds of the township.

Section 546. Subpoenas. Oaths. Perjury. The auditors of each township may issue subpoenas to obtain the attendance of the officers whose accounts they are required to adjust, their executors and administrators, and of any persons whom it may be necessary to examine as witnesses and to compel their attendance by attachment, in like manner as any court of common pleas may in cases pending before them, and may also compel the production of all books, vouchers, and papers relative to such accounts. Such subpoena and attachment shall be issued by a justice of the peace and be served by a constable or auditor of the township.

The auditors of each township may administer oaths and affirmations to all persons brought or appearing before them, whether accountants, witnesses, or otherwise. All persons guilty of swearing or affirming falsely on such examination shall be guilty of perjury.

Section 547. Completion, Publication and Filing of Auditors' Statement. The auditors shall complete their audit, settlement, and adjustment within as short a time as possible. They shall, within ten days thereafter, publish, by advertisement in at least one newspaper of general circulation, printed in the township or county, or by posting at least five copies in public places in the township, a concise itemized statement of the receipts and expenditures of the several officers for the preceding fiscal year. They shall also, within ten days thereafter, file a copy of such statement with the secretary, and another copy of such statement with the clerk of the court of quarter sessions. When any two offices are exercised by the same person, only one statement shall be required.

Section 548. Cancellng Orders. The auditors shall cancel all orders and vouchers presented to them, which they find have been paid, by writing the word "audited" on the face thereof.

Section 549. Penalty for Failure to Perform Duty. Any auditor neglecting or refusing to comply with the preceding provisions of this article shall pay a penalty of one hundred dollars, to be recovered by summary proceeding, upon the complaint of any taxpayer. Any penalty recovered shall be paid into the treasury of the township.

Section 550. Employment and Compensation of Attorney. The auditors, in case of a disagreement with any officials or board of officials whose accounts they are required to audit, may employ an attorney. Such attorney shall not be employed until reasonable effort to reach an agreement has been made, and only after notice of their intention so to do has been given to said official or board of officials. The compensation for such attorney shall be fixed by the auditors, and shall not exceed the sum of ten dollars per day, nor total in any case more than thirty dollars, unless when an appeal is taken to the court, in which case the court shall fix the additional compensation for the attorney. The compensation for said attorney shall be paid out of the township treasury by a warrant drawn by the auditors upon the treasurer of the township.

Section 551. Balances Due to be Entered as Judgments. Any balance, in any report of the auditors, against any officer of the township, shall constitute a surcharge against such officer, as fully as if expressly stated in said report to be a surcharge, and the amount of any balance, and of any express surcharge shall be entered by the prothonotary as a judgment, against such officer and in favor of the township. The auditors shall direct the clerk of the court of quarter sessions to certify the amount of every balance or surcharge, contained in any such report, from which no appeal has been taken, to the court of common pleas, for entry thereof by the prothonotary as a judgment.

Section 552. Collection of Surcharges and Charges by Taxpayers. Bonds. Any auditor or taxpayer of the township may enforce the collection thereof, for the benefit of the township, by action or execution, upon filing in the court of common pleas a bond (in the case of a taxpayer), with one or more sureties, conditioned to indemnify the township from all costs which may accrue in the proceedings undertaken by such taxpayer, subject, however, to all rights of appeal from the report of auditors hereinafter granted.

Section 553. Appeals from Report. The township, or any taxpayer thereof on its behalf, or any officer whose account is settled or audited by the township auditors, may appeal from any settlement or audit of the township auditors to the court of common pleas, within thirty days after the settlement has been filed in the court of quarter sessions.

Section 554. Taxpayers. Appeal. Bond. No appeal by a taxpayer or officer shall be allowed unless the appellant shall enter into recognizance to prosecute the same with effect, and to pay all costs accruing thereon, in case, if the appellant be a taxpayer, he shall fail to obtain a final decision more favorable to the township than that awarded by the auditors, or, in case the appellant be an officer, he shall fail to obtain a final decision more favorable to the officer than that awarded by the auditors.

Section 555. Intervention by Taxpayers. Bond. Whenever an appeal has been taken from the report of the auditors by the township, or by any person charged or surcharged in such report with any sum of money, any taxpayer of the township may intervene in such appeal, and either prosecute the same, on its behalf, or defend it against the appeal of the person so charged. No taxpayer shall intervene unless he shall file in the court of common pleas a bond, with one or more sufficient sureties, conditioned to indemnify the township against all costs accruing by reason of such intervention.

Section 556. Consolidation of Appeals. When more than one appeal from the report of the auditors is taken, whether by the township, an officer or officers thereof, or by a taxpayer or taxpayers, the court shall, upon petition of any party interested, direct the several appeals to be disposed of in a single proceeding.

Section 557. Testimony and Argument. Any person interested may order the appeal upon the argument list, and evidence may be taken before any person authorized to administer oaths, upon rule for that purpose served upon the opposite party.

Section 558. Framed Issues. Whenever any matter of fact is in dispute the court of common pleas is authorized to frame an issue for the trial thereof.

Section 559. Report. Prima Facie Evidence. Burden of Proof. The accounts of the officer or officers in question may be investigated de novo. The figures and facts found and stated by the auditors in their report of audit shall be taken as prima facie correct, as against any such officer, and the burden shall be upon each officer whose accounts are in question to establish the validity of the credits which he claims.

Section 560. Findings. Judgment. After hearings, the court shall file its finding of fact and law, and enter judgment in accordance therewith, and the judgment so entered may be enforced by any appropriate proceedings by the party prevailing.

Section 561. Costs. In all cases of appeal from the report or audit of township auditors to the court of common pleas, the costs shall abide the event of the suit as in other cases.

Section 562. Appeals From Lower Courts. Any person interested may except to the rulings of the court, and may appeal therefrom to the Superior or Supreme Court, as in other cases.

Section 563. Counsel Fees. When an appeal is taken from the township auditors' report or settlement of the account of any township officer, and such appeal results favorable to the appellants in such a manner that money is recovered for any township, the court hearing such appeal shall make an order to pay a counsel fee, which it deems just and reasonable, to the counsel representing such appeal, out of the funds so recovered.

#### (f) Tax Collector

Section 570. Powers, Duties and Liabilities. The tax collector of townships shall collect all county, township, school, poor and other taxes levied within townships by authorities empowered to levy taxes. He shall, in addition to the powers, duties and responsibilities enumerated in this act, have all the powers, perform all the duties, be subject to all the obligations and responsibilities, as are now vested in, conferred upon, or imposed upon, collectors of the several classes of taxes hereinafter mentioned.

Section 571. Oath and Bond. The collector of taxes of townships shall, before he enters upon the duties of his office, take and subscribe an oath of office and file the same in the office of the court of quarter sessions, and shall annually enter into a bond to the Commonwealth, in not more than the amount of taxes charged and assessed in the duplicates with at least two sufficient sureties or one bonding company. The bond shall be approved by the court of quarter sessions and shall be filed in the office of the clerk of said court. The condition of the bond shall be, that the collector shall well and truly pay over or account for the whole amount of taxes charged and assessed in the duplicates which shall be delivered to him. This bond does not cover the collection and payment over of school taxes.

#### (g) Assessor

Section 575. The assessors of townships shall have all the powers, perform all the duties, be subject to all the obligations and responsibilities, and receive the compensation as is provided for by existing laws relating to taxation.

#### (h) Township Solicitor

Section 580. Election; Vacancies. The board of supervisors, on the first Monday of January in any year, or as soon thereafter as practicable, may elect, by a vote of a majority of the members, and fix the compensation of one person learned in the law, who shall be styled the township solicitor, and who shall serve for the term of one year.

Section 581. Solicitor to Have Control of Law Matters. The law matters of the township shall be under superintendence, discretion, and control of the township solicitor, and no official or official body of the township, except as herein otherwise provided, shall employ an additional counsel without the assent or ratification of the board of supervisors.

Section 582. Duties of Solicitor. The township solicitor shall prepare such bonds, obligations, contracts, leases, conveyances and assurances to which the township may be a party, as may be directed by resolution; he shall commence and prosecute all actions brought by the township for or on account of any of the estates, rights, trusts, privileges, claims, or demands, as well as defend all actions or suits against the township, or any officer thereof, wherein or whereby any of the estates,

rights, privileges, trusts, ordinances, or accounts, of the township, may be brought in question before any court in the Commonwealth; and shall do every professional act incident to the office which he may be authorized or required to do by the board of supervisors or by any resolution. He shall, whenever required, furnish the board of supervisors, or any of them, with his opinion in writing upon any question of law which may be submitted by any of them in their official capacities.

(i) Township Engineer

Section 585. Election of Township Engineer. Term. Filling of Vacancies. The township supervisors may, at any time, appoint by a vote of a majority of them, a township engineer who shall be a registered civil engineer and fix his compensation.

Section 586. Duties. Preparation of Plans. The township engineer shall perform such duties as the township, supervisors shall prescribe as to the construction, reconstruction, maintenance and repair of all streets, roads, pavements, sewers, bridges, culverts, and other engineering work. He shall prepare plans, specifications and estimates of all such work undertaken by such township, and shall, whenever required, furnish the township supervisors with reports, information or estimates on any township engineering work, or on questions submitted by any of them in their official capacity.

Section 587. Certificate of Commencement and Completion of Municipal Improvements. Where a township engineer is employed, he shall, immediately after the completion of any municipal improvement, the cost of which, in whole or in part, is to be paid by the owners of the abutting property, make certificate in which he shall state the day or time on which the particular improvement was completed, and shall file the same with the township secretary, who shall enter the said day or time of completion in a book to be kept by him for said purposes; and the said day or time mentioned in said certificate shall be conclusive on all parties as to the time the said work was completed. The time of completion of the work, referred to in this section and in other parts of this act, shall be taken to mean the time of the completion of the whole contract for the improvement. He shall also furnish to the township secretary a certificate showing the time at which any such particular improvement was commenced and such certificates shall be conclusive evidence of the time when the said improvement was begun; and an entry of such date shall be made by said secretary in the book aforesaid.

(j) Township Police

Section 590. Petition for Appointment of Police. Upon the petition of not less than twenty-five taxpayers of any township, or of two or more adjacent townships, to the court of quarter sessions, representing that the safety of the citizens and the security of property makes it necessary for the appointment of one or more electors to act as policemen, the court shall consider said petition, and, if satisfied of the reasonableness and propriety of said application, shall direct the supervisors of said township to appoint one or more qualified electors to act as policemen, and to serve at the will of said supervisors.

The court shall fix the number of policemen necessary, the compensation of such policemen, and shall limit the term of service of said policemen as it may deem proper. Where such policemen are appointed for two or more townships, the court shall fix the amount of compensation which shall be paid by each of such townships. Such compensation shall be paid from township funds.

Section 591. Powers. Each policeman so appointed shall possess and exercise all the powers of policemen of cities of this Commonwealth.

The keepers or persons in charge of jails, lockups, or station houses shall receive all persons arrested by such policemen for the commission of any offense against the laws of this Commonwealth within said township.

Section 592. Shield. Each policeman, when on duty, shall wear a shield or badge, with the words "township police" and the name of the township or townships for which he was appointed, inscribed thereon.

Section 593. Equipment. The township supervisors may, with the approval of the court, provide such policeman with a uniform and equipment and for means of transportation and the maintenance of the same, the cost thereof to be paid out of the funds of the township or townships.

Section 594. Certain Compensation Prohibited. It shall not be lawful for any township policeman to charge or accept any fee or other compensation in addition to the salary paid to him as a policeman for any service rendered or performed by him pertaining to his office or duties, except public rewards and the legal mileage allowed to constables for traveling expenses.

ARTICLE VI

STATE AND COUNTY ASSOCIATIONS OR TOWNSHIP OFFICERS

(a) County Associations

Section 601. County Associations of Supervisors. County associations of township supervisors, auditors, and other persons officially charged with the construction and maintenance of the public roads or streets may be formed. Such associations, when formed, shall hold annual or semi-annual conventions, at the county seats of the respective counties or some other suitable place within the county, for the purpose of considering and discussing questions and subjects pertaining to the best methods for the construction, improvement, and maintenance of the public highways and bridges.

Section 602. Who to attend. Compensation and Mileage. The supervisors of townships, auditors, and the secretary of the board of township supervisors, when not a member of the board, shall attend such conventions whenever possible. Each township supervisor, auditor and secretary attending such convention shall receive a certificate, signed by the presiding officer and acting secretary of the convention, attesting his presence at the convention. Such certificate shall entitle him to collect from the township treasurer the sum of three dollars per day for each day's attendance, and mileage at the rate of four cents per mile traveled, to be computed by the route usually traveled from his place of residence to the place where the convention is held. No township supervisor, auditor, or secretary shall be paid for more than two days' attendance in any one year.

Section 603. Officers of County Association. Ex-Officio Members. The officers of the association shall consist of a president, two vice-presidents, a secretary, and a treasurer; all of whom, except the secretary, shall be members of the association, and shall hold office for one year or until their successors are chosen. If desirable, the secretary may be a person not a regular member of the association, and may be paid for his service such compensation, not exceeding ten dollars per annum, as the other officers may determine. Every township supervisor and auditor attending such convention may vote in the election of officers. The mayor of any city, the burgess of any borough or their duly appointed representatives, the county commissioners, and the judges of the court in the county the officers of the State Association of Township Supervisors, the township engineer of the State Department of Highways, the assistant engineers of the division of township highways, and the superintendent of State Highways in charge of such county shall be eligible to membership, but shall not be entitled to vote, nor to hold office.

Section 604. County to Pay Expenses. The county treasurer shall on warrants of the county commissioners, pay to the treasurer of such association, from the county funds, the necessary expenses incurred for the holding of such annual or semi-annual convention, including the necessary expenses of the secretary. The total sum thus paid by any county shall not exceed one hundred and twenty-five dollars a year.

Within thirty days after every such convention the treasurer of such association shall file with the county commissioners an itemized statement, under oath, showing when and where such convention was held, the number of township supervisors, auditors, and township secretaries present, and all the expenses connected with such convention, together with proper vouchers for all such expenses, and no payment shall be made to the treasurer of such association until he has presented to the county commissioners an itemized and verified statement of expenses.

(b) State Association

Section 610. State Association Authorized. The formation of a State association of township supervisors is hereby authorized. The association shall hold annual meetings, at such time and place within the Commonwealth as it may designate, for the purpose of discussing various questions and subjects per-

taining to the duties of township supervisors and for the purpose of devising uniform, economical and efficient methods of administering the affairs of townships.

Section 611. Delegates. Each county association of township supervisors shall elect one township supervisor for each ten townships, or fraction thereof, within said county, as a delegate to each annual meeting of said State association.

Section 612. Expenses and Mileage. The expenses of the delegates attending the annual meeting shall not exceed six dollars per day for each delegate for not more than three days, together with the actual mileage at the prevailing rate of railroad fare, and shall be paid by the respective county associations.

Section 613. Limit on Meeting Expenses. The expenses of the annual meeting, including expenses of committees, printing, and stenographers, shall be paid pro rata by the respective county associations, and shall not exceed fifteen dollars for each county association.

Section 614. Itemized Statement Filed With County Treasurer. Within thirty days after each annual meeting of the State association, the treasurer of the respective county association shall file, with the county commissioners, an itemized statement, under oath, setting forth where and when the annual meeting of the State association was held, the number of delegates from the respective association in attendance and the expenditures due from the county association for such annual meeting, and the county commissioners shall draw their warrant on the county treasurer and pay to the treasurer of the respective county association, out of the county funds, the amount expended by the county association under the provisions of this subdivision.

## ARTICLE VII

### General Powers

Section 701. Suits. Property. Townships of the second class may:

I. Sue and be sued by the name of the townships of .....

II. Purchase, hold, lease, let and convey such real and personal estate as the purposes of the township shall require. Such real and personal estate shall be taken and held only for the benefit of the inhabitants of the township, and for such objects and purposes as township rates and levies are authorized by law to be laid for.

Section 702. Supervisors to Exercise Powers. The corporate powers of townships of the second class shall be exercised by the township supervisors. They shall have power:

I. Lighting. To light and illuminate the streets, highways, and other public places of the township with electric light, gas, or other illuminating medium, and to provide for defraying the cost, charges and expenses thereof; and for such purposes to enter into contracts or agreements with any person, co-partnership, association, or corporation, for a period not exceeding five years, for the purpose of securing and maintaining a supply of light.

II. Contracts and Tax Levy for Lighting. On the petition of the owners of a majority of the lineal feet frontage along any street, highway or portion thereof within the township, to enter into contract with electric, gas, or other lighting companies to light and illuminate said streets and highways and other public places in said villages with electric light, gas light or other illuminant.

The township supervisors shall levy, for the maintenance of said lights, an annual tax upon all the property, including factories and places of business, abutting upon the said streets and highways, in the district benefited thereby, based upon the assessment for county purposes. Such taxes shall be collected in the same manner as other taxes. The collector of taxes shall receive the same commission as on the road tax. No such tax shall be levied against any farm land, but vacant lots between built-up sections, whether tilled or untilled, shall not be deemed to be farm lands. The township treasurer shall receive all such taxes collected for lighting the streets and highways, shall keep the same in a separate account, and pay out the same only upon orders signed by the chairman of the township supervisors, attested by the secretary. The treasurer shall make a report to the auditors of the township annually.

III. Contracts and Tax Levy for Fire Purposes. On the petition of the owners of a majority of all lineal feet frontage along any highway or portion thereof in any village within the township, to enter into contract with water companies for

the placing of fire hydrants along said highway, for the protection of property from fire.

The supervisors shall levy, for the maintenance of such fire hydrants and for the purchase of hose, et cetera, an annual tax upon the property abutting upon said highway in the district benefited thereby, based upon the assessment for county purposes. Such tax shall be collected in the same manner as other taxes. The collector shall receive the same commission as on the road tax.

The township treasurer shall receive all such taxes collected for fire protection, and keep the same in a separate account, and pay the same out only upon orders signed by the chairman of the board of supervisors, attested by the secretary. The treasurer shall make a report to the auditors of the township annually.

IV. Fire Protection From Adjacent Municipalities. To appropriate moneys to adjacent municipalities and townships or fire companies located therein to secure fire protection for the inhabitants of the township.

V. Watering Troughs. To erect watering troughs along the highways, at an expense not exceeding twenty dollars, and to keep the same in repair.

VI. Memorial Day Appropriations. To appropriate moneys for the expenses of Memorial Day services.

VII. Road Bulletins. To subscribe for not more than three publications the main subject-matter of which pertains to good roads and road building. Such publication shall be for the joint use of the supervisors, superintendents, and roadmasters of the township.

VIII. Garbage Regulations. To provide for the care and removal of ashes, garbage, and other refuse material, including the imposition and collection of reasonable fees and charges therefor.

IX. Traffic Lights and Signals. To provide for and to expend township road moneys for the erection, maintenance and operation of traffic lights and traffic signals whenever deemed necessary for the protection of the traveling public.

X. Road Supplies. To purchase such timber, material, equipment, machinery, road-drags, tools, and implements as shall be necessary for making and repairing roads and bridges, to employ sufficient number of laborers to make and repair the same, and to lease or lend such machinery, road-drags, tools, and implements to other townships, boroughs, or cities, and to contract for the construction, reconstruction and improvement of roads.

XI. Appropriations for Forestry. To appropriate moneys from their respective treasuries to any forest protection association co-operating in forest work with the State Department of Forests and Waters, or to be expended in direct co-operation with said Department of Forests and Waters in forest work; and to purchase or take by gift any forest lands for recreational purposes.

XII. Nuisances. To prohibit accumulations of garbage and rubbish on private and public property, and the carrying on of any offensive manufacture or business; and to remove any nuisance or dangerous structure on public or private grounds after notice to the owner to do so and, in his default, to collect the cost of such removal, together with a penalty of ten dollars from the owner by summary proceeding. In the exercise of the powers herein conferred the township may institute proceedings in courts of equity.

XIII. Insurance. To expend out of the public funds of the township such amounts as may be necessary to secure workmen's compensation insurance for its employes including volunteer firemen killed or injured while going to, returning from, or attending fires in said township or territory adjacent thereto; to make contracts of insurance with any fire insurance company duly authorized by law to transact business in the Commonwealth of Pennsylvania, on any building or property owned by such township, to make contracts with any insurance company insuring any public liability of the township, and to make contracts of group insurance for the benefit of its employes.

XIV. Armories. To appropriate money or convey land, either independently or in connection with any county, city, town, borough or township, to the Commonwealth of Pennsylvania, for the purpose of assisting the Armory Board of the Commonwealth of Pennsylvania in the erection of armories for the use of the National Guard, and to furnish water, light or fuel, free of cost to the Commonwealth, for use in any

armory of the National Guard, and to do all things necessary to accomplish the purpose of this clause.

XV. National Guard. To take, by right of eminent domain, for the purpose of appropriating to themselves, for the use of the National Guard of Pennsylvania, such public lands, easements, and public property as may be in their possession or control, and used or held by them for any other purpose. Such right, however, shall not be exercised as to any street or highway or wharf, but all other public easements and property may be appropriated and used for the purposes herein provided, any limitation of the use thereof by the township, either by donation, dedication, appropriation, statute, or otherwise, to the contrary notwithstanding.

XVI. Acquisition of Lands to Assist Armory Board. To acquire, by purchase or by gift or by the right of eminent domain, any land for the use of the National Guard of Pennsylvania, and to convey such lands so acquired to the Commonwealth of Pennsylvania to assist the Armory Board in the erection of armories. The proceedings for the condemnation of lands under the provisions of this act, and for the assessment of damages for property taken, injured, or destroyed, shall be taken in the same manner as is provided by this act for the condemnation of lands for public purposes in townships. The power conferred by this clause shall not be exercised to take any church property, graveyard, cemetery, or any dwelling house, or the curtilage of the same, in the actual occupancy of the owner.

XVII. Burial Plots of Ex-Service Men. To purchase plots of ground in any cemetery or burial ground for the interment of such deceased service men, as shall hereafter die within such township, or shall die beyond such township and shall have a legal residence within such township at the time of their death and whose bodies are entitled to be buried by the county. Such plots of ground shall be paid for out of the treasury of such township.

XVIII. Display of Flags. To display the flag of the United States, the Commonwealth, or of any county, city, borough or township on any public building of the township.

XIX. Care of Memorials. To maintain and keep in good order and repair at the expense of the township, and it shall be their duty so to do, any soldier's monument, gun, or cartridge or other similar memorials when there is not in existence any person, body or organization to care for and maintain the same and when such memorials were not erected by the government of the United States, the Commonwealth of Pennsylvania, any other state, or by the commissioners of any county; and to receive from persons or organizations funds for such purposes.

XX. Appropriations to Certain Associations. To appropriate annually a sum not exceeding two hundred dollars for the support of any voluntary association composed of electors of boroughs and townships within such county, or any of them, which association is formed for the study and investigation of the welfare, economics, management, and government of boroughs and townships, and for the protection and safeguarding of the rights and franchises of boroughs and townships, and for the purpose of recommending legislation beneficial to boroughs and townships, or any one or more of such purposes.

## ARTICLE VIII

### Contracts

Section 801. Power to Make Contracts. Each township shall have power to make such contracts as may be necessary for carrying into execution the provisions of this act.

Section 802. Contracts for Roads, Road Machinery and Materials. All purchases of materials, equipment and/or machinery for the construction, reconstruction and improvement of roads and bridges, involving an expenditure in excess of three hundred dollars, shall be by contract in writing. It shall be unlawful for the supervisors to evade the provisions of this section by making two or more contracts for small amounts which should have been in one. If the auditors find there has been any such evasion, they shall refuse to approve the same.

All such contracts and contracts for the construction, reconstruction and improvement of roads and bridges shall be valid only when approved by the Department of Highways of the Commonwealth.

A record of all purchases of material, equipment and/or machinery for road purposes, involving an expenditure of less

than three hundred dollars, shall be kept by the supervisors and furnished to the Department of Highways in the annual report.

Section 803. Bonds for Protection of Labor and Material-Men. It shall be the duty of all townships in the erection, construction or repair of any public work or public improvement of any kind or character, whatever, to require of the contractor or contractors employed in or about said works or improvements, an additional bond, with sufficient surety or sureties, providing for the payment of all labor and material entering into the said works or improvements, and all machinery used on such works or improvements.

The labor and material-men furnishing labor, material and machinery in and for said works or improvements, upon the contract of said contractor, shall have the right, according to law, to sue in an action of assumpsit, in the name of the obligee for his or their use, upon said bond, upon proof of said contractor's failure to pay for said labor, material and machinery.

Section 804. Separate Specifications for Branches of Work. In the preparation of specifications for the erection or alteration of any public building, when the entire cost of such work exceeds one thousand dollars, the architect, engineer, or person preparing such specifications shall prepare separate specifications for the plumbing, heating, ventilating, and electrical work, and the township shall receive separate bids upon each of such branches of work, and award the contract for the same to the lowest responsible bidder.

Section 805. Workmen's Compensation Insurance. All contracts executed by any township, which shall involve the construction or doing of any work involving the employment of labor, shall contain a provision that the contractor shall accept in so far as the work covered by any such contract is concerned, the provisions of the Workmen's Compensation Act of 1915, and any supplements or amendments thereto, and that the said contractor will insure his liability thereunder, or file with the township, with which the contract is made, a certificate of exemption from insurance from the Bureau of Workmen's Compensation of the Department of Labor and Industry.

Every officer of a township who shall sign, on behalf of the said township, any contract requiring in its performance the employment of labor, shall require, before the said contract shall be signed, proof that the said contractor with whom the contract is made shall have accepted the Workmen's Compensation Act of 1915, and any supplements or amendments thereto, and proof that the said contractor has insured his liability thereunder in accordance with the terms of the said act, or that the said contractor has had issued to him a certificate of exemption from insurance from the Bureau of Workmen's Compensation of the Department of Labor and Industry.

Any contract executed in violation of the provisions of this section shall be null and void.

Section 806. Engineers and Architects Not to be Interested in Contracts. It shall be unlawful for any architect or engineer, in the employ of a township and engaged in the preparation of plans, specifications, or estimates, to bid on any public work at any letting of such work in such township.

It shall also be unlawful for the officers of a township, charged with the duty of letting any public work, to award a contract to any such architect or engineer, in the employ of the township.

It shall not be lawful for any architect or engineer, in the employ of a township, to be in any wise interested in any contract for public work in such township, nor receive any remuneration or gratuity from any person interested in such contract.

Any person or persons violating these provisions, or any one of them, shall forfeit his office, and shall be guilty of a misdemeanor, and, on conviction thereof, shall be sentenced to pay a fine not exceeding five hundred dollars, or to undergo imprisonment of not less than six months, or both, in the discretion of the court.

## ARTICLE IX

### TAXATION, FINANCE, ROAD FUND

Section 901. Fiscal. The fiscal year in townships shall commence on the first Monday of January in each year. All receipts, disbursements, contracts and purchases shall be chargeable to and entered as of record in the fiscal year in which made.

**Section 902. Annual Budget.** The board of township supervisors of townships of the second class shall annually, before their organization meeting in January or as soon thereafter as practicable, make a written estimate of the amount of money required for the ensuing year, beginning on the first Monday of January, which shall be filed with the treasurer. Such estimates, for the purpose of aiding the board in determining how much road tax to levy, shall specify—

(a) The amount of money necessary for the maintenance, repair, and improvement of highways, including sluices.

(b) The amount of money necessary for the repair and construction of culverts and bridges.

(c) The amount of money necessary for the purchase, hire, repair, and custody of tools, implements, and machinery.

(d) The amount of money necessary for the payment of debts, or other miscellaneous purposes.

The supervisors may, by resolution, transfer moneys from one fund to another extent except from the fund allocated for the payment of debt.

**Section 903. Temporary Indebtedness.** Whenever the township highway funds have been exhausted, the board of supervisors may borrow on the credit of the township, money in anticipation of taxes to be collected for the current fiscal year, or township reward to be received as shown by agreements issued, and issue a certificate of indebtedness payable on a certain date not exceeding one year from the date of issue, to the end that work may be performed in proper season and in accordance with rules and regulations prescribed.

**Section 904. Sale of Bonds and Securities. Advertisements.** When any township shall borrow money and issue bonds or other securities therefor, except in the case of the giving of notes for temporary loans as may be authorized by law, the authorities thereof shall sell the same to the highest responsible bidder, after public notice by advertisement, once a week for three weeks, in at least one newspaper of general circulation published in the county in which such township shall be situated. No bid for such bonds or securities at less than their par value shall be accepted, but where bonds and securities shall have been heretofore or shall hereafter be advertised for sale as provided in this section, and no bids have been received, then it shall be lawful for such township to sell the same at private sale for not less than par and accrued interest.

**Section 905. General and Special Tax Levies.** The board of township supervisors may, by resolution, levy taxes upon all property and upon all occupations within the township made taxable for township purposes, as ascertained by the last adjusted valuation for county purposes, for the purposes and at the rate hereinafter specified, to wit:

One. An annual road tax, not later than the fourth Monday of March of each year, not exceeding ten mills, unless the board of supervisors by a majority action shall upon due cause shown, petition the court of quarter sessions, in which case the court may, after public notice as the court may direct and hearing, order a greater rate than ten mills, but not exceeding ten additional mills, to be levied. Such annual road tax shall include all levies for road purposes and for the payment of bonds and certificates of indebtedness issued and all other debts incurred for road purposes. Not less than ten per centum of the annual road tax shall be set aside by the respective townships and used for the payment of existing indebtedness incurred for road purposes, for the payment of which indebtedness no provision has been made. All road taxes shall be collected in cash.

Two. A tax for the purpose of building and maintaining a lockup, after obtaining the assent of the electors of the township in the manner provided in this act.

Three. Upon the receipt of a petition of a majority of the owners of real estate of the township requesting it, an annual tax, not exceeding five mills, for the purpose of lighting the streets and highways in the manner provided by the general powers of this act, and of defraying the costs, charges and expenses thereof.

Four. An annual tax so long as necessary, not exceeding fifty per centum of the rate of assessment for road purposes, for the purpose of procuring a lot and erecting a building thereon for a town house, and for the payment of indebtedness incurred in connection therewith; Provided, The total indebtedness for the payment of which any such tax shall be levied shall not exceed one-half of one per centum of the assessed value of real estate in the township.

Five. A tax, not exceeding two mills and not exceeding the amounts hereinafter limited, for the purpose of purchasing

and maintaining fire apparatus and to provide, with the assent of the electors of the township as hereinafter provided, a suitable place for the housing of the same, and to make appropriations to fire companies for the purchase and maintenance of fire apparatus, but the total expenditure for the purchase of fire apparatus by the township, together with the amount of appropriation to one or more fire companies from such taxes, shall not for the first fiscal year, exceed in all the sum of seven thousand, five hundred dollars; nor shall any new fire apparatus be thereafter purchased by the township, or by any fire company from appropriations made by the township, without the consent of the electors as hereinafter provided; nor shall the total expenditure by the township, in any fiscal year, for the purpose of maintenance and operation, together with the appropriations to any one or more fire companies, exceed forty-five hundred dollars.

Whenever the assent of the electors is required as hereinbefore provided, the same shall be expressed at an election to be held at the place, time, and under the same regulations as provided by law for the holding of municipal elections. At such election, the election officers shall receive ballots from the electors, which shall be prepared in the manner prescribed by the general election law. In receiving and counting and in making return of the votes cast, the election officers shall be governed by the laws regulating municipal elections, and the returns shall be computed by the court as now provided by law for municipal elections.

The taxes authorized to be levied by this section shall be levied upon the last adjusted valuation for county purposes, which valuation shall be furnished to the township supervisors by the county commissioners. If any further adjustment of valuation is made by the county commissioners, after any tax is so levied and before said tax is payable, such adjusted valuation shall be certified to the township supervisors, and to the township collector of taxes by the commissioners, and the tax shall be collected on the basis of such adjusted valuation.

This article does not include the levy of any taxes upon particular districts, or parts of any township, for particular purposes.

**Section 906. Tax Rate to be Expressed in Dollars and Cents.** Whenever the supervisors of any township shall, by resolution fix the rate of taxation for any year at a mill rate such resolution shall also include a statement expressing the rate of taxation in dollars and cents on each one hundred dollars of assessed valuation of taxable property.

**Section 907. Special Levies Ordered by Court to Pay Debts.** In addition to the levies hereinbefore provided for, when it is shown to the court of quarter sessions that the debts due by any township exceed the amount which the supervisors may collect in any year by taxation, the court, after ascertaining the amount of indebtedness of any such township, may by a writ of mandamus direct the township supervisors, by special taxation, to collect an amount sufficient to pay the same. If the amount of such indebtedness is so large as to render it inadvisable to collect the same in any one year, taking into consideration other necessary taxation, the court may direct the same to be levied and collected by annual instalments, and may order such special taxes to be levied and collected during such successive years as may be required for payment of the same.

**Section 908. Duplicates. Abatements and Penalties.** The township supervisors shall make or cause a duplicate to be made designating the amount of road tax levied against each taxpayer of the township, and also duplicates for all other taxes levied and assessed under the provisions of this act, and shall deliver the same on or before the first day of May of each year to the township collector, together with a warrant for the collection of the same, which taxes shall be collected as follows: Namely—To all taxpayers who pay their taxes to the collector before June first of each year, an abatement of five per centum shall be made. All road taxes paid to the collector between June first and October first of each year shall be paid in full and to all road taxes remaining unpaid on the first of October, in each year, the collector shall add five per centum as penalty for such delinquency, and shall collect said penalty in addition to the tax levied.

**Section 909. Public Notice of Issuing Duplicate.** Where any duplicate of taxes assessed is issued and delivered to the collector of taxes he shall give public notice, as soon thereafter as conveniently can be done, by at least ten written or printed notices, to be posted in as many public places in different

parts of the township. Such notice shall state that the duplicate has been issued and delivered to him.

Section 910. Tax Notices. Each tax collector of the several townships within thirty days after receiving the tax duplicate shall notify every taxable whose name shall appear on such duplicate. Such notice shall contain the rate of taxation, the valuation of the property of such taxable, the occupation valuation of such taxable, and the full amount of taxes for which said taxable shall be liable for the current year. Such notice shall further state that such taxes are payable, shall designate a place and time when they shall be paid; and shall further state the time within which an abatement of tax will be allowed, when full amount of tax will be collected, and when an additional percentage will be added as a penalty. Such notice shall be mailed to the last known post office address of each of said taxables.

Section 911. Compensation of Tax Collector. The compensation of the tax collector shall be two per centum on all road and other taxes collected during the period a discount is allowed, and five per centum on all such taxes collected thereafter.

Section 912. Accounts, Statements and Settlements of Tax Collector. The tax collector shall keep correct accounts of all moneys collected, marking "paid" on his duplicate at the name of each taxable, with the amount of tax and the date on which paid. The collector shall, on the first day of each month, make a true statement in writing, to the secretary of the board of supervisors, of all taxes collected during the previous month, giving names of taxables, and amount collected from each, and the total amount received. The collector shall pay over on the first day of each month, to the treasurer, all moneys collected during the previous month, and take his receipt for same. A complete settlement of all taxes for each year shall be made by the collector of taxes with the treasurer not later than the first day of July of the year succeeding the one in which the taxes are levied. In the settlement of such taxes, the tax collector shall be allowed a credit for all unpaid taxes which have been returned or for which liens have been filed as provided by law. Unless such settlement is made, the tax collector shall not be entitled to the duplicate for any succeeding year during his term, and the supervisors shall appoint a tax collector in his stead to collect such taxes. Any tax collector who neglects, or refuses to comply with the provisions of this section shall be guilty of a misdemeanor, and, upon conviction, shall be sentenced to pay a fine of not less than one hundred dollars, or be imprisoned for a term not exceeding one year, or both.

Section 913. Compensation of Tax Collector Paid by Order. Expenses. The compensation due a tax collector for taxes collected and paid over to the treasurer shall be paid on order drawn by the board of supervisors, and said collector shall be paid, in the same manner, such actual printing and postage expenses as shall be incurred by him in performing his duties. The amount of such expenses shall be adjusted by the boards of supervisors.

Section 914. Exonerations. The supervisors shall at all times make abatements or exonerations for uncollectible occupation taxes, mistakes, indigent persons, unseated lands, et cetera, as to them shall appear just and reasonable. The township secretary shall enter in a book or books, to be kept for that purpose, the names of all persons abated or exonerated, together with the reason why the amount of the tax, and date when made, and give to the collector a certificate, directed to the treasurer, stating the nature of the tax and the amount exonerated, in order to make settlement accordingly.

Section 915. Auditors to Settle Tax Accounts. The accounts of the collector of taxes shall be settled by the township auditors. The tax collector shall state a separate account for each different tax collected by him.

#### ARTICLE X

#### EMINENT DOMAIN; ASSESSMENT OF DAMAGES AND BENEFITS

##### (a) General Provisions Relating to Eminent Domain

Section 1001. Scope of Article. Whenever under the provisions of this act, the right of eminent domain and/or the ascertainment and assessment of damages and benefits in viewer proceedings is provided for and vested in a township, the proceeding shall be as set forth in this article.

Section 1002. Restrictions as to Certain Property. In addition to the restrictions made by other provisions of this act in

particular cases, no township shall exercise right of eminent domain as against land now occupied by any building which was used during the Colonial or Revolutionary period as a place of Assembly by the Council of the Colony of Pennsylvania, the Supreme Executive Council of the Commonwealth of Pennsylvania, or the Congress of the United States; or as against the land occupied by any fort, redoubt, or blockhouse, erected during the Colonial or Revolutionary period, or any building used as headquarters by the Commander-in-Chief of the Continental Army; or as against the site of any building, fort, redoubt, blockhouse, or headquarters, which are preserved for their historic associations and not for private profit. The Colonial and Revolutionary period shall be taken as ended on the third day of September, one thousand seven hundred and eighty-three.

Section 1003. Possession of Property Upon Tender of Bond. Whenever, in any condemnation proceedings, any township has tendered a bond to secure the payment of damages, and the same has been accepted, or, if the acceptance has been refused and the bond has been filed in, and approved by the court, the township shall have the right to immediate possession of the property.

Section 1004. Notice to Quit; Possession; Procedure. If the owner, lessee, or occupier shall refuse to remove his personal property or give up possession, the township may serve written notice upon such owner, lessee, or his agent, or the occupier to remove his personal property and give up possession of such property, within sixty days from the date of the service of such notice.

If the owner, lessee, or occupier shall refuse to remove his personal property and give possession, upon proof of the service of the notice, a writ of habere facias possessionem shall forthwith issue, directing the sheriff to give to the township possession.

Section 1005. Bond of Township Without Surety Sufficient. Whenever any court shall order any township to enter security for the payment of damages for the taking, injury, or destruction of land, property or materials by right of eminent domain, the bond of the township shall be taken without sureties.

Section 1006. Value of Land Not to be Assessed as Benefits: Exception. In all cases of the appropriation of land for public use, other than for roads or streets, it shall not be lawful to assess any portion of the damage done to or value of the land so appropriated, against the other property adjoining or in the vicinity of the land so appropriated.

Section 1007. Viewers' Report. Viewers or juries of view appointed by any court to assess damages and benefits, due to the taking, injury or destruction of private property in and by the construction or enlargement of any public work, highway, or improvement, shall make their reports within a time which the court shall fix when appointing them, but, if any of the viewers or juries of view shall, for any reason appearing sufficient to the court, be unable to file its report within the period so fixed, the court may, either before or after the expiration of the time fixed, extend the time for the filing of such report.

Section 1008. Plans of Properties Condemned to be Furnished to Viewers. In all proceedings to assess damages for the taking, injury or destruction of private property for public use, the township taking, injuring, or destroying property for said purpose, shall furnish the board of viewers with a correct plan of all properties affected, showing all buildings or other structures thereon, their width, length, elevation, and cubical contents, names of all owners, tenants, or occupiers thereof, the topography of the land, and the grades and widths of all highways running through or abutting on said properties, and all other data necessary for a proper determination of the amount of damages caused by the taking, injuring or destruction of said private property.

Said plans shall be prepared and ready for the use of the viewers at their first meeting, and copies thereof shall be furnished to all owners, tenants, and occupiers of the property and all other parties affected thereby, without charge.

Section 1009. Condemnation Petition to Specify Liens; Exception. In all proceedings instituted for the condemnation and appropriation of land and property by the exercise of the right of eminent domain, excepting proceedings to ascertain damages and benefits by reason of township street or sewer improvements, the petition for the appointment of viewers therein shall contain allegations specifying any judgments mortgages or other claims (hereinafter designated "liens")

which are liens upon the land and property sought to be appropriated or condemned as aforesaid.

Section 1010. Findings of Facts as to Liens. Testimony shall be taken in said proceedings to ascertain the amounts of said liens and the dates of the entry of the same, and the amounts of said liens and the dates of entry thereof shall be found as facts by the viewers in said proceedings. Certified lists of liens, from the courts of the Commonwealth and the United States, shall be prima facie evidence of the existence, dates, amounts, dates of entry and places of record, of said liens, and, unless modified or overcome by oral or documentary evidence, shall be conclusive upon the parties thereto as to items just specified.

Section 1011. Reports of Viewers as to Liens; Appeals; Distribution to Lien Creditors; Discharge of Liens. Where it appears that liens exist as aforesaid, which are liens upon property sought to be condemned and appropriated as aforesaid, a report of the facts found as aforesaid shall be made to the court having jurisdiction of the proceeding, which report shall be subject to exceptions in manner to be regulated by the Supreme Court, by general rule prescribed, amended, and published from time to time, and, upon the findings in relation to said liens being finally found by said court having jurisdiction of said proceedings, said court shall make an order directing the payment and distribution of the amount found to be payable as compensation to the parties entitled thereto, first to the owners of said liens, then to the owners of the property appropriated as aforesaid: Provided, however, That the parties interested shall have the right of appeal from said order of distribution to the Superior or Supreme Courts of the Commonwealth as shall be determined by the amount distributed to said parties respectively, in manner now provided by law. Payment in accordance with said order of distribution shall absolutely discharge the party making said payment from all claims of whatsoever nature by any person, firm, corporation, or claimant, as against said property, when the payment thereof shall be evidenced by a receipt of record in said proceedings; and in said receipt and on the record thereof, any claimant may reserve the right to pursue the owner of said property for any balance due upon his lien against any other property or assets of the said owner.

Section 1012. Vesting Title. Upon payment of the compensation for land or property appropriated as aforesaid, in accordance with said order of distribution, title to the land or property appropriated shall vest in the taker thereof in accordance with provisions of the law under which such appropriation is made, and all claims for compensation shall be deemed paid and satisfied as herein provided.

Section 1013. Competency of Evidence as to Market Value of Property. In all proceedings arising from the exercise of the right of eminent domain, it shall be competent for all witnesses called, when duly qualified, to state their opinion as to the market value of the property before the exercise of the right of eminent domain and as unaffected by it, and its market value immediately after the exercise of the right of eminent domain and as affected thereby:

(a) To state, in detail and costs, all the elements of benefit or damage which they have taken into consideration in arriving at their opinion;

(b) In arriving at their opinion as to the market value immediately after the exercise of the right of eminent domain, to add to their opinion of the market value before such exercise, the cost or value of all the elements of benefit or advantage, and to deduct therefrom all disadvantage or damage in order to arrive at the market value after such exercise of the right of eminent domain and as affected thereby;

(c) In all proceedings to assess damages or benefits for the opening of any street, alley, or other highway, to take into consideration, as one of the elements of advantage or disadvantage, the cost of street improvement.

In all claims for damages against a township, arising from the exercise of the right of eminent domain, it shall be competent for the party or parties claiming damages to offer in evidence, as a declaration against interest, the value of the property affected as assessed for the purpose of taxation.

Section 1014. Proceedings Where Assessments by Viewers Waived. In any proceeding to ascertain the damage caused to any owner of lands, by reason of the appropriation of a right of way or easement by any township, where the owner and township cannot agree upon the amount of damage done, the parties may by agreement, waive the right to have such damages assessed, and the owner may file his claim in the

court of common pleas of the county, and rule the defendant to plead thereto within fifteen days from the service of such rule upon the township, and the suit shall be proceeded with as if an award of viewers had been filed and an appeal had been taken therefrom.

Either party to such an action may on motion have the jury visit and view the premises over or through which the proposed right of way or easement may extend.

Section 1015. Appeals in Eminent Domain Proceedings; Payment of Money Into Court. In all cases of damages assessed against any township for property taken, injured, or destroyed by the construction or enlargement of their works, highways, or improvements, whether such assessment shall have been made by viewers, or otherwise than upon trial in court, and an appeal is not provided for, an appeal may be taken by either party to the court of common pleas of the county within thirty days from the filing of the report.

Any such appeal taken shall be signed by the party taking the same or by his agent or attorney, and shall be accompanied by an affidavit of the party appellant, or of the agent or attorney, that the same is not for the purpose of delay, but because the affiant firmly believes that injustice has been done.

When no such appeal is taken and judgment is entered, and the party to whom damages have been awarded refuses to accept payment of such award or judgment, then it shall be lawful for such township, upon petition to the court after notice as ordered by court, to pay the amount of the award and costs into the court. The court, upon such payment, shall order the satisfaction of the award or judgment.

(b) Procedure for the Exercise of Eminent Domain and for the Assessment of Damages and Benefits

Section 1020. Petition for Viewers; Time of Meeting. Except as is in this act otherwise provided, in case the compensation for damages or benefits accruing from the exercise of the right of eminent domain and/or from the erection and construction of public improvements have not been agreed upon, the court of common pleas, or any law judge thereof in vacation, on application thereto by petition by the township or any person interested, shall appoint three viewers from the board of viewers of the county, and appoint a time, not less than twenty nor more than thirty days thereafter, when the viewers shall meet upon the line of the improvement and view the same and the premises affected thereby.

Section 1021. When Viewers May be Appointed. The viewers provided for in the preceding section may be appointed before or after the entry, appropriation, or injury of any property or materials for constructing such improvements.

Section 1022. Notice of Meeting of Viewers. Except when otherwise in this act provided, the viewers shall give at least ten days' notice of the time of their first meeting, by publication in one or more newspapers of the county, and by hand-bills posted upon the premises, or otherwise as the court shall direct.

Section 1023. Swearing Viewers; Hearings; Schedules of Damages and Benefits. The viewers, having been sworn or affirmed faithfully, justly, and impartially to decide and a true report to make concerning all matters to be submitted to them and in relation to which they are authorized to inquire, and having viewed the premises and examined the property, shall hear all parties interested and their witnesses and shall determine the damages for property taken, injured, or destroyed, if any, and to whom the same is payable; and, having determined the damages, together with the benefits, they shall prepare a schedule thereof.

Section 1024. Assessment of Damages and Benefits. The damages may be paid in whole or in part by the township, or may be assessed in whole or in part upon the property benefited. In the latter case, the viewers, having first determined the damages apart from the benefits, shall assess the total cost of the improvement, or so much thereof as may be just and reasonable, upon the properties peculiarly benefited, including in the assessment all parties for which damages have been allowed and shall report the same to the court. The total assessments for benefits shall not exceed the total damages awarded or agreed upon.

Section 1025. Assessment Awards. In proceedings to assess damages and benefits, if the property is both benefited and damaged by such improvements, the excess of damages over benefits, or the excess of benefits over damages, or nothing in case the benefits and damages are equal, shall be awarded

to or assessed against the several owners of property affected thereby.

Section 1026. *Separate Reports of Damages and Benefits.* The preceding section shall not prevent the viewers from making a separate report of the damages and benefits, respectively. In such event, if the damages to the property of any person be greater than the benefits, or if the benefits be greater than the damages, or if the damages and benefits be equal, in either case the viewers shall strike a balance and carry the difference forward to another column, so that the assessment shall show what amount is to be received or paid by the property owner and the difference only shall be collectible of or paid to such property owner. Appeals taken from the report of the board of viewers shall be from such net amount only.

Section 1027. *Notice When Schedules Will be Exhibited.* The viewers shall give notice to all parties to whom damages are allowed, or upon whom assessments for benefits are made, of a time not less than ten days thereafter, and of place where the viewers will meet and exhibit their schedule and hear all exceptions thereto.

Section 1028. *Service of Notices.* Such notice shall be given, in the manner provided by law for the service of a summons in a personal action, if the parties can be found in the township; or upon an adult person residing upon the property affected by the assessment, in case the owner or reputed owner cannot be found; and to all others by publication in the newspaper or newspapers in which the first notices of the view were published, and by posting conspicuously on the premises. The board of supervisors may by resolution provide by whom the notice shall be served and posted and fix the compensation for such service.

Section 1029. *Report of Viewers; Plan of Improvements.* After making whatever changes are necessary, the viewers or a majority thereof shall report to the court, showing the damages and/or benefits allowed and assessed in each case, and file therewith a plan to be prepared or secured by the viewers, showing the improvement, the properties taken, injured or destroyed, and properties benefited.

Section 1030. *Notice of Filing of Report.* When the report is filed, notice thereof shall immediately be given, by publication once in the newspapers publishing the notice provided for in this article. Such notice shall state the date of filing of the report, contain a schedule of the damages allowed and benefits assessed, and shall state that, unless exceptions be filed thereto or an appeal to the court of common pleas is taken therefrom within thirty days from the date of filing, the report will be confirmed absolutely.

Section 1031. *Township to Pay Costs of Proceedings.* The cost of the proceedings, including court costs, except the compensation of the viewers, shall be paid by the township.

Section 1032. *Bond of Township.* Except when in this act otherwise provided, in all cases where the parties have not agreed upon the damages claimed, or where, by reason of the absence or legal incapacity of the owner, no such agreement can be made, the township may tender sufficient security to the party entitled to damages or to the attorney or agent of any person absent, or to the agent or officer of a corporation, or to the guardian or committee of any one under legal incapacity.

Section 1033. *Condition of Bond; Notice of Filing in Court.* The condition of the security shall be that the township shall pay or cause to be paid such amount of damages as the party shall be entitled to receive, after the same shall have been agreed upon by the parties or assessed in the manner provided for by this article. In case the party claiming damages refuses to accept the security tendered, the township shall give the party or his agent, attorney, guardian, or committee, a written notice of the time when the same will be presented in court.

Section 1034. *Filing Bond; Recovery Thereon.* If approved by the court, the security shall be filed for the benefit of those interested, and recovery may be had thereon for the amount of damages assessed. If the damages be not paid, they may be collected by execution on the judgment in the issue framed to try the question. Upon the approval of the security, the township may proceed with the improvement.

Section 1035. *Exceptions to Report of Viewers.* Within thirty days after the filing of any report, any party interested may file exceptions to the same; and the court shall confirm,

modify, or change the same, or change the assessments made therein or refer it back to the same or new viewers.

Section 1036. *Confirmation of Report of Viewers.* When the report is filed, the prothonotary shall mark it confirmed nisi. In case no exceptions are filed thereto, he shall enter a decree that the report is confirmed absolutely.

Section 1037. *Effect of Exceptions on Confirmation of Report.* When exceptions are filed which affect the entire report, the same shall not be confirmed absolutely as to any part thereof until the exceptions have been finally disposed of; when the exceptions do not affect the entire report, the court shall confirm the assessments to which exceptions have not been taken.

Section 1038. *Appeals from Confirmations After Exceptions.* Within three months after the confirmation of any report, following the filing of exceptions thereto, any party interested may appeal from the decree of the court below to the Superior or Supreme Court, as the case may be.

Section 1039. *Effect of Appeals.* When any appeal is taken from the action of the court confirming any viewers' report or part thereof, if the appeal affects the entire report, it shall have the effect of suspending the absolute confirmation thereof until the appeal is finally disposed of; but where the appeal is to matters which do not affect the entire report, or any other assessment, such appeal shall affect only the particular assessment for which the appeal is taken.

Section 1040. *Filing Assignments of Error, Et Cetera.* In order to determine whether any appeal affects the entire report, or any particular assessment, the appellant shall file in the court below, before or at the time of filing his writ of certiorari, a copy of his specifications or assignments of error or grounds of appeal. Upon failure so to do the township or any party interested may, by notice or rule upon the appellant cause such specifications, assignments of error, or grounds of appeal to be filed.

Section 1041. *Certificate of Judge of the Court Below.* Upon the request of the township, or any party interested, the court below, or any judge thereof in vacation, shall certify whether the appeal affects the entire report, and said certificate shall be conclusive. Where the court or judge certifies that the appeal will affect the entire report, no further proceedings shall be taken in the court below until after the final action of the appellate court; but where the court or judge certifies that the appeal will affect only a particular assessment, then the confirmation of all other assessments shall be final.

Section 1042. *Effect of Affirmation of Decree of Court Below.* If, on any appeal, the action of the court below is affirmed, the date of the decree or judgment of the appellate court shall be taken as the day on which the report was finally confirmed.

Section 1043. *Consolidation of Appeals.* Where any appeal is taken to the Supreme Court, and an appeal is also taken to the Superior Court, and the appeals in both cases are substantially the same, the Superior Court may certify such appeal to the Supreme Court to be heard with the other appeals from the same report.

The Supreme Court shall consolidate all such appeals and hear them as one case. Where several appeals are taken from the confirmation of the same report, either to the Superior or Supreme Court, and the grounds of the appeal are similar, the appellate court may consolidate the appeals.

Section 1044. *Appellants May Unite in Appeals; Effect Thereof.* Several parties may unite in a single appeal, either to the Superior or Supreme Court, where the grounds of appeal are similar, but the uniting of the appellants shall not unite the amounts or change the jurisdiction. When the appeal, if taken by each appellant singly, would be to the Superior Court, then the appeal shall be to that court; but, if the appeal of any one appellant would be to the Supreme Court, then the joint appeal shall be to that court. If an appeal has been taken to the Supreme Court, any other party, without regard to the amount involved, if the grounds of appeal are similar, may appeal to the same court and join in such appeal.

Section 1045. *Appeals From Reports of Viewers for Jury Trial.* Within thirty days after any report of viewers is filed in court, any party whose property is taken, injured, or destroyed, or who is assessed benefits, may appeal to the court of common pleas and demand a trial by jury. Where an appeal is so taken as to a portion of the report, the portion not appealed from shall be confirmed absolutely, at the expiration of thirty days after the report is filed in court.

Section 1046. Reasons for Appeals to be Stated. The appeal, as provided in the last preceding section, shall state the grounds upon which it is taken, and shall be signed by the appellant, or by his agent or attorney; and shall be accompanied by an affidavit that it is not taken for the purpose of delay but because the appellant believes that injustice has been done.

Section 1047. Costs. Upon the trial of any such appeal, in case the party appellant does not obtain a verdict more favorable than was the report of the viewers as finally confirmed, the appellant shall not recover any costs.

Section 1048. Notices. Appeals from the Court Below. The court of common pleas shall order what notices shall be given in connection with such proceedings, and may, by rule or otherwise, prescribe the form of pleadings. After verdict and final judgment, either party may, within three months, appeal to the Superior or Supreme Court.

Section 1049. Appeals to the Wrong Court. Should any appeal under this article be made to the wrong court, such court shall certify the appeal to the court to which it should have been taken.

Section 1050. Appeals Not to Prevent Filing Liens. No appeal taken under this article shall prevent the filing of liens by any township for any assessment made by any such report, but upon the final termination of the issue, the court shall make such order as to the lien filed as shall appear right and proper.

Section 1051. Discontinuance of Proceedings. If any township shall repeal any resolution, or discontinue any proceeding, providing for any improvements prior to the entry upon, taking, or injury to any property or materials, the township shall not be liable to pay any damages which have been assessed, but all costs upon any such proceeding shall be paid by the township, together with any actual damage sustained by reason of such proceeding.

Section 1052. Assessments to Bear Interest. All assessments for benefits, costs, and expenses shall bear interest at the expiration of thirty days after they shall have been finally ascertained, and shall be payable to the treasurer of the township.

Section 1053. Damages to Bear Interest. The amount of damages allowed in a report of viewers for the taking, injury or destruction of property by the exercise of the right of eminent domain shall, as finally confirmed, bear interest at the rate of six per centum per annum from the date of the confirmation nisi of the report.

## ARTICLE XI

### ROADS, STREETS AND HIGHWAYS

#### (a) Laying Out Roads Under the General Road Law

Section 1101. Except as otherwise in this act provided, or except as otherwise provided by local or special legislation, all roads wholly within or partly within townships, shall be laid out, widened, changed, or vacated by the courts of quarter sessions, as heretofore, in the manner provided by the general road law and the amendments, additions, and supplements thereto. All damages and benefits occasioned by such laying out and the subsequent opening thereof, or by any such widening, changing, or vacation, shall be assessed, collected, and paid in the manner provided by the general road law and the amendments, additions, and supplements thereto.

#### (b) Certain Roads Declared to be Public Roads

Section 1105. Every road not of record which has been used for public travel and maintained and kept in repair by the expenditure of township funds for a period of twenty-one years and upwards shall be deemed to be a public road of the width of thirty-three feet, notwithstanding the fact that there is no public record of the laying out of such road or a dedication thereof for public use. In all such cases the lawful laying out and opening or dedication of such roads of the width hereinbefore specified shall be conclusively presumed.

#### (c) Opening and Repairing Roads, Detours, Etc.

Section 1110. Opening, Repairing and Closing Roads. Public roads or highways in townships, shall, as soon as may be practicable, be effectually opened and constantly kept in repair. All public roads or highways shall at all seasons be kept reasonably clear of all impediments to easy and convenient traveling at the expense of the township.

The supervisors of any township may temporarily close any township road, when in their opinion excessive or unusual conditions have rendered such road unfit or unsafe for travel, and immediate repair, because of the time of year or other conditions, is impracticable. The road or portion of road so closed shall be properly marked at its extremities and a means of passage for the customary users of such road shall whenever possible be provided.

Any one using such road or portion thereof after the same has been properly closed and marked, without a permit from the supervisors, shall be subject to a penalty of not more than one hundred dollars to be recovered in a summary proceeding, and penalties so recovered shall be payable to the treasurer of the township wherein the offense was committed to be expended in the repair of the roads of the township.

Section 1111. Time Within Which Roads to be Opened. Whenever proceedings have been heretofore or may, hereafter be begun in any court of quarter sessions for the opening and laying out of any public road in any township, such public road shall be physically opened upon the ground for use by the public within the period of five years next after the entry of the final decree confirming said road and not thereafter.

In the event that the proceeding for the opening and laying out of a public road referred to in this section shall have been completed, and a final decree confirming said road shall have been made, and such proposed road shall not have been physically opened upon the ground and shall have remained unopened to public use for a continuous period of five years next after the entry of the final decree confirming said road, then such proceedings shall be deemed to be void and of no effect, and the land proposed to be taken shall revert to the owners of the land, as in the case of the vacation of a public road free of any easement or right of the public to use the same.

Section 1112. Detours. Except in the case of emergencies wherein the safety of the public would be endangered, no public road or highway in any township shall be closed to vehicular traffic, except upon order of the authorities having charge of the maintenance of such highways, nor for a longer period than is necessary for the purpose for which such order is issued: Provided, however, That no public road or highway shall be closed to vehicular traffic when the same has been designated as a detour by the State Department of Highways, unless the written consent of the State Department of Highways has first been obtained, or unless the authorities having jurisdiction over said road or highway shall, by resolution duly recorded on their minutes, declare such closing necessary for the protection of the public safety.

When any public road or highway shall be closed, as hereinbefore provided, it shall be the duty of the supervisors authorizing the closing to immediately designate or lay out a detour, on which they shall erect or cause to be erected and maintained while such detour is in use legible signs at each public road intersection throughout its entire length, indicating the direction to the main highway. During the period when such detour is in use, it shall be the duty of the authorities closing the main highway to maintain such detour in safe and passable condition. It shall also be the duty of the authorities closing the main highway and maintaining the detour to immediately remove all detour signs when the highway originally closed is opened for traffic. Said supervisors shall, as soon as possible, repair the road designated as a detour, and place same in a condition at least equal to its condition when designated as a detour. Whenever necessary in the creation of a detour, as aforesaid, the authorities responsible for laying out the detour may enter into agreement with the owners of private lands, covering the acquisition of right-of-way privileges over private property for the period when the main highway shall be closed to traffic. In the exercise of the rights conferred by this section, the authorities responsible are hereby empowered to pay for the necessary maintenance, subsequent repair, and land rental, out of such funds as are available for the construction and/or maintenance of the highways in their charge.

Any person who shall wilfully remove, deface, destroy or disregard any barricade, light, danger sign, detour sign, or warning of any other character whatsoever, erected or placed under authority of this section, or who shall drive on, over or across any highway which has been closed by proper authority, shall, upon conviction thereof in a summary proceeding before a magistrate, alderman or justice of the peace, be sentenced to pay a fine of not less than twenty-five dollars nor

more than one hundred dollars, and the costs of prosecution, and, in default of the payment thereof, shall be imprisoned one day for each dollar of fine and costs unpaid: Provided, however, That persons who have no outlet due to the closing of a highway may drive on, over or across such highway, with the consent in writing of, and subject to such conditions as may be prescribed by, the authorities responsible for the closing or their agents or contractors, without being subject to the penalties imposed by this section.

In addition to the penalties herein provided, the authorities responsible for the maintenance of a highway which has been closed to vehicular traffic, or their agents or contractors, may, in an action at law, recover damages from any person or persons who have damaged a highway by driving on, over or across same when it is closed to vehicular traffic in accordance with the provisions of this act.

All fines collected under the provisions of this section shall be paid by the officer receiving the same to the treasurer of the township in which the offense was committed.

(d) Changing, Vacating or Altering Roads by Agreement With Property Owners

Section 1115. Whenever the supervisors of any township deem it advisable to construct, change, or alter any part of any public road under their supervision, within this Commonwealth, or to vacate any abandoned portion of a State highway not vacated by the Department of Highways, and can agree with the property owners affected by such change, alteration or vacation, they may change, alter or vacate such part of such public road, as contemplated in such agreement, without the formality of a view.

No such change or alteration of any part of any public road shall be made, the costs and expenses of which, including damages to such township, shall exceed five hundred dollars. A petition setting forth the facts regarding such change, alteration or vacation, accompanied by a map or draft of the same shall be presented to the court of quarter sessions for approval before such actual change, alteration or vacation is made; whereupon the new location, approved by the court, shall be vacated, or the abandoned State highway shall be vacated as taken to be the public road and the old location shall be the case may be.

(e) Elimination of Curves

Section 1120. Any township may acquire, by purchase or by the right of eminent domain, any such property and lands situate along or adjacent to any township highway, as, in the opinion of the supervisors of such township, may be necessary to eliminate dangerous curves and widen narrow roads or highways for the better protection and safety to the traveling public.

Upon any such purchase or condemnation the supervisors may, from time to time, abate or remove or cause to be abated or removed, any such dangerous curve or curves, or widen such narrow highway to the extent of the property and land so acquired.

The proceedings for the condemnation of such property and lands under the provisions of this section, and for the assessment of damages for property taken, injured, or destroyed, shall be taken in the manner provided by this act for the condemnation of land by townships.

This section shall not be construed to repeal any acts or parts of acts providing a method of procedure for the widening of township roads.

(f) Acquisition of Unobstructed Views at Curves and Intersections

Section 1125. Any township, may acquire, by purchase or by the right of eminent domain, a free and unobstructed view down and across such lands located at or near the intersection of any two highways or a highway and a railroad or railway, or at any curve in any highway, as may be necessary to assure a free and unobstructed view in all directions at such crossings, and to so prevent the use of such lands for any purpose or in any manner which may interfere with or obstruct the vision of any person or persons traveling upon any such highway.

Upon any such condemnation, the township, having had such view condemned, may, from time to time, abate or remove, or cause to be abated or removed, any obstruction to such view over and across such lands.

The proceedings for the condemnation of such view over and across such lands under the provisions of this act, and for the assessment of damage for property taken, injured or destroyed, shall be taken in the manner provided in this act.

Upon the condemnation of a view over and across any such lands, the owner of such lands may make every such use thereof as will not interfere with a free and unobstructed view at such dangerous crossing or curve, and, unless specially provided for in such condemnation proceedings, such condemnation shall not be construed to prevent the owner thereof from using such land for pasture or the growing of grass, oats, wheat, or other crops which will not obstruct the vision more than wheat.

(g) Relocation, Alteration and Vacation of Roads in or Near State Parks

Section 1130. Agreements to Relocate, Alter and Vacate Roads. Whenever a public road or highway within a park or public grounds, title to which park or public grounds is vested in the State of Pennsylvania, is laid out, located, relocated, altered, or vacated, in such manner that a public road or highway, approaching, leading into, or contiguous to such park or public grounds, shall become either useless, inconvenient, or burdensome, such public road or highway, approaching, leading into, or contiguous to such park or public grounds, may be altered, relocated, or vacated, by the township supervisors charged with the duty of maintaining such roads, or highways, in whole or in part, for the purpose of making it convenient and suitable as an approach to the roads and highways within said park or public grounds, upon the consent and agreement of: (a) the commissioners or officials charged with the care and management of said park or public grounds; (b) the township supervisors charged with the duty of maintaining said roads or highways, approaching, leading into, or contiguous to said park or public grounds; and (c) the property owners owning the majority of the frontage of land abutting upon the relocated portion of the roads or highways, approaching, leading into, or contiguous to said park or public grounds.

Section 1131. Agreement to be Filed in Court. Effect of Filing. The filing of the consent and agreement of commissioners or officials charged with the care and management of such park or public grounds, the township supervisors, and of the property owners, in the court of quarter sessions of the county or counties in which the altered, relocated, or vacated road or highway is situate, shall have the same force and effect as the filing and the approval and absolute confirmation by the court of quarter sessions of a report of viewers appointed in accordance with the general road law, and shall have the same force and effect as though said viewers had laid out, located, relocated, altered or vacated such road or highway in accordance with the agreement filed as aforesaid, and the report of said viewers had been filed, approved and absolutely confirmed by the court.

The filing of said agreement in the court of quarter sessions shall be conclusive as to the question of the necessity for the laying out, location, relocation, alteration, or vacation of said roads, or highways, as contained in the said agreement, and that the portion or portions of said road or highway abandoned or vacated where useless, inconvenient, and burdensome.

Section 1132. Altered and Relocated Roads Declared Township Roads. Such road or highway, when altered or relocated, shall be maintained and repaired in the same manner as other township roads are maintained and repaired.

Section 1133. Assessment of Damages. The owner of any land through which any public road or highway may be so relocated, may apply by petition to the court of quarter sessions of the proper county, setting forth the injury which he or she may have sustained by reason of the relocation of the said public road or highway, and the proceedings relative to the assessment and payment of damages of said land-owner shall be in accordance with the provisions of this act for eminent domain proceedings.

(h) Grading, Paving, or Macadamizing Streets or Highways Upon Petition of Property Owners

Section 1135. Petition of Property Owners. Any township may grade, pave, or macadamize, with brick, stone or other suitable materials any public street or highway or part thereof (not less than one thousand feet) laid out and opened in the township. No street or highway or any part thereof shall be graded, paved, or macadamized under the provisions of this section, except upon the petitions of owners of property repre-

enting a majority in number of feet front of the properties abutting on the street or highway or part thereof proposed to be paved nor unless there shall be at least ten separate improved dwellings or places of business in each one thousand feet of highway to be so improved.

Section 1136. Assessment of Cost by Foot Front Rule. The cost and expense of any such improvement may be collected from the owners of the real estate abutting on such street or highway or part thereof, by an equal assessment on the feet front. Such assessment shall be estimated by the person in charge of the work or by other competent authority designated by the township supervisors.

Section 1137. Collection of Assessments. All such assessments for grading, paving, or macadamizing shall be filed with the secretary of the board of supervisors. The secretary shall give thirty days' written or printed notice that the assessments are due and payable to each party assessed, either by service on the owner or agent or left on the assessed premises. If the assessments, or any of them, remain unpaid at the expiration of said thirty days, they shall be placed in the hands of the township solicitor for collection. The solicitor shall collect the same, together with five per centum additional as attorney's commission and interest from the completion of the improvement, by a municipal claim filed against the delinquent owner in like manner as municipal claims are now collected. When an owner has two or more lots against which there is an assessment for the same improvements, all such lots shall be embraced in one claim.

Section 1138. Owner Defined. The term "owner" as used in sub-division (h) of this act, means all individuals, corporations, public or private, copartnerships, and associations, having any title or interest in the property assessed. If the owner to whom notice is required to be given is a non-resident of the township, and his, her, or their place of residence is unknown, or if the ownership of the property cannot be ascertained, the notice shall be posted on the premises and a copy left with the occupant, if there be one.

#### (i) Dedicated Roads, Streets and Drainage Facilities

Section 1140. Plans of Dedicated Roads and Streets. No person shall construct, open, or dedicate any road, street, lane or alley or any drainage facilities in connection therewith, for public use or travel in any township, without first submitting plans thereof to the township supervisors for their approval. Such plans shall be prepared in duplicate in accordance with such rules and regulations as may be prescribed by the supervisors, and shall show the profiles of such roads, streets, lanes or alleys, the course, structure, and capacity of any drainage facilities, and the method of drainage of the adjacent or contiguous territory, and also any other or further details that may be required under the rules or regulations adopted by the township supervisors. Before acting upon any such plans, the supervisors may, in their discretion, arrange for a public hearing, after giving such notice as they may deem desirable in each case. The township supervisors are authorized to alter such plans, and to specify any changes or modifications of any kind which they, in their discretion, may deem necessary with respect thereto, and may make their approval of such plans subject to any such alterations, changes or modifications. Any plans when so approved shall be signed in duplicate on behalf of the township by such officer as the supervisors may designate, and an approved duplicate copy shall be filed in the township office, where the same shall be available to public inspection. No road, street, lane, or alley, or any drainage facilities in connection therewith, shall be opened, constructed, or dedicated for public use or travel, except in strict accordance with plans so approved by the supervisors, or with further plans subsequently approved by them in the same manner, and/or until such plan and the approval thereof has been recorded as hereinafter provided.

Section 1141. Appeals Where Supervisors Refuse Approval. In any case where the township supervisors shall refuse to approve any plans submitted to them in accordance with this sub-division, any person aggrieved by the action of the supervisors may, within thirty days after such action, appeal therefrom by petition to the court of quarter sessions of the county, which court shall hear the matter de novo, and, after hearing, may enter a decree affirming, reversing, or modifying the action of the supervisors as may appear just in the premises. The court shall designate the manner in which notices of the hearing of any such appeal shall be given to all parties interested. The decision of the court shall be final.

The action of the township supervisors, or the court on appeal, in approving any such plans, and an approved duplicate copy of such plans, shall be recorded by the person applying for such approval in the office of the recorder of deeds of the county.

Section 1142. No Responsibility on Township Where Plans Not Approved. If any road, street, lane, or alley, or any drainage facilities in connection therewith, shall be opened, constructed, or dedicated for public use or travel, except in strict accordance with plans approved as herein provided, neither the township supervisors nor any public authorities shall place, construct, or operate any sewer, drain, water pipe, or other facilities, or do any work of any kind, in or upon such road, street, lane, or alley; and neither the township supervisors, nor any other public authorities, shall have any responsibility of any kind with respect to any such road, street, lane, alley, or drainage facilities, notwithstanding any use of the same by the public: Provided, however, That nothing herein contained shall prevent the laying of trunk sewers, drains, water or gas mains, if required by engineering necessity for the accommodation of other territory.

Section 1143. Entry on Lands by Supervisors. The township supervisors and their representatives and workmen may enter upon any land and property, and maintain marks and monuments, so far as the supervisors deem necessary in carrying out their powers and duties hereunder.

Section 1144. Penalty. Any person, copartnership or corporation who or which shall construct, open or dedicate any road, street, lane or alley, or any drainage facilities in connection therewith, for public use or travel in any township, without having first complied with the provisions of this sub-division of this act, and of any resolutions of the township authorities adopted pursuant hereto, shall be guilty of a misdemeanor, and, upon conviction thereof, such person or the members of such copartnership, or the officers of such corporation responsible for such violation shall be sentenced to suffer imprisonment not exceeding two years or pay a fine not exceeding one thousand dollars, or both, in the discretion of the court.

Section 1145. Effect of Approval of Plans. No approval of plans by a township shall obligate or require any such township to construct, reconstruct, maintain, repair, or grade such roads, until and unless authorized and ordered so to do by the proper court pursuant to the provisions of existing law in that regard.

Section 1146. Powers of State and Counties Preserved. Nothing contained in his subdivision shall be held to restrict or limit the State Department of Highways, or any county, in the exercise of any of its duties, powers and functions under the provisions of any act of Assembly now in force or hereafter to be enacted.

#### (j) Entry On Private Property to Secure Road Material and to Open Ditches and Drains

Section 1150. Power to Enter on Lands. When road material cannot be conveniently obtained by contract at reasonable prices, the supervisors of townships may enter upon any land or enclosures within their township lying near the road, and dig, gather, and carry upon the road any stones, sand, gravel or other road material which they think necessary to make, maintain, or repair the road. In exercising such right they shall do no unnecessary damage to the owners of the land, and shall repair any breaches of fences which they make.

Section 1151. Viewers to Fix Damages. Whenever the supervisors and the owners of any such materials cannot agree upon the price to be paid therefor, the value of such materials shall be assessed by viewers to be appointed and to make report as provided in this act in the case of eminent domain proceedings.

Section 1152. Power to Open Drains and Ditches. The township supervisors may enter upon any lands or enclosures and cut, open, maintain, and repair such drains or ditches through the same as, in their judgment, are necessary to carry the water from the roads, streets, lanes, or alleys.

If any person shall stop, fill up, or injure any such drain or ditch, or shall divert or change the course thereof, without the authority of the supervisors, such person shall for every such offense pay a penalty of not more than twenty-five dollars together with the cost of restoring such drain or ditch to be recovered in a summary proceeding. The penalty and moneys so recovered shall be paid to the township treasurer.

## (k) Highways Crossing Railroads. Special Uses of Highways

Section 1155. Railroad Crossings. Every township constructing a highway across a railroad shall construct the same above or below the grade thereof, unless permitted by the Public Service Commission to construct the same at grade.

Any such crossing of a railroad by a highway, or any vacation of any highway crossing a railroad, shall be constructed only in the manner prescribed by and under the jurisdiction of the Public Service Commission. The compensation for damages to the owners of adjacent property taken, injured, or destroyed shall be ascertained, fixed, and paid in the manner prescribed in the Public Service Company Law.

Section 1156. Highway Permits. No railroad or street railway shall hereafter be constructed upon any township highway, nor shall any railroad or street railway crossings, nor any gas pipe, water pipe, electric conduits, or other piping be laid upon or in, nor shall any telephone, telegraph or electric light or power poles or any coal tipples, or any other obstruction, be erected upon or in, any portion of a township highway, except under such conditions, restrictions, and regulations, and subject to the payment of such fees for permits, as may be prescribed and required by the township supervisors, not exceeding the reasonable cost of issuing the permit, the cost of restoring the road and expense of inspecting the work authorized by such permit upon completion thereof. Before any such permit shall issue the applicant shall give bond to the township in such amount as the supervisors shall fix, conditioned for the payment of the charges fixed by this section. All fees and charges so collected for permits shall be paid into the township treasury. Any person failing to obtain such a permit before doing any work on any road for which a permit is required by this section shall, for every such offense, be sentenced, upon conviction in a summary proceeding, to pay a penalty not exceeding one hundred dollars and costs together with the cost of restoring any road, which shall be paid into the township treasury.

## (l) Guideposts and Index Boards

Section 1160. Duty of Supervisors to Erect. The supervisors of townships shall erect posts at the intersection of all public roads and at one of the angles where any public road crosses another public road, and shall firmly fix thereon boards or metal signs, with index hands pointing to the direction of such roads, providing that if a building, tree, trolley pole, or telegraph pole is so erected that it can be used in place of a post and permission has been secured from the owner thereof, such building, tree or pole may be used in place of a post. On such boards and signs shall be inscribed, in large and legible characters, the name of the town, village, or place to which such roads lead, and the distance thereto computed in miles: Provided, Where any public highway intersects or crosses a State highway application for a permit shall be made by the supervisors to the State Department of Highways for the erecting of such signs.

Section 1161. Penalty for Destroying, Etc. It shall be unlawful for any person to wilfully destroy, remove, injure, or deface any guidepost or sign or index board erected upon or near any public street, road, or bridge, by the authorities of any township, or erected, with the consent of the authorities having jurisdiction over such street, road, or bridge, by any club, association, or other organized body for the direction, guidance, or safety of travelers. Any person violating this section shall, upon conviction in a summary proceeding, be sentenced to pay a fine of not less than ten dollars and not more than twenty-five dollars, with all costs of prosecution, together with the value of such sign so destroyed, removed or defaced. All fines and moneys imposed and collected shall be paid to the township treasurer. In default of payment of said fine, costs, and expenses, he shall undergo an imprisonment in the county jail for not less than five nor more than sixty days.

## (m) Protection of Highways From Snowdrifts

Section 1165. Any township which is responsible for the maintenance of any public road or highway, shall have authority to enter upon private property adjacent to such public road or highway, and place thereon a snow fence, at any point as may be deemed necessary, to within a limit of one hundred (100) feet from the right-of-way line of such public road or highway, in order to eliminate snow drifting on the traveled portion of the public road or highway.

No such snow fence shall be placed prior to November first, nor shall the same remain in place after April first of the succeeding year, unless the written consent of the owner is obtained, agreeing to an extension of time for the removal of said snow fence.

If the supervisors shall not be able to enter into an agreement with the owner of adjacent property occupied by such snow fence as to the amount of damages sustained as a result of said fence being placed and removed, the owner may petition the court of common pleas of the county for the appointment of viewers to ascertain the amount of damage incurred in such case in the manner provided in this act for eminent domain proceedings. Such damages, if any, when ascertained, shall be paid by the township. Any funds available to the respective authorities for the construction and maintenance of public roads or highways under their supervision shall be available for the payment of such damages.

Whenever any highways, in townships, are so located as to render them liable, on account of high wind during the winter season, to be so filled with snow as to make them impassable, and in the judgment of the supervisors, such drifts of snow can be avoided by the removal of any fence erected along either side of such highway and replacing the same by a fence constructed of posts, wire, and boards, or rail, combined, such supervisors may agree with the owners of such fences upon a plan for the erection of a fence constructed of posts, wire, and board, or rail, combined. The township may pay the owners of such fences a sum not to exceed the first cost of the wire used in the construction of such fences. The wire used in the construction of such fences shall be without barbs. This section shall not apply to any stone wall, hedge, or ornamental fence.

## (n) Grades of Highways

Section 1170. In the construction or repair of any highway, in any township, it shall be unlawful to raise such highway above the ordinary grade thereof when a drain or culvert shall be constructed under such highway, or when such highway shall be constructed or repaired over such drain or culvert. This section shall not be construed in any manner to interfere with the work of the State Department of Highways, in the reconstruction or improvement of any State highway or State-aid highway, or when a township improves a township road, under the direction, plans, and specifications of the State Department of Highways.

## (o) Trees and Shrubbery Within Limits of Highway

Section 1175. Saving Trees and Shrubbery. Where any highway, in any township, passes through or along forested lands, wild lands, or uncultivated lands, no trees growing within the limits of such highway at a distance beyond fifteen feet on either side of the centre line thereof, and which measure four inches or over in diameter at a point two feet from the surface of the ground, shall be cut down or destroyed by the supervisors or roadmasters employed by them or any other person, without first obtaining the consent of the abutting owners.

Whenever any highway, running through improved or cultivated lands, has been opened, and there are growing, along the roadsides and within the road limits, shrubs or trees not interfering with public travel, no supervisors or roadmasters, or other persons in their employ, shall remove, cut, injure, or destroy, or in any other manner interfere with such shrubs or trees. If such removal or cutting is absolutely necessary for the purpose of maintaining the highway at its highest efficiency the supervisors or roadmasters, or other persons in their employ, may so cut or remove such shrubs or trees, after notifying the abutting property owner and entering into an agreement with them relating to the removal, cutting, or interference with said shrubs or trees.

Section 1176. Court Orders for Removals. In either of the cases set forth in the preceding section, if the consent or agreement of the abutting property owners cannot be obtained, the board of supervisors may appeal to a judge of the court of common pleas. The judge shall inquire into the facts of the case, and after hearing all parties in interest shall make such order as seems just, having due regard for the demand for road improvement as well as for the preservation of the trees or shrubs. From such order there shall be no appeal.

Section 1177. Logs and Cordwood Property of Owner. All logs, cordwood, branch wood, or other forms of wood which

shall be derived from the destruction or removal of any trees growing along the highways, shall be surrendered to and remain the property of the abutting owners.

Section 1178. Brush and Refuse. The supervisors may clear out brush and other refuse from along the sides of the road to the legal width thereof. All such clearing and removal of brush and refuse shall be confined to growth that is within the limits hereinabove described, and to the removal of branches that in any way interfere with public travel. No other injury, by fire, cutting, abrasion, or otherwise, shall be done to the standing timber.

Section 1179. Penalty. If any supervisors, roadmaster, or person in their employ, or any other person, shall cut down, kill, or injure any living tree, growing at a distance beyond fifteen feet on either side of the center line thereof, and of a size four inches in diameter or greater at a point two feet from the surface of the ground, or shall violate any other provision of the preceding sections of this subdivision, he shall in a summary proceeding be subject to a penalty of not more than five dollars for every tree so cut, injured, or destroyed, with costs of suit. Such fines shall be paid to the township treasurer. If any defendant, upon conviction for any offense, fails or refuses to pay the fine and costs imposed, or does not give bond with approved surety to pay the same within ten days, he shall be committed to the county jail for not more than thirty days or until he has paid the fine and costs in full.

Section 1180. Removal of Obstruction. Nothing in this subdivision of this act shall be so construed as to prevent the supervisors, or roadmasters, or other person in their employ, from removing such roadside trees which may be thrown down by the wind or lodged in such position as to be a menace to public travel, or which by reason of any other cause may become a source of danger to the public. Every such act of removal shall be made with due regard to the circumstances of the case, so as to preserve the true intent and purpose of this subdivision.

#### (p) Obstructions and Nuisances

Section 1185. If any person shall stop or obstruct any public road or highway in any township, or shall commit any nuisance thereon by felling trees, making fences, turning the road, or in any other way, and shall not, on notice given by the township supervisors, forthwith remove the obstruction or nuisance and repair the damages done to such road, such person, upon conviction in a summary proceeding, shall, for every such offense, pay a penalty of not more than twenty-five dollars. Nothing in this section shall debar an indictment for any such nuisance, as in case of misdemeanor at common law.

#### (q) Opening, Making, Amending, and Repairing Highways and Bridges by Contracts with Taxpayers

Section 1190. Taxpayers' Rights. Any one or more taxpayers of any township may acquire the right to furnish all the materials and labor necessary for opening, making, amending, and repairing the public highways and bridges of such township, in manner and under the conditions set forth in this subdivision of this act.

Section 1191. Petition to Court. To acquire such right such taxpayers shall, before the beginning of the township fiscal year, present to the court of quarter sessions a petition setting forth that he, she, or it or they, are the owners of property assessed and taxed for road purposes in such township, the appropriate number of miles of public road in such township and the ability of the petitioner or petitioners to lay out, open, make, amend, and repair the public highways and bridges of such township, wholly at his, her, its, or their own expense, for the ensuing township fiscal year, and to pay the other expenses of such township as hereinafter provided, without any right against or claim upon such township for or by reason of the materials, labor, or money so furnished.

Section 1192. Bond of Petitioners. The petitioners shall, with the petition, present a bond to the township, in a sum equal to five hundred dollars for each mile of public road in the township, with one or more sufficient sureties, to be approved by the court, conditioned for the faithful performance of said petitioner or petitioners of his, her, its, or their duty, and to save the township harmless from any loss or claim by reason of failure so to perform said duty.

Section 1193. Notice to Supervisors and Auditors. Notice of the intention of presenting the petition and bond, and of the time when said petition and bond will be presented to the

court, shall be given to the supervisors and auditors of the township, at least ten days before the same are presented.

Section 1194. Contracts. Stipulations. When the petition, bond and proof of the notice required in the preceding section, are presented to the court, the same shall be ordered filed, and the court, being satisfied of the good faith of the petitioners and the sufficiency of the petition, bond, and notice, shall order and direct the supervisors, on behalf of the township to enter into a contract with the petitioner or petitioners. In such contract the petitioner or petitioners shall bind him, her, or itself or themselves.

First. To open, make, amend, and repair the public highways and bridges of the township for the ensuing fiscal year in a lawful and workmanlike manner, wholly at the expense of the petitioner or petitioners, and without creating thereby any claim upon or right against the township for or by reason of the materials, labor, or money for persons employed.

Second. To indemnify and save harmless the township from all claim, damage, cost, or expense of whatever kind, for or by reason of any act or omission of said petitioner or petitioners whereby any claim, suit, or other demand may be set up or recovered against the township.

Third. To pay, within sixty days from the beginning of the fiscal year, to the following officers of such township, the following sums, to be received by said officers in full for all demands against such township for their respective services as such officers of the township for the fiscal years for which the said contract is made, which shall be in lieu of the compensation otherwise in this act provided for such officers: namely,—to each township secretary, the sum of fifty dollars; to each of the auditors of such township, the sum of twenty-five dollars; to an attorney, to be elected by such supervisors as counsel for the township, the sum of fifty dollars; to each supervisor, the sum of two hundred and fifty dollars.

Section 1195. No Road Tax to be Levied. In consideration of the obligations set out in the preceding section to be assumed and performed by the petitioner or petitioners, the supervisors, on behalf of such township, shall stipulate that the township will not assess, levy, or collect any tax for road purposes during the fiscal year for which such contract is made.

Section 1196. Inspections by Supervisors. The supervisors shall view and inspect the making and repairing of the roads in such township, at least once during every month, and satisfy themselves that the petitioners have fully complied with their contract, before final settlement and expiration of contract. If, at any time, the supervisors shall see that any portions of the roads need repair, they shall notify the petitioners to repair the same. In case said petitioners fail to repair said road within five days after notice, the supervisors are empowered to purchase such materials and employ such men as may be necessary to repair such road, and charge the same to the petitioners.

## ARTICLE XII

### BOUNDARY ROADS AND HIGHWAYS

#### (a) Opening, Repairing, and Improving on Division Line of Townships

Section 1201. Roads Between Two Townships. Roads or highways laid out on a line which divides two townships shall be opened, made, kept clear and in repair, at the joint and equal charge of such townships. Any township necessarily incurring more than its due proportion of such charge may recover the excess so incurred from the other township.

When any public road is laid on the line of two townships, if the commissioners or supervisors of an adjoining township neglect or refuse to join with the supervisors of the township in opening or repairing such road, the supervisors of the township shall open, amend, and repair the road, and are authorized to collect a just proportion of the cost of the opening and repairing of such road from the township so neglecting or refusing to join in such opening or repairing. The commissioners or supervisors so neglecting or refusing shall be liable to a penalty of not less than four dollars and not exceeding fifty, to be recovered in a summary proceeding. All such penalties when recovered shall be paid into the township road fund.

## (b) Maintenance of Roads Between Townships and Cities or Boroughs

Section 1205. Whenever any road or street is on the boundary line between any township and a city or borough, such road or street shall be maintained jointly by the township and the city or borough. For the purpose of maintaining any such road or street, the authorities of any such township are hereby directed to enter into agreements with such city or borough providing the manner in which the same shall be maintained, and providing for the division of the cost of maintenance between the city or borough and township. If any such city or borough and township shall fail or refuse to enter into any such contract, or if the city or borough and township cannot agree, any taxpayer or the corporate authorities of the township may present a petition to the court of quarter sessions of the county, setting forth the facts, and the court, after hearing, of which such notice shall be given to all parties interested as the court may direct, shall make an order directing the manner of such maintenance and the division of the cost of maintenance between the city or borough and the township. The action of the court shall be final.

## (c) Highway, the Centre Line of Which is the Dividing Line Between Townships and Boroughs or Cities in the Same County

Section 1210. Whenever the centre line of any highway constitutes the dividing line between a township and any city or borough located in the same county, the supervisors of the township may, jointly with the county, enter into a contract with the city or borough providing for the grading, curbing, and macadamizing or paving of such highway.

Such alteration or improvement shall be constructed, and subsequent repairs shall be made, under the supervision of the proper authorities of the city or borough, in compliance with the laws governing the construction of such alterations or improvements in such city or borough and with plans and specifications to be agreed upon, in writing, between the supervisors of the township and the city or borough and the commissioners of the county.

The cost of any alteration or improvement shall be borne one-half by the city or borough and one-half by the county and township in equal portions.

The cost of repairs shall be borne one-half by the city or borough and one-half by the township, or by the county and township in equal portions, or such other portions as are agreed upon in the joint contract of the township with the county.

## (d) Highway, the Centre of Which is the Dividing Line Between Townships and Cities in an Adjacent County

Section 1215. Whenever the centre line of any highway constitutes a dividing line between a township and a city located in an adjacent county, it shall be lawful for the township supervisors to enter into a contract with the county in which it is located and the city providing for the grading, curbing, macadamizing or paving of the roadway of said highway, the cost thereof to be borne one-half by the city, and one-half by the township and the county in which such township shall be situated in equal portions.

The said alteration or improvement shall be constructed, and subsequent repairs shall be made, under the supervision of the proper authorities of the said city, in compliance with existing laws governing such construction or improvement in such city, and in further compliance with plans and specifications to be agreed upon in writing between such city and the commissioners of the county and the township supervisors of the said township. The cost of repairs shall be borne one-half by the city, and one-half by the township or by the county and township in equal portions or such other proportions as may be agreed upon by the county and township.

In all cases in which it shall be found impossible to enter into such contract or agreement as is provided for in this section, or where either the city or the township or the county in which such township is situated shall refuse to enter into such contract or agreement, it shall be lawful for the township to present its petition to the court of common pleas of either county, setting forth the facts and circumstances, including the condition of the highway from which the necessity of desirability for the grading, curbing, macadamizing, or paving of the roadway appears, and the estimated cost thereof, and that the terms of the said contract as provided for in this section

cannot be agreed upon by the said city and the county or township, or either or any of them, or that either such city or the county or township, or any or either of them refuses to enter into such contract. Such petition may pray that such court may, after hearing all the parties concerned, make its order or decree, defining the nature and character of the improvement reasonably necessary or desirable to be made to the roadway, and requiring the parties hereinabove specified to enter into a contract or contracts for the making and constructing of the same as herein provided for. A copy of the said petition, duly certified, shall be served upon the city or the county and township concerned, other than the petitioner, with notice of such day as may be fixed by the court for the hearing. Thereupon either or both of the parties served with such notice shall be entitled, on or before such date, to file in the said court its answer to the said petition, setting forth its version of the facts or such other matters in relation thereto as may be deemed necessary or proper by it. The said court upon the date so fixed or at such other times as it may appoint, shall hear the evidence of the parties, or it may refer the matter to a master, who shall hear the testimony of the parties and report his findings, in the same manner and under the same procedure as provided by the rules in equity in similar cases, to the said court, which may reject, confirm, or modify the same, and may make its decree or order directing the making of such alterations or improvements to the roadway as may be deemed reasonably necessary or desirable and providing for the sharing of the cost of such improvements, one-half by the city, and one-half by the county and township in equal portions. The said order or decree may further provide that the repairs to such alterations and improvements subsequently required shall be borne one-half by the city, and one-half by the county or township in equal portions or such other proportions as between the county and the township as such court may find to be legal and proper; and thereupon the said grading, curbing, macadamizing or paving of the roadway of such highway shall proceed in accordance with the decree or order of the said court in the same manner as if the contract or agreement in this section had been entered into and duly executed.

## (e) Improvement of Streets Where More Than One-Half of Width is in Township. Assessment of Property Outside Limits.

Section 1220. Whenever any street, alley, or highway more than one-half the width of which is within the limits of any township shall divide the said township from any other municipality or township located within the same county, such street, alley, or highway may be improved by the township within which the greater width is located in the same manner as if the said street, alley, or highway were entirely located within the limits of said township.

The property abutting on the side of said street, alley, or highway which is located outside the limits of the township making such improvements shall, for a depth of one hundred and fifty feet plus one-half the width of said street, alley, or highway from its center line, be assessed for any and all municipal improvements to or on the said street, alley, or highway in the same manner as such property would be assessed under the laws of the Commonwealth if it were entirely located within the limits of such city, borough or township.

## (f) Assessment of Property Outside Limits for Street Improvement Where Street Entirely Within Township

Section 1225. Whenever any street or alley, entirely within the limits of any township, shall divide such township from any other municipality or township, located in the same county, the property on the side of the street or alley, opposite the line of such township, shall, for a depth of one hundred and fifty feet, be assessed for municipal improvements on such streets or alleys on which property shall abut. Such assessment shall be made in the same manner and in the same proceeding as is used for the assessment of property within such township for such improvement.

## BRIDGES AND VIADUCTS

## ARTICLE XIII

## (a) Over Creeks, Rivulets, Gullies, Canals and Railroads

Section 1301. Power to Make and Maintain Bridges. The supervisors of townships, in making and repairing the roads,

shall make and maintain within their township sufficient bridges over all small creeks, rivulets, deep gullies, canals, and railroads, where the same is necessary for the ease and safety of travelers.

Such bridges over canals or railroads shall not obstruct the railroad or canal over which it is built. Nothing in this section shall release railroad or other companies of the Commonwealth from the requirements of existing laws.

Section 1302. Damages. In the construction and maintenance of such bridges, all damages shall be awarded and benefits assessed as part of the proceeding to lay out, open, make, or repair the road of which the bridge is a part.

(b) Over Streams, Railroads, and Canals on Township Boundaries

Section 1305. Bridges on Division Line of Townships. Where a small creek or a railroad or canal, over which a bridge is necessary, is on the boundary line of two townships, the bridge shall be built and maintained at the joint and equal expense of the townships, by their respective commissioners or supervisors, in the manner directed by this act in the case of public roads which may be the division line of townships.

Section 1306. Bridges Between Townships and Municipalities. Whenever a creek, railroad, or canal, over which a bridge is necessary, is on the division line of a township and a municipality, the township shall unite with such municipality in the construction and maintenance of such bridge and pay an equal share of the expenses incident thereto.

Section 1307. Where Bridge Over Railroad or Canal. If a bridge is built over a railroad or canal, such bridge shall not obstruct the railroad or canal over which it is built. Nothing in said sections shall release railroad or other companies or the Commonwealth from the requirements of existing laws.

(c) Maintenance, Repair, and Rebuilding of Bridges Built by County

Section 1310. Whenever a bridge or part thereof has been built by the county, or the whole or part of the money necessary to build it has been furnished by the county, and the bridge has not been entered on record as a county bridge, such bridge shall be maintained, kept in repair, and rebuilt, when necessary, by the township or townships in which, or on the boundary line of which, it is located, without rendering the county liable for the same.

(d) Effect of Approval of Department of Highways

Section 1315. Whenever authority has been given by the State Department of Highways to township supervisors, under existing laws, or laws that may hereafter be enacted, for the construction, repair, alteration, or maintenance of any township bridge, it shall not be necessary for such township supervisors to procure permits from any other department consenting to the construction, repair, alteration or maintenance of such bridge. This section shall not repeal or modify any of the provisions of the Act of the twenty-sixth day of July, one thousand nine hundred and thirteen (Pamphlet Laws, one thousand three hundred and seventy-four), known as The Public Service Company Law.

## ARTICLE XIV

### SIDEWALKS

Section 1401. Power of Supervisors to Establish Width and Location of Sidewalks. Consents in Certain Classes. The supervisors of any township, upon the request of any landowner whose land fronts upon a public highway within such township, may establish the width, grade and location for a sidewalk along one or both sides of said highway along the lands of such owner. The width of the walk on each side of said highway shall not be less than six feet for roads fifty feet in width or less, and for roads over fifty feet in width shall be ten feet in width. When said sidewalks are so established, such landowner shall pay for and keep the same in repair.

In case the street or highway is a State Highway or a county road, the written consent of the Department of Highways or the county commissioners, as the case may be, shall first be obtained.

Section 1402. Construction of Sidewalks Upon Petition of Property Owners. The township supervisors may construct sidewalks of board, plank, or cement, or other suitable mate-

rial, along the highways, through towns and villages in such townships, upon the petition of owners of property representing a majority in number of feet front of the properties abutting on the highways where such sidewalks are to be constructed. Whenever any such petition is filed with the supervisors, the owner of the property shall be given notice by the supervisors to construct such sidewalk; and in case of the failure of the owner to complete such sidewalk within a period of thirty days after the receipt of such notice, the supervisors may construct such sidewalk as herein provided. Whenever any such sidewalks are constructed by the supervisors the expense of the construction of such sidewalk shall be paid by the abutting property owners in proportion to their frontage. If such owners fail to so pay the expenses of the construction of such sidewalk, the township supervisors may recover the amount by action of assumpsit, or may file municipal liens therefor against the abutting properties, in the manner provided by law for the filing and collection of municipal liens.

Section 1403. Power to Establish Grades and Width of Sidewalks. Supervisors of townships may regulate, by resolution, the grade and width of sidewalks constructed along the highways in such townships, and shall have general supervision over the same and may establish a grade or grades for footways or sidewalks, which grade or grades may be separate and apart from the grade or grades established for the cartway or roadway.

## ARTICLE XV

### SEWERS AND DRAINS

(a) Establishing and Constructing Sewer and Drainage Systems; Sewer Connections and Rates; Disposal of Sewage. Assessment of Cost of Construction.

Section 1501. Power to Establish and Construct Sewers and Drains. Sewer Rentals. Townships may establish and construct a system of sewers and drainage, locating the same as far as practicable along and within the lines of the public roads of the township as seems advisable to the board of supervisors. The supervisors may permit and, where necessary to the public health, require adjoining and adjacent property owners to connect with and use the same. All persons so connecting shall pay in addition to the cost of making such connection a monthly or annual rate prescribed by a resolution of the board of supervisors. Such monthly or annual rate shall constitute a lien, until paid, against the property so connecting with such system and the amount thereof may be recovered by due process of law.

Nothing in this section shall be construed to repeal or modify any provisions of the Public Service Company Law.

Section 1502. Notice of Contemplated Construction. Protests by Property Owners. No sewer, system of sewers or drains shall be constructed under the provisions of this subdivision, unless a resolution of the board of supervisors authorizing the same shall be published in a newspaper of general circulation published in the county in which the township is situated, once a week for three successive weeks. If, within twenty days after the last publication or at any time during the period of publication, taxpayers of the township whose property valuation as assessed for taxable purposes within the township, shall amount to fifty per centum of the total property valuation as assessed for taxable purposes, within the township, shall sign and file in the office of the prothonotary of the court of common pleas of the county in which the township is located a written protest against the construction of such sewer, sewer system, or drain, then the construction authorized by such resolution shall not be undertaken or proceeded with.

Section 1503. Location of Sewers on Private Property. Where it is reasonably impracticable in the judgment of the supervisors in any part of such system to carry such sewers or drains along the lines of public roads, they may locate and construct so much of the same as is necessary through private lands.

Section 1504. Treatment Works and Facilities Therefor. Eminent Domain. The supervisors shall make the necessary provision for the disposition of the sewage and drainage within, or for carrying the same beyond the limits of the township, and to this end they are hereby authorized to enter into contracts with other municipalities and other corporations or persons to purchase, acquire, enter upon, take, appropriate,

occupy and use such lands, rights, and interests therein within the corporate limits of other townships or boroughs as shall be necessary for the proper location, construction, maintenance, use, and operation of sewer mains, drains, or treatment works, including such lands, rights, and interests therein as shall be necessary for future additions to and enlargements of such sewerage facilities, and as may be necessary to carry out the plans and specifications upon which a permit has been issued by the Secretary of Health in accordance with the provisions of the Act of April twenty-second, one thousand nine hundred and five (Pamphlet Laws two hundred and sixty), entitled "An act to preserve the purity of the waters of the State for the protection of public health" and of "The Administrative Code."

Section 1505. Entry on Lands to Mark Sewer Routes. Damages. In the event of inability to agree with the owners, either for the land necessary for so much of the line of sewers and drains as are not located upon public roads, or for so much land as is required for the disposition of the sewage, the supervisors may enter upon said land and mark thereon the route and width necessary for the construction of the line of sewers or drains or the boundaries of so much land as is necessary for disposition of such sewage, and occupy the said land for such purposes, for all damage done or suffered or which accrues to the owner or owners of such land by reason of the taking of the same the funds of the township raised by taxation shall be pledged and deemed as security. Such damages shall be determined by viewers in the manner provided in this act for eminent domain proceedings.

Section 1506. Enforcement of Judgment for Damages. The damages as awarded when the report is finally confirmed shall be entered as a judgment, and if the same is not paid within thirty days after the entry thereof, execution to enforce the collection thereof may be issued as in other cases of judgment against townships.

Section 1507. Cost of Construction. How Paid. The cost of construction of any such system of sewers, or drains constructed by the authority of this subdivision of this act shall be charged upon the properties accommodated or benefited thereby to the extent of such benefits in the manner hereinafter provided.

Section 1508. Sewer Districts. Township to Pay Non-Assessable Portion of Cost. Whenever a sewer system is constructed by a township for the accommodation of a certain portion only of the township, the supervisors of such township may constitute the territory accommodated into a sewer district or divide it into several sewer districts. In every such case of division into several districts, the supervisors shall make an estimate of the proportion of the cost of the sewer system which should equitably be charged on each of said districts, and declare and establish such apportionment by resolution. No district shall be charged more than its due proportion of the cost of the main sewers, pumping stations, et cetera, used jointly by more than one district; the aggregate amount charged on property in any such district shall not exceed the amount of such estimate. Where the whole of the township is accommodated by the system it may also be treated as a single district, or divided into districts and be subject to the foregoing provisions.

Any amount not legally chargeable upon properties benefited shall be paid out of the general township fund.

Section 1509. Manner of Assessment. The charge for any such sewer construction in any township shall be assessed upon the properties accommodated or benefited, in either of the following methods:

(a) By an assessment, pursuant to a resolution of the board of supervisors, of each lot or piece of land in proportion to its frontage abutting on the sewer, allowing such reduction in the case of properties abutting on more than one sewer as the resolution may specify. No assessment by frontage shall be made on the properties of such a character as not to be lawfully subject to such manner of assessment, and each abutting property shall be assessed with not less than the whole amount of the benefit accruing to it and legally assessable; or

(b) By an assessment upon the several properties abutting on the sewer in proportion to benefits. The amount of the charge on each property shall be ascertained as hereinafter provided.

When a township is divided into sewer districts, the assessment in each district may be by different methods.

Section 1510. Procedure for Assessment of Benefits. In all cases where the board of supervisors shall select the method provided by subdivision (b) of the foregoing section, they shall petition the court of common pleas for appointment of viewers to assess benefits. In all cases where they shall neglect, for a period of three months after the completion of the sewer system, to either ordain assessments by frontage or present petition for appointment of viewers, taxpayers of the township whose property valuation as assessed for taxable purposes within the township shall amount to fifty per centum of the total property valuation as assessed for taxable purposes within the township, may present a petition to the court of common pleas of the proper county for the appointment of viewers to assess benefits; and in all cases where such taxpayers shall, within three months of the adoption of a resolution levying an assessment under the method provided by subsection (a) of said foregoing section, by petition state to said court that such assessment insufficiently represents the benefits accruing to abutting properties, they may include in such petition a prayer for the appointment of viewers to assess benefits. In either case the court shall thereupon appoint three disinterested persons from the board of county viewers, neither of whom shall be a resident of that portion of the township which is accommodated by the sewer in question, and the viewers so appointed shall proceed as provided in this act for proceedings for the assessment of damages and benefits by viewers. The aggregate of the assessments in any sewer district shall not exceed the amount charged to such district for its share of the cost of the sewer construction unless the same shall, by petition of taxpayers, whose property valuation as aforesaid shall amount to fifty per centum of the total property valuation as assessed for taxable purposes within the township, presented within three months after the adoption of a resolution providing for an assessment by frontage, be stated to insufficiently represent the amount of benefits to such properties, in which case the proceedings by taxpayers authorized above shall be applicable. Upon the filing of such a petition by taxpayers as aforesaid for appointment of viewers, any assessment made by the supervisors and any proceedings thereunder shall be null and void.

Section 1511. Liens for Assessments. Costs of Proceedings. After the amount of the assessment charged upon the several properties has been established, either by resolution making assessments according to frontage, or by confirmation of any report of viewers, in whole or in part, it shall be the duty of the township supervisors to file municipal liens for the assessments covered by such resolution or confirmation within the time and in the manner provided by law; the same to be subject in all respects to the general law providing for the filing and recovery of municipal liens. The amounts of all assessments shall be payable to the township treasurer for the use of the township. The supervisors shall also make out bills for the amounts charged against each property, which shall be forthwith sent to all property owners residing in the township, and mailed to all such owners residing elsewhere whose address is known.

The costs of publication of notices in proceedings before viewers shall be paid by the township upon presentation of bills approved by the court.

#### (b) Contracts with Individuals or Corporations for Construction And Maintenance of Sewer and Drainage Systems

Section 1515. In any case where, under the authority of section one thousand five hundred and one of this act, a system of sewage and drainage covering any township in whole or in part shall have been approved and authorized by resolution, the supervisors may enter into a contract with any responsible individual or individuals or corporation for the construction of such system of sewage or drainage at the expense of such individual or individuals or corporation. He, they, or it shall be entitled under such contract to exercise all the powers of the township in the construction, maintenance, and operation of such system of sewage or drainage, with the right to collect such charges in connection therewith as the supervisors prescribe in as full manner as the same might have been collected by the township or the supervisors. In such contract the supervisors shall reserve to the township the right at any time or after a prescribed time to itself take possession of such system of sewage and drainage and its appurtenances at a price and upon terms to be fixed in the contract.

Nothing in this section shall be construed to repeal or modify any of the provisions of the Public Service Company Law.

(c) Sewers and Drains in Streets or Alleys or Over Private Property; Assessment of Cost of Construction According to Benefits

Section 1520. Subject to the provisions of section one thousand five hundred and two, townships may construct sewers and drains in any street or alley or through or on or over private property. The costs, damages, and expenses of the construction of any such sewers or drains shall be assessed upon the properties accommodated or benefited, in either of the following methods:

(a) By an assessment, pursuant to a resolution of the township board of supervisors, of each lot or piece of land in proportion to its frontage abutting on the sewer, allowing such reduction in the case of properties abutting on more than one sewer as the resolution may specify. No assessment by frontage shall be made on properties of such a character as not to be lawfully subject to such manner of assessment and each abutting property shall be assessed with not less than its proportion aforesaid of the entire cost and expense of such construction.

(b) By an assessment upon the several properties abutting on the sewer in proportion to benefits; the amount of the charge on which property shall be ascertained and the rights of taxpayers conferred in connection therewith, as provided in section one thousand five hundred and ten of this act.

(d) Sewers Under State and County Highways

Section 1525. Consents Necessary. Townships may construct sewers and drains in and under any county or State highway or State-aid highway within the township boundaries. In case of the construction of sewers upon county highways the consent of the county commissioners of the county shall first be obtained, and in case of the construction of sewers upon any State highway or State-aid highway the consent of the Secretary of Highways shall first be obtained.

Section 1526. Assessment of Cost. Whenever sewers have been or shall be laid or constructed by any township in and under such highways, such township may ascertain, levy, and collect the costs and expenses of the construction thereof from the abutting property holders by viewers in accordance with the provisions of this act relating to the assessment of damages and benefits by viewers.

(e) Connecting with Sewer of Adjoining Municipality

Section 1530. Agreements for Connections. Appointment of Viewers. Any township may, by agreement, connect with an existing sewer owned by any adjacent municipality, for sewage purposes, in the following manner:

An application shall be made by the board of supervisors to the court of quarter sessions setting forth that fact. If the court shall be of the opinion that such connection can be made without impairing the usefulness of the existing sewer, it shall appoint three viewers who shall view the premises, and investigate the facts of the case and shall assess the proportionate part of the expense of building the original sewer upon such township, and shall fix the proportion of the expense for repairs which the municipality and the township shall thereafter bear, and determine all other questions liable to arise in connection therewith.

Section 1531. Report of Viewers. The viewers shall report to the court the result of their investigation, which report shall be confirmed within thirty days unless exceptions thereto are filed. After confirmation of such report or the disposal of any exceptions any party interested may appeal from the decision of the court of quarter sessions to the Superior Court.

Section 1532. Notice of Contemplated Construction. Protests by Property Owners. No sewer, system of sewers, or drains shall be constructed under the provisions of this subdivision unless a resolution of the board of supervisors authorizing the same shall be published in a newspaper of general circulation published in the county in which the township is situated, once a week for three successive weeks, to-wit: within twenty days after the last publication or at any time during the period of publication, taxpayers of the township whose property valuation as assessed for taxable purposes within the township, shall amount to fifty per centum of the total property valuation as assessed for taxable purposes within the township, shall sign and file in the office of the prothonotary of the court of common pleas of the county in which the township is located a written protest against the construction of such sewer, sewer system, or

drain, then the construction authorized by such resolution shall not be undertaken or proceeded with.

(f) Acquisition of Sewer System

Section 1535. Any township in which any person, firm or corporation is maintaining sewers and culverts with the necessary inlet and appliances for surface and under-surface and sewage drainage, may become the owner of such sewers, culverts, inlet, and appliances, by paying therefor the actual value of the same at the time of the taking by the township.

In case the supervisors of the township cannot agree with the owners of such sewers as to the price to be paid therefor, the supervisors may enter upon and take possession of such sewers, culverts, inlets and appliances. For all damage done or suffered or which accrues to the owner or owners of such sewer by reason of the taking of the same, the funds of the township raised by taxation shall be pledged and deemed as security; such damages to be determined by viewers in the manner provided by this act for eminent domain proceedings. If any sewer or sewer system is acquired by purchase under the provisions of this section the cost of such acquisition may be distributed or assessed in the same manner as if such sewer or sewer system had been constructed by such township under the provisions of this act.

(g) Joint Sewers and Drains

Section 1540. Agreements for Joint Sewers. Townships may enter into agreements with municipalities or other townships for the purpose of building sewers, including trunk-line sewers or drains and sewage-disposal plants. Such agreement shall provide for the joint maintenance of the same.

Section 1541. State Permit. No such sewer or plant shall be constructed until plans and specifications have been submitted to the State Department of Health and approved, in accordance with provisions of the Act of April twenty-second, one thousand nine hundred and five, (page two hundred and sixty), entitled "An act to preserve the purity of the waters of the State for the protection of the public health."

## ARTICLE XVI

### WATER SUPPLY AND WATERWORKS

Section 1601. Contracts With Water Companies and Municipalities. The supervisors of any township may, by contract with any private corporation or any adjacent municipality owning a waterworks system, provide for a supply of water for public and private uses, to be delivered into the lines of the township at or near the boundary thereof, or to be delivered through lines owned by such company or municipality within such township or any part thereof.

Section 1602. Water Lines and Connections. Township supervisors shall have full power by contract to lay water lines and to regulate the making of connections therewith, or to contract or enter into agreements with any private water company or municipality for the laying of water lines within the limits of such township or any part thereof.

Section 1603. Expenditure of Township Moneys. Water Rents. The township supervisors are authorized to expend moneys of the township for the purpose of providing such water lines and connections, and for the purpose of providing a supply of water for private and public use. They may provide for the collection of water rents from users of such water, or may enter into contracts or agreements with private corporations and municipalities supplying such water for the collection by such private corporations and municipalities of water rents from such users.

Section 1604. State Permit. The supervisors of any township may by resolution provide, regulate, and protect any system of distribution of water for private and public use after a certified copy of the plans and surveys for such system, with a description of the sources from which it is proposed to derive the supply, are filed with the Department of Health, and a written permit for the construction of such system obtained from the Secretary of Health, in accordance with existing law.

Section 1605. Occupation of Highways. In providing for regulating, protecting, and extending its system of distribution of water the township may occupy public highways, but no highway under the jurisdiction of the State Department of Highways shall be occupied until a permit therefor has been obtained from the Department of Highways of the Commonwealth, nor any highway under the jurisdiction of the county

until a permit therefor has been obtained from the county commissioners.

Section 1606. Joint Maintenance of Works With a Borough. Any township may unite with a borough in the construction or acquisition and maintenance of works for the supply of water. The construction of such waterworks, shall be commenced only after plans for such waterworks have been filed with the State Secretary of Health, and a permit issued in accordance with the Act of Assembly of April twenty-second, one thousand nine hundred and five (page two hundred sixty), entitled "An act to preserve the purity of the waters of the State for the protection of the public health."

Section 1607. Commission of Waterworks. Whenever any township unites with a borough in the construction or acquisition and maintenance of waterworks the supervisors of such township, after the passage of a resolution to that effect, may join with the councils of such boroughs, now authorized by the General Borough Law, so to join and apply to the court of common pleas for the appointment of a commission of waterworks. Such commission shall be composed of citizens or each of the boroughs and townships so uniting.

Section 1608. Public Service Company Law Saved. Nothing contained in this article shall be construed or repeal or supersede any of the provisions of the Public Service Company Law.

## ARTICLE XVII

### PUBLIC BUILDINGS

Section 1701. Lockup The board of supervisors of townships may, after obtaining the assent of the electors of the township, expressed by vote at an election to be held at the place, time and under the same regulations as provided for the holding of municipal elections, build and maintain a suitable place for the purpose of incarcerating criminals, disorderly, suspicious, and intoxicated persons, until they can be dealt with according to law. The ballots to be deposited by the electors shall be prepared in conformity with the general election law. In receiving and counting and in making returns of the votes cast, the inspectors, judges, and clerks of said election shall be governed by the laws regulating municipal elections, and the vote shall be counted by the court as provided by the general law governing municipal elections. The board of supervisors shall direct the constable of the township to issue a proclamation, ten days prior to the date of the municipal election, that the qualified electors will vote "For or against building a lockup." Such building, when erected, shall be under the care of the board of supervisors.

Section 172. Town Hall. The supervisors of townships may procure a suitable lot of ground, and erect a suitable building thereon for a townhouse in which to hold elections, store road machinery, hold meetings of township officers, and community activities, and for other township uses. For the purpose of procuring a lot of ground and erecting a town hall, the supervisors may borrow money at a rate of interest not exceeding six per centum and issue bonds therefor.

Section 173. Unloaders and Warehouses. Townships may purchase or lease land adjacent to the tracks or right of way of any railroad or street railway, within or without the limits of such township and erect thereon suitable unloaders, warehouses, or other buildings as may be necessary for unloading, handling, and storing road materials and supplies.

Section 1704. Appropriation of Property. Townships may enter upon and appropriate private property, and also land heretofore granted or dedicated to public or other use, within the limits of such township, and which is no longer used for the purpose for which the same was granted or dedicated, for the erection thereon of a town hall, hose house, lockup, and such other public buildings as are necessary for public purposes. No land or property used for any cemetery, burying ground, public or parochial school, educational or charitable institution, seminary, or place of public worship shall be taken or appropriated by virtue of any power contained in this section.

Section 1705. Resolution of Supervisors. Whenever the supervisors desire to acquire, enter upon, take, use, and appropriate private property or lands for public buildings, they shall declare such intention by a resolution duly enacted.

Section 1706. How Damages are Assessed. The compensation and damages arising from such taking, using, and appropriating private property for such purposes shall be con-

sidered, ascertained, determined, awarded, and paid in the manner provided in this act for eminent domain proceedings.

Section 1707. Use of Public Land Acquired for Other Purposes. Whenever the supervisors desire to take any lands heretofore granted or dedicated to a use or purpose for which they are no longer used, they shall pass a resolution declaring such intention and shall thereupon petition the court of common pleas for leave to file the bond of such township for the purpose of securing any person or persons who may be injured by the taking of such lands. The court shall thereupon direct notice to be given by publication in at least two newspapers of the county. If no exceptions are filed to the bond on or before the day fixed in the notice, the court shall approve the same. The court may increase the amount of the bond, and hear and determine all exceptions that are filed against the approval thereof. Upon the approval of such bond, the supervisors may enter upon and take such lands for the purposes of erecting public buildings. The bond, which shall be in the name of the Commonwealth, for the use of any person or persons who are entitled to damage by reason of the taking of the lands, shall remain on file for their use and benefit.

In case the compensation for damages, accruing from any such appropriations, has not been agreed upon by the parties in interest, the same may be assessed by viewers in accordance with the provisions of this act for the assessment of damages in eminent domain proceedings.

## ARTICLE XVIII

### LICENSES AND LICENSE FEES

#### (a) Transient Retail Merchants

Section 1801. Transient Retail Merchants to be Licensed. Every person, whether principal or agent, entering into, beginning or desiring to begin, a transient retail business in any township for the sale of any goods, wares, or merchandise whatsoever, and who hires, leases, occupies, or uses any room, apartment, store, shop, building, railway car, or other place or structure for the exhibition and sale of such goods, wares, or merchandise, shall take out a license for the same from the supervisors of the said township: Provided, however, That nothing herein contained shall apply to farmers selling their own produce, or to any sale of goods, wares, or merchandise donated by the owners thereof, the proceeds whereof are to be applied to any charitable or philanthropic purpose.

Section 1802. Amount and Payment of License Fee. Penalty. The amount of such license in any township shall be the sum of twenty-five dollars (\$25) per month, or fractional part thereof, to be paid to the township treasurer. Said license shall be renewed monthly during the continuance of said sale, and upon failure of said person or persons so to secure such license, he, she, or they shall, in a summary proceeding, be fined in a sum not less than one hundred dollars (\$100) nor more than two hundred dollars (\$200), and in default of payment of said fines, shall be imprisoned in the jail of the county for a period not exceeding thirty (30) days.

Section 1803. Mercantile License Law Saved. Nothing herein contained shall be construed to relieve any person, partnership, or corporation from the duty of taking out a license, or from the payment of any license tax imposed or authorized by any other statute of this Commonwealth.

#### (b) Restrictions

Section 1811. Agents for Licensed Dealers Not to be Licensed. It shall be unlawful for any township to levy any license fee or mercantile tax upon any persons taking orders for merchandise, by sample, from dealers or merchants, for individuals or companies who pay a license or mercantile tax at their chief places of business. Nothing in this section shall authorize any person to sell by retail to others than dealers or merchants.

Section 1812. Insurance Agents and Brokers Not to be Licensed. It shall be unlawful for any township to impose or collect any license fee upon insurance companies or their agents, or insurance brokers, authorized to transact business under the Insurance Laws of the Commonwealth.

Section 1813. License Fees on Residents Not to Exceed Those on Nonresidents. It shall be unlawful for any township to impose by resolution or exact or collect, under the provisions of any resolution heretofore or hereafter enacted, any license tax or fee upon or from any manufacturer or the agent, representative or employe or any manufacturer who is a resident of the Commonwealth for soliciting orders for or for selling any goods, merchandise, or wares manufactured within this Common-

wealth that is not or cannot legally be imposed upon or exacted or collected from any manufacturer or dealer or the agent, representative, or employee of any manufacturer who is a non-resident of the Commonwealth for soliciting orders for or for selling any goods, merchandise, or wares manufactured without the Commonwealth.

#### ARTICLE XIX

##### Parks, Playgrounds, Gymnasiums, Public Baths, Swimming Pools, Indoor Recreation Centers, and Forests

Section 1901. Designation and Acquisition of Lands. The township supervisors of any township, may designate and set apart for use as parks, playgrounds, playfields, gymnasiums, public baths, swimming pools, or indoor recreation centers, any lands or buildings, owned by such township, and not dedicated or devoted to other public use. Such township may, in such manner be authorized or provided by law for the acquisition of lands or buildings for public purposes in such township, acquire lands or buildings therein for use as parks, playgrounds, playfields, gymnasiums, public baths, swimming pools, or indoor recreation centers, or, if there be no law authorizing such acquisition the township supervisors may acquire lands or buildings for such purposes by gift or purchase, or may lease lands or buildings in such township for temporary use for such purposes.

Section 1902. Park and Recreation Boards. The authority to supervise and maintain parks, playgrounds, playfields, gymnasiums, public baths, swimming pools, or indoor recreation centers may be vested in any existing body or board or in a park board or recreation board as the township supervisors may determine. The local authorities of any such township may equip, operate and maintain the parks, playgrounds, playfields, gymnasiums, swimming pools, public baths or indoor recreation centers, as authorized by this act. Such local authorities may, for the purpose of carrying out the provisions of this act, employ play leaders, recreation directors, supervisors, superintendents, or any other officers or employees as they deem proper.

Section 1903. Appointment of Park and Recreation Boards. If the township supervisors shall determine that the power to equip, operate, and maintain parks, playgrounds, playfields, gymnasiums, public baths, swimming pools, or recreation centers shall be exercised by a park board or recreation board, they may establish, in said township, such park board or recreation board, which shall possess all the powers, and be subject to all the responsibilities, of the respective local authorities under this act. Either such boards, when established, shall consist of five persons. The members of such boards shall be appointed by the supervisors, and shall serve for terms of five years or until their successors are appointed, except that the members of such board first appointed shall be appointed for such terms that the term of one member shall expire annually thereafter. Members of such board shall serve without pay. Women shall be eligible for appointment. Vacancies in such board occurring otherwise than by expiration of term shall be for the unexpired term, and shall be filled in the same manner as original appointments.

Section 1904. Officers of Board. The members of a park board or recreation board, established pursuant to this act, shall elect their own chairman and secretary and select all other necessary officers, to serve for a period of one year and may employ such persons as may be needed as authorized by this act. Such boards shall have power to adopt rules and regulations for the conduct of all business within their jurisdiction.

Section 1905. Joint Municipal Acquisitions. Any township may, jointly with any one or more townships, boroughs and cities, acquire property for, and operate and maintain, any parks, playgrounds, playfields, gymnasiums, public baths, swimming pools, or indoor recreation centers.

Section 1906. Bond Issues. The township supervisors, may issue bonds for the purpose of acquiring lands or buildings for parks, playgrounds, playfields, gymnasiums, swimming pools, public baths, or indoor recreation centers and for the equipment thereof.

Section 1907. Cost of Maintenance. Annual Tax Levies. All expenses incurred in the operation of such parks, playgrounds, playfields, gymnasiums, swimming pools, public baths, or indoor recreation centers, established as herein provided, shall be payable from the treasury of such township. The local authorities of such township having power to appropriate money therein, may annually appropriate and cause to be raised by

taxation such tax, not to exceed two mills on the dollar of the assessed valuation of taxable property in such township, for the purpose of maintaining and operating parks, playgrounds, playfields, gymnasiums, public baths, swimming pools, and recreation centers.

Section 1908. Right of Acquisition of Forest Lands. Townships may acquire by purchase, gift, or lease, and hold, tracts of land covered with forest or tree growth, or suitable for the growth of trees, and administer the same under the direction of the Secretary of Forests and Waters, in accordance with the practices and principles of scientific forestry, for the benefit of the township. Such tracts may be of any size suitable for the purpose, and may be located within or without the township limits.

Section 1909. Approval of Secretary of Forests and Waters. Before the passage of any ordinance for the acquisition of land to be used as township forests, the township commissioners shall submit to the Secretary of Forests and Waters, and secure his approval, of the area and location of such land.

Section 1910. Ordinance and Notice. Whenever the township commissioners deem it expedient to acquire any lands for forests they shall so declare in an ordinance, wherein shall be set forth all facts and conditions relating to the proposed action, which proposed ordinance shall be advertised once a week for three weeks prior to its passage.

Section 1911. Appropriation for Acquisition. All money necessary for the purchase of such tracts shall be appropriated in the same manner as appropriations for township purposes, and such funds may be provided from the current revenue or by the proceeds of a sale of bonds in accordance with existing law.

Section 1912. Control of Forests by Secretary of Forests and Waters. Upon the acquisition of any forests or lands suitable for forests, the township commissioners shall notify the Secretary of Forests and Waters, who shall make such rules for the government and proper administration of the same as may be necessary; and the secretary shall publish such rules, declare the uses of the forests in accordance with the intent of this article, and make such provision for its administration, maintenance, protection, and development as shall be necessary or expedient. The rules governing the administration of such forests shall have for their main purpose the producing of a continuing township revenue by the sale of forest products.

Section 1913. Appropriation for Maintenance. All moneys necessary to be expended for the administration, maintenance, protection, and development of such forests shall be appropriated and applied as is now done for township purposes. All revenue and emoluments arising from such forests shall be paid into the township treasury, to be used for general township purposes.

Section 1914. Use of Township Forests as Outing Grounds. Township forests may be used by the public as general or recreation grounds, subject to the rules governing their administration.

Section 1915. Disposition of Township Forests. Precedure. Ordinance. Submission of Question. Whenever the township commissioners deem it expedient to alienate any forest, or part thereof, they shall so declare in an ordinance, wherein shall be set forth all the facts and conditions relating to the proposed action, which proposed ordinance shall be advertised once a week for three weeks prior to its passage. No ordinance shall be effective in legalizing such alienation until it has been approved by a majority vote of the people at the next ensuing election.

Section 1916. Appropriation of Moneys to Forestry Organizations. The commissioners of any township may appropriate moneys from their respective treasuries to any forest protection association co-operating in forest work with the State Department of Forests and Waters, or to be expended in direct co-operation with said Department of Forests and Waters in forest work.

#### ARTICLE XX

##### ACTIONS BY AND AGAINST TOWNSHIPS

Section 2001. Supervisors to Bring and Defend Suits. All suits by a township shall be brought and conducted by the township supervisors. In all suits against a township, process shall be served upon and defence made by the township supervisors.

Section 2002. Right of Taxpayers to Inquire Into Judgments. Any taxpayer of any township may inquire into the

validity of any judgment, or defend the township in any suit or judgment, upon filing a petition with the court of common pleas of the county in which suit is pending or judgment exists, accompanied by an affidavit that the taxpayer believes that injustice will be done to the township in such suit or judgment. Whenever it is deemed necessary the court may order such taxpayer to file a bond, with one or more sureties, to be approved by the court, to save harmless the township from all costs that may accrue in such proceeding subsequent to the filing of such petition.

Section 2003. Appeals by taxpayers. Whenever a judgment is rendered by any justice of the peace or alderman against any township, and a right of appeal is given to such township, and for ten days immediately after the rendition of such judgment the township officials neglect to perfect an appeal, any taxpayer of such township may take an appeal, in behalf of the township, from such judgment to the court of common pleas of the county, within the time prescribed for the taking of such appeal.

Section 2004. Affidavit and Bail by Taxpayers. In taking the appeal the taxpayer shall make an affidavit that the same is not taken for the purpose of delay, but because he verily believes that injustice has been done. The taxpayer shall pay the costs of the appeal, and enter sufficient bail for the payment of all costs before the justice of the peace or alderman and all costs in the court of common pleas.

Section 2005. Taxpayers Parties to Suits. Upon the filing of such appeal in the court of common pleas of the county, the taxpayer shall be made a party to the suit, and shall have the right to defend such township therein.

Section 2006. Recovery of Municipal Claims. In addition to the remedies provided by law for the filing of liens for the collection of municipal claims, all townships may proceed for the recovery and collection of municipal claims by action of assumpsit against the person or persons who were the owner or owners of the property at the time of the completion of the improvement, notwithstanding the fact that there was a failure on the part of any such township, or its agents, to enter any such municipal claim as a lien against the property assessed for the improvement, and for the recovery of which the action of assumpsit was brought. Any such action in assumpsit shall be commenced within three years after the completion of the improvement from which said claim arises.

This section shall extend to all municipal claims where the improvement was heretofore made, where the action of assumpsit has been instituted under the provisions of prior acts of Assembly, and where the claim is not barred by the statute of limitations affecting actions of debt or assumpsit.

## ARTICLE XXI

### REPEALS

Note. The specific acts and sections to be cited for repeal are not printed, but will be attached to the bill introduced.

#### Exposition Showing Sources of the Various Provisions of the Proposed Second Class Township Law

Note: The word "Code" as used herein refers to the Township Code of July 14, 1917, P. L. 840.

Sec. 101 from Sec. 1, Code.

Sec. 102. New.

Sec. 103 from Sec. 2, Code.

Sec. 104 from Sec. 3, Code.

Sec. 105 from Sec. 4, Code.

Sec. 106 from Sec. 5, Code.

Sec. 107 from Sec. 6, Code.

Sec. 108 from Sec. 7, Code.

Sec. 109 from Sec. 9, Code.

Sec. 201 from Sec. 15, Code, which came from Sec. 6, Act of April 28, 1899, P. L. 104, as amended by Acts of May 11, 1901, P. L. 160, April 1, 1905, P. L. 97, and May 29, 1907, P. L. 305. The section has been redrafted since classification will not depend alone on population, but a change of class requires also the consent of the electors.

Secs. 205 to 227 represent a consolidation of (a) Secs. 20 to 28 of the Code taken originally from Secs. 13 and 14, Act of April 15, 1834, P. L. 537, Sec. 1, Act of April 25, 1864, P. L. 489, Secs. 1, 2 and 4, Act of April 24, 1857, P. L. 304, Sec. 32, Act of April 5, 1849, P. L. 555, and Sec. 1, Act of April 12, 1866, P. L. 109; (b) Secs. 35 and 36, Code, which in turn came from Act of March 14, 1905, P. L. 36; and

(c) Secs. 40 to 65, Code, which in turn came from Secs. 13 and 14, Act of April 15, 1834, P. L. 537, Sec. 1, Act of April 26, 1854, P. L. 489, Secs. 1, 2, and 4, Act of March 14, 1857, P. L. 93, Sec. 2, Act of April 24, 1857, P. L. 304, Act of April 22, 1905, P. L. 288, Act of April 4, 1907, P. L. 44, Sec. 1, Act of May 8, 1876, P. L. 136, Sec. 1, Act of April 12, 1866, P. L. 109. These sections, 205 to 224, change the procedure materially, and require the consent of a majority of the electors of all the townships affected before a new township may be created. In the case of the reestablishment of townships of the second class a procedure has been added to allow a first class township to become a township of the second class even though it still has sufficient population to make it a first class township.

Sec. 235 is new, and provides a uniform method to secure officers for new townships.

Sec. 240 consolidates the Acts of May 8, 1919, P. L. 130, and April 29, 1925, P. L. 359.

Sec. 301 from Sec. 95, Code, which came from Act of May 24, 1847, P. L. 203.

Secs. 302 to 307 are a consolidation of (a) Secs. 70 to 73, Code, which came from Secs. 13 and 14, Act of April 15, 1834, P. L. 537, Sec. 1, Act of April 26, 1854, P. L. 489, and Secs. 1 and 2, Act of May 1, 1861, P. L. 539; and (b) Secs. 80 to 83, Code, which came from Act of June 3, 1893, P. L. 284.

Sec. 401 from Sec. 140, Code, which came from Sec. 84, Act of April 15, 1834, P. L. 537.

Sec. 402 from Sec. 141, Code.

Sec. 410 from Sec. 145, Code, which came from Sec. 4, Act of July 22, 1913, P. L. 915.

Sec. 411 from Sec. 150, Code, the last clause of which came from Sec. 1, Act of May 18, 1876, P. L. 179.

Sec. 412 from Sec. 160, Code, which came from Sec. 1, Act of February 14, 1889, P. L. 7.

Sec. 413 from Sec. 162, Code.

Sec. 414 from Sec. 170, Code, which came from Sec. 1, Act of June 6, 1893, P. L. 333.

Sec. 415. New. Necessitated by change of fiscal year from the first Monday of December to the first Monday of January.

Sec. 420 from Sec. 180, Code, taken from Sec. 83, Act of April 15, 1834, P. L. 537, and Sec. 16, Act of July 22, 1913, P. L. 915. The order of appointment has been reversed. The supervisors are first given power to fill the vacancy and upon their failure the court may act.

Sec. 421 from Sec. 181, Code, which came from Sec. 21, Act of March 11, 1842, P. L. 62, and Sec. 83, Act of April 15, 1834, P. L. 537.

Sec. 422 from Sec. 182, Code.

Sec. 423 from Sec. 183, Code, which came from Sec. 1, Act of June 2, 1895, P. L. 434, Sec. 2, Act of June 25, 1885, P. L. 187, and Secs. 1 and 2, Act of April 27, 1909, P. L. 245.

Sec. 501 from Sec. 190, Code, which came from Sec. 86, Act of April 15, 1834, P. L. 537.

Sec. 502 from Sec. 191, Code, which came from Sec. 1, Act of May 25, 1907, P. L. 225.

Sec. 503 from Sec. 192, Code, taken from Sec. 1, Act of March 22, 1907, P. L. 27.

Sec. 504 from Sec. 193, Code, taken from Sec. 2, Act of March 22, 1907, P. L. 27.

Sec. 510 from Sec. 230, Code, taken from Sec. 4, Act of July 22, 1913, P. L. 915.

Sec. 511 from Sec. 231, Code, taken from Sec. 1, Act of July 11, 1915, P. L. 947, amending Sec. 5, Act of July 22, 1913, P. L. 915. The section has been redrafted to require the secretary and treasurer to be the same person except where a bank acts as treasurer.

Sec. 512 from Sec. 232, Code, which came from part of Sec. 3, Act of June 11, 1915, P. L. 947, amending Act of July 22, 1913, P. L. 915. A change allows supervisors to meet no more than twice each month.

Sec. 513 from Sec. 233, Code, which came from part of Sec. 17, Act of July 22, 1913, P. L. 915.

Sec. 514 from Sec. 234, Code, which came from part of Sec. 6, Act of July 22, 1913, P. L. 915.

Sec. 515 from Sec. 235, Code, as amended by Acts of April 4, 1919, P. L. 43, May 4, 1927, P. L. 711, March 7, 1929, P. L. 13. The original Code section came from part of Sec. 3, Act of July 11, 1915, P. L. 947, amending Sec. 15, Act of July 22, 1913, P. L. 915, and from part of Sec. 6, Act of July 22, 1913, P. L. 915. The section has been clarified.

- Sec. 516 from Sec. 236, Code, which came from Sec. 7, Act of July 22, 1913, P. L. 915.
- Sec. 517 from Sec. 237, Code, which came from part of Sec. 6, Act of July 22, 1913, P. L. 915.
- Sec. 518 from Sec. 233, Code, which came from Sec. 21, Act of July 22, 1913, P. L. 915.
- Sec. 519 from Act of May 22, 1923, P. L. 315.
- Sec. 520 from Sec. 239, Code, which came from part of Sec. 18, Act of July 22, 1913, P. L. 915.
- Sec. 521 from Sec. 240, Code, as amended by Act of April 30, 1925, P. L. 402. The original Code section came from Sec. 19, Act of July 22, 1913, P. L. 915, and Sec. 92, Act of April 15, 1834, P. L. 537.
- Sec. 530 from Sec. 285, Code, which came from Sec. 2, Act of June 11, 1915, P. L. 947, amending Sec. 9, Act of July 22, 1913, P. L. 915, and also from Sec. 95, Act of April 15, 1834, P. L. 537.
- Sec. 531 from Sec. 286, Code, as amended by Act of June 28, 1923, P. L. 887. The original Code section came from Sec. 97, Act of April 15, 1834, P. L. 537, and part of Sec. 1, Act of June 11, 1915, P. L. 947, amending Sec. 5, Act of July 22, 1913, P. L. 915. The matter added to the Code by the amendment of 1923 came as the result of the decision in Manor Township Auditor's Report, 37 Lanc. L.R. 167; s. c. 29 D.R. 1001, wherein it was held that the combined salary of the secretary and treasurer might include borrowed money.
- Sec. 532 from Sec. 287, Code, which came from part of Sec. 2, Act of June 11, 1915, P. L. 947, amending Sec. 9, Act of July 22, 1913, P. L. 915; also from Sec. 96, Act of April 15, 1834, P. L. 937.
- Sec. 533 from Sec. 260, Code, which came from Sec. 1, Act of May 16, 1857, P. L. 537.
- Sec. 534 from Sec. 261, Code, which came from Sec. 98, Act of April 15, 1834, P. L. 537.
- Sec. 535. New.
- Sec. 540 from Sec. 310, Code, which came from Sec. 99, Act of April 15, 1834, P. L. 537, and Sec. 1, Act of June 11, 1915, P. L. 947, amending Sec. 5, Act of July 22, 1913, P. L. 915. Section brought in accord with Sec. 531. See notes to this section.
- Sec. 541 from Sec. 311, Code, which came from Sec. 100, Act of April 15, 1834, P. L. 537.
- Sec. 542 from Sec. 312, Code, which came from Sec. 101, Act of April 15, 1834, P. L. 537.
- Sec. 545 from Sec. 325, Code, as amended by Acts of May 7, 1923, P. L. 156, and May 21, 1923, P. L. 291. The original Code Section came from Sec. 102, Act of April 15, 1834, P. L. 537, and from Sec. 1, Act of May 3, 1909, P. L. 392, and from Sec. 2, Act of May 20, 1913, P. L. 254, amending Sec. 1, Act of June 1, 1911, P. L. 865.
- Sec. 546 from Sec. 326, Code, which came from Secs. 50, 51, and 105, Act of April 15, 1834, P. L. 537. Provision was made for the issuing of subpoenas and attachments for auditors by justices of the peace.
- Sec. 547 from Sec. 327, Code, which came from Sec. 2, Act of May 3, 1909, P. L. 392, and Sec. 3, Act of May 20, 1913, P. L. 254, amending Act of June 9, 1911, P. L. 865. Optional provisions for the posting of auditors' reports instead of advisings were added.
- Sec. 548 from Sec. 328, Code, which came from Sec. 5, Act of May 3, 1909, P. L. 392.
- Sec. 549 from Sec. 329, Code, which came from Sec. 6, Act of May 3, 1909, P. L. 392. Penalty changed to summary proceedings.
- Sec. 550 from Sec. 330, Code, which came from Secs. 1 and 2, Act of April 27, 1909, P. L. 261.
- Sec. 551. New.
- Sec. 552 from Sec. 331, Code, which came from Sec. 1, Act of May 31, 1913, P. L. 394. Powers were conferred on auditors to collect surcharges.
- Sec. 553 from Sec. 332, Code, which came from Sec. 4, Act of May 20, 1913, P. L. 254, amending Sec. 3, Act of June 9, 1911, P. L. 865.
- Sec. 554 from Sec. 333, Code, which came from Sec. 4, Act of May 20, 1913, P. L. 254, amending Sec. 3, Act of June 9, 1911, P. L. 865.
- Sec. 555 from Sec. 334, Code, which came from Sec. 2, Act of May 31, 1913, P. L. 394.
- Sec. 556 from Sec. 335, Code, which came from Sec. 2, Act of April 21, 1915, P. L. 162.
- Sec. 557 from Sec. 336, Code, which came from Sec. 3, Act of May 31, 1913, P. L. 394.
- Sec. 558, from Sec. 337, Code, which came from Sec. 3, Act of May 31, 1913, P. L. 394, and Sec. 4, Act of May 20, 1913, P. L. 254, amending Sec. 3, Act of June 9, 1911, P. L. 865.
- Sec. 559, from Sec. 338, Code, which came from Sec. 1, Act of April 21, 1915, P. L. 162.
- Sec. 560 from Sec. 339, Code, which came from part of Sec. 3, Act of May 31, 1913, P. L. 394.
- Sec. 561 from Sec. 340, Code, which came from Sec. 6, Act of May 6, 1844, P. L. 564.
- Sec. 562 from Sec. 341, Code, which came from Sec. 4, Act of June 9, 1911, P. L. 865, which supplied the Act of May 11, 1901, P. L. 185, as to townships, and also Sec. 4, Act of May 3, 1909, P. L. 392.
- Sec. 563 from Act of April 22, 1929, P. L. 630.
- Sec. 570 from Sec. 365, Code.
- Sec. 571 from Sec. 366, Code, which came from Sec. 1, Act of June 6, 1893, P. L. 333, and Sec. 1, Act of May 8, 1909, P. L. 474, amending Sec. 3, Act of June 25, 1885, P. L. 187.
- Sec. 575 from Sec. 367, Code.
- Secs. 580, 581 and 582, new.
- Secs. 585, 586 and 587, new.
- Secs. 590, 591, 592 and 593 are a consolidation of Secs. 355, 356, 357 and 358, Code, as amended by Act of May 2, 1929, P. L. 1535, and Act of April 5, 1917, P. L. 47.
- Sec. 594 from Sec. 2, Act of July 14, 1897, P. L. 266.
- Sec. 601 from Sec. 195, Code, as amended by Act of April 4, 1925, P. L. 125. The 1917 Code section came from Sec. 1, May 8, 1913, P. L. 159.
- Sec. 602 from Sec. 196, Code, as amended by Acts of March 31, 1921, P. L. 86, May 16, 1921, P. L. 564, and June 29, 1923, P. L. 916. The 1917 Code section came from Sec. 2, Act of May 8, 1913, P. L. 159.
- Sec. 603 from Sec. 197, Code, as amended by Acts of May 16, 1921, P. L. 564, June 29, 1923, P. L. 916, and April 23, 1927, P. L. 482. The 1917 Code section came from Sec. 3, Act of May 8, 1913, P. L. 159.
- Sec. 604 from Sec. 198, Code, as amended by Act of June 29, 1923, P. L. 916. The 1917 Code section came from Sec. 4, Act of May 8, 1913, P. L. 159.
- Secs. 610, 611, 612, 613 and 614 from Act of May 5, 1921, P. L. 397. Sec. 2, Act of 1921, P. L. 397, was amended by Act of June 29, 1923, P. L. 944, and Sec. 4, by Act of April 23, 1927, P. L. 375.
- Sec. 701 from Sec. 385, Code, which came from Sec. 3, Act of April 15, 1834, P. L. 537. The powers have been amplified.
- Sec. 702, Clause I from Sec. 386, Clause I, Code, which came from Sec. 2, Act of April 15, 1909, P. L. 168.
- Sec. 702, Clause II from Sec. 386, Clause II, Code, as amended by act of March 27, 1923, P. L. 33, and Act of April 27, P. L. 464. The original 1917 Code clause came from Act of May 28, 1913, P. L. 371.
- Sec. 702, Clause III from Sec. 386, Clause III, Code, which came from Act of May 25, 1907, P. L. 231.
- Sec. 702, Clause IV. New.
- Sec. 702, Clause V from Sec. 386, Clause V, Code, which came from Sec. 3, Act of April 28, 1876, P. L. 51.
- Sec. 702, Clause VI from Sec. 386, Clause VI, Code, which came from Sec. 1, Act of June 25, 1895, P. L. 298.
- Sec. 702, Clause VII from Sec. 386, Clause IX, Code, which came from Sec. 1, Act of May 5, 1911, P. L. 165.
- Sec. 702, Clause VIII added to Code by Act of April 3, 1929, P. L. 129.
- Sec. 702, Clause IX from Clause X, Act of May 6, 1927, P. L. 844, amending Sec. 233, Code.
- Sec. 702, Clause X from Sec. 386, Clause IV, Code, as amended by Acts of May 16, 1921, P. L. 564, May 17, 1921, P. L. 357, and April 10, 1929, P. L. 470. The Code clause came from Sec. 8, Act of July 22, 1913, P. L. 915, and Sec. 27 Act of June 13, 1836, P. L. 551.
- Sec. 702, Clause XI from Act of April 23, 1923, P. L. 90.
- Sec. 702, Clause XII. New.
- Sec. 702, Clause XIII. New, but includes also Act of April 27, 1925, P. L. 305.
- Sec. 702, Clause XIV from Sec. 386, Clause VII, Code, which came from Sec. 1, Act of March 15, 1909, P. L. 33.
- Sec. 702, Clause XV from Sec. 386, Clause VIII, Code, which came from Sec. 1, Act of June 26, 1895, P. L. 332.
- Sec. 702, Clause XVI from Act of May 12, 1921, P. L. 544.
- Sec. 702, Clause XVII from Act of May 3, 1923, P. L. 136.

- Sec. 702, Clause XVIII from Act of June 5, 1913, P. L. 419.  
 Sec. 702, Clause XIX from Act of April 30, 1925, P. L. 371.  
 Sec. 702, Clause XX from Act of May 5, 1921, P. L. 381.  
 Sec. 801. New.  
 Sec. 802 from Sec. 386, Clause IV, Code, as amended by Acts of May 16, 1921, P. L. 564, May 17, 1921, P. L. 587, and April 10, 1929, P. L. 470. The Code clause came from Sec. 8, Act of July 22, 1913, P. L. 915 and Sec. 27, Act of June 13, 1836, P. L. 551. The section has been rewritten and the amount of purchases requiring contracts was raised from \$100.00 to \$300.00 and a clause added prohibiting the splitting of contracts.  
 Sec. 803 from Act of May 10, 1917, P. L. 158, as amended by Act of March 29, 1929, P. L. 106.  
 Sec. 804 from Sec. 1235, Code, which came from Act of May 1, 1913, P. L. 155.  
 Sec. 805 from Act of July 18, 1917, P. L. 1083.  
 Sec. 806 from Act of April 22, 1927, P. L. 350. The provisions have been restricted to township contracts.  
 Sec. 901 from Sec. 439, Code, which came from Sec. 12, Act of July 22, 1913, P. L. 915. Altered by providing for the fiscal year to commence on the first Monday in January instead of expiring on the day before the first Monday in December.  
 Sec. 902 from Sec. 420, Code, which came from Sec. 11, Act of July 22, 1913, P. L. 915. Clause permitting supervisors to transfer moneys from certain funds is added.  
 Sec. 903 from Sec. 436, Code, as amended by Act of July 15, 1919, P. L. 969. The Code section came from Sec. 5, Act of July 22, 1913, P. L. 915, as amended by Sec. 1, Act of June 11, 1915, P. L. 947.  
 Sec. 904 from Act of July 6, 1917, P. L. 747, as amended by Act of April 11, 1929, P. L. 518.  
 Sec. 905 from Sec. 421, Code, as amended by Act of May 16, 1921, P. L. 575, Clause V added by Act of May 20, 1921, P. L. 959, and amended by Acts of March 30, 1927, P. L. 82, May 4, 1927, P. L. 707, April 3, 1929, P. L. 129, and April 18, 1929, P. L. 616; the source matter of the Code section is as follows: First paragraph from Sec. 5, Act of July 22, 1913, P. L. 915, as amended by Sec. 1, Act of July 11, 1915, P. L. 947; Clause I from Act of July 22, 1913, P. L. 915, as amended by Act of June 11, 1915, P. L. 947; Clause II from Act of May 11, 1901, P. L. 169; Clause III from Act of April 23, 1909, P. L. 168; Clause IV from Sec. 3, Act of July 26, 1895, P. L. 324; paragraph 6 from Sec. 5, Act of July 22, 1913, P. L. 915, as amended by Sec. 1, Act of June 11, 1915, P. L. 947; and Act of April 15, 1834, P. L. 509.  
 Sec. 906 from Act of May 4, 1927, P. L. 738.  
 Sec. 907 from Sec. 422, Code, which came from Act of March 31, 1864, P. L. 162.  
 Sec. 908 from Sec. 423, Code, as amended by Act of April 30, 1925, P. L. 412. The Code section came from Sec. 14, Act of July 22, 1913, P. L. 915. The provisions relating to date of issue of duplicates is from Act of June 29, 1923, P. L. 965.  
 Sec. 909 from Sec. 424, Code, which came from Sec. 7, Act of June 25, 1885, P. L. 187, as amended by Sec. 1, Act of May 1, 1909, P. L. 305.  
 Sec. 910 from Sec. 425, Code, which came from Secs. 1 and 3, Act of May 5, 1911, P. L. 170. The requirement of affidavit before payment by tax collector is omitted.  
 Sec. 911 from Sec. 427, Code, as amended by Act of June 29, 1923, P. L. 916; the Code section came from Sec. 14, Act of July 22, 1913, P. L. 915. The provision fixing five per centum flats commission for the collection of special taxes is omitted.  
 Sec. 912 from Sec. 428, Code, as amended by Act of June 29, 1923, P. L. 947; the Code section came from Sec. 14, Act of July 22, 1913, P. L. 915. The provisions as to settlement by tax collector have been altered by requiring yearly settlement instead of at the end of the term.  
 Sec. 913 from Sec. 429, Code, as amended by Act of June 29, 1923, P. L. 947; the Code section came from Sec. 2, Act of May 5, 1911, P. L. 170.  
 Sec. 914 from Sec. 430, Code, which came from Sec. 48, Act of April 15, 1834, P. L. 509.  
 Sec. 915 from Sec. 431, Code, which came from Sec. 11, Act of June 25, 1885, P. L. 187.  
 Secs. 1001, 1002, 1003, 1004, 1005, 1006, 1007, 1008, 1009, 1010, 1011, 1012, 1013, 1014, 1015, 1020, 1021, 1022, 1023, 1024, 1025, 1026, 1027, 1028, 1029, 1030, 1031, 1032, 1033, 1034, 1035, 1036, 1037, 1038, 1039, 1040, 1041, 1042, 1043, 1044, 1045, 1046, 1047, 1048, 1049, 1050, 1051, 1052, and 1053, composing Article X, include a complete system for eminent domain and the assessment of damages and benefits to cover all cases under the proposed Code in which such right is exercised and such procedure necessary. Portions of the provisions therein contained are taken from the numerous and varying provisions under the existing Code; others from a similar article in the Borough Code upon which this article is modeled.  
 Sec. 1101 from Sec. 640, Code.  
 Sec. 1105. New.  
 Sec. 1110 from Sec. 660, Code, as amended by Act of April 28, 1927, P. L. 493; the Code section came from Sec. 6, Act of June 13, 1836, P. L. 551, and Sec. 9, Act of April 28, 1899, P. L. 104.  
 Sec. 1111 from Act of April 1, 1925, P. L. 100.  
 Sec. 1112 from Act of May 9, 1929, P. L. 1702.  
 Sec. 1115 from Sec. 685, Code, which came from Sec. 1, May 5, 1911, P. L. 123; and from Sec. 686, Code, which was from Sec. 1, Act of May 5, 1911, P. L. 123, as amended by July 11, 1917, P. L. 777.  
 Sec. 1120 from Act of March 17, 1925, P. L. 38.  
 Sec. 1125 from Act of June 14, 1923, P. L. 801.  
 Sec. 1130 from Act of May 1, 1919, P. L. 93.  
 Sec. 1131 from Act of May 1, 1919, P. L. 93.  
 Sec. 1132 from Act of May 1, 1919, P. L. 93.  
 Sec. 1133 from Act of May 1, 1919, P. L. 93.  
 Sec. 1135 from Sec. 847, Code, as added by Act of April 28, 1927, P. L. 496.  
 Sec. 1136 from Sec. 848, Code, as added by Act of April 28, 1927, P. L. 496.  
 Sec. 1137 from Sec. 849, Code, as added by Act of April 28, 1927, P. L. 496.  
 Sec. 1138 from Sec. 849A, Code, as added by Act of April 28, 1927, P. L. 496.  
 Sec. 1140 from Sec. 850, Code, as added by Act of May 13, 1925, P. L. 673, amended by Act of May 22, 1927, P. L. 55, and Act of April 25, 1929, P. L. 769.  
 Sec. 1141 from Sec. 850, Code, as added by Act of May 13, 1925, P. L. 673, amended by Act of May 22, 1927, P. L. 55, and Act of April 25, 1929, P. L. 769.  
 Sec. 1142 from Sec. 851, Code, as added by Act of April 25, 1929, P. L. 769.  
 Sec. 1143 from Sec. 851, Code, as added by Act of April 25, 1929, P. L. 769.  
 Sec. 1144 from Sec. 852, Code, as added by Act of April 25, 1929, P. L. 769.  
 Sec. 1145 from Sec. 853, Code, as added by Act of April 25, 1929, P. L. 769.  
 Sec. 1146 from Sec. 854, Code, as added by Act of April 25, 1929, P. L. 769.  
 Sec. 1150 from Sec. 695, Code, covering provisions of Sec. 28, Act of June 13, 1836, P. L. 551.  
 Sec. 1151 from Sec. 696, Code, which came from Sec. 29, Act of June 13, 1836, P. L. 551.  
 Sec. 1152 from Sec. 699, Code, as amended by Act of May 10, 1921, P. L. 427; the Code section came from Secs. 32 and 67, Act of June 13, 1836, P. L. 551.  
 Sec. 1155 from Secs. 725 and 726, Code, as amended by Sec. 8, Act of May 16, 1921, P. L. 564.  
 Sec. 1156 from Sec. 727, Code, as added by Sec. 8, Act of May 16, 1921, P. L. 564, and amended by Act of June 14, 1923, P. L. 773, Act of April 29, 1925, P. L. 365, and Act of April 21, 1927, P. L. 337. This section is altered by providing permits to be issued by township authorities and the fees therefrom payable into the township treasury, and adding a penal clause.  
 Sec. 1160 from Sec. 735, Code, as amended by Sec. 1, Act of May 16, 1921, P. L. 554; the Code section came from Sec. 61, Act of June 13, 1836, P. L. 551.  
 Sec. 1161 from Sec. 737, Code, which came from Sec. 1, Act of April 23, 1909, P. L. 171, Sec. 739, Code, which came from Sec. 1, Act of April 23, 1909, and Sec. 69, Act of June 13, 1836, P. L. 551. (Code section 736, providing penalty for supervisors, omitted).

#### Proposed Township Reward Law

An Act establishing and regulating a system of township reward, enabling the Commonwealth to assist financially, townships of the second class in the construction, improvement and maintenance of township roads, the erection and construction of township bridges and the purchase and installation of culvert and drain pipe; defining the powers and duties of county commissioners, township supervisors and the State Department of Highways in relation thereto; and repealing existing laws relating thereto.

Section 1. Township Reward System Established. Be it enacted by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, and it is hereby enacted by the authority of the same, That a system of township reward is hereby established by the Commonwealth to assist townships of the second class in the construction, improvement and maintenance of township roads, the erection and construction of township bridges, and the purchase and installation of culvert and drain pipe.

Section 2. Apportionment of Appropriations. The moneys appropriated by the General Assembly for township reward for the fiscal biennium commencing June first, one thousand nine hundred and thirty-three, and for each biennium thereafter, shall be apportioned by the State Department of Highways among the several counties of the Commonwealth in proportion to the number of miles of township road located in townships of the second class. Not more than fifteen per centum of any appropriation apportioned to any county shall be available in any one township in such county. But in case any excess in the amount set aside for use in a county remains after all applications from the several townships in the county have been considered, the State Department of Highways shall apportion the excess among the townships that have applications on file for more than fifteen per centum. If there are not enough applications from all the townships in a county, filed on or before May first of the year next succeeding the appropriation, to exhaust the apportionment of township reward to such county, then such excess shall be apportioned to the counties where the applications of the townships call for the expenditures of a sum greater than the amount originally apportioned to said county.

Applications filed under laws existing prior to the passage of this act for which agreements have not been issued by the State Department of Highways, because of insufficient funds, to the several townships on or before May first, one thousand nine hundred and thirty-two, shall be void unless reaffirmed by the township supervisors on or before May first, one thousand nine hundred and thirty-three, and biennially thereafter all applications on file shall be void unless reaffirmed on or before May first of each odd-numbered year.

All moneys appropriated for the fiscal biennium June first, one thousand nine hundred and thirty-one to June first, one thousand nine hundred and thirty-three, shall be apportioned by the Department of Highways among the several counties in proportion to the estimated rewards payable on all applications filed with the Department of Highways, under laws existing prior to the passage of this act, on or before September thirtieth, one thousand nine hundred and thirty. If any township or townships shall fail to take up any apportionment allotted to it or them for the fiscal biennium one thousand

nine hundred and thirty-one to one thousand nine hundred and thirty-three, on or before January first, one thousand nine hundred and thirty-two, then such moneys shall be applied to any unsatisfied applications on file on or before September thirtieth, one thousand nine hundred and thirty, in the order of their date of filing.

Section 3. Applications for Township Reward. Applications for township reward for the construction and improvement of township roads, and for the erection and construction of township bridges shall be made by the township supervisors of townships of the second class, on or before May first of each year, and annually thereafter to the State Department of Highways on blanks furnished by the department, which application shall be considered by the department by counties in the order of filing. Application for the improvement of a road, previously improved with the aid of reward moneys, may be made, but not for a lower type of improvement.

Section 4. Classes of Improvements. Rewards shall be granted by the Commonwealth only for improvements at least one-fourth mile in length (except bridges, pipes and drains) of the following classes:

(a) Grading and draining a section of road including any stream change.

(b) Using gravel, granulated slag, cinders, or other approved materials on a graded and drained road.

(c) Constructing a road with broken stone, air-cooled slag, or other approved materials base and broken stone, granulated slag, air-cooled slag, gravel, cinders or other approved material top on a graded and drained road.

(d) Constructing a bituminous surface treated macadam road constructed of broken stone or air-cooled slag or traffic bound stage construction macadam road on a graded and drained road.

(e) Constructing a bituminous surface road of stone or air-cooled slag.

(f) Constructing a concrete or buck road.

(g) Erection and construction of bridges, three feet or more span, of concrete or stone, or both, or steel bridges with floor, constructed of materials approved by the State Department of Highways.

(h) Purchase and installation of culvert and drain pipes.

Section 5. Amount of Reward Based on Assessed Valuations. The amount of reward payable by the Commonwealth for any improvement shall be as follows:

(a) In townships having an assessed valuation of twenty thousand dollars (\$20,000) per mile of road or less, seventy-five per centum (75%) of the actual cost of the improvement.

(b) In townships having an assessed valuation per mile of road of more than twenty thousand dollars (\$20,000), but less than thirty thousand dollars (\$30,000), sixty per centum (60%) of the actual cost of the improvement.

(c) In townships having an assessed valuation per mile of road of thirty thousand dollars (\$30,000) and more, fifty per centum (50%) of the actual cost of the improvement.

Section 6. Standard Widths on Which Rewards Based. No reward shall be paid for the improvement of any road where the improvement is of less width than sixteen feet.

Section 7. Primary System of Township Roads. In each county there shall be established, as soon as possible, a primary system of township roads. Roads on the primary system shall be selected with respect to the accommodation afforded to the traveling public to reach centers of population within and without the county. The primary system of township roads shall be established by the county commissioners of each county and the supervisors of the several townships within the county, but shall not be deemed finally adopted until it has been approved by the State Department of Highways. After such final adoption, the county commissioners and supervisors may, from time to time, with the approval of the Department of Highways, add additional spurs or roads to, or eliminate roads from, such primary system. All roads not on the primary system shall be secondary township roads. When the system of primary roads has been finally adopted in any county, no township reward moneys, appropriated by the Commonwealth, shall thereafter be allocated for expenditure in any township except for improvements on such primary road system: Provided, however, That reward moneys may be expended for culvert and drain pipes and bridges on the secondary system of township roads.

Section 8. Letting Contracts. Township Authorized to Do Work. All township reward improvements may be made by

the township supervisors of such township by contract, to be let by the township supervisors to the lowest responsible bidder after three weeks publication in at least two newspapers published in the county in which such township is located if so many are published in such county, or such improvements may be made partly by the township and partly by contract, to be let only after advertisement as hereinbefore provided. All the work of making said improvement may be done by the township.

Section 9. Approval of Plans and Specifications. Before any roads are constructed or improved or bridges are erected or constructed under the township reward system, the supervisors of the township asking for township reward shall furnish to the State Department of Highways a copy of the plans and specifications of the proposed improvement, together with estimates of the cost of such improvement, unless such plans and estimates have been made by said department. No reward shall be paid to any township until the State Department of Highways has approved the plans and specifications as filed in the department. When such plans and specifications have been approved, the department shall certify to the township supervisors the proportion of the cost of such improvement which the Commonwealth agrees to pay.

Section 10. Failure to Commence Improvements in Time. Partial and Final Payments of Reward Moneys. The actual work of construction and improvement of any township reward road or other reward project shall be commenced within the time specified by the State Department of Highways. If not so commenced the department shall have power to withdraw its allocation of reward moneys for the improvement. When any township reward improvement has been completed to the extent of sixty per centum, the department shall in cases where the total amount of reward is two thousand dollars (\$2,000) or more, pay to the township fifty per centum of the reward moneys, except where the improvement is for the construction of a traffic bound road, in which case the department shall apportion the total amount of reward moneys allocated into three equal sums, and one such equal sum shall be paid to the township each year over a three-year period as the work for each year is completed. Final payments of reward moneys due, whether the total or the part remaining unpaid, shall in all cases be made when the improvement is finally completed.

When any partial or annual payment is due any township, or upon completion of the work for which township reward has been granted, according to the plans, specifications and contract, as shown in either case, by the sworn statement of a majority of the board of township supervisors and such other evidence as the department may require, the department shall certify to the Auditor General the amount of township reward due said township and he shall draw a warrant upon the State Treasurer to the township treasurer which shall be paid out of moneys appropriated for such purposes.

Section 11. Maintenance of Township Reward Roads. State Aid. Any township road improved under the reward system, shall be maintained by the township in accordance with standards prescribed by the Department of Highways, but the Commonwealth shall contribute towards the cost of such maintenance.

The amount contributed by the Commonwealth shall not exceed fifty per centum of such cost of maintenance in townships having an assessed valuation of more than thirty thousand dollars (\$30,000) per mile of road, or sixty per centum in townships having an assessed valuation of more than twenty thousand dollars (\$20,000) per mile of road but less than thirty thousand dollars (\$30,000), or seventy-five per centum in townships having an assessed valuation of twenty thousand dollars (\$20,000), or less per mile of road of the yearly maintenance expense, and in the case of bituminous surface treatment, shall not exceed four hundred dollars (\$400) per mile in townships having an assessed valuation of more than thirty thousand dollars (\$30,000) per mile of road, or four hundred and eighty dollars (\$480) per mile in townships having an assessed valuation of more than twenty thousand dollars (\$20,000) but less than thirty thousand dollars (\$30,000) per mile of road, or six hundred dollars (\$600) per mile in townships having an assessed valuation of twenty thousand dollars (\$20,000) or less per mile of road; and in all other cases shall not exceed one hundred dollars (\$100) per mile in townships having an assessed valuation of more than twenty thousand dollars (\$20,000) per mile of road, or one hundred and twenty dollars (\$120) per mile in

townships having an assessed valuation of more than twenty thousand dollars (\$20,000) but less than thirty thousand dollars (\$30,000) per mile of road, or one hundred and fifty dollars (\$150) per mile in townships having an assessed valuation of twenty thousand dollars (\$20,000) or less per mile of road.

The aid of the Commonwealth shall be based only upon road surfaces of gravel, shale, cinder, slag, broken stone, asphalt, bituminous surface treated macadam, or other approved material of a width of sixteen feet and a length of one mile. Corresponding reduction or addition in the amount of maintenance aid shall be made as the width of the improved road surface is decreased or increased. No maintenance aid shall be paid for any road having less than nine feet of improved road surface.

Township reward roads shall be maintained by the supervisors, but such maintenance, where the State contributes, shall be done only under the supervision of the Department of Highways.

Before any maintenance work is performed to which the Commonwealth is to contribute, the supervisors of the township shall petition for aid on forms prepared and furnished by the Department of Highways, showing the nature of the maintenance work to be done with estimates of the cost of such work. If the petition and estimate is approved by the Department of Highways it shall certify to the township supervisors the portion of the cost of maintenance which the Commonwealth agrees to pay. Where the cost of maintenance is more or less than that set forth in the contract, a proper increase or deduction in the aid shall be made by the Commonwealth not, however, exceeding the limitation provided in this section.

Upon final completion of any maintenance work for which aid has been granted by the Commonwealth, the supervisors shall furnish to the Department of Highways a sworn statement of the expenditures and such other evidence as the department shall require, and the department shall certify to the Auditor General the amount due the township, which shall be paid in the usual manner out of moneys appropriated for such purposes.

Section 12. Refusal or Neglect to Comply With Rules and Regulations. Upon the neglect or refusal of the supervisors of any township to carry out the instruction, rules and regulations of the State Department of Highways, then the department may withhold from such township the amount to which it would otherwise be entitled for the year in which said neglect or refusal occurred.

Section 13. Repeal. Saving Clause. The following acts and parts of acts are hereby repealed absolutely:

I. Sections four hundred and thirty-two, four hundred and thirty-three, four hundred and thirty-four, four hundred and thirty-five, four hundred and thirty-six, four hundred and thirty-seven, and four hundred and thirty-eight of the act approved the fourteenth day of July, one thousand nine hundred and seventeen (P. L. 840), entitled "An act concerning townships; and revising, amending, and consolidating the law relating thereto."

II. The act approved the fifteenth day of July, one thousand nine hundred and nineteen, (P. L. 969), entitled "An act to amend the act, approved the fourteenth day of July, one thousand nine hundred and seventeen (Pamphlet Laws, eight hundred forty), entitled 'An act concerning townships; and revising, amending, and consolidating the law relating thereto.'"

III. The act approved the twenty-first day of April, one thousand nine hundred and twenty-seven, (P. L. 334), entitled "An act to further amend section four hundred and thirty-four of the act approved the fourteenth day of July, one thousand nine hundred and seventeen (Pamphlet Laws, eight hundred forty), entitled 'An act concerning townships; and revising, amending, and consolidating the law relating thereto.'"

IV. The act approved the twenty-eighth day of April, one thousand nine hundred and twenty-seven, (P. L. 504), entitled "An act to amend section four hundred and thirty-four of the act, approved the fourteenth day of July, one thousand nine hundred and seventeen (Pamphlet Laws, eight hundred forty), entitled 'An act concerning townships; and revising, amending, and consolidating the law relating thereto,' as amended."

V. The act approved the first day of May, one thousand nine hundred and twenty-nine (P. L. 1057), entitled "An act to amend sections four hundred and thirty-two and four hun-

dred and thirty-four of the act, approved the fourteenth day of July, one thousand nine hundred and seventeen (Pamphlet Laws, eight hundred forty), entitled 'An act concerning townships; and revising, amending and consolidating the law relating thereto,' as amended."

VI. The act approved the sixth day of May, one thousand nine hundred and twenty-nine, (P. L. 1543), entitled "An act to amend section four hundred and thirty-four of the act, approved the fourteenth day of July, one thousand nine hundred and seventeen (Pamphlet Laws, eight hundred forty), entitled 'An act concerning townships; and revising, amending, and consolidating the law relating thereto,' as amended."

VII. The act approved the seventh day of May, one thousand nine hundred and twenty-nine (P. L. 1584), entitled "An act to amend section four hundred and thirty-four of the act, approved the fourteenth day of July, one thousand nine hundred and seventeen (Pamphlet Laws, eight hundred forty), entitled 'An act concerning townships; and revising, amending, and consolidating the law relating thereto,' as amended."

VIII. Section one of the act approved the first day of May, one thousand nine hundred and twenty-nine (P. L. 1062), entitled "An act providing for assistance by the Commonwealth in the maintenance of township reward roads, and making an appropriation out of the Motor License Fund for such purposes."

IX. The act approved the first day of May, one thousand nine hundred and twenty-nine (P. L. 1056), entitled "An act providing for the Commonwealth to share in the cost of maintaining township reward roads."

But such repeal shall not be deemed to void any contract or any allocation of moneys made or any applications for township reward filed with the State Department of Highways under or in accordance with such repealed laws.

#### REPORT BY THE PENNSYLVANIA COMMITTEE ON UNEMPLOYMENT

Commonwealth of Pennsylvania,

Governor's Office, Harrisburg, Pa., February 10, 1931.

To the Honorable, the Members of the General Assembly of the Commonwealth of Pennsylvania:

I have the honor to present herewith a report just submitted to me by the Pennsylvania Committee on Unemployment.

GIFFORD PINCHOT.

Letter of Transmittal

Philadelphia, Pa., January 17, 1931.

Honorable Gifford Pinchot,  
Governor-elect of Pennsylvania,  
Harrisburg, Pennsylvania.

Sir:

Your committee on unemployment presents herewith our recommendations pertaining to administrative and legislative measures that we believe will alleviate some of the distress incident to this and to succeeding depressions. In this report we have endeavored to cover the essential items mentioned in your letter of invitation to membership, copy of which is presented in our report.

Your committee was also made the Pennsylvania Committee on Unemployment in the present crisis. We feel that our work in this endeavor is but well begun. We have created a county committee in every county of the State where a county-wide committee was not already at work. These county committees have made surveys of the need for relief in all parts of the county, and some urgent need has been discovered in sections not covered by agencies theretofore existing. These committees are co-operating with your State committee in pushing public works, particularly in the Spring of 1931. We believe that a determined and united effort to concentrate all public works, possible during March, April and May will push industry

permanently out of the present depression, so that private industry will be taking over its full activities by Autumn.

These committees are also co-operating in urging private employment by the householders in the State, by stimulating building construction where that is advisable and by suggestions as to stabilizing local industries.

We believe this work should be continued for the coming months.

Respectfully submitted,

Clyde L. King, chairman  
Paul H. Douglas, Secretary  
Mary Anderson  
John B. Andrews  
J. C. Benedict  
Jacob Billikopf  
Philip David Bookstaber  
Robert F. Brinton  
Marvin E. Bushong  
Morris L. Cooke

#### Letter of Invitation to Membership on the Pennsylvania Committee on Unemployment

Milford, Pa., October 10, 1930.

Dear—:

Unemployment has now become our most immediate problem. No class gains from it; all classes lose by it.

Unemployment creates fear. The workers can never breathe easily so long as this menace hangs over them. No state can really be prosperous when a large percentage of its citizens are unemployed. Our own state of Pennsylvania should not be the last to grapple with this problem; it should be among the first.

I am asking you, therefore, as part of the plan for a Greater Pennsylvania, to serve as a member of a committee to report to me not later than January 1 next on how the amount of unemployment may be reduced and how the condition of the unemployed and their families may be alleviated. I want the specific advice of the Committee as to what I, as Governor, can do, what the Legislature of Pennsylvania can do, and what all men and women of good-will can do in this matter.

I suggest that the following subjects among others deserve your attention:

#### 1. Seasonal fluctuations in demand for work.

Seasonal irregularities of demand create much unemployment. Despite this fact, several hundred employers, including many in our own state, have been fairly successful in regularizing their production and consequently their employment. I should like to have you consider the methods they have used, including attempts to change consumers' demands, to produce for stock under planned and budgeted schedules, to develop side lines, and to make working hours more flexible. The employers of Pennsylvania are peculiarly concerned with this phase of the problem.

## 2. Employment Agencies.

The practice of the private employment agencies and the relative efficiency of public agencies are here involved. Your recommendations toward enabling workers to find such work as is open more easily and more economically are especially desired. The present chaotic methods should give way to better and less wasteful means of bring workers and jobs together.

## 3. Unemployment due to changes in markets and manufacturing methods.

We can not turn back the clock of progress but we can see to it that the innocent shall suffer as little as possible because of the forward march of society. I ask you to consider whether our school system should be redirected to make young men and women industrially more flexible in a changing world, and how displaced adults can be re-trained for other jobs. In particular I would like you to report on whether other industries can be introduced in certain of the soft and hard coal areas of the state, and how the farmers can be protected against their present hardships.

## 4. A planned program of public work.

Should such a program include not only the federal government and the state, but the municipalities and counties as well? Can it be speeded up as private business falls off? If so, how should such a program be laid out and administered in Pennsylvania.

## 5. Stabilization of incomes during periods of unemployment.

It is highly improbable that unemployment can be entirely eliminated in the predictable future. Therefore, stabilization is necessary to protect families against want and to furnish that purchasing power which is needed to keep industrial establishments running which otherwise would be closed. I ask you to consider this also.

There are many other features of this question which will command your attention.

In conclusion let me say how much I shall appreciate your public spirit if you consent to serve. To remove insecurity from the lives of the workers and from industry as a whole is one of the greatest and most fundamental tasks of modern civilization.

Sincerely yours,  
(Signed) Gifford Pinchot

## CONTENTS

## Introduction

## Summary of Recommendations.

## Part One

## THE GENERAL REPORT

1. Seasonal Fluctuations and Unemployment.
2. Cyclical Fluctuations and Unemployment.
3. A Planned Program of Public Works for Pennsylvania.
4. The Better Organization of the Pennsylvania Supply of Labor.
  - A. A General Analysis.
  - B. The Public Employment Offices of Pennsylvania and Suggestions for Their Improvement.
  - C. The Better Regulation of the Private Employment Offices of Pennsylvania.
5. The Role of Education in the Struggle Against Unemployment.
6. The Organization of Relief.
7. Reserves Against Unemployment and Unemployment Insurance.

## Part Two

## DRAFTS OF PROPOSED LEGISLATION

- Appendix A. A constitutional amendment to provide more flexible bonding powers for local governments during periods declared to be unemployment emergencies.
- Appendix B. A constitutional amendment providing more flexible bonding power for the State government during periods declared to be unemployment emergencies.

Appendix C. An Act Creating a Commission for the Long Range Planning of Public Works in Pennsylvania.

Appendix D. An Act for the Better Organization of Public Employment Offices.

Appendix E. An Act for the Better Regulation of Private Employment Agencies.

Appendix F. An Act Prohibiting Charging Fees for Placement in Public Employment.

Appendix G. Two drafts of Bills to Provide Unemployment Reserve Funds.

(1) The draft of the American Association for Labor Legislation with contributions to the funds by employers.

(2) A draft to provide such a fund by joint contributions of workers and employers.

## Part Three

## REPORTS OF CERTAIN SUB-COMMITTEES

1. The Report of the Sub-Committee on Regularization by Private Employers.
2. The Report of the Sub-Committee on Education and Training.
3. Recommendations of the Sub-Committee on Relief to County Committees.

## INTRODUCTION

## Summary of Recommendations

Bringing our recommendations for specific action by the State of Pennsylvania together, we may summarize them as follows:

- I. Full efforts on the part of the State Department of Labor and Industry to stimulate private employers to stabilize their production and employment as completely as possible. The suggested means of accomplishing this to be by (a) conference, (b) consulting services of a properly qualified engineer or business man.
- II. A public works program for Pennsylvania which will include:
  - (1) The immediate preparation of a building program for State institutions of approximately \$10,000,000. This bill should be passed in the early days of the session and work started as soon as possible with the bulk of construction to be concentrated in 1931 rather than in 1932.
  - (2) The transfer of \$10,000,000 from the General Fund to the Motor License Fund and immediately pushing of highway construction.
  - (3) The requirement that contractors on State work should pay the going rate of wages with adequate inspection and penalties for violation. Preference in such employment to be given to residents of Pennsylvania.
  - (4) The submission of a constitutional amendment giving to the local governments and the State under proper safeguards more flexible bonding power for public works when an unemployment emergency is declared by a majority of a committee composed of the Governor, State Treasurer and Secretary of Internal Affairs.
  - (5) The creation of a long-range planning board for public work operating in terms of six-year programs
- III. The improvement of the public employment offices of the State by:
  - (1) The purging of unfit members of the staff and their replacement by qualified persons with educational training and previous employment and trade experience
  - (2) The building up of strong co-operating committees for each of the offices which would have real powers in helping to select the local superintendents and in guiding local policies and would be somewhat comparable to boards of directors.
  - (3) The more strategic location of the offices themselves.
  - (4) A thorough attempt to follow up the workers who have been placed in order to improve the quality of service given.
  - (5) A much greater degree of solicitation of employers in order to obtain more requisition for labor.
  - (6) An energetic system of stimulating the work of the local offices through the work of a field agent for the State and conferences of the local superintendents.

- (7) A better grading of the staff of the offices and the establishment of salary scales and promotional systems
- (8) The establishment of an adequate system of clearance.
- (9) The establishment of more uniform records and of a more accurate system of determining placements.
- (10) The allocation of offices to meet the public needs.
- (11) The attempt to secure financial aid from private sources in setting up model employment agencies in Philadelphia, Pittsburgh and possibly elsewhere.
- (12) The granting of increased funds for the public offices once they have been improved. The recommended sum for each year of the coming biennium would be a total of \$200,000 or \$100,000 more than is now being expended.

IV. The better regulation of the private employment agencies. We favor the enactment of legislation which embodies the following features: (1) Licensing only those private employment agencies for which there is a public need. (2) Enlarging the definition of private agencies so as to include those who solicit jobs by mail. (3) Raising the license fees to \$20 a year and increasing the bonds to \$5000. (4) Providing that all licenses shall expire on a given date so that the Department of Labor and Industry will have a chance to survey the whole situation. (5) Giving to the Department of Labor and Industry the power to revoke a license for cause. (6) Making the reasons for revoking a license more explicit. (7) Prohibiting the imposition of a service or registration fee for which no service is rendered. (8) Requiring each private office to make a monthly report on the numbers placed and total fees received.

We also believe that no agency should charge a fee for placing labor on public work.

#### V. Education.

- (1) A stricter regulation of the conditions under which employment certificates are issued. (2) Greater flexibility in high school and vocational training. (3) The development of foreman training classes and appointment of district directors of industrial education. (4) The encouragement to communities to put their part-time continuation schools upon a half-time basis with an increase of State-aid. (5) The establishment of special schools in mining districts to prepare workers more effectively for mining and other industries. (6) The establishment of extension classes for the unemployed. (7) An increase in the program of adult education. (8) The distribution of a State equalization fund of approximately two million dollars, for vocational and extension class in the mining and industrial, and rural schools, and distressed school districts. (9) Attempts to limit number of teachers trained in proportion to the demand. (10) Further research in certain fields such as Negro education and the curriculum.

#### VI. Relief.

- (1) The vigorous functioning of committees in every county of the State to stimulate aid to the needy unemployed. (2) The ultimate creation of integrated county welfare units.

#### VII Unemployment Reserves and Insurance Against Unemployment.

Measures for the stabilization of workers' incomes are essential to our healthy economic life and, although we are not able to agree on the specific measures through which this should be affected, we commend to your serious consideration and to that of our legislators (if in your judgment it should be submitted to them) the able report of our sub-committee on this subject, printed herewith; and we call attention to a third possibility of voluntary action by employers either as individuals or groups or in co-operation with organizations of employees.

#### PART ONE

##### The General Report.

#### Report of Pennsylvania Committee on Unemployment

Unemployment involves two main sets of problems. The first is how to reduce its scope to the greatest extent possible, while the second is how to care for those who are unemployed so

that they, without losing their self-respect, may experience a minimum of suffering. We propose in our report to point out the specific ways in which the State of Pennsylvania can help to meet each of these two main problems.

There are two major and two minor causes of unemployment. The major causes are the seasonal and cyclical fluctuations in demand and production, while the minor causes are the faulty organization of the labor market and technological and market changes.

#### 1. Seasonal Fluctuations and Unemployment.

The problem of meeting seasonal fluctuations is one which business itself must solve. Insofar as these fluctuations spring from the irregular buying habits of the consumers, which ultimately are swayed by changes in fashion and in the weather, it is probable that a very considerable residue of such seasonal unemployment will continue for a long time to come. But the successful practice of a large number of firms demonstrates that with good management such seasonal unemployment can in many industries be appreciably reduced. The chief methods of seasonal stabilization which have been adopted by these firms are:

- (1) Developing demand in the off-seasons by price reduction or by advertising. The latter of these methods is, of course, primarily practicable only for very large companies or for federations of small concerns. (2) Drawing up a sales budget for the coming year, based on past experience and seasoned according to a careful survey of business prospects, and then dividing this yearly quota into either twelve equal monthly fractions or fifty-two weekly fractions. In this way, the surplus of the goods produced in the slack seasons over those sold are stored to meet the excess demand of the busy seasons. This method is the most widely used of all stabilization devices and is capable of much greater extension. It is, however, largely limited to commodities which are standardized and which when stored will not be subject to the danger of being outmoded by the time they are to be sold. (3) Developing side-lines and fillers which can be produced and sold during the off-seasons with substantially the same equipment and the same factory and sales forces. (4) Extending the use of the flexible working week so that within a given yearly total of hours, the length of the actual working week may fluctuate, though not excessively, between slack and busy seasons. It is better for the same number of men to work a varying number of hours during the year than for a fluctuating number to work a constant number of hours. For in the first case, all the workers get some income at all times during the year and are not tormented by the fear of unemployment while in the second, some are thrown completely out of employment and lose all their income for those periods.

Such methods as these are not only beneficial to the workmen. They are also financially profitable in many industries to employers, for they: (1) provide a relatively steady force and remove the necessity of hiring large numbers of untrained men, with their lowered production and increased spoilage to meet the seasonal peaks; (2) through attracting, because of the continuous work afforded, a higher grade of artisan than would be available even at higher hourly rates when paid for work done intermittently. Thus stabilization of employment with what may be an actual increase in real wages easily can, and usually does, mean a reduction in production costs; (3) reduce any tendency on the part of workmen to prolong a job in order to be employed for as long as possible. This is a potent source of loss in seasonal employments and when steady work is provided, this fear of working oneself out of a job is greatly abated; (4) reduce the amount of fixed capital needed to turn out a given annual volume of product with a consequent decrease in the capital charges per unit. Where production is highly irregular within a year, business has a large quantity of fixed capital on its hands which is idle during the dull seasons. By leveling the seasonal peaks and valleys, a smaller quantity of fixed capital will be required and costs considerably reduced.

We are, of course, well aware that these methods of seasonal stabilization also entail costs. The method of budgeting production for example, necessarily entails added storage charges and larger interest payments for bank loans with which to finance the holding of goods until the busy season. The experience of several hundred firms which have used such methods demonstrates, however, that where the product is standardized, the workers relatively skilled, capital charges appreciable, and the value per cubic foot of product appreciable,

such a program more than pays for itself. Where, however, styles are changeable such a program of budgeted production is, as we have stated almost impossible to carry out while the alternative method of developing side-lines is not always open in such cases.

In the nature of the case, it is private business alone which is in a position to apply wherever practicable these methods of stabilization. But while the role of the State of Pennsylvania is necessarily a secondary one in such matters, it can be of assistance to private industry by stimulating the movement toward stabilization and by offering competent technical advice concerning the best means of accomplishing this end. This it can do by holding a series of conferences in various parts of the State in co-operation with the Manufacturers' Association and the State and local Chamber of Commerce where the practical achievements of specific business in coping with seasonal and other problems may be described and popularized. The Department of Labor and Industry, moreover, can and should prepare technically competent bulletins describing the methods of stabilization which have been used in various industries and give these a wide circulation among business managers who are in a position to take action. Every effort should be made to get various industries such as textiles, the metal trades, etc., to consider through their appropriate organizations the methods which are particularly applicable to meet their especial problems, and the Department of Labor and Industry in co-operation with other bodies should seek to get those industrial association to take these problems seriously to heart. The Department of Labor and Industry should, moreover, enlist the aid of an unpaid technical staff of competent economists, engineers and business men whose services could be utilized on a per diem basis by individual firms wishing to stabilize. If this work continued to grow, we would advise the ultimate appointment of a special engineer or business executive to the staff of the Department of Labor and Industry whose duty it would be to promote such programs of stabilization and to advise with particular firms about the best methods for them to adopt. It goes without saying, however, that the value of this work would depend entirely on the competence of the staff. A political appointment would injure rather than help the cause of stabilization. It is imperative, therefore, that if and when such an appointment is made, the technical competence of the person finally selected should be approved by appropriate engineering and managerial associations.

The Committee on Regularization by Private Employers under the leadership of Mr. J. W. Rawle and Senator Joseph R. Grundy and with Mr. W. C. Byers as secretary, have already held meetings in Philadelphia and Harrisburg, where the methods of regularization were described and where the two following methods were endorsed for the present emergency: (a) the fostering of plant extensions, betterment, and equipment be the creation of as much employment as possible by shorter shifts and no overtime. The committee has also distributed large quantities of literature urging detailing plans of regularization upon employers and plans to hold future meetings at Pittsburgh, Erie and possibly other centers as well. The energetic action of this committee, whose report is printed in Part Three of this document, is an evidence of the fruitful possibilities for co-operation between government and industry which we earnestly hope may be continued in the future.

## 2. Cyclical Fluctuations and Unemployment.

The second great cause of unemployment, which probably inflicts more concentrated damage than any other, is that of cyclical fluctuations with their more or less periodic business depressions. The precise causes of these depressions are still almost as mysterious as those of cancer but they are almost wholly outside the power of any one state like Pennsylvania to control and may indeed be outside the power of any one nation. Whatever their causes, they are accompanied by a fall in prices and a diminution in profit margins resulting from the fact that raw materials and labor purchased at earlier and higher price levels must be sold when embodied in finished commodities at later and lower price levels. This shrinkage of profits leads many businesses to reduce their purchases of raw materials until these have fallen still further in price. But this in turn necessitates decreasing the scale of operations and throws men out of work. These men are consequently not able to buy as much as before and retail stores, wholesale establishments, and factories are unable to sell as

much and consequently are compelled to reduce their volume of employment. This continues and intensifies the cumulative breakdown of purchases and of employment which mutually interact and decrease each other. The business depression as it sweeps on is especially severe upon: (1) Industries producing capital goods such as those that are needed not only to meet depreciation but to provide for the growth of industry. When this growth wanes, its effect is felt in a greatly multiplied fashion in those industries producing metals and machinery. Pennsylvania as the center of the iron and steel industry suffers, therefore, very intensely in a period of business depression. (2) Industries whose demand is inelastic and where an increase of 1 per cent. in their quantity is accompanied by a decrease of more than 1 per cent. in their unit price. In the case of these commodities, therefore, a larger total product brings a smaller total price. It is, therefore, but natural that at least three of the most depressed industries in the country, namely cotton, wheat, and coal, should be characterized by an inelastic demand.

In such a business depression, individual businesses can do but little. Advertising is at best open only to the producers of specialty products and even here, it is not always certain that any arresting of the diminution in their sales is not obtained at too great a cost. Moreover, the advantage of one firm is generally gained by still further decreasing the sales of the competing firms and hence is no general solution to the problem. About the most which individual firms can do is to distribute the amount of diminished employment in such a way as to cause the least hardship. Our sub-committee on the Regularization by Private Employers has given wide publicity to its advice that such employment as is available be staggered in the form of part-time for all, rather than full-time for some and complete unemployment for the remainder. It has urged employers that if they find it absolutely necessary to lay men off, those with families and dependents should be retained. Another sub-committee has sought to stimulate consumers to buy more commodities and thus help to check the depression.

Without going too deeply into the intricacies of business depressions, we believe that their severity would at the very least be lessened appreciably if the general price level could be stabilized, and profit margins much more generally maintained. Since under the gold standard, world price levels must move up and down together it follows that there must be some form of international co-operation in matters of money, credit, discount rates, etc., if stabilization is to be effected. While the State of Pennsylvania cannot initiate any such international action, we nevertheless, can and do urge that the national government should co-operate with the other nations of the world in the working out of such a policy. Such action would be all the more imperative if the world's production of goods were to increase more rapidly than its production of gold.

## 3. A Planned Program of Public Works for Pennsylvania.

The chief way in which governmental agencies can cope with business depressions is, of course, by the stimulation of public works. We have conducted a survey of the amount of building and construction which the various State and local bodies are planning, the results of which should be available soon. In the local committees on unemployment which are being set up under our auspices in all the counties of the State, one sub-committee is addressing itself to the stimulation of needed local works which may be undertaken both to fill public needs and to benefit the unemployed.

Our Sub-Committee on Public Works has gathered data from all the local government units on the amount of building which they plan to conduct during the coming years which will furnish a valuable basis for future follow-up work. It has also urged all of these local units to carry on as much building as possible during the present depression.

It is, of course, highly important both that vigorous action be taken at once and that plans be worked out for the future. We believe that the following steps should be taken by the State:

(1) The immediate preparation of a building program for needed State institutions to amount to approximately \$10,000,000. The final appropriation of this sum should not be delayed until the biennial budget is finally passed in the late spring but should be made a special order of business during the early days of the session and passed before the middle of February. Plans should be drawn and contracts let at the earliest possible moment. We believe it is probable that business con-

ditions and employment will be better in 1932 than in 1931 and that it is, therefore, wise to concentrate by far the major portion of this expenditure in this year rather than to distribute the available sums evenly between the two years of the biennium.

(2) The immediate authorization by the legislature of a temporary transfer of \$10,000,000 from the general fund to the motor fund so that added work on a large scale may start rapidly along this line as well. This money should be expended in accordance with the general highway plan of the State and also to help carry out your announced policy of lifting part of the burden from rural districts by taking over from them the support of a large mileage of strategically situated roads.

By this program of highways and buildings, the State would contribute \$20,000,000 to the fund of available work and at the same time obtain needed public works.

(3) That not only should a clause be inserted in all contracts compelling the contractor and sub-contractors to pay the going rate of wages but every effort should be made to see that this is actually done. A penalty clause might well be inserted in every contract compelling every contractor who violates such an agreement to pay liquidated damages to the State. The contractors should also bind themselves to preference in employment to residents of Pennsylvania, and the bringing in of labor from outside the State to fill those jobs which could be equally well filled by Pennsylvanians should be rigidly discouraged.

(4) That in order to give the State and local governments greater power in the future of initiating public works in periods of acute unemployment we favor a constitutional amendment which when, and as long as, the majority of a board composed of the Governor, the Secretary of Internal Affairs, and the State Treasurer declare an unemployment emergency to exist will then permit: (a) the local authorities to increase their bonding capacity without authorization of the voters from two to two and one-half per cent. of the assessed valuation and with the vote of the people from seven to eight per cent. Where, as in the case of Philadelphia, the limit is 10 per cent., this can be increased to 11 per cent. It should be carefully provided, however, that these additional bonds can only be spent for those purposes which are approved by the long-range planning board for public works described in the next paragraph. The bonds should not run for more than ten years, which is approximately the general span of time between major depressions.

(8) The State to borrow for public works an added \$100,000,000 in addition to the sum now allowed for highways. This provision should, however, be guarded in such a manner that the total amount of such emergency bonds outstanding at any one time should not exceed \$100,000,000 and should not be issued for more than twenty years. Suggested drafts for such constitutional amendments are submitted as Appendices A and B.

(5) That a long-range planning board for public works should be set up with a competent executive officer which will prepare a six-year plan of projected public construction by the State and the local bodies. This plan should be revised every biennium and thus always projected six years into the future; it should list the specific pieces of work to be undertaken, the time schedule to be followed for the same, and should hold a considerable proportion in reserve to be launched during periods of depression. The plan should be under the general charge of a committee which would include: (a) representatives of the State government, (b) representatives from the principal municipalities and counties so that the local units could be induced to prepare similar plans and integrate them with those of the State, (c) two or three representatives of such professions as architecture and engineering and such industries as construction, (d) a full-time, adequately paid and competent executive officer who would put vitality into such a board and who would see to it that the work was really done.

The work of this State planning board should in turn be integrated with that of the proposed Greater Pennsylvania Council. One way of accomplishing this would be to attach the Secretary as a member of the latter body.

It should be emphasized in the preparation of this six-year planned program for public construction that the plans for the projects which are to be held in waiting for the outbreak of

a depression should be drawn very far in advance and that in many cases bond issues should be authorized.

(A suggested draft for a bill authorizing such a Board is printed as Appendix C.)

#### 4 The Better Organization of the Pennsylvania Supply of Labor.

##### A.—A General Analysis.

Unemployment is also increased by the defective organization of the supply of labor. Although centralized exchanges have developed for most commodities which greatly facilitate their purchase and sale, the marketing of labor is about as chaotic in this State as it is elsewhere in this country. Workmen tramp from establishment to establishment seeking work with a great loss to time and effort. Not knowing what conditions are, they frequently leave one city to go to another where unemployment is just as great. Individual businesses, lacking any central labor reserve to draw from, try to maintain their own labor reserves to meet their busiest days and seasons. But since these busy days and seasons do not coincide, the result is a duplication of reserve which causes some labor to be idle even at the busiest period for society as a whole. In addition to all this there is inadequate vocational information for boys and girls entering industry with the result that many enter declining trades when their industrial future is unpromising, and where they clog the labor market and increase the amount of unemployment. In this confusion, a large number of private employment agencies have grown up. Some of them are managed by high-minded persons but there is always a great temptation to take advantage of those out-of-work men and women who so badly need work. Fees are, as we shall show, customarily high and the splitting of these fees with foremen not unknown. Advance fees are sometimes collected from workers who are then tired out, by being referred to a series of jobs and who find it difficult to get this money returned. Still worse abuses exist in the case of many commissary companies which furnish unskilled labor for jobs and which board the workers while they are on them. The State regulation of these offices has, as we shall see, been greatly weakened in recent years, and is now grossly inadequate.

The better organization of the supply of labor involves, therefore, two main steps: (1) the improvement and extension of the system of public employment offices and (2) the more stringent regulation of the private employment offices. The State of Pennsylvania can make one of its greatest contributions to the reduction of unemployment by resolutely pushing these two lines of effort.

An efficient and co-ordinated system of public employment offices could greatly improve the situation (1) by lessening the time workers lose between jobs and reducing the amount of duplicate interviewing on the part of employers. (2) By pooling the labor reserve, it would make it possible for individual employers to call upon the system for aid in meeting their peak loads and hence would lessen the practice of maintaining separate and duplicate reserves. These labor surpluses could then be released for other industries. (3) By furnishing the oncoming generation with more correct information about vocational opportunities, it could assist in better distributing the labor force to the actual openings and hence decrease unemployment. (4) By furnishing special services, after the public offices are firmly established, to particular groups of workers such as the young, the aged, and women. (5) By helping to regulate and to stimulate the efficiency of the private offices through the sheer pressure of competition and of good service.

##### B.—The Public Employment Offices of Pennsylvania and Suggestions for Their Improvement.

Such are the general advantages of an adequate public employment service. We must, however, be frank to say that the present system of public employment offices is very defective. Nor is Pennsylvania an exception to this general rule. The State maintains employment offices in no less than thirteen cities and during the last fiscal year expended approximately \$99,000 for the work. In our opinion, however, the people of Pennsylvania are not receiving an adequate return for the amount expended.

While we realize that per capita placement costs are not the sole test by which the comparative efficiency of the various State systems can be measured, we do nevertheless believe it to be significant that they are higher in Pennsylvania than in

any other of the chief industrial States as is evidenced by the following table:

State	Year	Number of Offices	Total Appropriations (state and local)	Total Placements	Average Cost per Placement
Wisconsin ....	1929	10	\$58,081	101,183	\$0.57
California ....	1928	10	84,895	144,516	0.59
New Jersey ...	1929	7	76,500	120,572	0.63
Ohio .....	1929	12	155,324	137,538	1.13
Connecticut ..	1928	8	50,000	29,867	1.71
New York ....	1929	11	188,309	100,171	1.89
Illinois .....	1929-30	20	266,080	135,909	1.96
Massachusetts ..	1929	4	68,841	30,157	2.28
Pennsylvania ..	1929	9	99,000	41,997	2.31
Total .....		91	\$1,047,030	842,910	\$1.24

The per capita costs in Pennsylvania are, therefore, approximately four times as great as they are in Wisconsin, California and New Jersey. What then can be the possible reasons for this great disparity? Is it for example perhaps due to greater care in determining whether or not a placement has actually been effected? It is true that Pennsylvania does not count placements of the same worker for more than one casual job in the same week, and hence is perhaps slightly more severe in its classification on this score than the majority of other States. It is, however, also true that since in a large percentage of the cases the employers do not notify the offices when they engage a worker sent to them, that it is necessarily difficult to tell just how many of those referred are actually placed. The figures of the State offices are at best, therefore, somewhat in the nature of an estimate and probably tend to overstate the numbers actually placed. In Wisconsin on the other hand only those placement are counted for which a definite report has been made by employers of employes, while in New Jersey a great deal of effort is expended in actually determining whether or not a placement has actually been made. If statistics of actual placement could, therefore, be obtained it is probable that the difference in placement costs between Pennsylvania and Wisconsin would be greater rather than less.

Is the difference then due, as it is sometimes said, to a greater predominance of skilled labor among the Pennsylvania placements upon whom more care must necessarily be expended and whose per capita costs will necessarily be greater? In Pennsylvania in 1929, 22,869 or 55 per cent. of the total number of 41,997 who were reported as "placed" were listed as unskilled, casual, or day workers.<sup>1</sup> "There were in addition probably many other unskilled workers among those listed in the occupational classes of "manufacturing," "building and construction" and "miscellaneous." If the miscellaneous group is added to the "unskilled, casual and day worker" group the total number placed in 1929 would amount to 25,403 or 60 per cent. of the total placements. In addition 4,410 placements or about 10.5 per cent. of the total were listed as semi-skilled. This should be compared with the records of the following other States:

State	Year	Percentage of Common, Casual and Misc. Labor to Total Placements
Illinois <sup>2</sup> .....	1927-28	60%
New Jersey <sup>3</sup> .....	Sept., 1930	51%
New Jersey .....	July, 1928-29	57%
Ohio <sup>4</sup> .....	1929-30	82%
Massachusetts <sup>5</sup> .....	1928	60%
Wisconsin <sup>6</sup> .....	1929	70%
California <sup>7</sup> .....	1927-28	71% Males; 35% females; and 64% both
Pennsylvania .....	1929	60%

<sup>1</sup> Classified Summary Report for 1929 of the Bureau of Employment, Department of Labor and Industry, p. 1.

<sup>2</sup> Eleventh Annual Report, Illinois Department of Labor, 1927-28, p. 9.

<sup>3</sup> This figure is for males only. New Jersey Industrial Bulletin, October 1930, p. 37.

<sup>4</sup> This for males only. Mimeo. Report, Department of Industrial Relations, Ohio, July 10, 1930, p. 1.

<sup>5</sup> Report of the Division of Statistics, Department of Labor and Industries, 1928, p. 21.

<sup>6</sup> Telegram from A. J. Altmeyer, Secretary Industrial Commission, January 2, 1931.

<sup>7</sup> Report of State Division of Employment Agencies, 1926-27, 1927-28, p. 61.

It does not seem, therefore, that the difference in costs can be explained by the type of service which the public offices of Pennsylvania give. The percentage which unskilled and miscellaneous labor forms of total placements in Pennsylvania is as matter of fact slightly greater than in New Jersey where per capita placement costs are only 28 per cent. as great. It is virtually the same as in Illinois and Massachusetts and only 4 per cent. less than in California although the Pennsylvania per capita costs are four times as great. It is only 10 per cent. less than in Wisconsin although here again Pennsylvania spends four times as much for each recorded placement as the former with its better system of records.

To our minds, these statistics together with the general survey which we have had made of the system by Mr. Charles Reittel and others point the way instead to a level of service and effectiveness greatly below that which should prevail. While there are many efficient and loyal workers in the service there are too many who owe their appointment to political influence and who are inefficient. Others who have good capacities give evidence of being discouraged because of the situation and of despairing of the possibility of doing effective work. With the exception of Erie, the advisory boards required by law have been allowed to lapse and there is little effort to enlist the cordial and organized support of employers. The situation is one which calls primarily for administrative reform rather than new legislation and we recommend the following steps:

(1) The thorough purging of the service of all those who are unfitted for their work and of those who will not devote their full time and their working energies to the upbuilding of the service. The recruiting of the future staff should be so far as possible according to merit principles and only persons with previous employment and trade experience with an educational minimum should be engaged.

(2) The creation in each of the cities where offices are located of strong co-operative committees composed of employers and workers with a representative of the public. These committees should be composed of men who are influential in the industrial world and should be given real powers in order both to retain their interest and to utilize their abilities. We recommend, for example, that after they have been firmly organized that they be given at least the following duties: (a) to advise with the Department of Labor and Industry concerning the appointment of the superintendent of the local office, (b) to help supervise the location and layout of the offices, (c) to aid the development of special sections for particular industries, and (d) to help promote the service among employers.

In order to make these committees more representative we have had a bill drafted (Appendix D) which replaces the present act for such committees. Their efficient organization and work will, however, depend not so much upon this legislation but rather upon the energy and judgment with which the Department of Labor and Industry proceeds to set them up.

(3) The offices should be decently and conveniently housed and readily accessible to the applicants. The present housing of the Philadelphia office upon the ninth floor of an office building should, for example, be discontinued at the earliest possible moment.

The public offices should not content themselves with merely placing applicants but should actively follow them up in order to learn from employers whether or not they have proved satisfactory and to obtain information which will enable the offices to give better service in the future. Such work will incidentally give the employers greater confidence in the office and will enable them to place more and better men.

(4) An active program of soliciting employers for jobs should be carried on and the possibilities of taking over the employment work for a given industry or group of employers constantly canvassed. We believe that the State office should have a supervisor constantly traveling over the State and at once enlisting the co-operation of employers and inspecting the service. Each local office should, more-over, have a field agent who would visit employers and this work can be a part of the follow-up program advocated in the previous paragraph.

(5) A system of promotion based upon tested efficiency with corresponding salary schedules should be worked out by the Director of the Bureau for the employees of the Bureau.

We recommend the following approximate and tentative salary schedule: (a) Superintendents of offices in Class A cities, \$4000, advancing with good service to \$5000, (b) Superintendents of offices in Class B cities \$2500, advancing to \$3500, (c) Supervisor for the State service, \$3000-\$4000, (d) Interviewers and examiners in local offices, \$2400 to \$3000, (e) Field agents in local offices, \$2400 to \$3000.

(6) The improvement of the statistical records of the public offices so that uniformity may be obtained and a more accurate statement of placements secured.

(7) The holding of periodical conferences of the various superintendents and of staff conferences within an office in order to promote the most effective work.

(8) The establishment of an adequate system of clearance between the offices of the State.

(9) The need for additional offices is apparent and we recommend that the whole situation be studied with a view to the best allocation of the available resources to the needs of the State.

(10) An attempt to enlist the aid of certain foundations and private individuals in the establishment of experimental employment offices in Philadelphia and Pittsburgh on terms which will insure their efficient operation for an experimental period of years. In order to remove all doubts of the legality of this measure, we have had a bill drafted authorizing the State to receive grants which is appended as a part of Appendix D.

(11) If a vigorous program such as we have recommended is carried through prior to the beginning of the new biennium of 1931-33, we recommend that appreciable additional funds should be provided. We favor an additional appropriation of \$100,000 a year to be spent for the improvement of the service.

#### C.—The Better Regulation of the Private Employment Offices of Pennsylvania

The reform of the private employment offices in the State, of which there were 274 in May, 1930, is also urgently demanded. Not only are the placement fees which they charge in many cases quite high but registration fees are also frequently demanded which the workers find it difficult to recover if they are not placed. Misrepresentation of working conditions has also been practiced and there are strong indications which point to the splitting of fees by some of the offices with the foremen. This latter practice, of course, causes the foremen to discharge one group of workmen after they have been employed for short periods of time and their replacement by another group of workers. An indication of the abuses practiced is the fact that in 1929 two private employment agents were killed by workmen who felt that they had been defrauded.

The regulation of these private agencies was greatly weakened by the act of 1929 which evidenced the great political power which these agencies then possessed. The present act does not permit the State Department of Labor and Industry to revoke licenses for cause and requires a protracted legal process before the courts before a license can be revoked. The charging of registration or service fees is not prohibited nor are the private offices required to file a record of all placements made. Supervision is made still more difficult by the fact that the licenses do not expire at one time but rather at different times during the year according to the date when the license was originally granted.

In our opinion the regulation of these offices should in the public interest be greatly stiffened and we recommend that the following features should be included in any such program of regulation: (1) Giving to the Department of Labor and Industry and the Industrial Board the power to license only those private agencies which are needed to serve employers, employees and the public. It seems probable that the industries of the State could operate just as efficiently with an appreciably smaller number of agencies than the present 274. In making their decision as to the number needed the Department and the Industrial Board should take into consideration the degree to which there was overcrowding in the field of private agencies, the employment agencies managed by employers or by workers directly, and the adequacy of the public employment offices. It would be expected that as the efficiency of the public offices increased, the need for the private offices would diminish.

It is believed that such a provision would be held constitutional by the courts for while it is true that the State cannot

prohibit private offices from receiving fees from workmen (Adams vs. Tanner, 244 U. S. 590), nor indeed regulate the minimum fees which these offices can charge for actual placements (Ribnik vs. McBride, 277 U. S. 350) the power to license carries with it the power not to license. A license is not a contract nor a vested right. It is in the power of the State to grant or to refuse and the Supreme Court in the case of Ribnik vs. McBride did assert the right of the State to regulate, even though it ruled against the power of fixing maximum placement fees.

As a matter of fact, the State of Wisconsin has had such a provision in its law since 1913. As a result of its operations and its administration by the Industrial Commission of that State, the number of private employment agencies has been reduced from 39 to 10. Nor has the constitutionality of this act ever been questioned.

(2) Enlarging the definition of private agencies so as to include those who solicit jobs for applicants by mail. The abuses in this field have been particularly marked in Philadelphia and it is highly important to bring these agencies indubitably under control.

(3) Raising the license fees for the private agencies to \$200 a year and increasing the required amount of their bonds from \$1000 to \$5000. At the same time the classification of the types of private agencies should be simplified.

(4) Providing that all the licenses shall expire on a given date such as September 30 so that the Department of Labor and Industry and the Industrial Board will be able to survey the whole situation and deal with the applications as a whole instead of being forced to deal with them one at a time.

(5) Giving to the Department of Labor and Industry the power to revoke a license for cause and not subject it to the delay which is now necessary. The proper rights of the private agencies would, however, still be protected by the courts.

(6) Making the reasons for the revocation of the licenses more explicit.

(7) Prohibiting the imposition of a registration fee for which no service is rendered, or agreed to be rendered in the procurement of employment or help for an applicant. Such a prohibition it is believed is also constitutional because the ruling of the Supreme Court in the Ribnik case applied only to placement fees and did not cover registration fees. Since abuses are inextricably bound up with the practice of charging fees before service is rendered, the prohibition of such fees would seem to be within the regulatory powers of the State. There is precedent for such a step in the fact that South Dakota and California already prohibit such fees.

(8) By requiring each private office to make a monthly report on the numbers placed and total fees received. The Department of Labor and Industry will thus be furnished with a statistical record which will greatly aid it in its task of licensing and inspection.

We have drafted a bill embodying these and certain minor features which is attached as Appendix E, to which we give our endorsement and we earnestly recommend that it be passed at the ensuing session of the legislature.

We also believe that labor on Government work should not be allowed to be mulcted for obtaining their employment and we therefore, recommend that private employment offices be prohibited from obtaining fees for placing workers on public work. (This is considered in Appendix F.)

We should also like to point out, however, that if the full possibilities of improvement are to be realized it is necessary to have a courageous, untiring, and efficient administration of the measures. Unless the Department of Labor and Industry and the Industrial Board are willing to grapple energetically and fearlessly with the problem, any act however good will necessarily be ineffective. The private employment offices have a great deal of political influence and in the people's interest the Department must be constantly vigilant.

#### 5. The Role of Education in the Struggle Against Unemployment.

While education cannot immediately reduce unemployment, it can contribute to make workers more flexible and at once enable them to transfer more readily to other positions and increase their general effectiveness. Our sub-committee on Education and Training has prepared a very inclusive report on this topic which is printed as Part Three, Section 2. Summarized briefly they recommend:

(1) A stricter regulation of the conditions under which employment certificates are issued to children between the ages of 14 to 16. The certificates should be issued only in those cases where there is clear evidence that the child's earnings are actually needed by the family.

(2) Greater flexibility in high school and vocational training to permit juveniles to prepare for more occupations.

(3) The development of more foreman-training classes and the appointment of at least six district directors of industrial education.

(4) The encouragement of communities to put their part-time continuation schools upon a half-time basis and the increase of State aid to such districts as adopt this plan. The vocational education facilities in all continuation as well as secondary schools to be developed and extended.

(5) The establishment of special schools in the mining districts where there is a surplus of labor, to prepare some juveniles and miners more efficiently for mining and other miners and juveniles for other industries.

(6) The establishment of vocational and extension classes for the unemployed with the aim of giving them general education, which so many of them need, together with vocational training wherever such schools are now available. In many cases, free carefare and lunches should be provided for those who attend such classes.

(7) A general development of adult education for the employed as well as the unemployed in order to decrease illiteracy and to give training in citizenship and the better use of leisure time.

(8) The distribution of a State equalization fund of approximately two million dollars to ensure added aid: (a) \$300,000 to schools in the mining and industrial centers of schools of the type mentioned in the two preceding paragraphs, (b) \$1,200,000 as aid to the rural schools which will enable them to give better training to their children, (c) \$500,000 for distressed school districts.

(9) A survey by the sub-committee of the graduates of the State Teachers Colleges and the accredited Liberal Arts Colleges shows that 17 per cent. of last year's graduates who proposed to enter the field of education are still unplaced. Since a reserve of from only 8 to 10 per cent. is needed to provide for deaths, marriages, etc., this indicates a tendency towards over-crowding which is primarily characteristic of the elementary grades and junior high schools. It is recommended that the number of students in the various Teachers Colleges be limited to the demands of the State. The period of preparation for the elementary grades should be increased from two to four years. If after further investigation, the State Council of Education finds that the various schools of education in liberal arts colleges are also turning out an over-supply of teachers then new curricula in these schools should be only sparingly approved. Both the State Teachers Colleges and the Liberal Arts Colleges should co-operate together to improve the quality of teacher-training and perhaps to dampen off the rate at which the number of teachers is now being increased.

(10) Further investigation of such problems as more adequate Negro education and the curriculum of elementary and secondary schools.

#### 6. The Organization of Relief.

The Committee immediately recognized the necessity for committees in the various counties which would organize and co-ordinate relief and it has now set up such bodies in virtually every county in the State. Perhaps the most important immediate task of these committees is the raising of more funds for relief and for their distribution through accredited local charitable organizations. The Sub-committee on Relief and on Co-operation with Local Agencies has worked out standards which should be followed including: (1) The listing of the unemployed and ascertaining those now receiving relief. (2) Aiding in the raising of funds. (3) Granting relief through accredited agencies to the most needy cases on condition that they render service in return on public work which would not otherwise be undertaken. The rates of payment for such work to be, however, at the going local rate. (4) Co-operating with the local agencies in a program of visiting the families of the unemployed to determine what needs for medical, vocational or other care the families need and of attempting to fill these to the fullest degree possible.

These county and local committees will continue their work as long as their services are needed and it is hoped that they may prepare the way for county units of Welfare under the

supervision of the State Department of Welfare which will provide specialized care for the various groups needing it along the lines of the program worked out in North Carolina and now being considered by a number of other states.

#### 7. Reserves Against Unemployment and Unemployment Insurance.

The Sub-Committee on the Stabilization of Wage-earners' Incomes after studying the problem, by majority vote submitted the following statements of policy to the general committee:

#### STATEMENTS OF POLICY

(1) In the development of our industrial civilization, great progress has been made in the continuity of dividend payments by those who have capital to invest in our major enterprises. Stabilization of wages and purchasing power of the vastly greater numbers of our industries citizens who must chiefly rely for the support of their families upon the investment of their labor has been likewise successfully attempted in a number of instances through co-operative efforts of employers and workers.

"Beneficial as these unemployment reserve funds have been to industry and the workers, it is agreed that this problem calls for the stimulus and encouragement of legislation in order that the benefits of such provisions may be had universally and with reasonable promptness."

This was passed by the following vote:

Yes: Andrews, Douglas, Hall, McBride, Maguire.

No: Wright and Benedict.

Absent: Phillips, Wolman.

(2) The second statement which went into the problem in greater detail was as follows:

We must face the fact that a very considerable amount of unemployment can be expected to continue in the future. Even with the most energetic action by employers large seasonal unemployment will exist because of the influence of styles and of the weather. There seems little prospect that business cycles will be controlled any more effectively in the coming than in the past decade and this will create a large amount of unemployed. If the general price level should decline during the coming years, this will have a further depressive influence upon business and still further swell the ranks of the unemployed. Technical and managerial improvements will also throw temporarily many workers out of employment and shifts in demand will cause further trouble.

One of the most pressing of social problems is, therefore, how to prevent these workers and their families, who are thus deprived of employment and income through no fault of their own, from undue suffering. The only two means of protection which they now have are their private savings and charity. The earnings of unskilled labor are insufficient in terms of modern standards of living to permit their making such adequate savings while if the semi-skilled workers have several dependents, such savings are impracticable for them as well. If the period of unemployment is prolonged whether because of a business depression or technical and market changes, even fairly large savings by skilled workers will be inadequate. Charity is, therefore, the sole bulwark which society now has to protect these men and their families from need. Even though large sums are now being raised in various cities of the State to help provide for the unemployed and while these efforts are worthy of all praise and should in fact be increased greatly during the coming winter, these amounts are grossly insufficient in the comparison with the need. Good men who have been thrown out of work through no fault of their own should not be required to depend upon so inadequate, uncertain and humiliating a source of relief.

The most effective way of providing such protection is by adopting a policy for labor which capital has already adopted for itself, namely to accumulate reserves during periods of prosperity and employment which may be utilized in periods of depression and of unemployment. Well-managed corporations do not now pay out all of their earnings in good times but instead lay aside a certain proportion in reserve funds which are paid out in periods when the net earnings are low or non-existent. In this way, the dividend payments and the money income of the investing and owning classes are largely stabilized in bad as well as good times. Good business men also take great pains to lay aside depreciation and obsolescence funds with which to meet the losses occasioned by machines being outmoded and replaced.

These practices reflect great credit upon the sagacity of management and logic would seem to call for their extension to labor as well. If industry aims to provide a return to capital even though it be unemployed, so it should make some provision that the income of the workers should be at least partially maintained if they are unemployed, provided of course that they are honestly seeking work.

Such a program as this would as a matter of fact have a stabilizing influence upon business, for: (1) By transferring dollars of purchasing power from periods when employment and production are relatively full, profits high, and demand adequate to periods of unemployment when employment is low and demand inadequate, it would by putting more purchasing power in the pockets of the workers, enable them to buy more and hence would at least partially check the cumulative breakdown of purchasing power, production and employment which now sweeps business so rapidly downhill; (2) By graduating the premiums which employers pay somewhat, though not fully, in accordance with the amount of unemployment in that particular firm or industry, it would put a pressure upon management to stabilize its employment to the fullest degree possible in much the same way that workmen's compensation has stimulated the better managed firms to reduce industrial accidents.

There are many who agree with such proposals but feel that owners and managers of industry can be trusted to adopt these plans voluntarily. But this ignores the crucial fact that business in general will not want to assume such added costs when to do so will place them at a competitive disadvantage with other firms which do not act similarly. After a decade of experimentation, the Industrial Relations Counsellors, Inc., an organization connected with large capitalistic interests, reports that prior to the adoption of the General Electric plan last spring, only 11 companies had such plans and that only approximately 9000 workers were eligible for benefits. Only about 35,000 workers were covered by trade union plans and somewhere around 60,000 by joint plans of employers and unions. The adoption of the General Electric plan has probably raised the total number protected by all three varieties of plans to somewhere between 175,000 to 180,000.

Because of competitive pressure, therefore, we believe that private experiments, though extremely valuable, cannot furnish adequate protection to the unemployed. We see no other way, therefore, of providing these reserve funds except by making this mandatory in much the same fashion that workmen's compensation was made mandatory.

We are well aware that large groups of high-minded and sincere people, whose motives we do not question, are at present opposed to any such proposal for a number of reasons which we propose to state fairly and to consider:

(1) It is feared that the benefits to the unemployed will cause them not to seek employment but instead to remain idle and that thus the result of any such measure would be to make the situation worse rather than better. With full respect to the proponents of this objection, we should like to point out that this danger can and should be prevented under any proper law by the following measures: (a) The benefits should be paid only to those who have been laid off because of lack of work and not to those who were discharged for cause or who voluntarily left without just cause. (b) Awaiting period of two weeks should be required before the payment of benefits begin. (c) Each unemployed person should register at the nearest public employment office which should seek to get work for him. Any person who refused work in his trade or locality where there was no strike, or lockout, at the going rate of wages should not receive any benefit and after a reasonable period of time if he refused work in other localities or industries, he should not receive benefits. (d) The benefits should always be appreciably less than what the worker could secure if employed. (e) The benefits should only be paid for a limited number of weeks in any year and should be limited to one week of benefits for every four or five weeks for which premiums were paid for or by the worker.

(2) It is also feared that once such a system is established there will be constant pressure to have the period of benefit extended and for the public to pay a large share of the expense. That there are real possibilities in this direction we freely admit. We believe, however, that these issues can be met when they are encountered and we submit that we should not refuse to take a needed first step because later the State may be asked to take a second.

(3) It is further feared that such a system may "freeze" labor in decaying trades and localities when the desirable thing would be for them to seek work elsewhere. This is a real danger but it can be met by some provisions as we have previously mentioned namely by requiring the unemployed, after a reasonable period of time, to accept available jobs in other industries.

(4) That the imposition of such burden upon industry in Pennsylvania would place it at a competitive disadvantage in comparison with similar industries in other States. This is, of course, an objection to all social legislation by the States under our Federal form of government. The previous adoption of workmen's compensation laws was not, however, found to be a serious burden upon the pioneering States and it should not be forgotten that such a program would bring with it many savings as well. It would stimulate Pennsylvania industry to regularize and thus effect economies and it would also lessen the burden of employers to contribute to charity. Any pressure of interstate competition can, however, be greatly lessened by a cooperative movement on the part of the chief industrial States to enact such laws. Such a development may be stimulated by the conference of governors called by Governor Roosevelt, of New York, to consider this question. A program of Federal grants-in-aid to the States adopting such measures would, moreover, greatly stimulate other States to enact similar laws, and thus lessen the pressure upon the pioneers.

(5) That many employers would take advantage of the payment of unemployment insurance to lay men off, whom if no other support were available, would otherwise be retained. These critics point out that employers are sometimes reluctant to drop workmen whom they would like to let go for either inefficiency or opposed policies, but whom they retain because of their reluctance to thrust men who do not possess reserves into the harsh rigors of unemployment. If these workmen are given some protection through unemployment insurance, it is alleged that the conscience of the employer will be assuaged and they will more readily drop the workers in question.

In dealing with this objection, we should bear in mind a number of considerations: (a) That large groups of workers such as those on the railroads and in various public utilities, etc., are employed on the seniority basis and hence are immune to such possible dangers of discrimination. (b) That it is not certain whether any very large group of employers now act in such a manner as that stated, or retain any considerable number of men whom they would fundamentally like to drop. (c) That the more workmen who would thus be laid off, the more would the premium rates of that employer go up with the result that a direct penalty would be imposed for such acts. (d) That the danger of a workman being alleged to be discharged when he is in reality laid-off can be checked both by an adequate administrative system which will probe such cases and by determining whether or not he is replaced. If the size of the working force be decreased, it is quite clear that such an ostensible dismissal would in reality be a lay-off.

We believe, therefore, that these honest objections are not sufficiently well founded and that they can be met by a proper mandatory law.

There are a number of points upon which competent opinion may well differ and which can be settled both by discussion and by experimentation. One of these is the question of contributions and whether they should be made by the employers alone, or jointly by both workers and employers, and whether the State should take a part in the financial support of the system. Another is whether the benefits should be flat sums irrespective of earnings or should be roughly graduated according to the previous earnings of the worker. Allied with all these questions are those of the administration of the insurance itself. We append two draft bills to our report which represent somewhat different approaches to these and other problems. The first is that prepared by the American Association for Labor Legislation in which the worker is not asked to contribute and another modeled upon the so-called Ohio plan in which the contributions are joint. While not specifically endorsing one of these bills in preference to the other, we wish to state our firm belief that the differences between them are far less important than the points of agreement. Once an agreement is reached on the principle of building up reserves for unemployment, the precise methods of administration can

readily be worked out and we believe that valuable suggestions are to be found in each of these two drafts.

We would, however, like to recommend that those who are receiving unemployment benefits may be required by the State, at its pleasure, to take general or vocational courses during such periods in order to prepare them more effectively for life and industry and to facilitate their re-employment. The period of unemployment would then not be a period of idleness as now but instead a period of development.<sup>1</sup>

This was passed by the following vote:

Yes: Douglas, Hall, McBride, Maguire, Phillips and Andrews.

No: Wright and Benedict.

Absent: Wolman.

#### Committee Recommendation

After earnest consideration of the above report of a majority of the Sub-Committee on Stabilization of Wage Earners Incomes, the committee as a whole resolved:

"That measures for the stabilization of workers' incomes are essential to our healthy economic life and that, although we are not able to agree on the specific measures through which this should be effected, we commend to your serious consideration and to that of our legislators if in your judgment it should be submitted to them) the able report of our sub-committee on this subject, printed herewith; and we call attention to a third possibility of voluntary action by employers either as individuals or groups or in cooperation with employees' organizations."

## PART TWO

### Draft of Proposed Legislation

#### APPENDIX A

A Joint Resolution Proposing an amendment to section eight, article nine, of the Constitution of the Commonwealth of Pennsylvania.

Section 1. Be it resolved by the Senate and the House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, that the following amendment to the Constitution of the Commonwealth of Pennsylvania be, and the same is hereby proposed in accordance with the eighteenth article thereof:

That section eight of article nine is hereby amended to read as follows:

Section 8. The debt of any county, city, borough, township, school district, or other municipality or incorporated district, except as provided herein, and in section fifteen of this article, shall never exceed seven (7) per centum upon the assessed value of the taxable property therein, but the debt of the city of Philadelphia may be increased in such amount that the total city debt of said city shall not exceed ten (10) per centum upon the assessed value of the taxable property therein, nor shall any such municipality or district incur any new debt, or increase its indebtedness to an amount exceeding two (2) per centum upon such assessed valuation of property, without the consent of the electors thereof at a public election in such manner as shall be provided by law. If, as and when the majority of a board consisting of the Governor, the Secretary of Internal Affairs, and State Treasurer, from time to time, as provided in section four of this article, shall determine and declare the existence of an unemployment emergency in this Commonwealth, the bonding capacity of each county, city, borough, township, school district, or other municipality or incorporated district, for the purpose of improving, adding to, or constructing any existing or new public works of political subdivisions may be increased from seven (7) per centum to eight (8) per centum upon the assessed value of the taxable property therein, the bonding capacity of the city of Philadelphia may be increased from ten (10) per centum to eleven (11) per centum upon the assessed value of the taxable property, and the bonding capacity of any such municipality or district from two (2) per centum to two and one-half (2½) per centum upon the assessed valuation of property therein without the consent of the electors thereof

<sup>1</sup>This of course, does not commit the sub-committee to the support of the second bill in Appendix G in preference to the first, although the second does have a provision to this effect. The real differences between the two bills are on other points.

at a public election in such manner as shall be provided by law. All bonds issued in accordance with the increased bonding capacity herein authorized in the event of an unemployment emergency shall be for terms of ten years and all construction projects of political subdivisions made possible thereby shall be subject to the approval of any State agency created by the Legislature for advance planning of public works.

In ascertaining the borrowing capacity of the city of Philadelphia, at any time, there shall be deducted from such debt so much of the debt of said city as shall have been incurred, and the proceeds thereof expended, or about to be expended, upon any public improvement, or in the construction, purchase, or condemnation of any public utility, or part thereof, or facility therefore, if such public improvement or public utility, or part thereof, whether separately, or in connection with any other public improvement or public utility, or part thereof, may reasonably be expected to yield revenue in excess of operating expenses sufficient to pay the interest and sinking fund charges thereon. The method of determining such amount, so to be deducted, may be prescribed by the General Assembly.

In incurring indebtedness for any purpose the city of Philadelphia may issue its obligations maturing not later than fifty (50) years from the date thereof, with provisions for a sinking fund sufficient to retire said obligations at maturity, the payment to such sinking fund to be in equal or graded annual or other periodical installments. Where any indebtedness shall be or shall have been incurred by said city of Philadelphia for the purpose of the construction or improvements of public works or utilities of any character, from which income or revenue is to be derived by said city, or for the reclamation of land to be used in the construction of wharves or docks owned or to be owned by said city, such obligations may be in an amount sufficient to provide for, and may include the amount of, the interest and sinking fund charges accruing and which may accrue thereon throughout the period of construction, and until the expiration of one year after the completion of the work for which said indebtedness shall have been incurred; and said city shall not be required to levy a tax to pay said interest and sinking fund charges as required by section ten, article nine of the Constitution of Pennsylvania, until the expiration of said period of one year after the completion of said work.

#### APPENDIX B

A Joint Resolution proposing an amendment to section four, article nine of the Constitution of the Commonwealth of Pennsylvania.

Section 1. Be it resolved by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, that the following amendment to the Constitution of the Commonwealth of Pennsylvania be, and the same is hereby proposed in accordance with the eighteenth article thereof:

That section four of article nine is hereby amended to read as follows:

Section 4. No debt shall be created by or on behalf of the State, except to supply casual deficiencies of revenue, repel invasion, suppress insurrection, defend the State in war, or to pay existing debt; and the debt created to supply deficiencies in revenue shall never exceed, in the aggregate at any one time, one million dollars: Provided, however, That the General Assembly, irrespective of any debt, may authorize the State to issue bonds, to the amount of one hundred millions of dollars, for the purpose of improving and rebuilding the highways of the Commonwealth: And Provided, further, That the General Assembly, irrespective of any debt, may authorize the State from time to time to issue bonds in any amount up to but not exceeding one hundred millions of dollars for the purpose of improvement, adding to, or constructing any existing or new public works in Pennsylvania if, as, and when the majority of a board consisting of the Governor, the State Treasurer and the Secretary of Internal Affairs from time to time shall determine and declare the existence of an unemployment emergency in this Commonwealth. All such emergency bonds shall be for a term of twenty years and at no time shall the aggregate amount of said bonds outstanding exceed one hundred millions of dollars.

## APPENDIX C

An Act providing for a system of advance planning and construction of public works of this Commonwealth and its political subdivisions in such a manner as will assist in the stabilizing of industry and employment; creating a departmental administration thereof; imposing powers and duties upon the Governor and the heads of certain administrative departments; and making an appropriation.

Section 1. Be it enacted by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, and it is hereby enacted by the authority of the same, That there is hereby created and placed in the Department of Property and Supplies a departmental administrative board to be known as "The Public Works Planning Board" hereinafter called the "board." This board shall consist of the Secretary of Property and Supplies, the Secretary of Highways, and a head of another administrative department appointed by the Governor, as ex-officio member, and five members appointed by the Governor as follows:

(a) Two of whom shall be active persons from one of the principal regional planning federations in a city of the first and second class, respectively.

(b) One of whom shall be conversant with city planning.

(c) One of whom shall be an economist or financier.

(d) One of whom shall be a representative of the building industry or of a building congress.

The members of the board first appointed under this act shall continue in office for terms on one, two, three, four and five years, respectively, and until their respective successors shall be duly appointed and shall have qualified, but their successors shall be appointed for terms of five years.

The board shall select from among their number a chairman and, with the approval of the Governor, shall appoint a Director, who shall receive an annual salary of seven thousand five hundred dollars, and such other clerical or other employees as may be necessary.

Each member of the board, other than the ex-officio ones, shall receive fifteen dollars per diem, for each day actually devoted to the work of the board as well as traveling expenses actually incurred in performing such work.

Four members of the board shall constitute a quorum.

The board shall co-operate with the departments, boards and commissions of the State Government that have jurisdiction or control of or power to engage in the construction of public works in formulating methods of advance planning thereof; shall make reports from time to time to the Governor and to the Legislature; and shall perform the powers and duties vested in it by this act.

Section 2. It is hereby declared to be policy of the Commonwealth of Pennsylvania to arrange the construction of public works, so far as practicable, in such manner as will assist in the stabilizing of industry and employment through proper timing of such construction, and to further this project there shall be advance planning of public works by the hereinafter designated construction agencies of the Commonwealth and by the board created by this act.

Each administrative department, board or commission having jurisdiction or control of or the power to engage in State construction work shall cause to be prepared a six-year advance plan of contemplated construction work by said department, board or commission with estimates for each project and tentative assignment of each project to a certain year. Such estimates shall show separately the estimated cost of land, the estimated cost of new construction and the estimated cost of repairs and replacements.

Such plans and estimates for the six-year period shall be submitted to the Secretary of Property and Supplies for correction and provisional approval. The Secretary of Property and Supplies shall submit to the Legislature from time to time a consolidated plan and a provisional estimate of the total sum which would constitute a normal construction program over a six-year period.

Each department, board, or commission submitting a six-year plan shall keep it up-to-date by a biennial revision of the plans and estimates for the unexpired years, biennially adding a plan and estimate for two additional years.

The Governor shall, before recommending to the Legislature the amount of State construction work for any biennium, take into consideration the total volume of construction, pub-

lic and private, under way within the Commonwealth, the general state of employment, and the activity of business.

The board shall collect information concerning advance construction plans and estimates by the political subdivisions of the Commonwealth, by public service corporations, and by private corporations and agencies, in order to estimate the probable future volume of construction within the Commonwealth.

Section 3. Whenever the Governor, upon recommendation of the board or upon advice of the President of the United States or for other reasons, shall declare the existence of an unemployment emergency, the rate of construction under the six-year plan shall be accelerated.

If the Legislature is in session the Governor shall submit a special message asking for appropriations for carrying out additional parts of the six-year plan.

If the Legislature is not in session work may be begun on those parts of the six-year plan which the Legislature has previously approved and payments may be made out of any moneys legally available for such purposes.

Section 4. The board may assist cities, towns, boroughs, school districts and other municipal units in developing their advance planning of construction and methods of financing which will assure increased available funds for construction during periods of unemployment.

The board may study methods of preventing peaks of public construction within geographical limits of the Commonwealth coinciding in time with peaks in private construction, in order to avoid excessive competition between public and private agencies for the same men, materials and credits.

The board may make suggestions to municipalities and to the public, based upon such studies in an effort to reduce the height of dangerous booms and thereby diminish the depth of subsequent depressions.

The board shall act, in its relations with municipalities, as far as possible through the Bureau of Municipalities of the Department of Internal Affairs.

Section 5. The board may study proposed construction projects within the Commonwealth which have not been authorized by the Legislature, for the purpose of later submitting to the Legislature plans and estimates suitable for consideration at a later time by the Legislature as emergency public works.

Section 6. There are hereby appropriated the following sums for the administration of this act:

## APPENDIX D

An Act to amend sections eleven, thirteen, fourteen and fifteen of an act approved the fourth day of June, one thousand nine hundred fifteen (Pamphlet Laws, eight hundred thirty-three), entitled "An act establishing under the Department of Labor and Industry a system of regulation of employment of employers seeking employees and of persons seeking employment; and prescribing, as incidental thereto, certain duties of employers and of county, municipal, township and school authorities and of agencies procuring employees for others; and prescribing penalties."

Section 1. Be it enacted by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, and it is hereby enacted by the authority of the same, that section eleven of the act approved the fourth day of June, one thousand nine hundred fifteen (Pamphlet Laws, eight hundred thirty-three), entitled "An act establishing under the Department of Labor and Industry a system of regulation of employers seeking employees and of persons seeking employment; and prescribing, as incidental thereto, certain duties of employers, and of county, municipal, township and school authorities, and of agencies procuring employees for others; and prescribing penalties," be and the same is hereby amended to read as follows:

Section 11. The Department of Labor and Industry shall have the power to establish and conduct public employment offices or labor exchanges at convenient places throughout the Commonwealth, and, with the approval of the representative council of a particular district or locality, may establish separate public employment offices for particular professions, trades and industries.

The [director] Department of Labor and Industry may enter into an agreement with any county, city, borough, town or township for the establishment and joint maintenance of local offices for the general public or for particular profession

trades and industries. All county, city, borough, town or township executives shall report to the [director] Department of Labor and Industry, from time to time, the general conditions of employment, the demands of employers for employees, the demands for employment and the existence of industrial disputes, strikes and lock-outs, in their respective districts, and shall cause to be posted any bulletins or notices of the [bureau] Department of Labor and Industry pertaining to the purposes of this act. Any county, city, borough, town or township may appoint the superintendent of the nearest district branch office to fill the office of superintendent of employment.

Section 2. That section thirteen of said act is hereby amended to read as follows:

Section 13. Each district and local office for the public in general or for a particular profession, trade or industry, shall have a representative council appointed by the [commissioner] Secretary of Labor and Industry. The council shall consist of [six] seven members, one of whom shall be a woman, and all of whom [are] shall be citizens of the United States and of the [State] Commonwealth of Pennsylvania, and residents of the district where the council is to serve. [One member shall be an employer, not a member of any employers' association; two members shall be representatives of employers' organizations; one member shall be a working person, not a member of any organization of working people, and two shall be representatives of organizations of working people. The commission shall designate one from the employers and one from the employees, to serve for a period of two years; one from each group, to serve for a period of four years, and one from each group, to serve for a period of six years. Upon the expiration of said terms, the] Of the seven members, three shall represent employers, three shall represent the working people and one shall represent neither employers nor working people, but the public in general: Provided that six members of a representative council of an office limited to a certain profession, trade or industry shall represent the employers and employees of said profession, trade or industry divided as aforesaid. The term of each member of representative council now holding office shall expire upon the effective date of this amendatory act. The term of office of each member of a representative council thereafter appointed shall be for a term of [six] two years, except that any member appointed to fill a vacancy shall serve for the unexpired term thereof.

The [commissioner and the director] Secretary of Labor and Industry shall be an ex-officio [members] member of each council. The superintendent in charge of a district shall be chairman of the council for his district, and in case of his inability to be present at any meeting the [director or the commissioner] Secretary of Labor and Industry or his duly authorized deputy may act as chairman.

The actual and necessary traveling expenses incurred by members of district representative councils, while engaged in the performance of their duties, shall be paid by the State.

Section 3. That section fourteen of said act is hereby amended to read as follows:

Section 14. [The] Each representative council [in each district] shall.

(a) [Devise methods and take steps toward the regularization of employment in the various industries and seasonal trades of the district.] In conjunction with the Department of Labor and Industry, exercise supervision over its particular public employment office.

(b) [Devise plans and take steps to promote public improvements by municipalities within the district, during seasons of unemployment.] Advise the Secretary of Labor and Industry in the appointment of the superintendent of its particular public employment office.

(c) Promote the wider use of district and local public employment offices by employers and persons seeking employment and to [co-operate] co-operate with any person, employers, association or organ of the press in accomplishing the aforesaid [purposes] purpose.

(d) [Appoint sub-committees to deal specially with any subject which the council has power to investigate or act upon, but each sub-committee shall be presided over by a member of the council.] Make recommendations concerning the promotion of members of the personnel staff at its particular public employment office.

(e) Hold meetings at least once each month, or oftener if required, for the accomplishment of the aforesaid pur-

poses; such meetings to be called by the chairman of the council, or to be fixed at any regular meeting of the council.

(f) Keep minutes of all meetings; submit a copy of all minutes, records and decisions; and report in full on all actions or proceedings to the [director] Department of Labor and Industry. No rule shall be prescribed or action taken by the council inconsistent with the action of the board.

Section 4. That section fifteen of said act is hereby amended to read as follows:

Section 15. The [bureau] Department of Labor and Industry shall neither charge nor receive fees, directly or indirectly, for any service or benefit rendered to those availing themselves of advantages provided. No official, employee or person associated with [the bureau] said department in the performance of its duties shall charge, demand, accept or receive, directly or indirectly, any fee, compensation, contribution or gratuity for any service or duty performed as an official or employee of [the bureau] said department.

The Department of Labor and Industry, however, may receive and accept from any person, firm, association, corporation or the United States of America gifts, donations, contributions or endowments of money, securities or other personal property which, or the income of which, shall be used by the Commonwealth either by itself or in conjunction with any political subdivision or groups of employers or employees for the establishment, development, promotion, extension, or operation of public employment offices in this Commonwealth for employers and persons seeking employment in general or for particular trades, industries or professions. Such gifts, donations, contributions or endowments shall be employed for the purpose or purposes specified by the donors to whom an accounting shall be made.

#### APPENDIX E

##### MAJOR CHANGES MADE IN EXISTING LEGISLATION GOVERNING PRIVATE EMPLOYMENT AGENCIES

The present powers of regulation of private employment agencies by the Department of Labor and Industry are authorized by the act of May 2, 1929, P. L. 1260, which repealed the original act of 1915 governing these agencies and weakened the regulatory powers of the aforesaid department.

This bill provides for the repeal of the act of 1929 and replacement thereof by a new act which puts more teeth in the regulatory powers of the Department of Labor and Industry. Briefly stated, the major changes made by this bill are as follows:

1. The definition of "employment agent" has been broadened to cover any person, firm or corporation making a charge for bringing or endeavoring to bring together employers and persons seeking employment.

2. "Service fees" and "registration fees are defined and the latter prohibited.

3. The procedure for the granting of licenses is simplified and the department after consultation with the Industrial Board may refuse to grant or renew a license if it is believed that private or public agencies fill the needs of the community in which the applicant proposes to operate.

4. The Department is permitted to revoke employment agents' licenses for cause after a hearing before the department. Formerly the Department could only revoke a license for three causes and had to institute revocation proceedings in the court of Common Pleas.

5. Now different fees are payable according to statutory classifications of licenses. This bill does away with the classification of employment licenses and provides for an annual license fee of two hundred dollars.

6. A definite license year is established and provision is made for the adjustment of existing licenses thereto; under the 1929 Act licenses are valid for one year after issuance.

7. Under this existing law the bond of each licensee is one thousand dollars while this bill requires a bond in the penal sum of five hundred dollars.

8. This bill authorizes the Department of Labor and Industry with the approval of the Industrial Board to prescribe rules and regulations for its administration.

An Act regulating the business of assisting employers to obtain employees, and persons to secure employment; providing for the licensing, registration, bonding and regulation of certain individuals and entities engaged in such business; conferring

certain powers and duties upon the Department of Labor and Industry and the Industrial Board; and prescribing penalties.

Section 1. Definitions.—Be it enacted by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, and it is hereby enacted by the authority of the same, that the following words or phrases when used in this act shall, unless the context otherwise indicates, have the meanings respectively ascribed to them as follows:

(a) "Employment agent" shall mean any person, partnership, association, or corporation engaged for profit in the business of assisting employers to secure employees, and persons to secure employment or of furnishing, in any manner whatsoever, information, letter service or other service as to where employment or help may be or is likely to be secured.

(b) "Department" shall mean the Department of Labor and Industry of this Commonwealth.

(c) "Secretary" shall mean the Secretary of Labor and Industry of this Commonwealth or his duly authorized deputy or representative.

(d) "Persons" shall include persons, associations, partnerships, and corporations.

(e) "Registration fee" shall mean and include any charge made, or attempted to be made for registering or listing an applicant for employment without rendering or agreeing to render service to the applicant in the procurement of employment or help.

(f) "Service fee" shall mean and include any money, compensation, or other valuable consideration paid or promised to be paid for services rendered, or to be rendered by any employment agent including any excess of money received by any such agent over and above what has been paid out by said agent for transportation, transfer or baggage, or board and lodging, for or on behalf of any applicant for employment.

Section 2. After the thirtieth day of September, one thousand nine hundred and thirty-one, it shall be unlawful for any employment agent to operate as such in this Commonwealth unless such employment agent be the holder of a license as in this act provided.

Section 3. Every person desiring to operate as an employment agent shall file an application for such license with the department. The application shall be on a form furnished by the department, and, together with such other information as the department shall require, shall state:

(a) The name and address of the applicant and, if the applicant is a corporation, the name and addresses of the officers, and, if the applicant is a partnership, the names and addresses of all the partners. The applicant of a corporation shall be signed by the president and treasurer and that of a partnership by all the partners.

(b) The State and date of incorporation and location of the principal office if the applicant is a corporation.

(c) The present address of the place where the business is to be conducted.

(d) Whether or not the applicant proposes to conduct a lodging house for the unemployed separate from the business proposed to be conducted.

(e) The business or occupation engaged in by the applicant for at least two years immediately preceding the date of the application.

Such application shall be made under oath or affirmation and accompanied by the affidavits of at least three reputable residents of the city or county in which the applicant intends to operate that the applicant or applicants signing the application is or are of good moral character.

With every original or renewal application each applicant for a license as employment agent shall file with the department a schedule of all service fees proposed to be charged for any services rendered to employers seeking employees and persons seeking employment.

All licensed employment agents in existence upon the effective date of this act shall file on or before August fifteenth one thousand nine hundred thirty-one an application for the renewal of their licenses as of October first of the same year.

Section 4. Upon receipt of an application for a license the department shall cause a thorough investigation to be made as to the character and responsibility of the applicant; and if the applicant is a corporation or a partnership, of all the officers or partners as the case may be; and of the person

who is to have the general management of the office; and as to the location and the premises at which the business is intended to be conducted.

The secretary shall have the power to issue subpoenas requiring the attendance of witnesses, and the production of books and pages, to administer oaths to such witnesses, and examine such witnesses, books and papers in respect to matters arising in the investigation of an application and may hold a public hearing as part of said investigation when and where he deems it necessary provided that said hearing shall be held within twenty days after the filing of an application. At least five days' notice of the time and place of such hearing shall be given by the secretary to the applicant, and any protestants that there may be.

Any witness who refuses to obey a subpoena issued hereunder, or who refuses to be sworn or affirmed, or to testify, or who is guilty of any contempt, may be punished for contempt of court as provided by law.

Section 5. After proper investigation and within thirty days after the filing of an application the department shall either grant or refuse the applicant a license. The department may refuse to grant a license to or renew a license or an applicant if upon investigation it is found and determined:

(a) That the applicant is not of a good character or reputation.

(b) That the place where the business is to be conducted is not a suitable place therefor, and such place, as well as for other proper reasons, shall be deemed unsuitable if it is to be conducted in rooms used for living purposes, or where boarders or lodgers are kept, or where meals are served, or where persons sleep, or in connection with a building or premises where intoxicating liquors are sold, or reputed to be sold, or in a house of ill repute, or in a neighborhood deemed unsatisfactory by the department.

(c) That the proposed plan of business is unjust or unfair.

(d) That the applicant, being hitherto an employment agent has been convicted of a violation of or has failed to comply with any law of this Commonwealth or any other State, governing the business of an employment agent, or has had, in this Commonwealth or elsewhere, an application for a license as employment agent refused or a license therefor revoked.

(e) After consultation with the Industrial Board, that the number of licensed private employment agents, or that the public employment agency operated by the Commonwealth, or by political subdivisions of this Commonwealth or by the United States of America, or by two or more thereof jointly, in the community in which the applicant for a license purposes to operate is sufficient to supply the need of persons seeking employees or employment.

Section 6. Every license hereunder shall be on a form prescribed by the department and shall be posted conspicuously in the place of business of the licensee.

All licenses issued by the department under this act shall expire on the thirtieth day of September next following the day on which issued. All licenses previously issued by the department and which are unexpired or unrevoked on the thirtieth day of September one thousand nine hundred and thirty-one shall expire on that day and existing employment agents shall secure new licenses as provided for by this act in order to continue business thereafter.

No license shall be granted under the provisions of this act until the applicant for a license shall have paid to the department a license fee of two hundred dollars: Provided, that all applicants for renewal of licenses prematurely expired by this act that are granted new licenses under this act shall receive a credit against the above license fee equal to the proportionate part of the old license fee applicable to the period of time after the thirtieth of September, one thousand nine hundred thirty-one during which the existing license expired by this act, would have been valid: And Provided further, That in the event the department refuses to renew the license of an existing employment agent, whose license prematurely expired by this act, such employment agent shall receive a refund of that proportionate part of the old license fee applicable to the period of time after the thirtieth of September, one thousand nine hundred thirty-one, during which the existing license, expired by this act, would have been valid. Amounts to be credited or refunded under this section shall be determined by the secretary. All refunds authorized

hereunder shall be paid by the secretary from any appropriation to the department available for this purpose.

All licenses issued hereunder shall not be transferable and shall be issued only for the premises named in the application.

Licenses issued under the provisions of this act may be renewed from year to year, upon approval of an application and upon the payment of a license fee of two hundred dollars, and the filing of a bond as in the case of an original application.

Section 7. Before any license can be granted, the applicant must file with the department a bond of a duly authorized surety company to be approved by the department, payable to the Commonwealth of Pennsylvania in the penal sum of five thousand dollars, and conditioned, among other things, upon the faithful observance and compliance by the applicant of the provisions of this act and all rules and regulations prescribed and issued thereunder; upon the payment of all damages or loss occasioned to any person dealing with said applicant, by reason of any misstatement, misrepresentation, fraud or deceit, or any unlawful act or omission of any such applicant, his agent or employees while acting within the scope of their employment, made, committed, or omitted in the business conducted under such license, or caused by any other violation of this act in carrying on the business of employment agent, and upon the payment of fines and penalties imposed for a violation or violations of this act.

All actions upon bonds given under this act shall be in the same manner as actions upon official bonds.

Section 8. The department shall have the power and duty to revoke or to refuse to renew the license of any employment agent upon due cause, particularly if as a result of any inspection or investigation, or upon sworn complaint filed, that any employment agent did knowingly or wilfully—

(a) Secure a license by means of fraud or misrepresentation.

(b) Violate any of the provisions of this act.

(c) Induce or attempt to induce any employee to leave his employment with a view to obtaining other employment through such agent.

(d) Publish or cause to be published any false or fraudulent or misleading information, representation, notice or advertisement or whose letterheads, receipts and blanks were not printed or did not contain the name and address of such agent, and the words "employment agent."

(e) Give false information, or did make false promises or false representations concerning an engagement or employment to any applicant who shall register or apply for an engagement, or employment or help.

(f) Accept any application for employment made by or on behalf of any child, or did assist in placing any such child in any employment whatever, in violation of the child labor laws.

(g) Divide, directly or indirectly, any fees charged or received by him, with any person who secured help through such employment agent, or to whom help was referred by such employment agents.

(h) Knowingly send persons seeking employment to non-existent jobs.

(i) Induce or compel any person to enter his employment office for any purpose either by the use of force, or by taking forcible possession of said person's property.

(j) Send or cause to be sent, any female as a servant, employee, inmate, entertainer or performer, or any male as employee or entertainer, to any place of bad repute, house of ill fame, or assignation house, or to any house or place of amusement kept for immoral purposes, or place resorted to for the purpose of prostitution, or gambling house the character of which such licensed person could have ascertained upon reasonable inquiry.

(k) Send out any female applicant for employment without making a reasonable effort to investigate the character of the employer.

(l) Send any female, as an entertainer or performer, to any place where any such female would be required or permitted to sell, offer for sale, or solicit the sale of intoxicating liquors, to those present or assembled as an audience, or otherwise, in such place, or any rooms or building adjacent thereto.

(m) Permit any persons of bad character, prostitutes, gamblers, intoxicated persons, or procurers to frequent his place of business.

(n) Charge any registration fee.

All the aforesaid enumerated actions, doings, or sayings are hereby declared to be unlawful on the part of employment agents.

Such revocation shall only be after a full and fair hearing before the secretary upon the question of revocation and after fifteen days' notice of the time and place of said hearing, and a copy of the charges preferred have been given to the holder of the license. The effect of any revocation shall be the same as if the licensee had never been licensed.

Whenever such licensee shall be finally revoked, the secretary shall not, within one year of such revocation, issue another license to such person, or his representative, or to any person with whom he is to be associated in such business. Nor shall such person be employed during such period by any other employment agent.

Section 9. No foreign employment agent, or other person, shall enter this Commonwealth and attempt to hire, induce, or take from this Commonwealth any labor, singly or in groups, for any purpose, without first filing, in the office of the secretary, a statement as to where the labor is to be taken, for what purpose, for what length of time, whether transportation is to be paid to and from destination, and a statement of the financial standing of the company desiring the labor, as well as an affidavit of authority to represent such company in this Commonwealth, and whatever other information the secretary may require.

The secretary shall thereupon determine whether the person desiring such labor from this Commonwealth is an employment agent for profit, and, if so, whether such person is qualified to be licensed under this act. The secretary, after such investigation, may refuse to license, upon compliance with the provisions of this act, or register such person. If such person shall be exempted from license, he shall pay for registration, a fee of five dollars, and receive therefor from the secretary a certificate recognizing his right to do business in this Commonwealth.

Section 10. Every employment agent shall keep a register or registers, approved by the secretary, in which shall be entered, in the English language, the date of any application for employment, the name and address of the applicant, the amount of the fee received, and, whenever possible, the names and addresses of former employers of persons to whom such applicant is known, and the final disposition of the applicant's case; a similar record of all applications of persons seeking employees, the date of such application, the kind of help required, the names of the persons sent, the record of the ones so sent, if any, who were employed as a result thereof, the amount of the fees received, and the rate of wages at which upon. No person shall make any false entry in such register.

It shall be the duty of the employment agent, whenever possible, to communicate, orally or in writing, with at least one of the persons mentioned as reference by any applicant for work in private families, or to be employed in a fiduciary capacity, and the results of such investigation shall be kept on file in such agency: Provided, That if the applicant for help voluntarily waives, in writing, such investigation of references, the employment agent shall not be required so to do.

Section 11. No employment agent shall send out any applicant for employment without having obtained a bona fide order therefor, and, if it shall appear that no employment of the kind applied for existed at the place to which said applicant was directed, the said employment agent shall refund to such applicant, within three days of demand, any sums paid by said applicant, for transportation in going to and returning from said place, and all fees paid by said applicant.

Section 12. Every employment agent shall give to each applicant for employment a card of paper, containing in printed, typewritten or written form:

(a) The name of the applicant.

(b) The name and address of such employment agency.

(c) The name and address of the person to whom the applicant is sent for employment.

(d) The kind of service to be performed.

(e) The rate of wages or compensation.

(f) The time of such services, if definite, and if indefinite, to be so stated.

(g) The name and address of the person authorizing the hiring of such applicant.

(h) The cost of transportation, if the services are required outside of the city, borough, town, or township where the employment agent conducts his business.

Section 13. It shall be the duty of every employment agent to give to every applicant for employment, from whom a fee shall be received, a receipt in which shall be stated together with such other facts as the department may direct:

- (a) The name of the applicant.
- (b) The date and amount of the fee.
- (c) The purpose for which it was paid.

Every applicant for help shall receive a receipt in which shall be stated:

- (a) The name and address of the applicant.
- (b) The date and amount of the fee.
- (c) The kind of help desired.

The secretary may require the printing on the back of any such receipts of portions of this act, or any rules or regulations prescribed thereunder, or any other information he may deem expedient.

Section 14. Whenever any employment agent agrees to send one or more persons as contract laborers, in any place outside the city, borough, town, or township in which such employment agent conducts his business, he shall file with the secretary, within five days after the contract is made, a statement containing the following items:

- (a) Name and address of the employer.
- (b) Names and addresses of the persons to be employed
- (c) Nature of the work to be performed.
- (d) Hours of labor.
- (e) Wages offered.
- (f) Destination of the persons to be employed.
- (g) Terms of transportation.
- (h) All fees that said contract laborers will have to pay.

A duplicate copy of this statement shall be given to the applicant for employment, in a language he is able to understand, before he leaves the city, borough, town or township.

Section 15. Every employment agent, in addition to his license, shall post in a conspicuous place, in every room of his place of business the portions of this act required by the department, and the schedule of fees on file with the department as required by this act, all of which shall be printed in large type, in language in which persons commonly doing business with such employment agent can understand. Such posters shall also contain the names and addresses of the nearest officers having authority to enforce this act.

Section 16. The secretary shall be charged with the enforcement of the provisions of this act, and his duly designated employees shall inspect from time to time, without warning, the office of each employment agent holding a license in this Commonwealth. Such employees shall enforce this act and shall have suitable badges, which they shall exhibit on demand of any person interested. They shall have for the purpose of the enforcement of this act, the powers of constables and policemen in cities of the first and second class.

All registers, books, records, and other papers required to be kept pursuant to this act by any employment agent, shall be open at all reasonable hours to the inspection of the secretary or his duly authorized employees for the purpose of enforcing this act.

Section 17. Subject to the approval of the Industrial Board, the department shall have the power to make rules and regulations as it may deem necessary for the supervision and control of employment agents and in so doing it may classify placements effected by employment agents.

Section 18. On the tenth day of November, one thousand nine hundred thirty-one, and on or before the same day of each month thereafter, each and every employment agent shall make to the department a statistical report of the preceding month which shall set forth, together with other data required by the secretary.

- (a) The number of placements classified according to the rules and regulations of the department.
- (b) The number of applicants applying but for whom placements were not secured.
- (c) The gross amount of fees received.

Section 19. All persons conducting without charge any department, association, bureau or agency for procuring employment shall not be subject to license under this act but shall apply on the first day of October of each year for registration with the department upon such forms and giving such

information as the department shall require, and the department may thereupon register such persons to operate without a license.

Section 20. Every employment agent shall maintain on file with the department a schedule of the service fees charged by it. And if any change is made in said schedule the employment agent shall promptly file a revised schedule with the department.

No registration or other fee in lieu thereof shall be charged or received by any employment agent.

Section 21. All moneys, fees, fines and penalties required to be paid under this act shall be collected by the secretary and by him paid into the State Treasury through the Department of Revenue.

Section 22. No person shall operate as an employment agent in this Commonwealth, without holding a license so to do, as herein provided; no person shall operate in this Commonwealth as set forth in Section 19 of this act, or under Section 9 hereof, without holding a license so to do, or being registered as herein provided. Any person so doing, shall for the first offense, upon conviction thereof in a summary proceeding before any alderman, magistrate, or justice of the peace, in the county where the offense occurred, be sentenced to pay a fine of not less than twenty-five dollars, not more than one hundred dollars, or upon non-payment thereof to undergo imprisonment in the county jail for a period of thirty days, and for a second offense shall be guilty of a misdemeanor, and upon conviction thereof in the proper court shall be sentenced to pay a fine of not less than twenty-five dollars nor more than two hundred and fifty dollars, or imprisonment for a period of not more than one year, or both, at the discretion of the court.

Section 23. Any person doing any of the acts set forth in paragraphs (f), (g), (j), (k), (l) or (m), of Section eight of this act, shall be guilty of a misdemeanor, and, upon conviction thereof before a court of competent jurisdiction, shall be sentenced to pay a fine of not less than one hundred dollars (\$100), or more than one thousand dollars (\$1000), and costs of prosecution, or undergo imprisonment in the county jail for a period of not more than one year, or both at the discretion of the court.

Section 24. This act shall become effective on the fifteenth day of August, one thousand nine hundred and thirty-one, except where its contents limit it to some later date.

Section 25. The provisions of this act are severable, and in the event that any provisions thereof should be declared unconstitutional, it is hereby declared to be the legislative intent that the remaining portions would have been enacted notwithstanding such judicial determination of the invalidity of any particular provision or provisions in any respect.

Section 26. That the act approved the second day of May, one thousand nine hundred twenty-nine (Pamphlet laws one thousand two hundred sixty), entitled "An act regulating the business of assisting employers to obtain employees, and persons to secure employment; providing for the licensing, registration, bonding, and regulation of certain individuals and entities engaged in such business; conferring certain powers and duties upon the Secretary of the Department of Labor and Industry of this Commonwealth, and of said department; and prescribing penalties," be and the same is hereby repealed as of the thirtieth day of September, one thousand nine hundred and thirty-one.

Section 27. All acts or parts of acts inconsistent herewith are hereby repealed.

#### APPENDIX F

An Act to add a new section to the Penal Code, making it a misdemeanor offense to charge or collect, or attempt to charge, or collect, a fee or valuable consideration for placing, or attempting to place, persons in public employment, or for registering persons for public employment or giving information as to where such public employment may be procured, or to place any order for public employment where a fee or valuable consideration is to be charged the applicant for such employment.

Section 1. A new section is hereby added to the Penal Code, to be numbered (——) and to read as follows:

Be it enacted by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met and it is hereby enacted by the authority of the same:

Section —. Any person, firm, association or corporation, or agent or officer thereof, who shall charge or collect, or attempt to charge or collect, either directly or indirectly, a fee or valuable consideration for registering any person for public employment, or for giving information as to where such public employment may be procured, or for placing, or attempting to place, any person in public employment of any kind, or in employment upon any public work done for or on behalf of the State, or any political subdivision, district or municipality thereof, whether such work is done by contract, sub-contract or otherwise and whether the person so placed, or to be placed, or registered, is to work directly for the State, or political subdivision, district or municipality thereof, or is to work for a contractor or sub-contractor doing public work for the said State or political subdivision, district or municipality thereof, shall be guilty of a misdemeanor, punishable by a fine of not exceeding five hundred dollars or by imprisonment for not exceeding six months, or by both such fine and imprisonment, in the discretion of the Court, and any person who, acting on behalf of the State, or any political subdivision, district or municipality thereof, or any person acting as a contractor or sub-contractor, or agent or representative thereof, doing any public work for or on behalf of the State, or any political subdivision, district or municipality thereof, places any order for public employment, or employment on public work as in this section described, with any other person, firm, association or corporation, or agent or officer thereof, the filling of which order will involve the charging of a fee or valuable consideration from any applicant for such employment, shall likewise be guilty of a misdemeanor and be subject to the same punishment.

#### APPENDIX G (First Part)

#### (1) A PLAN SUBMITTED AS A BASIS FOR STATE LEGISLATION BY THE AMERICAN ASSOCIATION FOR LABOR LEGISLATION

Industrial managers, as good business practice, set aside a dividend reserve fund out of which to pay stockholders during periods when their plants are idle. It is urged that an unemployment reserve fund should also be provided in order that their wage-earners may be tided over temporary periods of involuntary idleness.

The State can take a hand in the establishment of such a reserve. One method by which it may fruitfully do so, under the conditions prevailing in this country, is embodied in this tentative draft of an unemployment reserve bill. Instead of the plan featured in European relief schemes, this bill requires employers to contribute a small fixed percentage of their payrolls to a fund which will be administered so as to furnish to employees such benefits as the condition of the fund will permit. Employees are not required to contribute to the fund, but they do, of course, bear a considerable portion of the cost of unemployment owing to the limits placed upon benefits. A maximum limit of ten dollars a week is fixed, and no employee is to receive benefit for more than 13 weeks in a year nor for more than one week for each four weeks in which he has been employed by employers subject to the act. Opportunity is offered workers in any industry voluntarily to elect to pay contributions and thus receive additional benefits. Payments are not to be made to persons who are unemployed owing to stoppage of work due to a trade dispute and no one is to be denied benefits for refusal to take a job where there is such a dispute.

The bill recognizes that it is essential to any system of unemployment benefits that there should be a work test. It provides for the application of this test through employment offices, and it is to be expected that the operation of the plan will result in a reduction of unemployment by furnishing jobs instead of benefits wherever possible.

If the right to benefit is contested, it will be passed upon by the officer in charge of an employment office, and an appeal is allowed to an appeal board on which sit a representative of labor, an employer, and a neutral arbiter.

The administration of the plan in each industry is placed in the hands of an Employment Stabilization Board provided for that industry, under the supervision of the State Department of Labor. Since employers who are contributing to the fund are in a position to aid effectively in stabilizing employment in their industry, it is provided that when those

who employ a majority of its workers elect to do so they are authorized to administer the fund for their industry and conduct an employment office for its employers and employees subject to the approval of the State Department of Labor.

Employers who furnish satisfactory proof of their ability to pay benefits equal to those which the reserve fund for their industry pays are permitted to make the payments directly to their employees, and relieved from the duty of contributing to the fund. Those who remain in the fund are encouraged to reduce unemployment among their employees by the possibility of the payment of dividends on the basis of their employment experience.

This proposal in the course of its development through many months of conferences and correspondence has been submitted to a large group of interested citizens for criticism and suggestions.

#### DRAFT OF AN ACT FOR UNEMPLOYMENT RESERVE FUNDS

Section 1. Short Title. This act shall be known as the "unemployment reserve law."

Section 2. Definitions. As used in this act:

1. "Department" means the Department of Labor and Industry;
2. "Secretary" means the Secretary of Labor and Industry;
3. An "employment," except where the context shows otherwise, means any employment for hire within the State, except:
  - (a) employment as a farm laborer; or
  - (b) employment not in the usual course of trade, business or occupation of the employer;
4. "Employee" means any person employed by an employer in an employment subject to this act, except a person employed at other than manual labor at a rate of remuneration of fifteen hundred dollars a year, or over;
5. "Employer," except when otherwise expressly stated, means a person, partnership, association, corporation, and the legal representatives of a deceased employer, or the receiver or trustee of a person, partnership, association or corporation including the State and a municipal corporation or other political subdivision thereof, employing six or more employees in a common employment;
6. "Fund" means the unemployment reserve fund established by this act;
7. "Benefit" means the money allowance payable to an employee as provided in this act;
8. "Wages" means the money rate at which the service rendered is recompensed under the contract of hiring in force at the time the employee became unemployed, including the reasonable value of board, rent, housing, lodging or similar advantage received from the employer.

Section 3. Liability for payment of benefits. Benefits shall be paid to every unemployed employee for the industry fund to which his last employer belongs, or by his last employer if he has been exempted from the payment of contributions to the fund.

Section 4. Benefits. 1. An employee shall be entitled to demand benefits on account of unemployment which continues subsequent to a waiting period of two weeks after notification of unemployment.

2. Benefits shall be payable at a rate as provided herein but not to exceed:

- (a) ten dollars a week to an employee of 18 years or over, or five dollars to an employee under 18 years; or
- (b) 60 per cent. of his weekly wages; whichever is the lower.

3. Benefits shall be paid for a period to be fixed as provided herein but not for more than 13 weeks in one calendar year, nor in a greater ratio than one week of benefits to four weeks of employment by one or more employers in the State during the two preceding calendar years;

4. Benefits shall be paid to an employee only:

- (a) if he has been employed by one or more employers in the State for not less than 26 weeks during the two preceding calendar years;
- (b) while he is capable of and available for employment and unable to obtain employment in his usual employment or in another employment for which he is reasonably fitted.

But he shall not be required to accept employment:

- (1) in a situation vacant in consequence of a stoppage of work due to a trade dispute;

(2) if the wages, hours, and conditions offered be not those prevailing for similar work in the place of employment or are such as tend to depress wages or working conditions.

5. The duty of paying benefits shall not be shifted by employment for less than six days if such employment is temporary in character.

Section 5. When benefits not paid. An employee shall not be entitled to benefits:

1. if he has lost his employment through misconduct; or  
2. if he has left his employment voluntarily without reasonable cause; or

3. if he has left or lost his employment due to a trade dispute in the establishment in which he was employed, so long as such trade dispute continues.

Section 6. Break in unemployment. 1. Employment at any work for which provision of benefits is not required, shall suspend the right to benefits. If the employee becomes unemployed after three months or more of such employment, his right to benefits shall recommence upon notification of unemployment and the running of the waiting period. If he becomes unemployed within three months of his acceptance of such employment, his right to benefits shall recommence upon notification of unemployment.

2. If an employee undertakes such employment during the two-weeks' waiting period it shall not affect the running of such period if it continues for six days or less.

3. The employee shall inform the employment office at which he has given notification of unemployment, when he begins and leaves such employment.

Section 7. Notification. An employee may give notice of his unemployment either in the State employment office for the district in which he resides or in the employment office established under this act by the industry in which he is usually or was last employed.

Section 8. Proof of right. The employee shall prove his right to benefits and the continuance of such right in such manner as may be provided by the rules and regulations of the department.

Section 9. Jurisdiction continuous. Jurisdiction over benefits shall be continuous. Benefits paid to any individual shall be modified whenever necessary to make the amount correspond to the amount or period fixed by the appropriate industry board.

Section 10. Method of determining disputed right to benefit. 1. If the employer, or industry fund liable to pay benefits, upon request by the employee, fail to pay, or to continue to pay, the benefit as provided in this act, the employee may file a claim with the officer in charge of the employment office at which he has given notice of his unemployment. The claim must be filed within one month of default in payment.

2. If such officer believe the claim correct, or as soon as it has been corrected, he shall notify in writing such employer or industry fund, of the claim and that he may contest it by filing, within five working days after the receipt of notice, a denial of the claim in such form as the department may provide; and such denial shall operate as an application for a hearing before the officer.

3. If the claim appear to such officer invalid or improperly made, he shall, within three days, notify such employer, or industry fund. He shall also notify the employee of his right to make an application for a hearing before the officer which must be made within five working days. Such notifications and applications shall be in such form as the department may provide.

Section 11. Appeals. The secretary shall provide for an appeal from the decision of the officer to an appeal board of three members, appointed by the secretary. This appeal board shall contain one employer and one employee, or representative of employees, who shall be resident within the district for which they serve, and one person who is not an employer, an employee or a representative of either.

Section 12. Questions of law to court. The secretary, or an appeal board, may certify questions of law to the (appropriate court).

Section 13. Agreement to contribution by employees void. No agreement by an employee to pay any portion of the payment made by his employer for the purpose of providing benefits either through the fund or otherwise, shall be valid and no employer shall make a deduction for such purpose from the wages or salary of any employee. But nothing in this act shall effect the validity of voluntary arrangements where-

by employees individually or collectively agree to make contributions for the purpose of securing unemployment benefits in addition to those provided by this act.

Section 14. Waiver of agreement void. No agreement by an employee to waive his right to benefits under this act shall be valid.

Section 15. Assignments. Benefits due under this act shall not be assigned, released or commuted and shall be exempt from all claims of creditors and from levy, execution and attachment or other remedy for recovery or collection of a debt, which exemption may not be waived.

Section 16. Administration. 1. This act shall be administered by the Department of Labor and Industry and the department shall have power to make all rules and regulations and to make all appointments which are necessary for the enforcement of the act.

2. The secretary shall appoint for two years an employment advisory committee, consisting of an equal number of representatives of employers and employees, to be selected from lists submitted for that purpose by employers and employees, and one person who is neither an employer, an employee nor a representative of either and who shall act as chairman. The committee shall meet on the call of the secretary and shall assist the secretary without pay in investigations and the general administration of this act.

Section 17. Exemption. 1. The secretary may exempt from the duty of paying contributions to the fund, an employer:

(a) who furnishes satisfactory proof of financial ability to pay the benefits fixed for unemployed persons in his industry, or the most similar industry as determined by the secretary; or

(b) who submits a plan for unemployment relief which in the opinion of the secretary will give benefits at least equal to the benefit as estimated in subsection (a) of this section

2. As a condition to granting exemption, the secretary shall require the employer to furnish such security as he may deem sufficient to insure payment of all benefits, including the setting up of proper reserves. He may from time to time require further proof of financial ability of an exempted employer. For lack of such proof, or for failure to comply with the provisions of this act, or with the rules and regulations of the department, the secretary may, upon 10 days' notice and opportunity to be heard, revoke the exemption of any employer.

3. An exempted employer shall pay the benefits provided for in subsection one of this section.

Section 18. Unemployment reserve fund. There is hereby created a fund to be known as "The Unemployment Reserve Fund." Such fund shall consist of all contributions received and paid into the fund, of property and securities acquired by and through the use of moneys belonging to the fund and of interest earned upon moneys belonging to the fund and deposited or invested. Such fund shall be applicable to the payment of benefits.

Section 19. Payment of contributions. Contributions shall be paid by employers to the fund at such times as may be fixed by the secretary, at the rate of one and one-half per cent. of the wages paid to employees.

Section 20. Record and audit of payrolls. Every employer shall keep a true and accurate record of the number of his employees and the wages paid by him, and shall furnish to the secretary, upon demand, a sworn statement of the same. Such record shall be open to inspection at any time and as often as may be necessary to verify the number of employees and the amount of the payroll. Any employer who shall fail to keep such record or who shall wilfully falsify any such record, shall be guilty of a misdemeanor.

Section 21. Collection of contributions in case of default. If an employer shall default in any payments required to be made by him to the fund, after due notice the amount due from him with interest at 6 per cent. from the date when due, shall be collected by civil action against him in the name of the secretary, and the same when collected, shall be paid into the fund, and such employer's compliance with the provisions of this act requiring payments to be made to the fund shall date from the time of the payment of said money so collected.

Section 22. Bankruptcy. In the event of bankruptcy or insolvency of an employer, the amount due for contribution shall be a preferred asset second only to wages.

Section 23. Classification of employments. The secretary shall classify the employers in the fund into industries or groups of industries. The assets of each such class shall con-

stitute a separate branch of the fund, to be known as its industry fund, and shall be liable for the benefits payable to employees whose last employer was a member of such class.

Section 24. Organization of industry funds. 1. Upon classification of any industry, or group of industries, the secretary shall provide a board of not less than five members, at least three of whom shall be employers in such industry. The board shall be known as the Employment Stabilization Board for the (name of industry) Industry. Each member of the board shall hold office for the period of one year, or until his successor is appointed and qualifies.

2. The board shall have power:

(a) for the purpose of this act, to make rules and regulations for its class, which shall take effect when approved by the secretary; and

(b) to fix periodically the amount of benefits payable from its industry fund, the period for which payable, and the times of payment, subject to the provisions of the act and the approval of the secretary and the superintendent of insurance. Such benefits shall be as near the amount of the maximum provided herein as the condition of the industry fund of such class permits, and the decision of the board may be modified from time to time so that such fund shall always remain solvent; and

(c) to award dividends to employers based on their experience in maintaining regular employment; and

(d) subject to the approval of the secretary, to appoint and fix the remuneration of the officers and employees of its industry fund; and

(e) to do all other things which may be necessary for carrying on the business of its industry fund.

3. Whenever more than two employers in a classified industry employing more than half of the persons employed in such industry, shall so request the secretary may provide for the election of the board by the employers in the industry and may provide for a vote by each employer in proportion to the total number of his employees. Such employment shall be corrected for each annual election. If votes at any such election are not cast by more than two employers employing more than half of the employees in such industry, the election shall not be valid, and the secretary shall appoint the members of the board.

Section 25. Employment Offices. Any employment stabilization board elected by the employers may, with the approval of the secretary, create an employment office to serve the employers in the industry, and such branches as they may think desirable. The expense of such office shall be a charge upon the assets of the industry fund. Such board shall, subject to a minimum remuneration fixed by the secretary, appoint and fix the remuneration of the officers and employees of such employment office, and shall, with the approval of the secretary, make rules and regulations for its operation.

Section 26. Powers of Secretary. 1. Each employment stabilization board shall make such report to the secretary as he shall request and their books, accounts and records shall at any reasonable time be open to him or to any duly accredited representative. He may at any time investigate the conduct of an employment office maintained by such a board.

2. The secretary may make rules and regulations to provide for the co-operation between the industry employment offices and with the public employment offices.

Section 27. Expenses of administration. The expenses of administration shall be borne by the State, except as otherwise provided in this act.

Section 28. Expense of hearings. Fees of witnesses and other expenses involved in hearings and appeals under this act shall be paid on the same rate as similar expenses are paid in hearings under the Workmen's Compensation Law and shall be treated as expenses under this act.

Section 29. Penalties. 1. Any person who wilfully makes a false statement or representation:

(a) to obtain any benefit or payment under the provision of this act, either for himself or for any other person; or

(b) to lower contributions paid to the fund; or

2. Any person who wilfully refuses or fails to pay a contribution to the fund; or

3. Any employer who shall make a deduction from the wages or salary of any employee to pay any portion of the contribution to secure benefits under this act;

shall be guilty of a misdemeanor.

Section 30. Separability of provisions. If any provisions of this act, or the application thereof to any person or circumstance, is held invalid, the remainder of the act, and the application of such provision to other persons or circumstances, shall not be affected thereby.

Section 31. Time of taking effect. This act shall take effect immediately, except that the requirements in respect of benefits and applications for benefits shall take effect on January 1, 1932.

#### APPENDIX G (Second Part)

##### (2) A PLAN MODELED UPON THE OHIO BILL

###### Abstract

This act provides for a system of unemployment insurance for all manual workers in establishments where three or more employees are engaged, except in the case of agriculture and private domestic service which are exempt from all mandatory features of the act, and for all non-manual employees in such establishments whose salaries are less than \$2000 a year.

The benefits are payable only to those laid off for lack of work or who suffered from this cause a loss of more than 25 per cent. of their normal full-time. They are not payable to those who were discharged for just cause or who left voluntarily without just cause nor those who voluntarily absented themselves from work. A waiting period equal to two full-time weeks from the date the unemployed worker registers is also imposed. Benefits are to amount to 50 per cent. of the full-time weekly or daily wage of the worker but are not to exceed \$18.75 a week and will not be paid for more than 13 weeks during the year. Benefits will not be paid to those who refuse work in occupations for which they are fitted at the going rate of wage. It is also provided that the unemployed worker receiving benefits may be required to attend classes of a general or vocational nature under penalty of losing the benefit.

The contributions to the fund are to be made by employers and employees jointly. The contributions of the employees will amount to one and one-half per cent. of their earnings. The employer's contributions will vary according to the relative amount of unemployment in the past in his industry or establishment but in no case are to exceed three per cent. and are to average approximately two per cent. The State will make no cash contributions to the fund but will bear the expense of administering the fund and the registration and employment offices.

The administration of the fund and the employment offices is to be in the hands of an Unemployment Compensation Board of five members appointed by the Governor and with the consent of the Senate. Two of these are to represent the employers and selected from a panel of names submitted by accredited organizations of employers. Two members are to represent the employees from a panel of names submitted by accredited organizations representing the group.

Provision is made for self-insurance by individual employers provided they grant equal benefits to those provided under the act.

##### TENTATIVE DRAFT OF AN UNEMPLOYMENT INSURANCE LAW FOR PENNSYLVANIA

Section 1. There is hereby created an UNEMPLOYMENT COMMISSION OF PENNSYLVANIA, to be composed of five members appointed by the Governor with the advice and consent of the Senate. Not more than two of the appointees to such commission shall be persons who, on account of their previous vocation, employment, or affiliation, can be classed as representatives of employers, and not more than two of such appointees shall be persons who, on account of their previous vocation, employment, or affiliation, can be classed as representatives of employees, and not more than three of the members of such commission shall belong to the same political party. These four members shall be appointed by the Governor from lists submitted by accredited organizations representing employers and employees respectively. The members of the commission shall be appointed by the Governor within 30 days of the date when this act becomes effective; two of which members shall be appointed for the term of two years, two members for four years, and one member for six years, and thereafter as their terms expire the Governor shall appoint two members for the term of six years. Vacancies shall be filled by appointment by the Governor for the unexpired term.

Section 2. The Governor at any time may remove any member of the Unemployment Commission of Pennsylvania for inefficiency, neglect of duty, malfeasance, misfeasance or nonfeasance in office.

Section 3. No commissioner shall hold any position of trust or profit, or engaged in any occupation or business interfering or inconsistent with his duties as such commissioner; and no commissioner shall serve on any committee of any political party.

Section 4. Each of the members of the commission shall receive an annual salary of seven thousand five hundred dollars, payable in the same manner as the salaries of other State officers are paid. Before entering upon the duties of his office, each member of said commission shall take and subscribe the constitutional oath of office and shall swear or affirm that he holds no position upon any committee of a political party, which oath or affirmation shall be filed in the office of the Governor. Each member of said commission shall give a bond in the sum of ten thousand dollars, which bond shall be approved by the Governor and filed with the State Treasurer. All employees or deputies of the said commission receiving or disbursing funds of the State shall give bond to the State in amounts and with surety to be approved by said commission.

Section 5. The commission shall choose one of its members as chairman. A majority of such commission shall constitute a quorum to transact business. No vacancy shall impair the rights of the remaining commissioners to exercise all the powers of the commission, so long as a majority remains. Any investigation, inquiry, or hearing which the commission is authorized to hold, or undertake, may be held or undertaken by or before any one member of the commission, or by or before one of its deputies, and every order made by a member thereof, or by one of its duly authorized deputies, when approved and confirmed by a majority of the members and so shown on its records of proceedings, shall be deemed to be the order of the commission.

Section 6. The commission shall keep and maintain its office in the city of Harrisburg, Pennsylvania, and shall provide suitable room or rooms, necessary office furniture, supplies, books, periodicals, maps, and appliances as they deem necessary. The commission may hold sessions in any place within the State of Pennsylvania.

Section 7. As used in this act the following terms shall be defined and construed as follows:

(a) "COMMISSION" means the Unemployment Commission of Pennsylvania.

(b) "EMPLOYER" means every person, firm or private corporation who shall have three or more employees in a common employment. It shall not include the State of Pennsylvania as an employer, nor any municipal or public corporation, nor any political sub-division; nor any farmer; nor any person, firm or corporation engaged in Interstate Commerce and subject to the supervision and jurisdiction of the Interstate Commerce Commission; nor any person, firm or corporation to which this act may not apply by reason of any provision of the Constitution of the United States or of any act of Congress.

(c) "EMPLOYMENT" means any employment for hire within the State of Pennsylvania, and shall include any trade, occupation, or process of manufacture or any method of carrying on said trade, occupation or process of manufacture in which any person may engage, but shall not include private domestic service or persons engaged in farm labor, unless the employer of domestic or farm labor accepts the provisions of this act.

(d) "EMPLOYEE" means any person employed for hire by an employer in an employment in Pennsylvania subject to this act, except a person whose employment is not in the usual course of the trade, business, profession or occupation of the employer, and except further, persons whose income from employment other than manual labor is more than TWO THOUSAND DOLLARS per year.

(e) "BENEFIT" means money allowance payable to an employee as unemployment insurance or compensation as provided in this act.

(f) "WAGES" means the money rate at which the employee is recompensed under the contract of hiring in force at the time he became unemployed, or partially unemployed, including the reasonable value of board, rent, housing, lodging, or similar advantage from the employer.

(g) "FUND" means the Unemployment Insurance Fund established by this act.

(h) "UNEMPLOYMENT." A person shall not be deemed to be unemployed during any week in which he is following an occupation for which he derives wages not less than 75 per cent. of his usual remuneration.

Section 8. In addition to all other powers granted to the commission by provisions of this act, the commission shall have all power as follows:

(a) To adopt and promulgate rules governing.

(1) The time, place, and manner of making claims for benefits under this act.

(2) The procedure for investigating, hearing and deciding claims.

(3) The kind and character of notices required thereunder.

(4) The nature and extent of the proofs and evidence, and the method of taking and furnishing same to establish the right to benefits.

(5) The method and time within which adjudications and awards shall be made.

(b) To amend and modify its rules from time to time in such respects as the commission may find necessary or desirable.

(c) To appoint secretaries, clerks, investigators and deputies as required for the administration of the provisions of this act, and to determine their salaries and duties.

(d) To create such districts and branch offices as may be required for the proper administration of this act.

(e) To provide for the registration of all persons who are unemployed and to adopt such measures as may be feasible to promote their re-employment including the establishment and management of the public employment offices.

(f) To maintain such agencies for investigating unemployment and promoting regularity of employment as it may find feasible; and to license and supervise the conduct of all private employment agencies.

(g) To require all employers subject to the provisions of this act to furnish to it information from time to time concerning the amount of wages paid, the number of employees employed, the regularity of their employment, the number of former employees unemployed, the reason for their unemployment the likelihood of their future re-employment, and the probable requirements of employment of new employees; and to require such employers to give other and further information respecting any other facts required for the proper administration of this act.

(h) To classify generally all occupations and employment, and all employers individually, as to the general hazard of unemployment in such occupation and employment; and as to the particular hazard of such employer having especial reference to the history of the regularity of employment of employees of such employer.

(i) To provide for the levy and collection from all employees of employers subject to this act and all employers subject to the provision of this act, excepting only those employers hereafter referred to as "SELF-INSURERS," of the premiums required for the maintenance of the Unemployment Insurance Fund as further required by this act.

(j) To receive, hear and decide all claims for unemployment benefits, whether against the Unemployment Insurance Fund or against a self-insuring employer, and to provide for the payment of such claims as are allowed.

(k) To determine within the limits provided by this act the premium rates upon employers subject to this act.

Section 9. All unemployed employees of employers subject to this act shall be entitled to receive unemployment benefits; subject, however, to the following conditions:

(a) No employee shall be entitled to any benefits unless within the year preceding he has been employed by employers subject to this act, and has contributed to the Unemployment Insurance Fund one and one-half per cent. of his wages for a period of not less than TWENTY-SIX WEEKS; nor unless he has been so employed and has contributed to said Unemployment Insurance Fund premiums of ONE AND ONE-HALF PER CENT. of his wages for a total period of not less than FIFTY-TWO WEEKS.

(b) The total benefits to which an employee shall be entitled in any calendar year shall not exceed 13 times his benefit for one week of total unemployment, nor exceed ONE WEEK of benefits for total unemployment for each four

weeks of employment by employers subject to this act in the two years next preceding.

(c) Benefits shall be payable on account of each week of unemployment, after a waiting period of two weeks, at the rate of 50 per cent. of the employee's weekly wage, provided, however, that no benefit shall be in excess of Eighteen Dollars and Seventy-five Cents per week.

(d) In cases of partial unemployment where, by reason of part-time employment, there is an impairment of wages in excess of 25 per cent., a benefit shall be paid as in cases of total unemployment, except that the amount of such benefit shall be one-half of the impairment in wages due to such partial unemployment, but not to exceed \$10.00 per week, and shall continue for the period of such unemployment; provided, however, that the total amount of the benefits payable, whether for partial unemployment, or total unemployment or partial unemployment and total unemployment, shall be as already stated; and provided further that no benefits shall be payable for such partial unemployment until after a waiting period such that the loss of time in such partial unemployment is equal to two weeks' total unemployment.

(e) The waiting period shall commence on the day the employee registers as unemployed at the PLACE OF REGISTRATION maintained by the commission in the city or district of his employment.

(f) Benefits shall be paid to an unemployed employee only while he is capable of, and available for employment, and unable to obtain employment in his usual employment, or in other employment for which he is reasonably fitted, provided however, that the right to benefits shall not be destroyed by reason of a refusal to accept employment IF,

(1) There is a strike or lockout in the establishment in which employment is offered; or

(2) The employment is at an unreasonable distance from his residence, having regard to the character of the work which he was accustomed to do; or

(3) Travel to the place of employment involves expense substantially greater than that required for his former employment, unless the expense be provided for; or

(4) The employment offered is at a rate of wage lower, or on conditions substantially less favorable than in his usual employment or any similar employment for which he is fitted.

(g) After a reasonable length of time if the unemployed employee is unable to find work in his usual trade or locality, he may not refuse a reasonable offer of employment in another trade or locality without losing his claim for benefit.

(h) No benefits shall be payable to an employed employee who has lost his employment through his own misconduct in such employment, or who has left his employment voluntarily and without reasonable cause; or who has left or lost his employment by reason of a strike or lockout in the establishment in which he was employed, so long as the strike or lockout continues; or who fails or refuses to report to the commission from time to time as required by its rules; or whose unemployment has been directly caused by act of God; or who becomes unemployed by reason of becoming an inmate of any penal institution.

Section 10. Every unemployed employee receiving benefit may be required by the Board, with the advice of the Superintendent of Public Instruction, to attend such classes for either general or (and) vocational instruction as the Superintendent of Public Instruction may provide. Any employee refusing to attend such classes or who absents himself an unreasonable number of times is to be deprived of his benefit.

Section 11. There is hereby created a fund to be known as the UNEMPLOYMENT INSURANCE FUND. Such fund shall consist of all premiums received and paid into the fund by employers and employees; or property and securities acquired by and through the use of moneys belonging to the fund; and interest earned upon money belonging to the fund. Such fund shall be applicable to the payment of benefits as provided herein.

Section 12. The State Treasurer shall be the custodian of the fund and all disbursements therefrom shall be paid by him upon vouchers authorized by the commission and signed by any two members of said commission, or, such vouchers may bear the facsimile signature of the members of said commission printed thereon, and the signature of the deputy or other employee of said commission charged with the duty of keeping the

account of said funds and with the preparation of vouchers for the payments of benefits to the person or persons entitled thereto.

Section 13. The State Treasurer is hereby authorized to deposit any portion of the fund not needed for immediate use, in the same manner and subject to all the provisions of the law with respect to the deposit of State funds by such treasurer; and all interest earned by such portion of the fund as may be deposited by the State Treasurer in pursuance of authority herein given, shall be collected by him and placed in the credit of such fund.

Section 14. The commission shall have the power to invest any of the surplus or reserve belonging to the fund in bonds of the United States, farm loan bonds issued under the provisions of the Act of Congress known as the Federal Farm Loan Act, approved July 17, 1916, and amendments thereto, the State of Pennsylvania, of any county, city, village or school district, or any conservancy district of the State of Pennsylvania, at current market prices for such bonds; provided that such purchase be authorized by a resolution adopted by the commission and approved by the Governor; and all such bonds so purchased forthwith shall be placed in the hands of the State Treasurer who is hereby designated as custodian thereof, and it shall be his duty to collect the interest thereon as the same becomes due and payable, and also the principal thereon and to pay the same, when so collected, into the fund. The State Treasurer shall honor and pay all vouchers drawn on the fund for the payment of such bonds when signed by any two members of the commission, upon delivery of said bonds to him when there is attached to such voucher a certified copy of such resolution of the commission authorizing the purchase of such bonds; and the commission may sell any of said bonds upon like resolution and the proceeds thereof, shall be paid by the purchaser to the State Treasurer upon delivery to him of said bonds by the treasurer.

Section 15. The State Treasurer shall give a separate and additional bond, in such amount as may be fixed by the Governor, and with sureties to his approval, conditional for the faithful performance of his duties as custodian of the fund herein provided for. Such bond shall be deposited with the Secretary of the Commonwealth and kept in his office.

Section 16. Excepting as hereinafter provided, every employer, subject to the provision of this act, shall in the month of January, 1932, and semi-annually thereafter, pay into the Unemployment Insurance Fund the amount of premiums determined and fixed by the commission for the employment or occupation of such employer, the amount of which premium to be so paid by such employer to be determined by the classification, rules and rates made and published by said commission, and such employer shall semi-annually thereafter pay such further sum of money into the Unemployment Insurance Fund as may be ascertained to be due from him by applying the rules of said commission, and a receipt or certificate certifying that said payment has been made shall immediately be mailed to such employer by the commission, which receipt or certificate, attested by the seal of said commission, shall be prima facie evidence of the payment of such premium. Provided, however, that such employers, otherwise referred to in this act as SELF-INSURING EMPLOYERS, who will abide by the rules of the commission and may be of sufficient ability to render certain the payment of benefits to unemployed employees equal to or greater than provided for from the Unemployment Insurance Fund, and who do not desire to insure the payment thereof, may, upon the evidence of said fact by the commission, elect to pay individually such benefit directly to their said unemployed employees, and the commission shall require such security or bond from said self-insuring employers as it may deem proper, adequate and sufficient to secure to such unemployed employees the payment of the benefits herein provided for, which shall in no event be less than that paid out of the Unemployment Insurance Fund in similar cases. Should municipal or other bonds be accepted by the said commission as security for said payments, such bonds shall be deposited with the State Treasurer, whose duty it shall be to have custody thereof, and to retain the same in his possession according to the conditions prescribed by the order of the commission accepting the same as security, and said treasurer shall retain possession of said bonds until such time as he may be directed by said commission as to the mode and method of his disposition of the same, and said commission shall make and publish rules and regulations gov-

erning the mode and manner of making application, the nature and extent of the proof required to justify such finding of fact by the commission to permit such election of such employers, which rules and regulations shall be general in their application. The commission may at any time change or modify its findings of fact herein provided for or revoke the right of said employer to pay benefits direct, if in its judgment such action is necessary or desirable to secure a strict compliance with all the provisions of the law in reference to the payment of benefits.

Any self-insuring employer may substitute for the benefits provided by this act any other plan which will, in the opinion of the commission provide benefits equivalent to or greater than those provided for in this act, and without greater burdens upon the employees in the form of premiums or otherwise and which is further shown to be desired with substantial unanimity by the employees of said employer. If at any time such plan or its administration is claimed to fail to meet such standard, the commission shall, upon proper notice to said employer, and after hearing, determine such fact; and if said finding is adverse to said employer, it shall withdraw its permission; and thereupon said employer shall contribute its premiums to the fund, or in the alternative, qualify as a self-insurer, as hereinbefore provided.

Section 17. Every employee of an employer, subject to the provisions of this act, which has not elected to be a self-insuring employer, and who is entitled to receive benefits under the provisions of the act, shall pay into the Unemployment Insurance Fund, a sum equal to one and one-half per cent. of all wages received in such employment, and such employers shall be required to deduct from the wages so paid such amount as to pay the same into the Unemployment Insurance Fund under such regulations and at such intervals as the commission may determine and require. All employees of self-insuring employers who are entitled to benefits under this act shall pay to such employers such sums as such employers shall require, provided, however, that such amount may not be in excess of one and one-half per cent. of the wages paid by said employer, and the time and method of collection and the records thereof, shall be subject to the approval of the commission.

Section 18. The rate of premium to be paid into the Unemployment Insurance Fund by all employers under this act shall be a percentage of the employer's payroll to employees entitled to participate in benefits under this act. For the purpose of establishing this rate employment shall be classified into groups equitably based on differences of unemployment hazard, and employers shall be classified into classes within such groups, equitably based upon their individual history of unemployment hazard; and premiums shall be fixed on an actuarial basis at the lowest possible rate consistent with the maintenance of a solvent insurance fund with reasonable reserves and surplus. In no event may the premium rate upon any employer be fixed at a greater percentage than three per cent. upon such payroll of such employer with a general average for all employers of two per cent.

Section 19. No agreement by an employee to pay any portion of the payment required to be made by his employer for the purpose of providing benefits either through the fund or otherwise, shall be valid; and no employer shall make a deduction for such purpose from the wages or salary of any employee. But nothing in this act shall affect the validity of voluntary arrangements whereby employees agree to make contributions for the purpose of securing unemployment benefits in addition to those provided in the act.

Section 20. No agreement by an employee to waive his right to benefits under this act shall be valid.

Section 21. Benefits due under this act shall not be assigned, released or commuted and shall be exempt from all claims of creditors and from levy, execution and attachment or other remedy for recovery or collection of a debt, which exemption may not be waived.

Section 22. Whenever in any employment it is customary to operate only during a regularly recurring period or periods of less than one year in length, then the right to benefits shall apply only to the longest seasonal period or periods which the best practice of such industry or class of employment will reasonably permit. The commission shall ascertain and determine or re-determine such seasonable period or periods for each such seasonable employment. Until such determination, no employment shall be deemed seasonal.

Section 23. Every employer shall furnish the commission upon request, all information required by it to carry out the purpose of this act. In the month of January of each year, every employer of the State, subject to this act, shall prepare and mail to the commission at its main office in the City of Harrisburg, Pa., a statement containing the following information, viz.: the number of employees employed during the preceding year from January 1 to December 31, inclusive; the number of employees employed at each kind of employment and the aggregate amount of wages paid to such employees and further information required by the commission, which information shall be furnished on a blank or blanks to employers free of charge upon request therefor. Every employer receiving from the commission any blank, with direction to fill out the same, shall cause the same to be properly filled out so as to answer fully and correctly all questions therein propounded, and to give all the information therein sought, or if unable to do so, he shall give to the commission in writing good and sufficient reasons for such failure. The commission may require that the information herein required to be furnished be verified under oath and returned to the commission within the period fixed by it or law. The commission or any member thereof, or any person employed by the commission for that purpose, shall have the right to examine under oath, any employer, or the officer, agent or employee thereof for the purpose of ascertaining any information which such employer is required by this act to furnish to the commission.

Any employer who shall fail or refuse to furnish to the commission the annual statement herein required, or who shall fail or refuse to furnish such information as may be required by the commission under authority of this section, shall be liable to a penalty of five hundred dollars, to be collected in a civil action brought against said employer in the name of the State. All such penalties, when collected, shall be paid into the fund and become a part thereof.

Section 24. The information contained in the annual report provided for in the preceding section, and such other information as may be furnished to the commission by employers in pursuance of the provisions of said section, shall be for the exclusive use and information of said commission in the discharge of its official duties, and shall not be open to the public nor be used in any Court in any action or proceeding pending therein unless the commission is a party to such action or proceeding; but the information contained in said report may be tabulated and published in statistical form, for the use and information of other State departments and the public. Any person in the employ of the commission who shall divulge any information secured by him while in the employ of the commission in respect to the transactions, property, business or mechanical, chemical or other industrial processes of any company, firm, corporation, person, association, co-partnership or public utility to any person other than the members or employees of the commission shall be fined not less than One Hundred Dollars, nor more than One Thousand Dollars, and shall thereafter be disqualified from holding any appointment or employment with the commission.

Section 25. Each member of the commission, its secretary and all deputies appointed by the commission shall, for the purposes contemplated by this act, have power to administer oaths, certify to official acts, take depositions, issue subpoenas, compel the attendance of witnesses and the production of books, accounts, papers, records, documents and testimony.

Section 26. In case of disobedience of any person to comply with the order of the commission or any deputy, or on the refusal of a witness to testify to any matter regarding which he may be lawfully interrogated, or refusal to permit an inspection as aforesaid, the Probate Judge of that county in which the person resides, on application of any member of the commission, its secretary, or any deputy, appointed by it shall, compel obedience by attachment proceedings as for contempt, as in the case of disobedience of the requirements of subpoena issued from such Court on a refusal to testify therein.

Section 27. It shall be the duty of each member of a firm, and of the president, secretary, general manager and managing agent of each private corporation, including any public service corporation subject to this act, to cause such firm or corporation to comply with the provisions of this act, and any person or any member of such firm or any officer of such corporation referred to in this section who shall neglect or fail to comply with the provisions of this Act relating to the making of reports and the payment of premiums to the Fund shall be

guilty of a misdemeanor, and upon conviction thereof shall be fined not more than Five Hundred Dollars and the costs of prosecution. Such fine when collected shall be paid to the commission and placed in the State Insurance Fund.

Each day's refusal on the part of such persons, members of such firm or the officers of such corporations to comply with the provisions of this Act, after notice to said person, firm or corporation, including any public service corporation, from the commission to comply with the same, shall be deemed a separate offense and be punished as herein provided.

All courts exercising jurisdiction in cases of misdemeanor, including justices of the peace, shall have final jurisdiction of offenses under this section; but an affidavit charging such an offense shall not be filed unless the same bears the approval of the prosecuting attorney of the proper county or of the attorney-general.

Section 28. If the commission finds that any person, firm or private corporation, including any public service corporation is, or has been at any time after January 1, 1932, an employer subject to the provisions of this Act and has failed to comply with the provisions of this Act, it shall determine the period during which he or it was such an employer, which finding and determination shall for all purposes of this Act be prima facie evidence thereof. The commission shall forthwith give notice of said action to the employer who shall immediately thereafter furnish the commission with a payroll covering the period included in said finding, together with an estimated payroll of six months next succeeding the date of such finding, if such employer is subject to the provisions of this Act, and shall forthwith either pay into the fund the amount of premium determined and fixed by the commission for such period or shall comply with the provisions with reference to the direct payment of the benefits provided by this Act as self insurer.

If said employer fails, neglects or refuses to furnish such payroll and pay the premium for such period or to elect to pay directly such benefits during such period within ten days after receiving such notice, the commission shall then determine the amount of premium due from said employer for the period the commission found him or it to be subject to this Act, including the amount of premium to be paid by him or it for the next succeeding six months, if such employer is subject to the provisions of this Act on the date of such determination, and shall notify said employer of the amount thereof and shall order the same paid into said fund. If said amount is not paid within ten days after receiving notice, the commission shall certify the same to the attorney-general, who shall forthwith institute a civil action against such employer in the name of the State for the collection of such premium. In such action it shall be sufficient for plaintiff to set forth a copy of the finding of the commission relative to such employer as certified by the commission to the attorney-general and to state that there is due to plaintiff on account of such finding of the commission a specified sum which plaintiff claims with interest. A certified copy of such finding relative to such employer shall be attached to the petition and shall constitute prima facie evidence of the truth of the facts therein contained. The answer or demurrer to such petition shall be filed within ten days, the reply or demurrer to the answer within twenty days, and the demurrer to the reply within thirty days after the return day of the summons or service by publication. All motions and demurrers shall be submitted to the court within ten days after the same are filed. As soon as the issues are made up in any such case, it shall be placed at the head of the trial docket and shall be first in order of trial.

Unless said employer shall, within ten days last aforesaid, execute a bond to the State, in double the amount so found and ordered paid by the commission, with sureties to the approval of the commission, conditioned that he or it will pay any judgment and costs rendered against him or it for said premium, the court at the time of the filing of the petition, and without notice, shall appoint a receiver for the property and business of such employer, in this State, with all the powers of receivers in other cases, who shall take charge of all said property and assets of the defendant and administer the same under the orders of the court.

If upon final hearing of said cause it is found and determined that the defendant is subject to the provisions of this Act the court shall render judgment against said defendant for the amount of premium, provided to be paid by such employer for such period under the provisions of this Act. with

interest from the date of the determination of said amount by the commission together with costs, which judgment shall be given by the same preference as is now or may hereafter be allowed by law on judgments rendered for claims for taxes.

If any employer who has complied with this Act shall default in any payment required to be made by him or it to the fund, for a period of ten days after notice that such payment is due, the same proceedings may be had as in the case of an employer against whom the commission has made a finding as hereinbefore provided.

If the defendant is a non-resident of this State or a foreign corporation doing business in this State, service of summons may be made upon any agent, representative or foreman of said defendant, wherever found in the State, or service may be made in any other manner designated by statute.

The commission, for good cause shown, may waive a default in the payment of premium where such default is of less than sixty days' duration, and upon payment by the employer of the premium for such period, he and his employees shall be entitled to all of the benefits provided by this Act.

Section 29. The commission shall have full power and authority to hear and determine all questions within its jurisdiction, and its decisions thereon in each claim shall be final. Provided, however, that any employer or employee aggrieved by any order or decision of the commission may, within 15 days thereafter appeal such order or decision to the Court of Common Pleas of the county wherein said appellant is resident or was last employed; and said appeal shall be heard upon a transcript of the proceedings before the commission and said order shall not be modified nor reversed unless said Court shall find, upon consideration, of the record, that it was unlawful and unreasonable. Either party shall have the right to prosecute error from the decision of the Court of Common Pleas as in other civil cases.

Section 30. All claims for benefits under this Act shall be waived, unless made within sixty days from the date when unemployment began.

Section 31. Employment at any work for which provision for benefits is not required shall suspend the right to benefits. If the employee loses such employment within six months of the cessation of his employment by his previous employer his right to benefit shall recommence upon registration and expiration of the waiting period.

Section 32. If an employee undertakes such employment during the two weeks' waiting period it shall not affect the running of such period if it continues for one week or less.

Section 33. The employee shall notify the employment office at which he is registered when he begins and leaves such employment.

Section 34. The entire cost of the administration of this Act, including salaries and other expenditures required, shall be paid upon vouchers of the commission out of the general funds of the State.

Section 35. If any employer, employee or other person shall violate any provisions of this Act or shall do any act prohibited by this Act or shall fail or refuse to perform any duty lawfully enjoined, within the time prescribed by the commission, for which no penalty has been specifically provided, or fail, neglect or refuse to obey any lawful order given or made by the commission, or any judgment or decree made by any court in connection with the provisions of this Act, for each such violation, failure or refusal such employer or other person shall be fined not less than Fifty Dollars, nor more than One Thousand Dollars for the first offense and not less than One Hundred nor more than Five Thousand Dollars for each subsequent offense.

Section 36. Every day during which any person, persons or corporations, or any officer, agent or employee thereof shall fail to observe and comply with any order of the commission, or to perform any duty enjoined by this Act shall constitute a separate and distinct violation of such order or said section as the case may be.

Section 37. The sections of this Act, and every part of such sections are hereby declared to be independent sections, and parts of sections and the holding of any section or part thereof to be void or ineffective shall not affect any other section or part thereof.

Section 38. This Act shall be in effect on and after July 1, 1931; but no premiums shall be payable by employees or employers until on and after January 1, 1932.

## PART THREE

## Reports of Sub-Committees

## 1. REPORT OF THE REGULARIZATION BY PRIVATE EMPLOYERS COMMITTEE

## 1. Activities

Your Regularization by Private Employers Committee, as appointed on November eighth, met immediately after the meeting of the Pennsylvania Committee on Unemployment, at the Benjamin Franklin Hotel and discussed informally the scope and the prospective activities of the Committee. It was decided that probably the most effective method would be to hold a series of meetings at strategic industrial centers of the State, where important speakers could meet with and discuss the various accepted plans of regularization with the leading employers of that district.

Before holding the first of such meetings, it was deemed advisable to call in a few of the industrial leaders for their advice and counsel in both methods and scope. Consequently, a small group was invited to meet with your Committee at the Manufacturer's Club, Philadelphia, on Tuesday, November 18th. The attendance was not large but the enthusiasm and the practical suggestions expressed were of material benefit to us. The advice or regional meetings concurred without our own judgment, and as a result, a general meeting was called and held at the Manufacturers' Club, Philadelphia, on Tuesday, November 25th. This meeting was attended by the important industrialists of the Philadelphia Metropolitan area, including the counties of Philadelphia, Chester, Delaware, Montgomery and Bucks. The meeting was addressed by Senator Grundy, Dr. Clyde King, Mr. Morris L. Cooke, one of the Committee; Mr. Philip Gadsden, of the U. G. I. Company; Mr. Morris Leeds, another member of the Committee, and Dr. Billikopf, of the Lloyd Committee.

By resolution, three in number the meeting (1) called for the summarization and publication of the plans for Regularization as successfully operated in industry, (2) pledged itself to a program of plant betterment, extension and repair, and (3) pledged the distribution of available jobs among as many as possible by eliminating overtime through more shifts.

A second regional meeting was projected for the Bethlehem, Easton, Allentown, Stroudsburg section, by a close study of employment in that territory revealed that we have nothing to offer for the present emergency that is not being done. Our information is that payrolls of the industries of the Section in question are running about 60% of normal; that the work is being distributed, and that while incomes are materially reduced, there is no one out of a job who wants to work. There being no emergency, emergency measures are unnecessary. Hesitating to disturb a situation that is eminently satisfactory, we are holding in abeyance our meeting, but are in direct contact with the situation, and if the need becomes apparent, our ground work can be utilized in short order.

We next called and held a meeting in Harrisburg on Tuesday, December 9th, with industrialists from the central section of the State, reaching from Williamsport to York and from Lewistown to Lancaster and Lebanon.

This meeting aroused considerable enthusiasm, especially was it fruitful of stimulating the work of the County Committees in the sections represented. The meeting was addressed by Governor-elect Pinchot, Dr. Clyde King, Dr. Harlow Person, of New York, and representatives of the County and City Committees of that section.

This meeting likewise passed Resolutions (1) to foster plant extensions, betterments and equipment, and (2) to create as much employment as possible by shorter shifts and no overtime.

Further meeting, similar in nature are planned for Pittsburgh, immediately after the Holiday Season, and for Erie at a not-yet-determined date.

## 2. Results

Your Regularization by Private Employers Committee can already lay its hands on a single instance of the result of its activity. The E. I. Dupont de Nemours Company sent a representative to the Philadelphia meeting, who next day wrote for a synopsis of successful regularization plans from which would be devised a plan for installation in the far-flung plants of that corporation.

Undoubtedly others have been helpful in the emergency by instilling confidence into their employees, distributing employment, encouraging improvements, extensions and betterments and by creating an unemployment consciousness.

## 3. Co-operating Agencies

Your Committee found supporting co-operation from the Manufacturers' Association of Delaware County, Manufacturers' Association of Montgomery County, Manufacturers' Association of Lancaster County, Manufacturers Association of York, Waynesboro Manufacturers' Association and the Harrisburg, Bethlehem, Williamsport, Stroudsburg, Pittsburgh and other branches of the Pennsylvania Manufacturers' Association. The Philadelphia Chamber of Commerce sent invitations to our Philadelphia meeting to their membership.

## 4. Publications

Your Committee deemed it desirable to compile a synopsis of Regularization and Stabilization plans for distribution to industrialists. A folder consequently issued, which was the work of Dr. James T. Young, of the Wharton School, University of Pennsylvania, one of the Committee.

Approximately four thousand copies have been printed and about two thousand copies have been distributed.

(Signed) J. W. RAWLE,  
Chairman.

## 2. REPORT OF THE SUB-COMMITTEE ON EDUCATION AND TRAINING

WILLIAM R. STRAUGHN, Chairman.

L. H. DENNIS,

MRS. J. FRANK KERR,

RABBI PHILIP DAVID BOOKSTABER,

J. W. VICKERMAN,

C. J. GOLDEN,

MRS. SAMUEL SEMPLE.

The Sub-Committee on Education and Training submits the following report, in which the conclusions are arrived at after extensive research, involving many personal interviews, some group meetings, and much correspondence with leading educators, business men, industrial and labor representatives. The committee has approached the problem of the contribution which education can make to unemployment ills from the point of making long-time human adjustments effective.

Any system of education or training must have the co-operation of all constructive social agencies. The cost of public education is met by the business interests of the State; in turn business has the right to accountability from public education. It is but reasonable for business to know how the educational system functions to the advantage of the Commonwealth as well as of the individual. On the other hand, the business and social agencies must be acquainted with the State program of education. In this report, the Committee has tried to clarify the opportunities made available by the State, and to point out possible adjustments and advancements for future progress, with the hope that remedial measures employed now, and for years to come, may, in part at least, have something to do with alleviating social conditions in periods of distress. The program of Education and Training, as recommended by this Committee, can be carried out through the present administrative machinery of the Department of Public Instruction.

## Vocational and Technical Training

Industrial education can make its chief contribution to the Unemployment situation by developing an increased efficiency among the workers of tomorrow and by helping our youth to make more satisfactory occupational adjustments. Provisions should be made for retraining the workers who find it necessary to seek other employment or to meet new conditions brought about through the development of the mechanization of industry.

The high school curriculum must be made more flexible and more varied in order that the needs of the greatly increased enrollment of our youth may be more specifically met from the standpoint of occupational adjustment. The vocational training opportunities now offered by our high schools and evening schools should be greatly extended to meet the needs of those not now being served. A greater flexibility should prevail in the operation of vocational classes, permitting of vocational instructional opportunities for any group seeking such instruction. Provision should be made for the proper use of correspondence courses where needed.

Vocational classes should be organized and conducted where they will best serve the needs of the group receiving the instruction. In many cases such classes should be organized

within the plant where the men are employed, the classes being made under public supervision and control.

Efficiency in industry depends much upon the training of the worker and his adjustment to his job. These are some of the problems of the foremen who are the key men in industry. Foreman training opportunities should be made generally available in all of our industrial centers. These should be organized as a part of the vocational education program of the State.

The machine age and other changing methods and conditions in industry are making it necessary for many men to seek new fields of employment. Retraining opportunities should be made available wherever necessary.

The mining industry finds it necessary to employ new methods of production. These new methods involve a much greater use of machinery and the application of power. The industry needs men who are trained to meet the new conditions and methods. This involves the retraining of men now in the industry and the setting up of vocational training opportunities in the field of mining for the youth of the mining areas of the Commonwealth.

Adequate provision has not been made for training for technical occupations of a junior engineering grade. The vocational education program should be extended to meet this need.

Pennsylvania's well established vocational rehabilitation program should be definitely extended to include the educational phases of retraining.

Many workers out of employment will find it impossible to take advantage of retraining opportunities unless either lunches or carfare or both are provided. We recommend that the committee on relief give this problem very careful study.

A satisfactory development of industrial education opportunities throughout the Commonwealth will depend very largely upon the availability of the services of trained industrial education leaders. The committee recommends that definite provisions be made for the appointment of at least six district directors of industrial education. The development of the entire program outlined above can be quickly organized through the services of these district directors.

**Compulsory School Age**—A suggestion has been made to the committee that consideration be given to the raising of the compulsory school age limit from sixteen to seventeen or eighteen years. The committee after conferring with numerous educational leaders in this and other States, is of the opinion that the schools should first prepare themselves for serving this group before undertaking the raising of the compulsory age limit. It has been pointed out that many school districts are finding it exceedingly difficult to provide housing facilities for the group now in school and that to require the housing of additional groups on short notice would add many problems at a time when districts are finding it difficult to adequately finance public education.

It has been further suggested that to withdraw some youth from employment would be to take away the only source of income enjoyed by some families whose main wage earner is out of employment. The Committee feels that this matter should be carefully studied during the next biennium before recommending any legislation in the matter.

Communities should be encouraged to arrange attendance in the part-time continuation schools on a half-time basis. This will work to the educational advantage of the children and to the economic advantage of those by whom they are employed. To encourage this being done on a voluntary basis on the part of local communities, the aid of school districts for the operation of continuation schools should be increased whenever attendance in the continuation school is arranged on a half-time basis.

In order that school districts may gradually but effectively prepare themselves for the time when it will be found wise or even necessary to raise the compulsory school age, the development of vocational training facilities in continuation schools and secondary schools should be very generously encouraged.

#### Labor Certificates

No temporary relief in the unemployment problem appears to be in prospect by advocating a raise of the compulsory school age to seventeen or eighteen years. Undoubtedly some relief, and of a more permanent nature, can be obtained by seeing that the conditions under which labor certificates are issued shall be more closely investigated. More personal attention should be given by the supervising school officer who is responsible for the issuance of these certificates to children

between the ages of fourteen and sixteen. The truant officer, the school nurse, the visiting teacher, and even the principal himself or proper agencies to determine whether the labor of a child of this age is actually needed in the family. A sympathetic understanding of the family problem is necessary, but a vigorous effort to keep the fourteen-sixteen year old child off the streets and the highways will be an easement in acute and incompetent labor competition.

#### Education for the Readjustment of Adults

The purpose of Extension Education is to provide educational equipment for a ready and intelligent readjustment of individuals to rapidly changing social and economic conditions. No additional legislation appears to be needed to make this program effective. Either school directors are slow to adopt this program for the benefit of their communities, or the citizens themselves have not pressed for these opportunities. Perhaps the State as a whole is ignorant of the means now available to aid the readjustment of wage earners. The committee, therefore, briefly outlines the problems for the purpose of calling emphatic attention to the fact that much can be done now. Mingled with the problem of readjustment is the large and menacing phase of adult illiteracy. A few basic facts must be presented as a logical approach to this problem.

The total enrollment in all junior and senior high schools of the State is 383,261. Yet the total number of working boys and girls of 'teen age not in any school whatever is 650,000. The total number of adults unable to sign their own names is 312,699. Total number unable to read and write English understandingly is 1,250,000. Total number unable to speak English is 162,240. Total number unable to carry on conversation in English is 500,000. The total number of foreign-born residents above the age of 21 years who have not been naturalized is 708,743. It at once becomes clear that these are the groups first affected in a period of economic depression, as they are likely to be the first ones out of a job.

In order to eradicate illiteracy; to assimilate the foreign-born; to aid social, industrial and economic readjustment; to prepare for citizenship; to enrich appreciations, enjoyments and usefulness of adult life; and to insure successful participation in the life of the community and of the nation, the Commonwealth will provide (and does provide where demanded according to law): public school classes in English and citizenship for immigrants; public school classes in reading and writing for Negro and native white illiterates; home classes for foreign-born mothers; evening elementary schools; evening high schools offering intensive courses adapted to the needs of special groups, and evening high schools offering accredited courses of study with credit toward graduation.

The problem resolves itself into one of getting the adults and minors of the upper 'teen age into these schools, particularly during periods of unemployment, when the morale is low. School districts having vocational schools should make the vocational instruction facilities available to all groups who can profit by such instruction. Instruction should be offered at such hours, and under such conditions, as will best meet the needs of the groups involved.

We wish to direct attention to the provisions of present legislation.

#### Mandatory Provisions

1. Whenever twenty or more residents of a school district, above the age of sixteen years, make written application for instruction in any of the following fields, the board of school directors of such district shall provide such instruction:

- (a) English and citizenship for immigrants and native illiterates.
- (b) Elementary school instruction.
- (c) Secondary school instruction.
- (d) Citizenship for adults. (Section 4102, School Laws.)

2. Extension classes organized in response to such written application shall be provided in school buildings at any time not in conflict with regular day-school activities, as requested by such applicants. (Section 4102, School Laws.)

3. The minimum salary of extension teachers shall be \$1.00 per hour for the first year of service, \$1.25 per hour for the second year of service, and \$1.50 per hour for the third year of service. (Section 1210, Paragraph 19, School Laws.)

4. State aid shall be provided for all extension education classes at the same percentage of the minimum salary required as is paid to such districts of the minimum salary of regular day-school teachers. (Section 1210, Paragraph 19, School Laws.)

5. Extension class instruction shall be free but school districts may exact a deposit fee from each student of a sum not to exceed \$5.00, such fee to be returned at the close of each term to all such persons who have attended 75% or more of the class sessions of such term. (Section 4104, School Laws.)

6. Extension schools may not be closed until the average daily attendance for one month falls below ten. (Section 4103, School Laws.)

7. Extension schools and classes shall be a part of the public school system and shall be subject to all pertinent regulations governing the administration of day schools. (Section 4106, School Laws.)

#### Permissive Provisions

1. Boards of school directors may organize and maintain extension classes in any course of study which they may deem advisable. (Section 4102, School Laws.)

2. Extension classes may be maintained at any place which may seem advisable to the responsible board of school directors. (Section 4103, School Laws.)

Our sub-committee on Education and Training joins with the Adult Extension Education Bureau of the Department of Public Instruction in requesting that particular emphasis be placed upon the following:

1. Upon the reduction of illiteracy as a first prerequisite in the adjustment of individuals to their environment.

2. Upon more genuine assimilation of our foreign-born population as means of securing the contributions they are fitted to make.

3. Upon character education in our public school program with appropriate credit rewards for good citizenship as well as for scholastic attainment.

4. Upon education for our rapidly growing leisure.

5. Upon the development of intensive unit courses as emergency aids for individuals on the job.

6. Upon more widespread development of extension training courses for promotion to specific jobs.

7. Upon the development of junior and senior high school correspondence courses to provide extension education opportunities for rural districts and smaller communities.

8. Upon education in co-operative citizenship with special emphasis upon mutual interests of employers and employees.

9. Upon the development of extension schools and correspondence instruction in conservation and thrift; vegetable gardening; preservation of foods, preserving, cold packing, and storage; care of perishable foods; preparation of cheaper foods; purchasing and preserving clothing and footwear, remodeling and repairing old clothing; home repair and economies; budgeting (the wise use of income).

The committee recommends that an assistant be provided, if needed, in the Extension Education Bureau to carry out the provisions of this program.

#### New Adjustments in Present School Curricula

In discussing that phase of unemployment which arises because of the large number of immature boys and girls of teen age who have been thrust upon the competitive labor market, serious consideration must be given to the question whether the public school system today is functioning to the advantage of the State as well as of the individual; and whether or not it may be time to discard some old practices of promotion, to eliminate certain courses and minimize present values and time requirements. We are all agreed that education has no panacea, or cure-all, for the social ills that threaten us; in fact, except for slight variations, they are no different from the ills of former periods of depression. It is opportune, however, to raise the question whether new adjustments in the educational system may not be made with accruing advantage to the State. Waste in any form is socially undesirable and has much to do with the poverty and misery of individuals and communities—waste of money, of natural or acquired resources, of time or energy. Many of our leading educators and business men doubt that the present 12-year plan of the public school program is the best possible arrangement for social efficiency. Why 12 years—whether based on the 8-4 plan or the 6-6 plan? Why not eliminate a year, as has been done successfully in Kansas for the past several years, and organize on the 7-4 plan, or even better on the 6-5 plan—six years of elementary school system and five for the junior-senior high school? Or, perhaps best of all, why have any definite period of time, but adjust a flexible program of study to the child according to his ability to progress, instead of adjusting the child to a fixed program of study stated in terms of years? An active, en-

lightened program that challenges the child to his best effort, under competently-trained teachers, need not necessarily be expressed in terms of years, but in terms of accomplishments. Many children drop out of school because they have lost interest. If the so-called cultural subjects fail to arouse and maintain this interest, the school system should include vocational or technical schools to fit the needs of the boys and girls who have arrived at the age of 14, regardless of what grade they may have attained. The industrial and mining communities should be prepared to meet this need, and not further clog the ranks of labor with ill-prepared cheap labor. The State should make a further study of the possibilities of this suggestion, particularly to find out how other industrial nations have met the problem. Germany had to face this situation ahead of the United States, and we might well profit by finding out how she has attempted to solve the problem. Furthermore, our Commonwealth should encourage and support experimental schools in which these plans are tried before embarking upon a State-wide program involving changes in our present procedure. These experiments can be carried on under the actual conditions to be tested in the industrial and mining sections, and on the campus of some or all of our State Teachers Colleges. These schools are further discussed in this report under the heading of EXPERIMENTAL SCHOOLS.

#### Experimental Schools

In this report the committee refers to Experimental Schools. We wish this term to be understood to mean a school in which the Commonwealth, through the control of finances by the State Council of Education, shall test the soundness of its educational procedure, in which the cost can be estimated and determined, and the results checked. These really are opportunity schools in which the State by a controlled investment affords to those who attend an opportunity to enlarge their social and economic outlook; but the term Opportunity School is already in educational nomenclature with another meaning, so for the purpose of indicating a controlled test we are using the term Experimental School.

##### (a) Farming Districts

The Commonwealth should assume in a large measure the final responsibility for seeing that the one-room rural schools have enriched curriculum that will be attractive to farm boys and girls. In spite of efforts at consolidation, there will always be thousands of one-room rural schools that cannot be consolidated into larger units. These are the ones that should have special attention, because they are usually located where the farmers are taxed to the very limit with the result that the schools have only the barest necessities. The Commonwealth should provide an Equalization Fund, perhaps of \$1,200,000, to be placed at the disposal of the State Council of Education for the purpose of equalizing educational opportunities in the farming districts. A large portion of this fund should be used in the one-room schools. A phase of the unemployment situation is that many families have moved from farming districts to industrial centers, and during the economic depression, with factories and mills closed down, the wage earners of the families find themselves without means of livelihood. Many of these wage earners left the farms because of inadequate educational opportunities for their children; they would have remained on the farm had the school opportunities been right, or had the tax burden not been so heavy. The Commonwealth can aid in the proper distribution of its population according to the capabilities of the individual wage earner, by giving adequate support to the schools that are located in the farming districts. The committee therefore suggests that a large portion of the proposed two million dollars of the Equalization Fund be used for five hundred to one thousand of these rural schools during the coming two years for the purpose of experimenting on a large scale with an enriched program of studies that will make these schools attractive without adding to the burden of the farmer, and in fact to relieve him somewhat of his school taxes. The State Council of Education would, in co-operation with the County Superintendent and the local school boards, select these schools and see that they are adequately equipped to give modern instruction in the fundamental subjects of the curriculum; and in addition, in Art, Music and Literature, in the same manner that these subjects are given in our best schools. Every one of these rural schools should have some works of art, and every one should have some modern music records, with a phonograph, or perhaps a radio. The children of these schools

should have adequate reading material. We are training farm boys and girls for a future life that is comfortable to themselves, such comforts usually being expressed in the appreciation which one has developed in art, music and literature, as well as for the more practical economic necessities. Every one of these schools should have a motion picture machine so as to make modern instruction through visual aids. These schools should have a definite program in Everyday Science as applied to the farm in which the boys and girls have an opportunity to try out simple testing of seeds and soils. This program should also consider farming problems. In fact the problems of the farm, relating to housing, stock and poultry, as well as field culture and farm mechanics should have attention in the upper grades in the rural schools—not that we expect that all of these children should go back on the farm, but that they shall at least have an appreciative understanding of our national farm problems. Co-operative marketing and co-operative buying should be considered. This is in line with the thought that problems are rarely ever solved during the emergency. Only temporary relief can be had. Problems are solved by a long process of study and thought. If we teach farming problems with an appreciation and sympathy we shall be doing much to aid in farm developments.

There are approximately 8,000 one-room schools in the State. If this experiment proves successful in the coming biennium, the program can be put on an accumulative basis, over a period of years taking in most of the one-room schools until it shall appear that the State aid has enabled these isolated schools to conduct their own affairs on the customary legislative basis.

(b) Mining and Industrial Communities.

As an industrial State, Pennsylvania must give particular attention to mining and industrial communities. These are the key to an economic fluctuation. It is therefore of utmost importance in a long time program of training that the State shall sponsor new types of vocational schools for training and retraining of adults and minors. Educational, industrial and labor leaders favor the more complete use of present buildings and equipment. To establish additional buildings and vocational equipment in the industrial sections would be a very expensive proposition. The committee suggests that co-operative schemes be entered into with various school boards and industries, on an experimental basis, to aid in developing the plans as outlined under VOCATIONAL AND TECHNICAL TRAINING, the State to furnish \$300,000, controlled by the Council of Education, to supplement the equipment and resources of the local industrial districts that co-operate.

(c) State Teachers Colleges

Any proposed change in the time or content elements of the present public school curriculum might advantageously be tried out in the campus training schools of the State Teachers Colleges, or in an affiliated school system that co-operates with the Teachers Colleges. No additional legislation is needed, and probably no additional funds are necessary unless these experimental schools enter the field of vocational or technical training. The committee has particularly in mind that several of the Teachers Colleges might co-operate with a local school district, and devise a new course of study based on the 7-4 plan, or the 6-5 plan, or some other plan approved by the Department of Public Instruction, to break up the present grade by grade plan of 12 years toward which some criticism has been directed. It is probable that a saving in time, in public money, and a more enriched, yet condensed, course of study can be devised, beneficial alike to the individual and to the community. The first care should be the need of the child, and the child should therefore be the unit of attention, rather than the course of study. If it should be found that children complete the prescribed course of study in the elementary and secondary schools, and have saved one or two years in time, and are below the usual college entrance age, they will have the advantage of entering the local State Teachers College where further comparison can be made for their rate of progress. This experiment should be tried on a scale sufficiently large to test the values of the results. It has already been done, in several instances, in Teachers Colleges and in public school systems, in a small way, but not with adequate authority so that the results can be accepted as conclusive. Perhaps this experiment will mean a rather extensive change in the content of subjects now given as the State Course of Study, for which reason the Department of Public Instruction shall be the authority for the proposed experiment.

#### Equalization Fund

Failure of the Legislature to provide a larger unit of taxation, so as to distribute the burden now resting heavily on farming, industrial and mining, and distressed districts, compels us to seek relief in some other manner. We therefore recommend an Equalization Fund, of approximately \$2,000,000 for the biennium, to be placed at the disposal of the State Council of Education, in order that this body may give a measurable degree of relief in districts of the Commonwealth which need assistance, that the children may have equal social and economic opportunities. This Equalization Fund of \$2,000,000 would include the \$1,200,000 already suggested for the schools in the farming districts, \$300,000 for the Council to provide aid in the vocational schools in mining and industrial communities (to carry out the program as outlined under the heading of Vocational and Technical Training) and \$500,000 for distressed school. The past two sessions of the Legislature have provided some assistance for distressed schools but this is wholly inadequate to the necessities of the State. At the present time there are at least fifty school districts that are virtually bankrupt and unable to function, and hundreds of others that are so handicapped that they cannot do more than make a pretense to carry out the essentials of the State Course of Study.

#### Negro Education

Our investigation leads us to believe that Pennsylvania is not prejudiced in the matter of employing Negroes for certain types of jobs, but this very open-mindedness entails on us a responsibility to help meet an economic situation that will become more pressing during the coming years. The Negro has become a large economic factor in our present-day civilization, and with increases in his population, there must be more jobs for him to fill. The impulse of higher living has made him an applicant for jobs and positions above the purely manual type. What is Pennsylvania doing to make the Negro economically fit for skilled trades and professions? A few teaching positions in the State are available to Negroes and opportunities are offered to prepare for this profession. However, it is the Negro citizenry that we must think of: what type of education and training, as a part of our educational system, shall be made available for the Negro to be better equipped to adjust himself happily or satisfactorily in a civilization already interminably complicated by racial factors? The committee recommends a study of this phase of education and training in the light of future economic developments.

#### Unemployed Teachers

Much has been said recently about the number of prospective teachers who have been unable to secure positions for which they have been prepared. The committee has, therefore, attempted a survey of the situation as it affects the entire teacher training output of the State for the current year (1930). We realize our inability to secure definite information as it affects particular communities. Some of the wealthy favored communities have a super-abundance of applicants who desire to locate amid the most desirable educational opportunities, particularly in or near the large cities; on the other hand, in small and isolated districts, the school boards experienced difficulties in finding fully certified teachers. Due to splendid co-operation on the part of the Teachers Bureau, the State Council of Education, the State Teachers Colleges and the accredited colleges of the State, the committee has been able to make a complete survey of the situation as it affects a State-wide teacher situation, with the following results:

(a) State Teachers Colleges

In 1930 (May to August), the thirteen State Teachers Colleges and Cheyney graduated in all curricula a total of 3639 young men and young women. Of this number 2956 were placed, and 683 were not located in teaching positions. This shows an 81% placement. (Exactly the same ratio holds in the two-year curricula.) Only two (plus) per cent. of the graduates due to various causes such as marriage, removal or additional study did not care to be placed, leaving 17% unplaced. The study shows 100% placement in the special curricula of Home Economics, Art, Commerce; almost 100% in the special curricula of Music, and in Health Education. The Junior High School curriculum shows 77% placed. It will therefore be noted that the lowest placement is in the Junior High School curriculum (which is on a four-year level) and in the two-year elementary school curriculum, showing a possible trend toward overcrowding in these fields; or, in other words, the teacher preparation in the more recent special fields of

Art, Music, Home Economics, Commerce and Health Education, has not yet caught up with the State program for these fields. The tendency to overcrowd is in the fields where another important, but undetermined factor, enters, namely; during periods of economic depression many men and women who hold any type of teachers' certificate, perhaps obtained many years before on lower levels of preparation, again become applicants for teaching positions. Because they are usually older (with dependents) or more influential they frequently are the successful applicants. This situation leaves the younger college and normal graduates without places. The committee is unable to determine how many were thus affected this year, but believe that 5% to 10% is a safe estimate. Undoubtedly the same factor, in a slightly less ratio affects the teacher placement situation in the accredited liberal arts colleges. The committee wishes to call attention to the fact that the Teacher Training Schools of Philadelphia and Pittsburgh are not included in this study. These are highly particularized communities, and the graduates of their normal schools rarely become applicants for positions outside their city, or at least outside the immediate vicinity.

(b) Liberal Arts Colleges on the Accredited List of the State Council of Education

The Committee had a 100% response from the accredited colleges, giving the exact information or a close estimate as revealed by their records. These colleges graduated (May to August) 3230 who were enrolled as prospective teachers—almost the same number as the State Teachers Colleges. The number placed was 2109, but the number desiring not to be placed was 338, giving a total of those desiring positions as 73%, and 10% not wanting positions, and 17% unplaced. This will be noted as being identical with the situation in the Teachers Colleges. With few exceptions the Liberal Arts Colleges train for high school positions and for special departments. The teacher unemployment condition, therefore, appears to be about the same in the State Teachers Colleges and in the Liberal Arts Colleges, and about the same ratio in the elementary field and in the secondard field.

The Commonwealth should always have a reserve of well trained and fully certified teachers of perhaps 10 per cent. of the annual output in order to provide for the continued turnover due to marriage, death, sickness, leaves of absence. The annual turnover in Pennsylvania has been reduced to an average of less than 8 per cent. It might be unwise to draw too restrictive conclusions from the survey thus made, but it is apparent that the trend shows definitely that serious consideration must at once be given to the significance of preparing too large an output of expensively trained teachers who have no prospect of entering gainfully into the profession of their choice.

The committee recommends: (1) That the Board of Presidents of the State Teachers Colleges, with the approval of the State Superintendent of Public Instruction, shall develop a program to limit the number of students to be admitted to these colleges, on the basis of the needs of the State; (2) Raising the standard of teacher preparation for elementary grades to four years. This will reduce the number of persons applying for admission to the Teachers Colleges, and will raise the standard of teacher preparation, as well as relieve a possible overcrowding in the profession; (3) That the State Council shall make a study of the unemployment situation as it appears to exist from the information disclosed in this report, and if the Council finds that the schools of education in the Liberal Arts Colleges are turning out an over supply of prospective teachers, the Council should consider the advisability of moving slowly in authorizing the establishment of new curricula in these liberal arts institutions. It appears that the time has arrived when the State Teachers Colleges and the accredited Liberal Arts Colleges should devote more definite attention to the quality of the product rather than to the quantity of the product looking toward teaching as a profession.

#### SUMMARY OF RECOMMENDATIONS

##### Vocational and Technical Training

1. Greater flexibility and variety in the high school curricula.
2. Flexibility in vocational training—vocational classes in industrial plants.
3. Development of foreman training program.
4. Vocational training program for mining industry.
5. Development of technical education.

6. Educational program for those physically rehabilitated.
7. Carfare and lunch service through a relief committee for unemployed attending vocational classes.
8. Development of industrial education program through appointment of six district directors.
9. Establishment of classes in standards of living and use of income for workers and home makers.
10. Development of half-time continuation school attendance on voluntary basis through additional aid.
11. General development of vocational training in continuation and vocational schools.
12. Development of new types of vocational training facilities under direct auspices and control of the State Council of Education.

Budgetary Requirements—(See Experimental Schools.)  
Labor Certificates

To be issued only after the supervising school officer has satisfied himself that the boy or girl of 14 to 16 has a job, and his help is needed in the family.

Budgetary Requirements—None.

Education for the Readjustment of Adults.

A State-wide, 10-year program to be launched to reduce illiteracy, and to instruct in conservation and thrift and to educate for the wise use of leisure.

Budgetary Requirements—(See Experimental Schools.)

New Adjustments in Present Public School Curricula

Further study and tests to be made to eliminate wasted time and effort in the grades and the high school, and to vitalize the course of study.

Budgetary Requirements—Probably none.

Experimental Schools

The State to sponsor through the State Council of Education various controlled tests to the mutual advantage of the community and of the individuals.

Budgetary Requirements—\$1,500,000.

Equalization Fund

Sufficient financial aid from the State to equalize educational opportunities by means of the Experimental Schools in the farming, mining and industrial communities; and a general fund for distressed school districts.

Budgetary Requirements—\$1,500,000 for the Experimental Schools (listed above); and \$500,000 for distressed districts. Total, \$2,000,000.

Negro Education

Further study to be made of the need for additional vocational training.

Budgetary Requirements—None.

Unemployed Teachers

Restricting the admission of students, hence the output of all State-controlled and State-aided teacher-training institutions; and limiting the teacher-preparation curricula in the accredited liberal arts colleges.

Budgetary Requirements—None.

#### RECOMMENDATIONS ON RELIEF METHODS BY THE SUB-COMMITTEE ON RELIEF TO THE COUNTY COMMITTEES

It is recognized as fundamental that in times of depression and unemployment there are certain functions which must be assumed by those concerned for the public welfare.

1. Acute need must be relieved at once regardless of residence.
2. Employment must be secured for those unemployed, and who are physically and mentally able to work.
3. Long distance planning must be undertaken:
  - (a) In order to provide a non-recurrence of the economic depression and unemployment;
  - (b) To set up machinery so that there shall not again be the uncoordinated scramble to find ways and means of meeting the situation.

Each County Committee on Unemployment must clarify its own thinking or program in order not to do damage which may be irreparable because of the utilization of unsound social methods. Sources of relief may be roughly grouped into governmental source and private sources.

##### Governmental Sources

There is danger of assuming that state and national government may be justly called upon to provide relief in circumstances such as we now face.

Only upon the basis of appropriations which will result in creating necessary employment; and in appropriations made to pension systems, already provided in law, is there any justification for assuming that national or state government will provide "grants in aid" to meet local needs.

Law, traditional custom, and good social practice make it a sound assumption that efforts looking to immediate relief by "grants in aid" should come from local official bodies authorized by law to render such assistance.

In the State of Pennsylvania the Overseers of the Poor, the Directors of the Poor, the municipal governing bodies, through their public welfare agencies have the right to provide, and are able to provide the necessary funds to meet the emergency, if properly administered.

The statement frequently made that overseers and directors of the poor are "not permitted" to do certain things on behalf of the needy, is usually not based upon law or fact, and the limitations under which they operate are rules or ordinances imposed by themselves which can be changed to meet changed social conditions.

A study made by the Pennsylvania Department of Welfare of the expenditures of Poor Relief Taxation over a ten-year period showed that more than \$100,000,000 were used for the purpose of indoor and outdoor poor law administration.

In the year 1923 outdoor relief to the amount of more than \$1,300,000 was expended and this sum was known not to represent the total of expenditures, since records were not available.

It was also shown that far too much money went into overhead administration as contrasted with the amount of actual relief rendered; for example, one overseer expended \$15.00 in outdoor relief during the year and the cost of administering that expenditure, inclusive of his stipend was \$120.00. That kind of poor law administration is absurd and dangerous, and very costly to the taxpayer.

On the statute books of Pennsylvania are laws permitting counties to set up their poor law administration on a county basis, which is the sound method of administration for practical purposes.

#### Private Sources

Relief from private sources has its origin in fraternal, religious, and private philanthropic undertakings. Private philanthropy is always pinched in a period of hard times, and is less well able to meet pressing and long term emergencies.

It is evident that a co-operative undertaking involving public charity and private charity is essential if emergencies, such as now exist, are to be met.

The county committee on relief, now being appointed by the Pennsylvania Committee on Unemployment, should serve to bring combined forces of public and private charity to a focus for intelligent planning and administration to meet the local needs. Watch for and suppress charitable rackets of all kinds.

This is no time for "part time" and unco-ordinated effort! A competent, socially-minded executive, whose job it should be to promote co-ordination, is essential.

One pressing difficulty in some cities now is the number of floaters looking for work. Charity should go to those in need now but policies should look toward returning floaters to their residences.

The citizens should make their wish known to those responsible for appropriating funds in counties and municipalities for purpose of emergency relief, in order that there may be more adequate appropriations made for use during the winter.

A centralized clearing house should be set up for purpose of locating jobs, and these clearing houses should be both local, and on a county-wide basis. This would involve co-operation with employment agencies, public and private, and special effort on the part of the county committee itself.

A clearing house for the determination of actual need, and the elimination of undesirable duplication of relief should also be set up, and the mechanism of a social service exchange should be used both locally, and on a county-wide basis.

Administration of relief funds should be guided by sound social principles which were set up in the study made by the Department of Welfare and published in 1925 as Bulletin 1 of the Department.

#### Principle Involved

Proper comprehension of family case work. Frequently it is available through a good private agency which the public

officials can use, supplementing the funds of the private agency in order to enable them to secure sufficient personnel to handle the emergency.

2. Proper investigation of families to be aided. This does not preclude the provision of food, clothing and shelter immediately when needed, but the proper investigation should be carried on immediately thereafter, to determine the cause of the difficulty, the genuineness of the need, and the right method of relieving it.

3. Careful relief planning with the family's rehabilitation as the ultimate aim. This is the essence of good family case work.

4. In the case of children, mental cases, and defectives, consult the State Welfare Department as to advice and procedure.

5. Follow-up work and supervision. There is no sense in providing grants in aid or grocery orders, or what not, and permitting these things to be provided indefinitely.

6. Close co-operation as between public and private agencies dealing with family problems. (The phrase "family problems" is not to be constructed as exclusive of homeless men, "spinisters," and the aged.)

7. Keeping of adequate records. Bookkeeping of the human material is just as important as the accounting for funds spent, and failure to provide adequate records does not necessarily mean voluminous records which only clutter a file without giving a basis for action.

8. Employment of trained welfare workers to give their entire time to the relief situation.

It should be remembered that material relief is a two-edged instrument, which unless carefully manipulated by skilled hands, will do more damage than good, and will create in a community complacent paupers who look to the public treasury for their maintenance.

Public and private relief should be administered on a constructive basis and jobs at normal rates of pay for the work done are better medicine than grants in aid.

Any national or state appropriations for construction programs, or in the pension fund, should be within the purview of the state and county employment committees, and every effort should be made to distribute as widely as possible in the territories most in need—these funds representing jobs that need to be done.

It should be remembered that "democracy" implies not only that we must care for the unfortunate, but that as far as possible each individual in a democracy shall bear his share of the burden of that democracy. We can, therefore, not afford as a democracy to permit this emergency to render any considerable number of our citizens to become dependent.

In the religious field there is much unco-ordinated good intention. The county committees should strive to co-ordinate the good will of the churches in the collection of clothing, collection of funds, and a co-ordinated administration of these through the social service exchange, and the co-ordinated job-finding facilities.

The county committees should stimulate careful consideration by the schools of the needs of the children who are in attendance, and in order to minimize the grind of deprivation on these young lives, school luncheons should be provided and children representing special need should be followed back into their homes for constructive family case work.

#### To Summarize

1. The local committee should recognize that to them falls the responsibility of applying the good will of the community to those in need.

2. The major portion of relief funds, necessary in any community should be provided by that community, and state national grants should be considered only in terms of providing work on public projects that are needed.

3. To promote the public welfare in their community the committee should insure friendly co-ordination and co-operation between governmental and private agencies.

4. Where possible, a full-time worker, with an office location, should be designated at the executive of the county welfare committee.

5. The relief work should be done on a sound family case work basis, and major emphasis should be placed on finding work.

6. Governmental authorities, in their municipal and county fields, should be urged to make available out of tax moneys, the necessary funds to meet this emergency.

7. In cases where legal residence has not been established temporary aid should be given and then provision made after careful study to return such individuals at public expense to their legal residence, when investigation shows that this is advisable. Social workers should be reminded to seek aid and advice from the State Department of Welfare in mental cases, as to defectives, and as to children. Care will of course be used to take care locally of established families regardless of legal residence. The poor authorities will help in transportation.

#### REPORT OF COMMISSION FOR THE ELIMINATION OF TOLL BRIDGES BETWEEN PENNSYLVANIA AND NEW JERSEY AND FOR THE LOCATION AND COST OF CONSTRUCTION OF AN ADDITIONAL BRIDGE BETWEEN EASTON AND PHILLIPSBURG.

##### Introduction

By the provisions of Act No. 553, P. L. Pennsylvania, approved May 10th, 1929, the Joint Commission for the Elimination of Toll Bridges over the Delaware River, between Pennsylvania and New Jersey, was directed to make surveys, take sub-surface borings; make studies, investigations; to prepare plans, estimates of cost and determine the most suitable site for an additional bridge across the Delaware River between Easton, Pennsylvania, and Phillipsburg, New Jersey.

To this end an appropriation of \$2,500.00 was made contingent on concurrent Legislation on the part of the State of New Jersey. This legislation was enacted on the part of the Legislature of the State of New Jersey, and approved April 14th, 1930.

Section No. 2, of the concurrent act provides that a report on the findings of the Commission should be made to the Legislature of the Commonwealth of Pennsylvania, at the first Legislative Session after the completion of the work.

##### Preliminary Work

As a first step in carrying out the mandates of the Legislative Enactment, surveys and topographical maps were prepared to depict the topography in accurate and connected form on both sides of the river.

A number of locations were proposed and advocated for the proposed bridge, each with its supporters. In consequence, the Commission considered it wise to hold a public hearing and permit the advocates of each plan to give expression to their views, so as to inform itself upon the merits of each location. To this end, a sub-committee, consisting of Messrs. Lyon, Chairman; Buckman, Thomas, Kline and Focht, met on June 18th, 1930, in the rooms of the Easton Chamber of Commerce and conducted a public hearing which was well attended by local citizens and representatives of business organizations of Easton, Phillipsburg and vicinity.

After giving careful consideration to each of the locations advocated, the Commission adopted the line, extending from the northeast corner of Third and Bushkill Streets, Easton, to a point in Phillipsburg, near the new High School, connecting with Morris Street, by means of a connection to be constructed by the New Jersey State Highway Commission.

With the location of the bridge once decided on borings to determine the character of the sub-surface were started and carried to completion as expeditiously as circumstances would permit. These borings could not be taken until the location of the bridge had been fixed.

The accompanying plan shows the location adopted, together with the alignment, profile, grades, character of material encountered in the sub-surface test holes and the depths to solid bed rock. According to the plan adopted, the length of the entire structure would be, as follows:

Pennsylvania approach .....	1.465 linear feet
Main bridge over the Delaware .....	1.285 linear feet
New Jersey approach .....	1.675 linear feet
Total length .....	4.425 linear feet

As planned, the bridge will have a roadway forty-two (42) feet wide, in the clear, with two sidewalks, each eight (8) feet wide, making a total width, inside of parapets, of fifty-eight (58) feet. The width of forty-two (42) feet fixed for the roadway will provide four traffic lanes, two eastbound and two westbound, which will be sufficient to accommodate one hundred thousand (100,000) cars in twenty-four (24) hours, an ample provision for all present and future needs.

##### Necessity for an Additional Bridge

The necessity for an additional bridge to relieve the present daily congestion of traffic in Easton and in Phillipsburg hardly needs any argument, but a review of the situation will probably prove useful to those unfamiliar with existing conditions.

In the first place, Easton is located at the point of convergence of several important and heavily-traveled highways with the William Penn Highway and the Lackawanna Trail both passing through the heart of the city.

The situation at Phillipsburg is almost identical, with the Washington Pike and the Bloomsbury-Somerville Road meeting at the same point, namely, the easterly approach to the present bridge. The traffic over these arteries is augmented by north and southbound traffic moving to and from Belvidere and points north. In addition to the through traffic moving over these main thoroughfares and passing from one State to the other, there is a heavy local movement across the Delaware River between Easton and Phillipsburg.

To give an idea of the volume of traffic over the present bridge, an exact count, during the month of November, shows that the eastbound and westbound movement ranges from a minimum of fifteen thousand one hundred and eighty-nine (15,189) to a maximum of twenty-two thousand, eight hundred and forty-four (22,844) cars in twenty-four (24) hours, with a maximum density exceeding one thousand, eight hundred (1,800) cars per hour. On the foregoing basis, the volume will range from five million, five hundred and forty-three thousand, nine hundred and eighty-five (5,543,985) to eight million, three hundred and thirty-eight thousand and sixty (8,338,060) cars annually. These totals are rather below than above the maximum, as the travel during November is not so heavy as during the summer months.

As all of this traffic must pass over a bridge with a roadway but thirty-two feet wide and the movement complicated by the passage of trolley cars, it is not surprising that the congestion and practical stoppage of traffic is a frequent and almost daily occurrence.

A study of the map showing the main arteries of travel converging at Easton and Phillipsburg will show at a glance the reason for this heavy concentration of traffic at the present bridge, which is in effect, merely the neck of a bottle.

##### Reasons For Selecting Adopted Location

The problem of selecting a suitable location for an additional bridge, in this instance, was a two-fold one, as its solution, of necessity, involved a compromise between accommodating through, or State-wide travel and local traffic.

Had the problem consisted alone of accommodating through travel, a by-pass to the northward of Paxinosa Hill, with a high-level bridge across the River, connecting the high headlands at this point would have been the solution. This location is about two and one-half miles to the northward of Easton and Phillipsburg, but too far removed to take care of the heavy local travel.

To relieve the traffic situation, a location removed so far as possible from the congested centers of travel in each of the municipalities, but not so far as to be inaccessible, was essential. As the by-pass referred to was out of the question, the location selected and shown on the plan, was adopted.

In addition to the site to the northward of Paxinosa, locations to the southward of Easton and Phillipsburg were also considered, but these would have involved the construction of an additional bridge across the Lehigh River to connect with the main lines of travel in Pennsylvania and have led to costly and involved construction in Phillipsburg, without the possibility of making satisfactory connections with the main lines of travel, in and out of Phillipsburg, therefore, all thought of a line in this locality was dismissed.

Another location suggested was based on the extension of Ferry Street, Easton, across the River to Main Street, Phillipsburg. This location, however, would not have relieved the congestion in Easton, nor in Phillipsburg. In effect, it would have merely represented the substitution of a new bridge for the present structure. Also the grades on the bridge and approaches would have been prohibitive. In consequence, this location was discarded.

The adopted location, it will be noticed, abuts the southerly slope of College Hill, Easton, which is as far to the northward as it was possible to place it without going to the northward of

Paxinosa Hill. The line then extends to the most favorable supporting ground for the approach in Phillipsburg.

The location of the terminals of this line will afford ready access to all local traffic and to all through traffic entering and leaving Easton and Phillipsburg by any of the present lines of travel, when supplemented by the construction of a by-pass, around the easterly section of Phillipsburg, to connect the Clinton-Somerville Road (U. S. Route 22), (N. J. Route No. 28) with the Morris Pike, Route No. 24, a plan which meets with the approval of the New Jersey State Highway Commission and which they have signified their willingness to construct when the necessary authority has been granted by the Legislature.

In addition, the easterly terminus of the proposed bridge was located to connect with Morris Street, Phillipsburg, usually alluded to as the "Morris Pike" (Route No. 24), in order to afford direct access to the traffic moving over this road, as it is being developed by the State Highway Commission of New Jersey, as the principal line of communication between Phillipsburg, Newark and New York.

With the by-pass around the easterly section of Phillipsburg constructed, connecting the Morris Pike (Route No. 24) with the Bloomsburg, Clinton and Somerville Road (U. S. Route No. 22) (N. J. Route No. 28), all of the principal lines of travel will be afforded full access to the proposed bridge.

#### Congressional Sanction and Approval of the United States War Department Necessary

As the Delaware River has been classed by Congress as a Navigable Waterway, by virtue of the jurisdiction of the Federal Government over all navigable waters of the Country, conferred by the Commerce Clause (Section 8, Art. 3) of the Constitution, Congressional sanction for building another bridge across the Delaware will be necessary, before active steps toward actual construction can be undertaken.

Congress first exercised its general authority with respect to bridges by enactment of the River and Harbor Act of March 3, 1899, Section 9 and 10, and by the subsequent legislation of March 23, 1906.

According to the provisions of these Acts, plans for all bridges over navigable streams require the approval of the Secretary of War of the United States and the Chief of Engineers of the United States Army.

In consequence, a Congressional Act authorizing the construction of this bridge is essential as the first step, following the approval of the project by the Legislatures of Pennsylvania and New Jersey.

After Congress has acted favorably on the proposition, the next step necessary will be to submit plans to the United States War Department for its approval.

In localities similar to the one under consideration, the War Department is usually interested mainly in the clear span lengths, overhead clearances and the area of the available waterway, this latter factor principally to decide if sufficient allowance has been made to safely pass the flood discharges in the River.

The highest flood ever known in the River occurred on October 10th, 1903, the highest previous flood having occurred on January 8th, 1841, or about sixty-two years previous. According to the best information obtainable, the flood of 1903 was several feet higher than that of 1841.

According to the records at Easton, the maximum rise of the water in the River, during the flood of 1903, reached the bottom of the fascia plates on the sidewalks of the present bridge. The net submerged area at this point being eighteen thousand (18,000) square feet.

The net area of the waterway of the proposed bridge, between the bed of the River and the springing lines of the arches, is twenty-one thousand (21,000) square feet, when computed to the flood line of 1903. The elevation of the springing lines of the arches and this flood line having been made coincident.

Above the springing lines of the arches, there is an additional area of twenty-one thousand (21,000) square feet, although its efficiency cannot be considered one hundred percent (100%) effective for passing flood waters.

As a comparison between the effective area of the waterway of the proposed bridge, as compared with the present bridge, we have the following:

Proposed Bridge	
Net area, bed of River to flood line, October 10th, 1903 (springing lines of arches) .....	21,000 sq. ft.
Net area, springing lines to soffits of arches ....	21,000 " "
Total .....	42,000 sq. ft.

Present Bridge	
Net area, bed of River to under side of fascia plates, flood line, October 10th, 1903 .....	18,000 sq. ft.
Excess area of waterway of proposed bridge over present bridge, as follows:	

From bed of River to flood line, October 10th, 1903, excess .....	16-2.3%
From bed of River to arch soffits, proposed bridge, excess .....	133-1.3%

As the present bridge safely passed the flood waters of the 1903 freshet, which were greater, by the added discharge from the Bushkill Creek, thank the flow under the present bridge would be, it would seem sufficient provision has been made to take care of the maximum flood discharge, at the proposed point of crossing.

Considering the effective waterway from another standpoint, we find that the area of the watershed of the Delaware above Bushkill Creek, embraces four thousand, eight hundred (4,800) square miles. The estimated flood discharge in the River during the flood of October 10th, 1903, amounted to one hundred and forty-four thousand (144,000) cubic feet per second, in round figures. On this basis, the velocity of discharge through the proposed bridge, as compared with the present bridge, would stand as follows:

Present bridge, 18,000 sq. ft. of waterway, velocity .....	8.0 ft. per second
Proposed bridge, 21,000 sq. ft. to springing lines, velocity .....	6.86 ft. per second

This latter is not an extreme velocity during an extreme flood, such as the one under consideration and, as the River bed is composed of material not readily scoured at such velocities, no apprehension need be felt with respect to the adequacy of the waterway provided, especially as there is an additional twenty-one thousand (21,000) square feet of waterway in reserve, above the springing lines.

#### Legislative Authority to Construct Bridges

By the provisions of two concurrent acts, namely, Act No. 441 P. L. of Pennsylvania, approved May 10th, 1927, and Chapter No. 217, Laws of New Jersey, Legislative Session of 1928, approved April 3rd, 1928, the Legislatures of both States conferred on the Joint Commission for Elimination of Toll Bridges, full authority to construct new bridges across the Delaware River, between the two States. The authority thus conferred, provides for the selection of bridge sites; the acquisition of the necessary lands, by purchase, or condemnation, the preparation of plans and authority to construct. The authority thus conferred is therefore ample to cope with the present situation, once the approval of the Legislature of both States has been given and that of Congress and the United States War Department secured.

#### Type of Proposed Structure

In selecting the type of bridge best suited for this locality, strength, permanence and durability were given first consideration. With these objects in view, a concrete arch structure, with solid barrel arches was selected as the most appropriate type.

While the first cost of a solid type of arch is somewhat greater than the ribbed type, at the same time it affords greater security to a structure built over a river, subject to floods, as is the case with the Delaware. This advantage is due to the fact that the smooth inside surfaces of the arches offer less obstruction to the passage of flood waters and again afford no points for the lodgment of floating debris, such as would be presented by the separate arch ribs, as the lodgment of debris against these ribs might result in serious damage to the structure. Furthermore, in the design of the solid barrel type of arch, certain complicated details, usually unsatisfactory in action and costly to maintain, can be omitted.

To sum up the case, while the solid barrel type of arch is somewhat more costly to construct, on the other hand it is less complicated in design, but more desirable and less costly to maintain.

The total length of the entire undertaking is four thousand, four hundred and twenty-five (4,425) linear feet, extending from the northeast corner of Third and Bushkill Streets, Easton, to the point near Meadow Avenue, Phillipsburg, where the New Jersey State Highway Commission will connect. This is divided into three sections, as follows:

Pennsylvania approach .....	1,465	linear feet
Main bridge over the Delaware .....	1,285	" "
New Jersey approach .....	1,675	" "
Total .....	4,425	linear feet

The Pennsylvania approach comprises a double arch culvert over the Bushkill Creek, an overhead crossing over the Bushkill Drive, with a series of sixteen (16) arches of forty (40) foot span from the Bushkill Drive to the westerly abutment of the main bridge over the Delaware River. Total length one thousand, four hundred and sixty-five (1,465) linear feet.

The main bridge over the Delaware River consists of one central arch, span one hundred and sixty (160) feet in the clear, two flanking arch spans of one hundred and fifty (150) feet in the clear, with two end arches of one hundred and thirty-five (135) feet in the clear, making a total length of one thousand two hundred and eighty-five (1,285) linear feet.

The New Jersey approach, beginning at the easterly abutment of the main bridge, passes over the tracks of the Belvidere Delaware Division of the Pennsylvania Railroad, with an overhead clearance of twenty-six (26) feet; over Broad Street and North Main Street, Phillipsburg, by means of concrete and girder bridges until it strikes the open hillside between Meadow Avenue and Shafer Avenue. From this point it continues along this hillside to a point near Meadow Avenue, the end of the approach, where the New Jersey State Highway Commission proposes to connect. The total being one thousand six hundred and seventy-five (1,675) linear feet.

Between North Main Street and the end of the line the work will consist of side hill excavation and embankment.

Owing to the direction of the channel at the point of crossing, the piers of the main portion of the bridge across the Delaware, will have to be placed on a skew. This is necessary in order that the faces of the piers will coincide with the direction of the flow-line in the River. The most favorable angle obtainable is sixty (60) degrees with the centre line.

An arch bridge on a skew, while an undesirable structure from a constructive standpoint, can be safely constructed, although at an increased cost due to the greater quantity of material required to take care of the additional stresses resulting from the skew. In this case, however, a skew bridge is unavoidable.

In width, the bridge will be fifty-eight (58) feet inside of parapets, made up of two sidewalks, each eight (8) feet wide and one roadway, forty-two (42) feet wide between curbs, capable of accommodating four separate lanes of traffic, which

will permit the passage of at least one hundred thousand (100,000) cars in twenty-four (24) hours.

Two main factors control the height of the floor of the bridge, namely, the tracks of the Belvidere Division of the Pennsylvania Railroad and the elevation of the high water of the flood of October 10th, 1903.

As a result of these controlling factors, the main bridge and the approaches are necessarily elevated above the general level of the natural surface of the ground on the Pennsylvania and New Jersey approaches, with the exception of that portion of the line in Phillipsburg, between North Main Street and its easterly terminus. While this requirement adds greatly to the cost, at the same time it results in a structure exceptionally well adapted to handle economically and without congestion all of the traffic likely to pass over the bridge, at present and during the future.

With the exception of a five (5) degree curve on the Pennsylvania approach and a very short curve at the easterly end of the New Jersey approach, the alignment is straight, thus permitting free and uninterrupted movement of traffic at all points.

The maximum grade in any direction is three and one-half (3½) per cent., which will enable the heaviest trucks to readily operate without stalling.

A structure, such as the one contemplated, will require solid and secure foundations, hence, the footing of the piers and abutments, of the main bridge at least, should be carried down to bed rock. The borings taken show this bed rock to lie further below the surface than was at first believed to be the case. The conditions thus developed will operate to increase the cost. In view of the conditions disclosed by the borings, the possibility of shifting the line to a point where the surface of the bed rock will lie nearer the surface will naturally occur, but when the disadvantages of other sites are fully considered, with the probability that the underground conditions are unlikely to be more favorable than at the site selected, owing to the badly-folded nature of the rock formations in this locality, it is probable that the site selected will prove as advantageous in this respect as any other.

In order to control and regulate the north and southbound traffic passing through Front street, Easton, and over the Delaware River Road (Lackawanna Trail) and to correlate this movement with the traffic on and off the proposed bridge, a "Traffic Circle" has been located on the point of land just north of the Bushkill Creek. To properly approach this Circle will require a change in the alignment of Front Street, with an entirely new bridge over the Bushkill Creek. As the present bridge on Front Street, at this point, has apparently about reached the end of its useful life, no economic loss will result from this step. On the contrary, local benefits and advantages will result through the improvement resulting from the Park development proposed.

Estimated Cost of Proposed Concrete Bridge and Approaches,  
Easton, Pa.—Phillipsburg, N. J.

Section	Length Feet	Land		Total	Construction — Estimated Cost	Total Exclusive of Engr. and Contingencies
		Estimated Cost, Land and Buildings	Cleaning Site and Compen- sation a/c Damages			
Pennsylvania approach, Third and Bushkill Streets, to main bridge .....	1,465	\$303,000	\$25,000	\$328,000	\$1,318,500	\$1,646,500
Main Bridge over Delaware River .....	1,285	127,000	16,000	143,000	3,984,500	4,127,500
New Jersey approach, from main bridge to junction with N. J. Highway Route .....	1,675	209,700	34,800	244,500	844,000	1,088,500
Land and Structures .....	4,425	\$639,700	\$75,800	\$715,500	\$6,147,000	\$6,862,500
Engineering and Incidentals .....						337,500
Total, Bridge and Approaches .....						\$7,200,000
Plaza, North Front Street and Bushkill Drive						
Relocation of Bushkill Drive and North Front Street, Easton, Pa. ....		\$167,000	\$37,000	\$204,000	\$374,000	\$578,000
Engineering, Contingencies and Supervision .....						31,000
Total .....		\$167,000	\$37,000	\$204,000	\$374,000	\$609,000

This estimate of cost of the entire project has been carefully worked out in detail and checked against the costs of similar structures.

While the total represents a substantial figure, the following facts must be borne in mind, namely, that the topography of the locality is rugged; that at two points in the River the depth to reach a suitable foundation will approximate one hundred (100) feet; that in order to provide for the uninterrupted movement of traffic across the River, the Belvidere Division of the Pennsylvania Railroad must be crossed overhead, which fact lengthens the line, if grades suitable for the free movement of traffic are to be given consideration. All of these facts affect the cost.

Again, it was necessary to place the piers of the main bridge over the river on a skew, which, while adding materially to the cost, could not be avoided.

The cost could have been reduced somewhat by substituting a fill for the series of arches on the Pennsylvania approach, between the Bushkill Drive and the main bridge, but as this plan would not have permitted the ground to be utilized to the best advantage, with the further disadvantage of probable recurring settlements in the roadway throughout a number of years, the arches were adhered to as affording the more satisfactory type of construction.

A reduction in cost, amounting to about \$2,000,000, could be effected by substituting a steel superstructure for the portion of the bridge over the Delaware River, in place of concrete, but if permanence and durability, with decreased cost of maintenance and the elimination of future replacements are considered prime factors in a structure of this kind, the concrete type of construction, if substantially designed, will by far prove the more economical in the long run and, in consequence, is the type of structure recommended.

Minor savings could probably be effected in the plan submitted, when detailing, but these were not taken into account

at this time as it was thought unwise to trim the preliminary estimate too closely, on account of unforeseen contingencies which invariably arise during construction and offset any apparent savings of this character.

In preparing this estimate, all elements, such as drainage, paving, guard rails on embankments, lighting, etc., were taken into consideration and it is believed ample provision has been made to cover all possible contingencies, and arrive at a safe but reasonable result, that will require no supplemental appropriations to complete the work; and undesirable state of affairs and one to be avoided, so far as the exercise of ordinary foresight will permit.

Respectfully submitted,

CLARENCE J. BUCKMAN,

President, Joint Commission for Elimination of Toll Bridges over the Delaware River.

LOUIS FOCHT,

Superintendent and Engineer to the Joint Commission for the Elimination of Toll Bridges over the Delaware River.

FRED R. PARKER,

President, New Jersey Commission for Elimination of Toll Bridges over the Delaware River and Vice-President, Joint Commission for Elimination of Toll Bridges over the Delaware River.

Attest:

EDWARD J. PIERSON,

Secretary, Joint Commission for Elimination of Toll Bridges over the Delaware River.

REPORT OF THE BOIES PENROSE MEMORIAL  
COMMITTEE

Report of the Committee of the Joint Assembly of the State of Pennsylvania on the Memorial to Honorable Boies Penrose

Whereas: The Joint Session of the Assembly on Memorial to Honorable Boies Penrose, met in the House of Representatives May 1, 1923, with Honorable Davis Davies, Lieutenant Governor in the chair, and, at conclusion of the remarks made by Honorable William S. Vare, Honorable Augustus F. Daix and Honorable Charles L. Brown, in commemoration of Honorable Boies Penrose, on his life touch on the history of Pennsylvania and the United States, the Joint Memorial Committee of the Senate and House of Representatives was continued for the purpose of further expression by the Assembly as to the usefulness of Senator Penrose to the State of Pennsylvania and the United States.

And Whereas; your Joint Committee did so continue and, in the Session of the Legislature of 1927, presented an act to authorize the erection of a statue to Honorable Boies Penrose, in commemoration of his services to the State of Pennsylvania and his country, and that said act was passed and approved by the Governor of the Commonwealth, May 4th, 1927.

And Whereas; Governor John S. Fisher did thereupon appoint a committee to supervise the carrying into effect of the said Act of Assembly.

And Whereas; the said committee and the State Officials did perform their services and caused to be designed a full-sized statue in bronze of Honorable Boies Penrose, which said statue was, by authority of Governor John S. Fisher and the Honorable Benson E. Taylor, Secretary of the Department of Public Property and Supplies, erected in a prominent place in the capitol ground at Harrisburg, in the State of Pennsylvania, and now submit herewith the attached proceedings together with the addresses made at the unveiling of the Penrose Memorial Statue, on Tuesday, September 23rd, 1930, as a part of their record.

Your Joint Committee having fully performed the service for which it was designated and brought into existence, respectfully submits the foregoing report and ask that they be discharged from further regard thereto.

AUGUSTUS F. DAIX, Jr.  
EDWARD HAWS.  
ROBERT S. SPANGLER.

VISED THE CARRYING OUT OF THE  
PURPOSE OF THE ACT

## BOIES PENROSE

Born in Philadelphia, November 1, 1860

Prepared for College by Private Tutors and in the Schools  
of Philadelphia

Graduated from Harvard College in 1881

Admitted to the Bar in 1883. Practiced Law in Philadelphia  
for Several Years

Elected to Pennsylvania House of Representatives from the  
Eighth Philadelphia District in 1884

Elected to the Pennsylvania State Senate from the Sixth  
Philadelphia District in 1886; Re-elected in 1890  
and again in 1894

Elected President Pro Tempore of the Pennsylvania State  
Senate in 1889, and Re-elected in 1891

Delegate to the Republican National Convention of 1900,  
1904, 1908, 1916 and 1920

Chairman of the Republican State Committee 1903-1905

Elected a Member of the Republican National Committee from  
Pennsylvania in 1904, 1908, 1916 and 1920

Elected by the Legislature to the United States Senate to  
Succeed J. Donald Cameron, and took his seat March 4, 1897;  
Re-elected by the Legislature in 1903 and 1909; Re-elected  
at the General Election in November, 1914; Re-elected at the  
General Election in November, 1920

First United States Senator elected by Direct Vote  
in Pennsylvania

Chairman of the following Committees of the United States  
Senate: Additional Accommodations for the Library of Con-  
gress; Immigration; Post Office and  
Post Roads; Finance  
Died December 31, 1921.

HONORABLE JOSEPH R. GRUNDY  
United States Senator  
Presiding

Address by

HONORABLE JOSEPH R. GRUNDY  
United States Senator

Governor Fisher, Other State Officers, Friends and Fellow  
Citizens:

This Committee having been appointed by the Governor, upon authority of the Legislature, we are here in fulfillment of the distinguished service entrusted to us. We are about to make formal presentation to the Commonwealth and its citizens, of a reproduction in bronze of one of Pennsylvania's truly great statesmen, the late United States Senator Boies Penrose.

My relationship with Boies Penrose was over such a period, and so intimate, as to create an admiration and respect which amounted to a deep and abiding affection—a feeling which I know many of you likewise had for him. Although there are some restrictions which apply, ordinarily, to a presiding officer, it would seem to me to be almost unnatural if, in this situation, I did not pay my own tribute to his memory and express briefly some of the thoughts which this occasion inspires.

Although Senator Penrose was, for a great many years, a national figure of outstanding prominence in the public and political affairs of our country, he was, first of all, Pennsylvania's own illustrious son. It is fitting, therefore, that this monument should be placed here, within the shadow of the capitol where his career began, and where his spirit abided and his power and influence so frequently were exercised, up to the very day of his death. History will record but few men in either branch of the Congress who so thoroughly knew the complex needs and requirements of their States, and who labored so long and faithfully and intelligently to meet those needs and materialize those requirements—always through policies harmonious with the development of the country as a whole—as did Boies Penrose for Pennsylvania.

He was intimately known to many of you. Of tremendous physique, he had an intellect proportioned to the size of his body. Coming as he did from a family whose every son achieved distinction in his chosen field, it was not surprising that he and a brother shared highest honors upon being graduated from Harvard, and that shortly thereafter his unusual mind and innate abilities should have won him the recognition which opened a career of rapid advancement in his own sphere of activity—politics, public service, statecraft.

His service of a quarter of a century in the United States Senate following upon a legislative experience gained in both houses of the Pennsylvania Legislature, covered a period which might be said to have marked the passing of a considerable part of the old order of things, founded in the fundamentals of our Government as originally contemplated, and the emergence of a new era of legislative and constitutional experimentation, with its varied and often unforeseen and sometimes almost tragic consequences.

Boies Penrose was elected to the United States Senate in the same year that William McKinley assumed the office of President. Hence he entered upon his Senatorial duties during the earliest days of what might be called the reconstruction following the disastrous second administration of Grover Cleveland, with its free-trade Wilson Tariff, which prostrated the country and almost destroyed its economic structure. Those who were at that time of an age to observe and realize the conditions that prevailed, need no reminder of the havoc that was nation-wide, reaching to every strata of society and falling with greatest severity upon our working people. How near the Government itself was to actual bankruptcy may be realized from the fact that it was driven to the desperate expedient of floating a bond issue to meet current expenses. And this at a time when the total cost of government averaged only

\$365,000,000 per annum, or less than one-tenth of what it is today!

Thus Penrose was a participant in the restoration which began under the able guidance of McKinley and which put the country again under the sound, constructive policies of the Republican Party. One of the first acts of the McKinley Administration was the enactment of the Dingley Tariff Law, in the course of which the then junior Senator from Pennsylvania laid the foundation of that comprehensive economic knowledge of his State and the country at large, which later made him invaluable to Pennsylvania and an acknowledged authority with vast power and influence in the Senate.

Republican economic doctrine, as expressed in the Dingley Law of 1897, followed by the Republican revision known as the Payne-Aldrich Act of 1909, survived until the disastrous split in the Republican Party in 1912, and thus covered a period of fifteen years. During that time Penrose had come to a position of leadership not only in the Senate, but in the councils of his party in the nation. This period, with its constructive legislation which bred public confidence and encouraged activity in every field of effort, gave full play to the inventive, managerial and productive genius of the American people. It gave us not only a practically uninterrupted national prosperity, but marked an era of the soundest and most sustained development and expansion of the great industrial structure of Pennsylvania, upon which the whole economic life of our Commonwealth rests.

During these years our great steel, glass, pottery and other mills of the western part of the State, and our textile, paper, cement, metal, woodworking and other diversified industries of eastern Pennsylvania, were brought to their highest development. Transportation, banking, real estate, general business, and every other activity, benefited. The same was true in each of the States which had encouraged industry.

In all of this Boies Penrose had an important and increasingly influential part, and had it not been for this period in our history, it is frightful to think what probably would have happened to the Allies in the recent World War, and, later, even to ourselves. Half of the iron and steel, and half of the coal which went into our activities during the World War, came from Pennsylvania.

I sometimes wonder just how much really serious thought our people give to the causes which bring conditions about. That era of sound prosperity and general advancement and development was no mystery. Nor was it brought about by any administrative miracle or legislative legerdemain. It was no secret to Boies Penrose. Upon the contrary, that entire situation arose from, and depended upon, that which was a fundamental of the Penrose philosophy of politics and government. It was founded upon sound policy, of course. But policy in itself is like permissive authority in a Constitution, without the enabling or enforcing legislation to make it effective.

If I were called upon to name the well-spring of the major part of all the material good which came to the American people directly and indirectly as a consequence of the national legislation of that period, I should say without hesitation: the party cohesion and solidarity which gave effectiveness to party policy as expressed in platforms and campaign pledges, and which enabled the people to know, and to act upon the knowledge, that once their mandate had been given it would be carried out conscientiously and honestly by their servants in the administrative and legislative branches of the Government.

In these days of rapid and almost complete disintegration of party loyalty and party spirit, and when many men in public life regard party as nothing more binding than a label with which to get votes on election day, it behooves us to think seriously of whether we are headed, and what chaotic consequences are likely to be.

Boies Penrose believed implicitly in party government. He saw clearly the dangers inherent in political irresponsibility. He hated the hypocrite, despised the opportunist, and loathed the demagogue. He had faith in the soundness of public opinion, but did not confuse it with every gusty expression which purported to be the voice of the populace. He had vision, and applied it in sound, constructive ways; but he never mounted the hustings to proclaim himself a prophet. He was at one and the same time a statesman and a political leader, with the requisite intellect and courage to enable him to be both. A strong man, of brilliant mind and determined purpose, he had

throughout his entire career tens of thousands of staunchly loyal friends, and, by very reason of the characteristics I have mentioned, he also had a not inconsiderable number of enemies, some of whom were sincere in their disagreement with his political philosophy, others of whom were actuated by no loftier motives than their own personal advancement, to which he was an obstacle.

As I already have said, his twenty-five years in the United States Senate embraced a period marked by many changes in the fundamental law and in our methods of political procedure. He witnessed the beginning of the weakening of party solidarity and party strength. He saw the old method of nominating by party conventions supplanted in Pennsylvania and most of the other States by the present system of primary elections.

Within his service in the Senate he saw the country adopt the 16th Amendment to the Constitution, providing for the Income Tax, one effect of which has been to saddle upon the people of the progressive and productive Commonwealths a large part of the burden of supporting the backward States of the nation; the 17th Amendment, providing for the direct election of United States Senators, the consequences of which are so well known as to require no comment; the 18th Amendment, which was to dry up the country and take liquor out of politics; and the 19th Amendment, creating equal suffrage.

He was three times elected to the United States Senate by the Legislature of Pennsylvania and was the first Senator from this Commonwealth to be elected by popular vote, as required by the 17th Amendment. Described by his detractors as one who did not have the confidence of the great mass of our citizenship, he entered a popular election within little more than a year after the adoption of the 17th Amendment and was returned to the Senate by a vote nearly twice that cast for either of his two opponents. Again, in 1920, he submitted his candidacy to the electors of the Commonwealth, and was elected by a vote of 1,067,989.

If there is one thought above others that the memory of Boies Penrose suggests to me at this time, it is that progress and prosperity are dependent upon sound governmental policy, that sound governmental policy can only be made effective through political integrity, that political integrity, in the large sense, only can be achieved and maintained out of party solidarity; and that party solidarity is impossible without capable and courageous leadership—leadership devoid of personal ambition, with an eye single to the good of the nation as a whole. This was the chart and compass of the man in whose honor we gather here today.

With those remarks, I take up the duties for which I was selected, and introduce the first speaker.

Fellow citizens, it is both a privilege and a pleasure to present to you the Hon. Charles L. Brown, President Judge of the Municipal Court of Philadelphia.

Address by

HONORABLE CHARLES L. BROWN

President Judge of the Municipal Court of Philadelphia

Senator Grundy, Governor Fisher, and Fellow Citizens:

We are here to chronicle an epoch in Pennsylvania, dotted by the existence of a man; just as all periods in the world's existence chronicle the life of some individual in the history of Statecraft Science and Religion.

Most governments are congregated under party heads. Ours is a government by parties, organized for concentrating the minds of the people on certain principles to be carried forward in the election of the party candidates. Pennsylvania was held for years largely in the Democratic party up to 1860; prior thereto the Republican party was formed and Simon Cameron became the dominating figure and, under him, its delegates caused the nomination of Abraham Lincoln in 1860; and from that time has been in the Republican column, under the leadership of the Camerons, Quay and Penrose. He succeeded Donald Cameron in the United States Senate. In the memory of a history of seventy years, with an occasional defeat of its candidates, the Republican party has given to the Commonwealth an efficient government. A man prominent in party government can vision and accomplish for the general welfare a real service only when he stands free from alignment with any form of business with which the Commonwealth has to deal, and this is singularly the case with the

man we honor today, who so recognized the peculiar equity of his trust, that upon his election to the United States Senate, he separated himself from the active and lucrative law firm of Page, Allison & Penrose and retired from the practice of his profession.

Party government, or its candidates is defeated when men, securing controlling influence in its management, direct its purpose to their financial gain.

He was graduated from Harvard University, specializing in political science, and gained his degree as Bachelor of Law; from that time he was a student of economics.

Senator Quay, in discussing Senator Penrose with me at the conclusion of his first term in the United States Senate, remarked his ability to absorb work and his knowledge of men in the Senate and said that in the six years he had never breached a single precedent of that body and had not made one public address. He worked in committee; he was learning the science of government, which is the psychology of man, and when he became Chairman of Post Offices and Post Roads he increased and perfected the service and enlarged the compensation of its employees and, at a function in the Union League, in Philadelphia, he was commended for his mastery of this intricate service by former Postmaster General, John Wanamaker.

He then became the head of the Finance Committee of the Senate and a master in finding ways and means to conduct the business of our government on land and sea and for her dependencies, with such fine balance that the financial affairs of the country's best interest were welded in security.

A division in the Republican Party brought a change in administration and distress stalked the land until we were drawn into the World War. All the mental calibre of the man, his knowledge of men and things, was given to President Wilson to bring to a conclusion that holocaust. Following its close came another change in administration and the herculean task arrived to reconstruct the government in its finances and return large business to their former owners, re-establishing initiative in our citizens.

Here, again, he evidenced his knowledge of men. I asked him, prior to President Harding's assuming office, if Mr. Mellon would be the Secretary of the Treasury—"Yes, he is now arranging his business affairs, retiring from everything that would touch government finance, prior to his acceptance. It will be a personal sacrifice but public gain, for most things to which that man puts his hand turn to gold." The people of this country have many evidences of Senator Penrose's foresight in the frequent "melons" he has cut in government taxes.

He knew men; he studied Mark Hanna and euchred him at his own game. No man had more to do with forcing the nomination of Colonel Roosevelt as Vice-President at the National Convention in Philadelphia, against the desire of both Roosevelt and Hanna, than Senator Penrose. He had knowledge that Hanna possessed, that because of organic disorder President McKinley could hardly stand the strain of another four years in office, and the battle was for a possible President of the United States. This information was not in the possession of either Colonel Roosevelt or Senator Platt. Platt wanted to shelve Roosevelt.

Hanna had disfranchised Pennsylvania in keeping Quay out of the Senate. Quay and Penrose desired to unhorse Hanna. A catastrophe removed President McKinley and spread sorrow over the land.

In Pennsylvania he was able to so guide important legislation that agricultural, mining, corporate, business and laboring interests were all measurably balanced to the benefit of the State. The continuance of her fiscal system, her Health Law and Pure Food Law, her Educational and Eleemosynary advancement, the State Constabulary, her fish and game preserves, all copied by other Commonwealths and some by the National Government, evidence the wisdom that guided their passage.

He was a man who understood the requirements of massed people and sensed the needs of the rural and agricultural communities and the people who produced from the bowels of the earth that which meant the comfort of all. He had the capacity to look at things in the large. He was firmly convinced that the largest liberty came from the minimum of statutes. Law that restricts individual initiative and binds us too close in our social relations is destructive of character and tends to slavery by the State. Education of our people,

in economics, particularly legislators and executives, may return much liberty that has been lost.

Although a marked man, recovering from what subsequently proved a fatal illness, he insisted upon returning to Washington to that stupendous work, day and night, as head of the Finance Committee of the Senate, using all his knowledge to readjust the economics of the country, striving, like Archimedes, for more time to complete his task. He was a statesman.

Governor Fisher, your Committee, designated to attend the work authorized by the Legislature, have followed closely the efficient manner in which Honorable Benson E. Taylor, Secretary of the Department of Property and Supplies and your Art Commission have performed their services and, through me, present to you for the Commonwealth of Pennsylvania, the Statue in bronze of

#### UNITED STATES SENATOR BOIES PENROSE

Senator Grundy (Chairman): The statue will now be unveiled by Mrs. Spencer Penrose.

The statue was thereupon unveiled by Mrs. Spencer Penrose.

Senator Grundy (Chairman): It is now my great privilege to present to you his Excellency, the Governor of Pennsylvania.

Address of Acceptance by

HONORABLE JOHN S. FISHER  
Governor of Pennsylvania

Senator Grundy, Members of the Committee, Invited Guests, and Fellow Citizens:

In a dedication of this monument to the memory and services of the Honorable Boies Penrose we are performing the crowning act of a duty imposed upon us by the Legislature. By Act of 1927 an appropriation of \$20,000 was made to erect a statue to his memory. Primarily, the duty of carrying out this mandate rested with the Department of Property and Supplies, headed by Honorable Benson E. Taylor. However, a committee of distinguished and able men, who were closely associated with Senator Penrose, took over in large measure the task, and this finished work of art is the evidence of their duty lovingly and faithfully performed.

This large gathering of friends and citizens, whose admiration and affection Senator Penrose held in life by the force of his commanding powers of intellect and those fine qualities of character which endeared him to all who were brought into personal relations with him, is in a sense a finer tribute than can be offered in stone and bronze, and raises this occasion above the formalities of an official function. The memory of Boies Penrose as a true and enduring friend and a courteous gentleman always is the magnet that draws us here.

Unhappily, his active career fell in a period when vilification of public men by speech and pen and pencil conveyed to the public, who were unacquainted with the victim, a distorted conception of every quality of person and character. The image of Penrose which his enemies sought to create in the minds of the public was utterly unlike the real man. Many good people who were denied the privilege of knowing him were, of course, deceived. He had little time from the exacting duties of his office and public employments to disabuse them by going among them and appearing publicly on the speaking platform. When he did, the effect was almost magical. But, in the main, he stuck to his work and left the rancor of faction and partisanship to exhaust itself by its own violence. Undoubtedly he was as sensitive as any other person but he learned to cultivate a spirit of patience and indifference—a little trying to his friends at times—which left him free to carry on with a disposition unclouded by passion and a mind unbalanced by personal grievance. I never knew any man who displayed so much indifference to personal wrongs committed against him as Senator Penrose. I once heard him say that he had become so accustomed to being kicked from the rear that he never turned around to see who was doing it.

Almost nine years have flown by since Senator Penrose closed his long tempestuous and distinguished career. Passions have subsided, party and factional rancor have abated, and the shadows of misunderstanding which enshrouded him in life have been dissipated. The true genius of his nature and

the really great qualities of his character and the accomplishments of his public career can now be seen and dispassionately appreciated. Just as this finished work of art truly represents his magnificent physique, so each one of us today who called him friend may raise in our hearts and minds the image of the living Penrose, who walked and talked and labored with us and for us through all the years of his toilsome life.

I like to think of his fine distinguished presence. This statue will preserve that for all time. My first impression of him still lingers. It was in the stormy Republican State Convention of 1896. The issue turned upon the election of a State Chairman. The contest was close and Senator Quay, whose leadership was assailed, as was usual with him in tight pinches, became the candidate of what was known as the stalwart wing of the party. In the preliminary caucus of the Quay delegates and on the floor of the Convention the young Senator from Philadelphia became the spokesman and floor leader of the Quay forces. He met the best the opposition had to offer, all experienced tacticians and debaters, and triumphed over them completely. It was his Convention speech that won the admiration of the young men of his party, made him known to the people of the State at large, and led to his election to the United States Senate the following year. When I returned from that historic Convention, I told friends back home that I had met the handsomest man I had ever seen, named Penrose. Senator William Flinn, of Pittsburgh, will be remembered as the doughty antagonist of Senator Penrose in that and many later contests. Not so long before the death of Senator Flinn I had the good fortune to meet him at the Duquesne Club at luncheon. In talking over old times, he warmed my heart with his generous tribute to his old foe and wound up by describing him as the handsomest young man he had ever met. Truly, nature lavished on Boies Penrose her rarest gifts of comeliness and manly strength.

But nature went far beyond these superb physical endowments. They were crowned with a mind of extraordinary gifts and strength. There was no weak spot in his mental equipment. Every faculty was up to full measure with every other. His was a beautifully balanced mind. It was perfected by the best training school and university could supply. I have been told that the mother did much to prepare her boys for college and encouraged them in the course of their studies. Whether or not that be the case, we know that Boies Penrose and his brother, the late Doctor Charles Bingham Penrose, author of the law creating our Health Department, graduated from Harvard in the Class of 1881, and that Boies stood second because the first honors went to Charles. I have heard it said that Charles Penrose had a perfect college record. Being thus gifted and thoroughly prepared, Boies Penrose was animated with honorable ambition and a determination to carve out for himself a successful career. No young man ever left college to face the fitful chances that life has to offer with fairer prospects of success.

It will certainly be of interest and, I trust, of profit to recall some of his distinguishing traits of character. These qualities have much to do with any man's life, whatever his gifts and opportunities. They are the touches that impart individuality and compose what we term "character." Senator Penrose possessed an abundance of personality.

His manner was ever courteous but reserved with those who had not been admitted to intimacy. He was always easy of access and was frank, open, and truthful with those who approached him on business, politics, or public matters. In the circle of his friends he was one of the most companionable of men. His conversation was a delight and was full of wit and information. There was a peculiar quality of voice and intonation and a piquancy in the use of words and phrases that were peculiarly Penrosean and left his expressions sticking like burs to the memory.

He was gifted with a delicious sense of humor. This was the saving grace that sweetened many bitter experiences. He could dismiss an ugly situation or pass over some act of littleness or meanness or disloyalty with a joke. He had the happy faculty of seeing the ludicrous side of thing. A book of highly amusing Penrosean anecdotes could easily have been compiled and yet some ill-informed people thought him solemn and austere because he was not given to peals of loud laughter. His enjoyment was likely to find expression in a quizzical smile. While he was still a big figure at the National Capitol an unknown author published a book called "The Mirrors of Washington," a rather satirical volume purporting to

delineate the leading statesmen of the time. Penrose was given a chapter, written not in an unfriendly vein, but the author held him up as a humorless person and gave in proof an incident which was certainly "mirrorless" in portraying this trait of the Senator. It appears that one of the well known members of the opposition had imbibed too freely and had come into the Senate with a rather uncertain gait. In his confusion he occupied the seat of Senator Penrose, who was giving his attention on the side to some committee matters. Senator Penrose took in the situation and finally walking down the aisle and addressing the presiding officer most politely requested that the secretary be directed to record the fact that he had not occupied his seat in the Chamber that day. Naturally, this drew the attention of the members and the galleries to the situation and the remark was met with peals of laughter. This was a characteristic Penrose joke but the author of the "Mirrors" thought he merely took this method of getting back his seat, without appreciating the ludicrous circumstance and the embarrassment of his Democratic colleague.

In the best sense of the term, he was a sportsman. He had the spirit of play, although little time to indulge in games, such as golf and the like. He longed for the sea and the mountains and the woods. He liked yachting and fishing and hunting. After a hard siege of work, he wanted to get away where he could relax and enjoy the beauties of nature. One of his favorite haunts in earlier years was the Jackson Hole country in Wyoming. He told me that he had spent weeks at a time living in the open and riding that gorgeously wild and rugged region. Later on in some of my visits to the same region I ran across traces of him. I took the liberty of asking him why he had discontinued going to "The Hole" and he said that the place had become too civilized. At that time it took only two days to ride in from civilization. It was this quality in him that led to his keen interest in the establishment of departments to restore wild life and forests throughout the State and Nation. Here in Pennsylvania he was ably assisted by his brother, Doctor Penrose, who served so long on the State Game Commission and did so much to set up the system of game refuges. We have not forgotten Senator Penrose's addresses in the interest of conservation and the great influence he wielded in bringing about the proper legislation.

He was possessed of tireless energy and a zeal for work. He never left a job half done. The bigger it was, the greater was the challenge to his energies. He mastered every phase. He dug out every detail. This accounts for the soundness of his judgment on matters of legislation and administration. This trait was manifested early in his career when he took the laboring oar in collaboration with his partner, Mr. Allison, in writing the history of the corporate development of Philadelphia. That work was done so thoroughly that no finishing touches have ever been found necessary. In the course of his research he found the original charter of the city, now regarded as a priceless treasure. This book is an authority and is still the resort of students on municipal subjects. Again, at the very height of his career, as Chairman of the State Committee on Post Offices, we see him plunging into a self-imposed three-year task in the investigation of the entire Post Office system. No similar work approaches this in its vastness of scope and detail. It resulted in the reorganization of the entire administration of the Post Offices of the United States. Its good results are still in force and effect. And to mention just one more illustration, may I call attention to his part in the preparation of the three tariff bills while he was either Chairman or minority leader of the Senate Committee of Finance. None of his colleagues approached him in the mastery of the schedules of the revenue laws and their influence on the finances of the Government and the business of the country. No Senator had ever surpassed him in this respect. Those of us who have seen him in his office, surrounded by a staff of twelve or fifteen secretaries, all working like mad, know how he poured out the exuberance of his great strength in the service of his constituents.

He was broadminded and tolerant of the views of others. This was manifested both in his leadership of party in the State and Nation and in his attitude toward colleagues and rivals who differed with him on public issues. During his entire tenure of leadership he never once arbitrarily dictated the selection of party candidates or the issues to be advanced in platforms or party declarations. He acted only after wide consultation with others who had a right to a voice and whose

opinions were entitled to respect. Among his fellow members of the Senate he had no personal enemies and many warm friends, even in the opposition ranks. This was because of his tolerant and open-minded attitude. Only on a few occasions was he ever the object of personal attack. We recall the rather vicious assault of the Elder LaFollette and Penrose's withering reply, in which he spoke of the Wisconsin statesman as the Doctor Munyon of politics who sought to apply patent nostrums to all the ills of the Nation. Immediately afterwards he repented these remarks and asked that they be stricken from the journal. In doing so he made a lifelong friend of one who had been a bitter political enemy. During the World War, Senator Stone, partisan Democrat of Missouri, in a studied address, charged Penrose and ex-President Roosevelt with party activities to the embarrassment of the conduct of the war. Penrose was credited with being the national leader of the Republicans. In his extemporized answer, Penrose expressed surprise at the mildness of his indictment as a loyal party man, begged the privilege of pleading guilty to every item, and took occasion to emphasize his sense of political loyalty. But he went on to say:

"There are many things that could be mentioned by way of criticism of the present Administration that, in my opinion, would bring vastly beneficial results to the country during the present war crisis; but I have kept scrupulously silent in this body, not wanting to embarrass the Administration in any way, and, with one or two exceptions, voted for every measure that was submitted by the various departments, in most cases against my judgment and my private opinion, simply to give them every opportunity to succeed."

These words exactly express his habitual attitude of subordinating his own views and interests to his sense of public duty. Numberless proofs of a similar nature might be recalled.

If I were asked to point out the dominant quality of his character, I should unhesitatingly answer "courage." Conscious of his superior strength and the power of his position, he never needlessly sought a quarrel or raised controversial issues for party or factious advantage. Nor did he ever fail to accept a challenge, whether offered without or within the party or by individuals or combinations of individuals. He counted not the odds if he believed in his cause and the rectitude of his course. In a great crisis he was never scared by the spectre of possible defeat. It was this stout-heartedness that won the devoted loyalty of his followers and the respect and often the admiration of his foes. In the famous Pennypacker-Elkin gubernatorial contest Penrose was the field marshal for Senator Quay, who was backing Judge Pennypacker. Those of us who were regarded as the younger element in the party were adherents of Elkin and went down to a defeat not altogether inglorious. After the battle was over Mr. Elkin said to me that "Boies Penrose is the boldest, most lion-hearted man I have ever met." It is needless to say that the breach between the two was eventually completely closed.

Owen Wister has recently written a most interesting book on Roosevelt, in which he refers to Penrose. He credits Senator Penrose with the defeat of Roosevelt in 1912. After that disastrous rift, he quotes Roosevelt as saying of Senator Penrose, "I like that big buccaneer." The book is right in claiming that Penrose was willing to join in nominating Roosevelt in 1916, for he advanced such a proposal to certain members of the Pennsylvania delegation. The old breach was not yet sufficiently healed for the success of such a move, but I believe that had Colonel Roosevelt lived, Penrose would have backed him for the Republican nomination for President in 1920. It was the fighting quality in each of these two men that led to a mutual regard, never completely broken, even in the hectic days of 1912, and which drew them together again after those stormy days had drifted by.

It is pleasant to dwell on the personal side of Senator Penrose, but the memorial we dedicate today is the tribute of the Commonwealth he loved and honored to his unusual public services. It is appropriate at this time that we briefly recount the steps in his brilliant career that opened with his election to the Legislature in 1884 and continued in unbroken succession until he closed his eyes in the last long sleep on December 31, 1921, clothed with the highest dignities and powers his fellow citizens could bestow.

In the earlier days of the Republic it was not unusual for young men to come to the fore rapidly. Things were then in the making and stirred into action the bounding spirit and

boundless faith and confidence of youth. The framing of the Federal Constitution called forth the creative genius of Hamilton and Madison and Pinckney when they had not yet reached an average age of thirty. Patrick Henry, Jefferson, Marshall, both the Adamases, Webster, Clay, Calhoun, and many others of little less renown, had attained national repute when still in their thirties. But in the day of Boies Penrose things had settled down and youth was compelled to fight for its place on the top rung. This was especially true with our conservative people, yet this young man broke through all barriers and reached the summit of his official dignities when only thirty-seven years of age. He proved that the young man still has his chance.

Once launched upon his career his progress was rapid and at times dazzling. There is inspiration even in the chronology of his advancement. Three years after graduation from college and one year after admission to the Bar, he is elected a member of the House of Representatives in the General Assembly. Two years later, in 1886, he is advanced to the State Senate, to which he is twice re-elected, serving as President pro tempore in the memorable session of 1889 and 1891. While still serving in that body he is chosen by his fellow members of the Legislature to succeed the distinguished Honorable J. Donald Cameron as the representative of Pennsylvania in the United States Senate. Thrice he is re-elected. Of his four elections, twice was by the Legislature and twice by popular vote. His political strength was subjected to every test. In both State and National Legislative bodies, he held committee assignments of the highest importance and unobtrusively performed a prodigious amount of labor. At various times he held Chairmanships of four United States Senate Committees, serving at the head of the Committees on Additional Accommodations for the Library of Congress, Post Offices and Post Roads, Immigration, and finally Finance. In the latter Chairmanship he succeeded Senator Aldrich and automatically became the leader of the Republicans in the Senate. The extent and variety of his service is apparent from his membership on the Committees on Naval Affairs, Commerce, Education and Labor, Railroads, Public Expenditures, Banking and Currency, Public Health and National Quarantine, Expenditures in the Department of State, and Expenditures in the Post Office Department.

While carrying this heavy official load, his services to the political party of his choice were no less onerous and distinguished. In 1903 he became Chairman of the State Republican Committee and from that time maintained his party supremacy until his death, with the exception of the upheaval of 1912, when he lost temporary control. His membership in the National Republican Committee began in 1904 and was continuous with but one interruption. He was a delegate to the National Republican Conventions of 1900, 1904, 1908, 1916 and 1920. Whether a delegate or not he exercised a powerful influence in formulating platforms and selecting standard bearers, beginning with the Convention which nominated McKinley in 1896.

By many of his admirers it has been thought that his activity in party management somewhat obscured his reputation as a statesman. I incline to the belief that had he been free to devote all his energies and talents to his duties in the Senate he would have added a lustre to his name that would not have been outshone by any other member in the history of that august body. And then it must be remembered that party leadership was thrust upon him and was not of his own seeking. He simply accepted its responsibilities as a call to duty. It was his fidelity to the trust thus imposed that maintained his sway over his party for a longer time than was ever wielded by any other State leader.

His reputation, in the last analysis, must rest upon his achievements as a legislator. In the field of legislation his labors bore abundant and enduring fruitage. No specific reference can here be made to the multitude of enactments in the Legislature and in Congress which bore the stamp of his authorship or had the needful support of his influence. That duty must be left to the leisurely pen of the painstaking biographer who will sooner or later perform that labor of love. We can only note the general trend of the measures he sponsored or advocated. His general attitude was determined by the spirit of the times in which he lived and the conditions of life with which he was familiar. He witnessed three of the greatest epoch making events in our new world—perhaps in the entire world. He opened his conscious life upon the scenes

of the Civil War; he entered the United States Senate just in time to participate in the measures incident to the Spanish-American War; he reached the zenith of his career and abilities to give of his best to his country under the heartrending strain of the World War. He absorbed his patriotic devotion in youth and lived it in his ripened years. The great weight of his influence was consequently always on the side of those measures which tended to safeguard and make serviceable the constitutional powers of government, to consolidate and strengthen the bonds of the union of our States, and to adjust and expand the laws to meet the everchanging conditions flowing from the exigencies of war and the transforming influences of modern life. His face was set against all sectionalism, class distinctions, and whatever tended to undermine and destroy our American institutions and laws. He always faced his flag when on duty.

In the compass of his life he was witness to the evolutionary changes in the business world. He fully comprehended their significance and wisely sought to weave their influences into the political and social fabrics of the times. With such a background it was but natural that his thoughts should be focused on measures for the protection and advancement of labor, the largest and most important factor in organized industry. He believed that general prosperity depended on the working man and that he was most valuable to industry and society when given reasonable working hours, safe and sanitary conditions while on the job, and good wages for a fair day. To him belongs the credit of writing and pushing through the law establishing the State Factory Inspector's Department, now enlarged into the Department of Labor and Industry. It was an advanced step and was vigorously opposed and attacked in the courts. But it stood the test and was followed by a long succession of kindred humane enactments, such as semi-monthly pay in lawful money, the protection of women and children in industry, the health and safety of the anthracite and bituminous coal miners, the safeguarding of tenement workers, the arbitration of labor disputes, the adoption and protection of union trademarks and labels, the granting of workmen's compensation and the establishment of the State Workmen's Insurance Fund. These and many similar measures had his approval and substantial support. In Congress he espoused numerous counterparts and his aid is still gratefully remembered by the Post Office employees and the railway and telegraph operators for the Eight Hour Law, and, by all who work for a living, for the bill creating the Federal Department of Labor.

Likewise, we may expect him to champion the cause of good business and sound economics, as he always did. He was a profound believer in the resources of America and sought to develop them in full for the expansion of industry and trade and the employment of labor and capital. He knew that one of the essentials to attain this end was a sound banking system with a currency that was flexible, ample, and stable in value. And so we find him arrayed against the "Free Silver" heresy and all forms of cheap money. The defeat of Mr. Bryan settled the money question. Then came the struggle for a national banking system that was really national in extent and power. This need had been in the minds of statesmen and financiers since the time Alexander Hamilton submitted his well organized plan for a national bank, and had persisted, although unsuccessfully, until the pressure of the World War broke down all opposition. Senator Aldrich had given the best of his life in the preparation of suitable legislation. He was ably assisted and supported by Penrose, but party and sectional opposition had defeated their efforts. When Woodrow Wilson became President, he it remembered to his everlasting credit, he reversed the ancient policy of his party, and with the aid of Republican Senators like Penrose and his associates, set up the Federal Reserve Bank, which made the financing of the World War a possibility and assures for all time to the United States a banking system stable as the Government itself and ample for the needs of every form of business.

The same motive prompted him to champion the protective tariff. His views and labors in connection with the tariff are too fresh in our memories to need amplification. It is sufficient to recall that he became, and for years continued to be, the commanding influence in support of the protective principle in the levying of impost duties. However, he applied this principle always in a reasonable measure. He did not seek to erect around America a "Chinese Wall" against world trade.

He fully realized the importance of keeping open the channels of commerce with foreign nations. But his endeavors were directed to the establishment of tariff rates sufficiently high to equalize the difference in the cost of production between the imported and the domestic article. He held this to be absolutely essential to the maintenance of the American wage scale as against the cheap wage paid in foreign competing countries. Neither did he believe the tariff to be a local issue. He wanted its benefits spread equally and impartially throughout the Nation and to every form of industry. He did not ask favors for his constituents that he was unwilling to extend to the citizens of every other State. He will long be remembered as the master or sane tariff legislation.

And may I touch just one more point in his career as a lawmaker. As I have intimated, he was sensitive to the great social and economic changes wrought by modern industrial methods and processes and keenly alive to the necessity of expanding governmental authority to regulate and control the new order of affairs. He was not a reactionary who opposed every move to advance the Government in harmony with the progress of business, nor was he a radical who would apply hampering and destructive methods to arrest the initiative and progress of an energized and enlightened people. His methods were rather of the deliberate, sane, sure order that looked to results with the least amount of disturbance and injury to the existing state of affairs. And in this spirit his hand was felt in the establishment, as I have said, of our Factory Inspection Department, now elaborated into the great Department of Labor and Industry, which jealously guards the safety of every industrial worker in the Commonwealth. It was also directly felt in the creation of the Forestry, Health, Highway, and Welfare Departments, and equally so in the expansion of other departments as occasion demanded. The United States Department of Labor stands as his monument to the workers of America. In whatever affected the prosperity and welfare of the people he effectively asserted the powers of his office and position in line with a progress marked by moderation. This attitude will be apparent to anyone who will examine his record in the Senate on legislation affecting railroads, merchant marine, telegraph and telephones, inland and coastal navigation, rivers and harbors, internal improvements, irrigation, national parks, conservation, and other measures of a like character. The scope of these activities mark him as a statesman of wide sympathies and wise actions.

And so, Senator Grundy, we accept from you, Chairman of the Committee in Charge, this monument as a lasting memorial to a great Pennsylvanian and a great Senator. You and your fellow members have discharged your duty in such manner as to merit the commendation of the Commonwealth for which you acted. I make grateful acknowledgement of your services and, as Governor, accept this monument from your perpetual property and solicitous care of the people who authorized its erection. I now transfer it to Honorable Benson E. Taylor, Secretary of the Department of Property and Supplies, to be protected and maintained in accordance with the provisions of law.

Address by

HONORABLE BENSON E. TAYLOR

Secretary, Department of Property and Supplies

His Excellency, the Governor of the Commonwealth, Senator Grundy, Ladies and Gentlemen:

In accepting the custody of this splendid memorial in behalf of the Commonwealth of Pennsylvania, I do so with appreciation of the great honor conferred upon me personally. However, I am not unmindful of the fact that I am acting solely as representative of the citizens of this entire State in taking possession of this statue, for, after all, it is now their property. I am happy to receive this beautiful work of art and humbly offer to the donors the slight expression of gratitude of the people.

Pennsylvania has many magnificent monuments erected to the memory of the great men and women who have passed on and who gave their best, even their lives to make this State the "key-stone" of them all. Therefore, it is highly fitting that one should be dedicated to the memory of that great statesman, the Honorable Boies Penrose. It is not for me to tell you today of the wonderful accomplishments of that splendid leader who for so many years represented Pennsylvania

in the United States Senate, but I desire to suggest that it is fitting that this statue should adorn the beautiful grounds of this State Capitol where years ago Senator Penrose, then a young man, began a career of public life which made his name famous not only in these United States but the world over.

Much credit is due to those whose efforts made this memorial possible and it will stand forever as a symbol of the wonderful love and affection that his friends, whose counsel he often accepted, had for him and which made him the great leader he was. Therefore, I can only repeat that in accepting this fine example of man's handiwork I do so in behalf of the people of the whole Commonwealth, and for each of them I now offer thanks to all those who had the honor of participating in this undertaking, knowing full well that for years to come it will stand as a monument to the accomplishments of one of Pennsylvania's foremost sons.

Senator Grundy (Chairman): It is now my very great privilege to present to you Mr. Samuel Murray, the genius who created this representation of the late Senator Boies Penrose.

The Sculptor thereupon arose, acknowledged the introduction of the Chairman, bowed to the assemblage, and retired.

Senator Grundy (Chairman): The exercises of this afternoon have now been concluded.

  - Concerning the Codification of Laws

## Foreword

This report is the result of an investigation conducted by the Commission on Penal Institutions appointed by Governor Fisher pursuant to an Act of Assembly of the Commonwealth of Pennsylvania, dated the 10th day of May, A. D. 1927, P. L. 882. The Act imposed upon the Commission the duty to "inquire into the advisability of making the State Penitentiary at Rockview a penitentiary, separate and apart from the Western Penitentiary, to be governed and administered under the supervision of a board of trustees appointed

by the Governor; to investigate the several State and local penal institutions, their method of administration and the commitment, employment, care, and maintenance of inmates therein, and to suggest methods for the improvement of the same; to study and make recommendations relative to the transfer and retransfer of inmates to and from such institutions; and to inquire into the advisability of providing for the construction of district or central prisons or workhouses for the confinement of prisoners now confined in county and city prisons and workhouses."

The organization meeting was held in the Governor's reception room at the Capitol, in Harrisburg, on January 7, 1928. The Commission then proceeded with its labors.

In 1929 so much remained to be inspected and evaluated that the Commission held it advisable to present a tentative report concerning only Rockview and to ask for the continuance of the Commission during the biennium of 1929-31. Sufficient funds remained of the appropriation to finance the completion of the work. The request was granted and the Commission was continued by Legislative Act.

## Introduction

Public interest has been focused upon prisons and prisoners with a growing desire to understand the penal and criminal situation and to meet it with intelligence. The situation is hopeful, and the time has arrived for definite objectives to be set up and clarified, and for a comprehensive program to be formulated and put into practice.

This report may seem oversolicitous for the welfare of the criminal. On the contrary, the Commission holds emphatically to the proposition that few are imprisoned unjustly; that stern but wise discipline should be enforced; that society must be protected. But the Commission also holds, with equal emphasis, that society is responsible for some situations conditioning criminal behavior. The case histories of many criminals reveal how society often fails to provide the means of readjustment at critical times in the life of the individual, in spite of the fact that knowledge of his needs is not lacking.

One recognizes that some criminals cannot be restored to society, and that segregation is the only means society has for self protection. But a large number of prison inmates, under wise guidance and suitable education, can change their attitudes and develop their abilities, and in the end return to society and make a readjustment. The Lombrosian theory that the criminal is a creature apart from society, of a congenitally alien group, from which society must protect itself, is now in the discard.

Protection of society implies, not only the imprisonment of criminals for a period of time, but also the acceptance, on the part of society, of the grave and important responsibility of changing the prisoner's attitude, of developing his abilities to the limits of his native endowments, so that society may not be subjected to his depredations upon his release.

Dr. Richard Cabot has analyzed the old profitless way of treating prisoners, "one cannot break up a man's bad habit by locking him away for some months.—Some way he must be brought

1. to take a new interest in an honest job;
2. to have a new affection leading to finding it worth while to behave more decently;
3. to learn that crime doesn't pay."

To this end the penal and correctional institutions of the State should develop a well coordinated, scientifically organized socio-educational program of rehabilitation that shall use every available means for reaching, changing and developing the personality of the prisoner.

The effectiveness of such program will depend first, upon limiting of the number of inmates for each institution secondly upon the possibility of establishing a graded system of promotion within each institution, providing colonies for the inmates of the more promising type; and thirdly, upon the possibility of classifying the institutions as well as classifying the inmates. Without classification, the desired results cannot be obtained.

Any consideration of delinquency involves the inquiry into its cause and prevention. The Commission believes that, through the agency of the home and the schools, the problem of potential delinquency should be attacked. The average teacher, who now looks upon the troublesome, the truant and the defective as trying nuisance, must recognize in many of them the potential delinquent, requiring special care. Schools should be adjusted for such cases. For if effective reclamation work were done in the early stage of unsocial behavior of the

young, the population of our correctional and penal institutions would be materially reduced.

Other agencies should be utilized more widely. Attendance at prenatal clinics will warn of congenital disorders; baby clinics will discover and advise concerning physical maladjustments; pre-school clinics will help adjust health and behavior problems and guide the parents to better handling of the child and the choice of more suitable school. With the correction of his physical ills, many roads to delinquency will be closed and the State will have protected the child against an overwhelming environment.

The lack of preventive measures is well illustrated in the following.

On June 1, 1930, twenty-three girls, rated feeble-minded, were held in Muncy because all proper institutions for them were overcrowded. Of this group, one girl, aged 17, with a mental age of 10 years and 2 months is serving a term for her seventh offense. Had the Juvenile Court discovered her mental condition when she first appeared at the age of 14, much distress and cost would have been spared. Had the schools discovered it long before she was 14, the whole tragedy might have been averted and the child protected in a suitable institution.

In conclusion, the affairs of prisons and prisoners require wide technical knowledge and are of tremendous consequence to society. For the world of the anti-social is a world in itself, even behind prison bars. Within the limits of its age groups, it must meet problems of housing, physical and spiritual care, education, employment, leisure. In fact every problem that arises in the life of the socially minded, may arise in the prison world. The prison has the task of making over the anti-social into a social person. This task is made particularly difficult because normal family relationships are cut and the unhappiness of physical restraint is added.

In view of the complexity of the problem, it is necessary to have a highly developed and powerful organization handling the affairs of our penal institutions, an organization with specialized, yet well coordinated, divisions, subscribing to a uniform program, covering the whole field of commitment, treatment, restoration and disposition of the delinquents, with power and authority to put its program into effect.

## II.

### The Rockview Prison Project

A. The Relation of Rockview to the Western Penitentiary. After thorough study, the Commission is convinced that Rockview should not be "a penitentiary separate and apart from Western Penitentiary, to be governed and administered under the provision of a Board of Trustees appointed by the Governor."

Irrespective of other consideration the Commission holds it to the best modern prison policy to continue Rockview as a part of a system of classification and promotion for prisoners, to be more systematically developed in the future.

As a transfer prison, Rockview offers the opportunity of developing a graded system of classification in conjunction with the other penitentiaries of the State. With the establishment of a program of rehabilitation at the older institutions, Rockview receives those cases whose behavior, past history, criminal record, clinical and psychological record warrant a favorable prognosis. The time spent at Rockview represents the last stages toward rehabilitation and involves the preparation of the inmate for parole or release.

This policy, if fully developed, would be wholesome and desirable. It would involve the fundamentals of rehabilitation based on the man's normal desire to gain something, on his understanding the means by which he can gain, and on his practice of behavior leading to success. In this promotion scheme, the inmate would really learn the technique of social behavior, feel the satisfaction of personal recognition and would advance one step toward becoming a self-directing personality, having learned the facts pertaining to promotion and practiced the necessary self-control.

The Commission presents this relation of Rockview and Western Penitentiary in detail because on it depends the major argument for holding them as two units of one institution. To set aside this system, which gives major possibilities for rehabilitation, would be to renounce the advance in classification, in occupation and in the potentialities that it affords.

B. Finance. As a prison of first reception, Rockview would require a wall. This very large cost would be waste since those for whom a wall is necessary are taken care of at the Western Penitentiary under the present arrangement. A reparation of the prisons would entail a duplication of staff; dislocation of records and bookkeeping would increase the overhead without resultant profit.

The cost of transfer of inmates, trustees and records under the present arrangement is comparatively negligible and defensible in the purpose now served.

C. Administration. With the present policy continued, the single Board of Trustees can adopt a modern, integrated program of prison administration. A division would require not only two Boards but also two wardens. It would require other major staff officers for work not sufficiently manned. It would require records and bookkeeping now properly handled. It would entail a new program and policy and great physical changes of undiscovered benefit. It would eliminate the possibility of developing a very desirable scheme of prison control by removing incentives to good behavior that promotion offers.

D. Present Conditions at Rockview. We heartily recommend the type and construction of the new cell block which provides a room for each inmate, giving him privacy, calm and quiet; giving him opportunity to live with his personal possessions, to pursue personal interests and to feel the satisfaction of daily renewing social contacts and starting each day as in normal life.

We recommend the Psychopathic Ward at Rockview because it relieves the main institutions of their troublesome mental cases, placing the borderline cases in a specialized environment where some may be helped to return to the general group and where the true psychopath receives care and later placement for the best interest of society and himself.

We believe it inexcusable, however, to find double-decker beds in any State institution and particularly bad in the Psychopathic Ward at Rockview, where it may be a source of discontent and possible danger.

We believe the educational program is insufficient and calls for complete reorganization.

We find that a distinction is made in the wages paid by the institution and by the Department of Welfare for work of the inmates. We can find no reason why the Department should pay a man fifty cents per day and the institution ten cents to twenty cents per day when the work of each is equally necessary and often requires similar skill. We believe this to be unfair and a source of discontent and should be promptly changed. An honest day's work should rate the same wage in the institution.

Moreover, as now organized, the Commission finds that Rockview has served as a promotion institution for Eastern Penitentiary and other prisons. Though this condition has been less prevalent since the better type prisoner has been needed in the construction work at Graterford, it proves the desirability of developing Rockview, with its seven thousand acres, to its full usefulness as a promotion prison.

## III.

### Findings Relative to the Bureau of Restoration.

A. Present Organization. Under the present organization, too many bureaus and boards handle the affairs of prisons and prisoners. The Bureau of Prison Labor in the Department of Welfare, the Bureau of Parole and the Board of Pardons and Paroles in the Department of Justice have no related purposes and no coordinated program to follow.

The relation of the Bureau of Restoration within the Department of Welfare to the State, County and local institutions is friendly but casual. Effective authority to correct after its inspection, is not given by law or when given is practically nullified by conditions set within the law.

The Commission finds that the chief of the Bureau of Restoration is charged by law with duties that require wide diversity of talents and tremendous labors. But there is little organization for the functioning of these talents and few facilities are provided for the performance of the labors. The staff is wholly insufficient to carry out the laws or to put in motion an adequate program of restoration. There is immediate need for additional clerical aides and technical assistants, and sufficient appropriation of funds to enable the Bureau to function one hundred per cent.

Moreover great progress toward the execution of the recommendations of this report would follow without further Legis-

lation, if the Bureau of Restoration had a reasonable number of clerical aides and technical assistants.

Another important need is the coordination of the work of the Bureau of Prison Labor, the Board of Parole and the Board of Pardons and Pardoes with the work of the Bureau of Restoration. In fact, the Commission believes that the work done by these various bureaus and boards is of sufficient importance and magnitude to warrant its elevation to a ranking department of the State Government, as a State Department of Correction.

**B. Standards.** At present there are no state required minimum standards for any of the institutions or agencies that handle delinquents. There is need for the setting up of such standards to be applied to all institutions from city lock-ups to penitentiaries, giving the Department of Welfare power to enforce its orders as well as power to rate its findings.

**C. Conferences.** The Commission finds that recently the Director of the Bureau of Restoration has taken the initiative in calling separate conferences of the Wardens and Superintendents, Chaplains and other officials of the State Penal Institutions. This is a commendable beginning and should be extended to officials of county institutions as well. There should be district conferences as well as State conferences.

#### The Physical Conditions of Penal and Related Institutions

**A. Overcrowding.** Overcrowding is one of the outstanding evils in many Penal Institutions in Pennsylvania. The crowded conditions in certain districts of large cities are deplored and yet are tolerated in our state institutions. The use of double decker beds is a common means of doubling the number of inmates for which the rooms were designed. The Pennsylvania Industrial Reformatory, designed for a population of 800, on March 11, 1929, had a population of 1146; on February 13, 1931, its capacity unchanged, had a population of 1290. The Farview Hospital for the Criminal Insane, designed to house 397, on November 26, 1930, was housing 621. Similar conditions exist at Morganza Training School, with double decker beds in the boys' dormitories. No purpose is served in having Morganza a co-educational institution. A separate institution for girls would relieve this congestion.

In a recent report of the Bureau of Restoration it is stated that the Eastern Penitentiary is overcrowded by 90 per cent. the Rockview branch of the Western Penitentiary is overcrowded by 12 per cent, the Pennsylvania Industrial Reformatory is overcrowded by 60 per cent. and the State Industrial Home for Women at Muncy by 4 per cent., based on one inmate to a room.

There is immediate need for additional space at Laurelton, especially for defective women who are also delinquent.

Nearly all county institutions are cruelly overcrowded and in need of space for every purpose.

Overcrowding has many evils.

1. It is undesirable from an administrative standpoint. Close and frequent contacts between inmates lead to an increase in disciplinary cases. Individual treatment is much more difficult. In short, any program of rehabilitation is more or less doomed to failure where overcrowding exists.

2. Overcrowding conditions often have demoralizing and degenerative effects. When two or more men sleep in the same cell, practices may be indulged in by individuals who otherwise might remain normal.

3. Overcrowding is undesirable from the standpoint of hygiene and health. It reduces the amount of fresh air available for each individual in the cell; it raises the temperatures; it gives vermin opportunity to multiply.

4. It is desirable to have a cell for every inmate. This develops in the individual the sense of pride arising from the fact that the cell is his alone. He is made to feel responsible for its appearance, cleanliness and order. It provides him with a certain degree of privacy.

**B. Size of Institutions.** There is a tendency to relieve overcrowding by adding to the size of existing buildings or by squeezing new buildings within old boundaries. While this may be permissible in institutions of small size, it should be discouraged in institutions whose population is above a thousand, unless the expansion be for the purpose of giving more adequate quarters to the inmates already there. For efficient administration and for successful rehabilitative work, there is need for much more individualized treatment of inmates than can now be given. Such treatment can obtain only where the number of inmates is reasonably small, or the number of

attendants adequate. On the other hand, the Commission finds the State Industrial Home for Women at Muncy is pathetically small. With an unusually good site and location and an administrative force sufficient for an adequate institution, the small number of inmates accommodated is out of all proportion to the State's large need and unduly increases the per capita costs.

**C. Special Need of Certain Institutions.** Besides the lack of sufficient space for adequate housing of inmates, certain institutions lack buildings or space for special purposes. A comprehensive rehabilitation program calls for shops of various kinds, grounds or floor space, or both, for recreation and exercise, floor space for libraries, dining halls, educational buildings, buildings or wings for special classes of offenders, special discharges or pre-parole cottages or buildings. All of these are part of a rehabilitation program. Yet there is not one institution now fully equipped to carry out its own modest plans.

1. When a sentence reads "Solitary confinement at hard labor," one knows that this order of the court will not be carried out. Solitary confinement, except for discipline, is in the discard and hard labor or any labor at all is for the few. Shops are entirely lacking in almost all county institutions. In State institutions conditions are better, but certain needs are real. The reformatory at Huntingdon is well equipped to teach thirty odd trades. On the other hand, Muncy lacks facilities for canning, tailoring and weaving. The penitentiaries need more shops to give daily employment to a greater number of the prison population. Now, in order to give work to as many as possible, the jobs are divided, and a full days work is given to few of the inmates.

2. Other needs are of more specific nature. Muncy needs a discharge cottage to carry out the plan that the last months of detention shall be as nearly like normal living as possible. The enlargement of the psychopathic ward at Rockview is urgent and necessary to do away with its double decker beds and to increase its capacity. The county jails lack space for shops, schools, dining rooms, recreation, exercise. Few county jails provide any work in the open air or even outdoor exercise.

At Farview, the new administration building had but one suite of apartments for staff physicians. To man our institutions with the best type of officers and to lessen the turnover, greater consideration should be given to the conditions that will enable them to lead a normal family life. Particularly in institutions for the insane, the doctors in charge must have relief from the strain. Their home life, recreation, and vacation periods must be scrupulously guaranteed.

The State is in immediate need of an institution to take care of male defective delinquents. Such an institution would reduce the population of the penitentiaries, reformatories and county jails and enable those institutions to carry out their program of rehabilitation. The institution at Cumberland Valley promises this relief. Its functioning should be hastened with all possible speed.

**D. Present Status of Buildings and Equipment.** In general, increasing attention is being given to the physical care of State, Penal and Related Institutions. In county institutions improvement is noted in increased fire protection and fresh paint.

1. Security. In State institutions there is practically no danger of escape from lack of security. Even in county jails the question of security has been given adequate attention although nearly half of them do not meet the State requirements in every detail. Prisons, by definition, are institutions in which offenders can be securely kept. But the problem of making prisoners secure has been given too much attention and money, when compared with other problems of vital importance. Security is needed, but there is a tendency to go beyond the need with a consequent waste of energy and money. Walls of solid concrete separate one inmate from another; heavy steel bars, closely placed, are still found on every window of most American prisons. Little purpose can be served by placing heavy steel bars on a dining hall within a prison wall, unless one discredits all other means of prison control.

There is no better proof of the futility of our ponderous prison structure for certain type of prisoners than the fact that while Rockview and Graterford were being built, the inmates, who did most of the work, were housed in tents. These conditions existed at Rockview for almost ten years. It demonstrates what can be done with a selected group of inmates.

But the trend in prison building has recently taken a turn. The new cell block at Rockview has steel bars of considerably reduced thickness, although all windows open on the outside and there is only a stockade surrounding the buildings. Likewise, at the Western Penitentiary, the new dining hall will have no window bars.

2. Protection from Fire. The recent disaster in a neighboring state focused public attention everywhere, upon the question of fire protection in penal institutions. In State institutions, protection against fire appears to be adequate, assuming that the available apparatus will work in emergency. It is less adequate in jails. Some county jails are too poorly built to insure safety, but new fire extinguishers have been acquired and precautions are taken.

3. Ventilation. Provisions for proper ventilation seem adequate. In some State institutions, thermometers are placed in cell blocks and readings are taken at regular intervals. Data on the temperature of the buildings are thus made available. But this desirable system is by no means universal. County institutions vary.

4. Lighting. Lighting in the cells is generally poor because it must filter across corridors or through chink windows. Only where the outer wall of the cell block is provided with large windows extending the whole height of the wall is there ample light for each cell, but it is by no means general.

In the new buildings at Rockview, Graterford and the Delaware County Jail, all cell windows open on the outside. These are examples to be followed.

In some jails electric lights are available only in the corridors, but, in general, there is a light in each cell. This is placed in the ceiling and is usually too dim for reading.

5. Equipment. The equipment for hospitals, kitchens and general maintenance is fairly adequate. The furniture varies in quality and kind, but one feels the absence of a practical housekeeper's advice.

Beds and mattresses vary greatly in kind. Some county jails have no mattresses. The inmate rests on one inch steel strip latticework, sometimes with a blanket thrown over it. In larger county jails, canvass cots that fold against the wall are common. Where mattresses are in use, some are of hair and cotton, some entirely of cotton and some are tick filled with straw.

Sheets, slips and blankets, vary greatly in quality and in the extent of their use. Many county jails use only blankets; some supply one, others two, to each inmate. State institutions generally supply full bedding. As the number of commitments have increased, the double-decker beds have found wider use.

Benefit could be derived from the standardization of equipment in analogous institutions.

6. Fixtures. Toilet facilities differ greatly in State and county institutions. State institution cells are equipped with basins and toilets, but there are many county jail cells without them. Facilities for bathing and for washing clothes are satisfactory in State institutions, but are poor in many jails.

7. Special Equipment. In some institutions, the lack of sufficient equipment, renders available equipment practically useless. At Muncy there is a gymnasium, but lacks equipment. In other cases were found libraries without suitable books.

#### The Treatment of Inmates

A. General Physical Treatment. State institutions are doing well, under existing conditions, in providing for the physical needs of the inmates and for the maintenance of humane treatment. In most of our jails, however, no attempts have been made, in any phase of the program, toward individual readjustment.

1. Food. In all State institutions food is provided in sufficient quantities and is fairly palatable. Facilities for serving it hot and neatly are provided. There is often lack of variety and proper balancing of menus.

In county institutions the food varies greatly both in quantity and kind.

2. Clothing. Clothing varies in quality from fair to good and appears adequate. In some institutions a certain amount of freedom is permitted the inmate in the use of his own clothes rather than those of the institution.

3. General Cleanliness. State institutions are everywhere clean and practically free from vermin. In the county institutions every degree of cleanliness and its absence can be found, from scrupulous neatness to inexcusable filth.

4. Exercise and Recreation. State institutions recognize the value of, and attempt to provide, exercise, as far as possible, in the open air. This is much more effective than walking up and down the corridors. It is more effective because it is usually much more enjoyed, therefore more vigorously pursued and for a longer period of time. Wherever recreational exercise finds a place in the daily program of an institution, it reduces problems of discipline, and prevents brooding and scheming on the part of inmates.

In spite of the acknowledged need of exercise and recreation, except in State institutions, outdoor recreation is seldom possible. In most county jails, except where they have prison farms, the only form of exercise is walking the range corridors. Recreation there is none, except what the ingenuity of the individual prisoner may invent. Card playing and gambling are not infrequent. The situation for the women in county jails is in every way worse.

The seriousness of these conditions is great. For it must be realized that the county jails handle the greater number of offenders. Moreover, many of the inmates are waiting trial. With the possible exception of known recidivists, they should not be considered as criminals, not treated as such. Many of them are not convicted.

State institutions usually have some land available for outdoor exercise and recreation. Moving pictures, and occasionally stage shows, provide indoor recreation, supplemented by the institution bands. At Farview hospital the recreation program is not developed.

5. Discipline. Prison discipline, by tradition, tends to be repressive rather than constructive. The notion that the inmate is in prison to be punished is still dominant. The feeling of vengeance toward the offender is deep rooted. It is no surprise, therefore, if occasionally jurists or others still advocate the whipping post as a cure for crime. Nor [should] it be surprising to find occasionally in our institutions an administrator whose idea of discipline is almost synonymous with physical punishment.

Discipline is indispensable in prison control and management. But it should be constructive rather than repressive. Repressive discipline has been in vogue in the past, and still is the rule in some institutions, simply because it offers the easiest solution to the problem of management of offenders. Wherever it exists, it indicates inefficiency, ignorance, incompetency and lack of imagination on the part of those in charge.

The true disciplinary status of our institutions is difficult to ferret out. As far as can be known by inspection and questioning, it seems generally good. The trend is to treat inmates as individuals who will respond to humane methods of treatment. It is not uncommon to find reasonable privileges granted and responsibilities delegated to deserving and competent inmates.

Both at Huntingdon and Glen Mills a notable attempt is being made to replace severe military discipline with socio-educational treatment and to build upon, rather than stifle, boy spirits.

6. Training of Attendants. The Commission is convinced that the morale of an institution depends largely upon the type and training of the attendants. In order to carry on the kind of discipline now advocated, it is necessary to have attendants who are trained to understand the objectives. The majority of the attendants in our Penal and Related Institutions lack proper training.

Nowhere in the State is any formal attempt made to train attendants for the proper supervision and guidance of the inmates. Just as State schools are being established for those dealing with the apprehension of the criminal, so other schools should be established for the training of those responsible for his custody and rehabilitation. These could be readily established by a cooperative arrangement between the State penal and correctional institutions and the State aided universities and colleges.

In order to raise the standards of quality and training of attendants, it will be necessary to make their position secure and their wages proportionate to their tasks and responsibilities. At present, some of the attendants are paid wages so small for the best interest of the institutions,—as at Farview, among the criminal insane, where the work of attendants is really that of keepers.

B. Medical Treatment. Physical ailments are often the basis of social maladjustment. Medical treatment, therefore, is fundamental to any progressive program of rehabilitation.

1. State Laws Concerning Health. The Commonwealth of Pennsylvania has made many laws for the care of health in all institutions. But the laws seem to have gone little farther than her statute books. Frequently officials and governing bodies are little impressed with the necessity of carrying out the laws. As a consequence, the matter of routine physical examination of all sentenced prisoners, while well done in some institutions, is superficial or not done at all in others.

The difference between what is and what should be, is well illustrated by the appended letter sent by the Department of Welfare in December 1930, to Warden X., County Z, Pennsylvania:

My dear Mr. X.:

Pursuant to the duties imposed on the Department of Welfare by Act 175, 1929, section 2304b, visits and inspections have been made of all supervised institutions.

At the inspection of the prison under your control, conditions were found as are checked below, which, in the opinion of the Department of Welfare, are unlawful.

(1) One cell is occupied by more than one inmate. (Refers to prisons erected since the operation of the Act of April 8th, 1851, repealed by Act 447, May 2nd, 1929, Section 567.)

(2) Inmates are not segregated who are:

a. Physically diseased, Act 208, May 10, 1921, P. L. 433, Par. 2.

b. Mentally weak, Act 208, May 10, 1921, P. L. 433, Par. 3.

c. Evilly inclined, Act 208, May 10, 1921, P. L. 433, Par. 4.

(3) Venereal examinations are not made of all inmates. (Act of April 26, 1921, P. L. No. 150, Par. 1.)

(4) Physical examinations are not made of all sentenced prisoners. (Act of May 10, 1921, P. L. 433, No. 208, Par. 1.)

(5) Mental examination are not made of all sentenced prisoners. (Act of May 10, 1921, P. L. 433, No. 208.)

(6) Incoming and outgoing mail is not censored. (Act of May 11, 1911, P. L. 274.)

(7) All inmates found to be venereally diseased are not treated. (Act of April 26, 1921, P. L. 299, No. 150, Par. 1.)

(8) Exercise is not given to all prisoners, two hours each day, out of doors, when weather and safety permit, and out of cells when the weather is inclement or security does not permit. (Act of June 14, 1923, P. L. 755, No. 3061.)

(9) Physicians records of prisoners examinations are not kept in the prison. (Act of May 10, 1921, P. L. 433, No. 208, Par. 1.)

Very truly yours,"

2. The Status of Medical Treatment. The medical program is almost entirely remedial. Illness and pain alone call for medical service. Health in County institutions is almost uniformly on the cure-pain basis. Treatment of the near-sick, while carried on in a few state institutions, for certain types of cases, is not a State-wide practice. Inmates in poor health when they are committed, continue in poor health unless a change for the worse takes place. There is need for a State-wide policy of discovery and treatment.

State institutions take some care of the tubercular, by segregation and special diet. Genito-urinary cases are likewise segregated and treated. Psychopathic cases at the Western Penitentiary and Rockview receive commendable attention, who the ward has double decker beds and additional housing is sorely needed. Huntingdon Reformatory has a splendid new hospital building and fine equipment.

Hospital facilities at both Eastern and Western Penitentiaries are not good.

At present there is not sufficient cooperation by correctional and penal institutions with the facilities already available in the State Department of Health. There is need for a Director of Health in the Bureau of Restoration in the Department of Welfare to coordinate the work of State and local hospitals, State genito-urinary clinics and State mental clinics and make their services available to state and county penal institutions.

It seems altogether possible, in a plan for health rehabilitation, that wings in jails in certain climatic locations could be designated for the care of special ailments; that the affected prisoners could be exchanged between prisons, each county paying for its own prisoners.

3. The Status of Prison Physicians. The remuneration of prison physicians, like that of many of the personnel of penal and correctional institutions, is generally too low for the amount of service demanded by law. As a consequence, too much latitude is often allowed the physician with regard to the time and the services he renders to the institution.

C. Educational Program. Formal education can not be regarded as the panacea for all criminal evils. The majority of the inmates of penal institutions are literate and a few of them have had the benefit of a high school education. Yet many of them are classified as habitual delinquents. Formal academic training is necessary, but it is only a phase of education. In a progressive program of rehabilitation, education carries a wider meaning and becomes of fundamental importance. Its principal function should be to rebuild the character of the inmates, to develop their personality and to provide training in habits that will lead to successful social adjustment upon release.

1. Lack of State-Wide Policy of Education. While here and there it is possible to find a good class in this or that branch of education, there is no State-wide policy, either for minors or adults, in our penal and correctional institutions. There is no definite objective toward which the educational programs of the different institutions aim. Certain institutions limit their educational activities to "bringing illiterates to fourth grade" before their minimum expires and others to teaching "something useful upon release."

The Commission finds no relation between schools of penal institutions and the State Department of Education, no policy for requiring certificated teachers, no supervision, no special curricula or course of study by said department. The whole program is often left to the judgment of the Warden or Superintendent, who may or may not have knowledge of the modern technique of education. This, coupled with insufficient funds, makes the education of inmates in penal institutions, on the whole a haphazard, unorganized, unscientific activity, rather than a purposeful rehabilitation project.

The State, so vigilant in the education of non-delinquents, fails to accord similar opportunity to those confined in county and State institutions. As it provides a specially trained teacher for any twenty non-delinquent illiterate adults, it should provide similar facilities for the teaching of adults in penal institutions, where the need is equal and where attendance and time are assured.

In order that the available educational agencies of the State may be coordinated and that a comprehensive socio-educational program for penal and correctional institutions may be formulated, there is need for a Socio-Educational Director, whose duty should be to establish a relationship with the State Department of Education through the divisions of Special Education, Adult Education, etc. and to plan the education in all penal and correctional institutions, suited to the varying grades, ages and abilities of the inmates.

2. The Status of General Education. Education in our institutions suffers from three defects. In the first place little use is made of the modern findings of pedagogy and psychology relative to best methods of teaching adolescents and adults. Secondly, there is a lack of material and equipment. With few exceptions, all State institutions lack illustrative material, up to date books, adapted to the intelligence and age of the inmate. Libraries are usually poor. In some institutions books are available in large numbers, but many of them are either very old or treat of subjects in which the average inmate is not interested. On the other hand, magazines find wider circulation. Many of the inmates subscribe to various magazines and pass them around to other inmates.

Other available sources of education are restricted in their usefulness because of lack of equipment.

The third major defect is the lack of trained teachers. The teachers are usually inmates, in most cases with a limited educational background. While they may have some capacity and a willingness to teach, they lack in training, experience and knowledge.

3. Training in "Life Interests." The Commission believes that one type of education should be introduced as far as practicable for every inmate. This "Life Interests Education" includes those skills which every woman should have as a woman and every man as a member of a household. It is the obligation of each penal institution to equip each inmate with the correct technique of daily living and to attach real importance to well rounded standards of home making. The study of the methods and materials of the household should be correlated with school, recreational and social studies and should constitute an important part of the educational program. Every girl and woman, upon release, should have the skill and technical knowledge to make a bed according to hospital standards, to clean various types of rooms, to care for, prepare and serve food, to budget and plan means, to give

first aid and child care, to darn and mend, to know something about materials and their costs, to use a pattern, to operate a sewing machine, to know something of flowers, songs, games, stories, needle work, to know how to spend her leisure pleasantly and profitably and to meet her civic obligations.

There is absolutely no intention to minimize the importance of "wage earning" education. A fifteen hour day for three hundred working days of the year holds time for many types of activity. It is important to remember that while operations in present day factory work are easily learned, the technique of good housekeeping is far more difficult and the opportunity for learning it far more rare. Penal and correctional institutions are the logical places for this kind of training. One cannot over-emphasize the importance of focussing the attention of institutions upon character building and the skills which equip a woman to make life happier and so lead away from criminal acts.

This training in "life interests" is equally advisable for male inmates. During his incarceration each one should progress through a routine performance of simple household tasks in carpentry, plumbing, electricity, gardening, firing, first aid, camp cooking, etc. and the meeting of his civic obligations.

4. Vocational Education. Recent investigations on the usefulness of trade training in penal institutions have brought new problems. The New York Crime Committee reports that "exconvicts abhor the trade taught in prison." The study made of the Massachusetts Reformatory disclosed that 66 per cent. of the boys released did not follow the trade learned while in the reformatory. The Fishman report states: "It is open to question whether any considerable per cent of the prisoners who do learn trades actually pursue such trades after they are released."

These reports do not disclose why trades learned in prisons are not followed on the outside. The data only show that they are not followed by 66 per cent. of the cases.

The fact that ex-convicts must often take any job that is offered them, may be one comment on the situation. Moreover, trade training acquired in prisons is often not given recognition on the outside.

But the Massachusetts report shows that 34 per cent. of the released do follow the trades they learned in the Reformatory. This proportion makes trade training worthwhile. In fact this percentage is only 18 per cent. lower than the percentage of those who attend Pittsburgh trade schools for 1½ years. Fifty-two per cent. of those follow the trade after leaving school. While on the average, the boys of the Massachusetts Reformatory trained only 12 to 15 months.

So, while highly elaborate, expensive shops set-ups may not be advisable, such shop set-ups as are reasonable and modern should be encouraged. Prisoners should be taught to do one marketable thing absolutely and unqualifiedly well. The State's aim should be to give every person coming out of a penal or correctional institution that feeling of security that skill in at least one trade gives. To be able to do one job well gives an interest and a reinstrument with which to escape the old world of the unskilled, unindustrious or predatory group and to enter a state of self directed, decent and self-supported living.

The aim of industrial rehabilitation is to fix work habits, to increase dexterity and to broaden social understanding and to teach technique so that each inmate can adjust himself to whatever outside employment he may find.

In vocational education, as in other phases of education, there is no State-wide policy. At Huntingdon there are well organized facilities to teach thirty odd trades. Considerable progress is being made along this line at Glen Mills, and the progress thus being made is highly commended by the Commission. At Muncy typewriting, hairdressing, power laundering and commercial banking are taught. At the Western Penitentiary attempts are being made to teach machine shop work, plumbing, carpentry, cabinet making, mechanical drawing, auto mechanics, auto painting, barbering, etc. But everywhere there is lack of coordination, of materials and personnel for supervision.

5. Physical Education. At present, there is a lack of organization, facilities and apparatus for purposes of physical education. In some State institutions much is done in athletics, baseball, volley ball, basket ball, football. This is commendable. It affords entertainment and recreation for all and exercise for the players. Nevertheless, there is conspicuous

need for physical exercise in which every inmate may take part.

6. Special Educational Phases. There are phases of special education which have not as yet received the attention they deserve. Morganza has an "Opportunity Class" for low mental cases. But there is need for further provision for all mental defectives of both sexes and all ages. For such cases there must be proper institutions. In the meantime, special effort should be made to procure training for the troublesome high moron and borderline cases.

Studies made by Doctor Van Nuxen at Laurelton and by others, show that individuals with relatively low intelligence can become useful and self-supporting if properly taught, properly placed and properly watched.

Institutions are increasingly making use of music as a means of developing the personality and powers. We commend the success and efforts of Doctor Van der Wall in musicotherapy, which coordinates moods, education and character building. His work at Muncy should be considered as a precedent to be followed by other institutions.

7. Education in County Institutions. Only three county jails out of sixty-six make an attempt to educate their inmates.

D. Prison Employment. Whatever else may be lacking in a penal or correctional institution, lack of employment should not be tolerated. Employment per se, is the greatest need in prison administration.

All penologists claim that as a rehabilitative force, work for prisoners has no equal. To a largely unindustrious group, such as are found in penal and correctional institutions, it gives the most important lessons in life. It fixes habits, gives opportunity for earning money and owning it and a feeling of satisfaction, independence and pleasure from earned rest after work. It is the most effective discipline. It occupies the prisoner's mind otherwise left to brood and scheme. It occupies time otherwise used for fraternization of the duller or more dangerous sort. It provides an incentive for good behavior and makes clear that the loss of work means the loss of income and of privileges.

Work for inmates is the greatest and most immediate of prison needs. The idleness of prisoners is everywhere denounced as an inexcusable burden on the taxpayer and wholly demoralizing to the prisoner. It defeats all purposes for protecting society because instead of salvaging the individual prisoner it strengthens his bad habits. What little work is available pertains to daily tasks necessary to prison maintenance and the routine demands of prison life. In State institutions there is usually some shop work and occasionally trade training giving wage-earning skills. Steady work, however, is available for only a few of the inmates and practically no employment is available in county jails.

Moreover, different wages are paid to those who work for the Department of Welfare and those who do institution work. The Department of Welfare pays as high as 65 cents a day while the institution pays 10 cents to 20 cents a day for work which is fully as important and often carries greater responsibilities. This is obviously unfair.

Besides maintenance and shop work, inmates often do hand work in beaded bags, cabinet making, novelties, etc., on their own account. Such activities are highly commendable and should be developed systematically. Closer study of changing styles and new patterns would increase the real sales value of the articles.

The Commission does not approve of the employment of inmates in the handling of confidential histories of other inmates.

Some ruling should be made in institutions by which the inmate is required to send a portion of his wages to his dependents on the outside.

1. Handicaps to the Development of an Adequate Industrial Program. The Commission finds that this disastrous condition of unemployment is due to the absence of a proper market and the lack of scientific relationship between production and disposition. If the market for prison made goods were adjusted and inter-institutional commerce, known as "State use" were set up. Free Labor would find in it a tax relief rather than serious competition.

It would be advisable to make a list of all the needs of the institutions of the Commonwealth, and to equip certain institutions with facilities to manufacture articles not produced at present. A steady market for prison goods could thus be provided by requiring each institution to purchase from the

institution producing. If this were done, institution maintenance could be paid for with little or no appropriation and the prisoners could earn for their dependents and thus to some extent relieve county poor agencies.

Of further help would be the standardization of equipment and merchandise used in similar institutions so that opportunity for large scale production of needs would be provided.

Another serious handicap lies in the present methods of accounting. The Commission believes that the Department of Welfare should arrange a system of bookkeeping whereby each institution is given credit for whatever it sells or manufactures.

In brief, the Commission finds the present industrial program in penal and correctional institutions hampered by

- a. the lack of information concerning demand,
- b. an unreasonably limited market,
- c. the lack of mandatory legislature for "State use",
- d. the lack of standardization in equipment,
- e. inadequate provision for farm labor and insufficient set-up for industries,
- f. the fluctuating population in county jails.

F. Classification. Classification of inmates is of paramount importance even in institutions where there is no program of rehabilitation. It is of material aid to prison administration and management. In a progressive program of rehabilitation it is indispensable.

1. Within the Institution. Various types of classification are possible within the institution. Inmates can be grouped, according to the prospects they offer for rehabilitation, into the corrigible and the incorrigible. The latter group could be further classified into smaller groups as psychopaths, mental defective and others.

Classification serves also as a disciplinary measure; it affords possibilities for the permanent segregation of the incorrigible type commonly known as the "hardened criminal."

The corrigibles, the majority of the inmates in any penal institution, may further be classified into graded classes; the members of the lowest class promoted to higher classes after requirements are met and improvements in the behavior of the individual becomes manifest.

This type of classification, for its full fruition, would necessitate the building of discharge units for those who are about to be released and whose conduct and demeanor has warranted their being promoted to conditions as nearly like those on the outside as practicable. Discharge cottages are needed at Muncy, Huntingdon, Glen Mills and all other institutions where a graded classification is now attempted. This system provides for varying degrees of security, from "tight house" for the "hardened criminal" to "discharge unit" for the inmate meriting such promotion.

Wide range of ages and difference in sex are often factors that make proper handling of inmates difficult. The range of ages at Morgantown and the housing of boys and girls on the same grounds add to the administrative problems and hamper development. Most jails house men and women in the same building. This is not advisable in any institution.

Classification is often necessary as a medical measure. In some State institutions there is segregation of the tubercular, in some there is segregation of mental cases. This practice should be universal.

In general, adequate attention is given to social diseases. But the practice should be established of retaining inmates in the institution beyond the limit of his minimum term if the disease is not sufficiently under control by that time to warrant release.

Psychological and educational tests are not infrequent, but the results should find far wider use. Psychological and social findings, in fact, are indispensable for many kinds of classification. Studies of individual inmates should help to determine sentence and to clear many prison problems in administration, classification and vocational placement. But psychology is not a cure and classification is only a setting for treatment.

2. Classification by Institution. In a graded system of rehabilitative penology the most approved procedure is to classify the institutions themselves, and to transfer the inmates accordingly, as they advance or depart from the norm of the institution in which they find themselves. This system lends itself to the transfer of inmates for purposes other than those of promotion or demotion. Rockview, for example, not only provides a place to which the more deserving inmates

of the penitentiaries may be promoted, but it also provides a ward for their psychopathic cases.

A classification of prisons as wells of prisoners, might well be introduced immediately. A jail in certain climates could be designated to house to treat all the tuberculars in a given prison district; another jail could be adapted to house all women prisoners of the district; a third could care for the defective delinquents until suitable State institutions are built.

Institutions for mental defectives and for defective delinquents are a very urgent present need. Fairview cannot accommodate all the criminal insane. There is immediate need for a new institution for criminal defectives to relieve the reformatory, penitentiaries and jails.

There is very urgent need for a system of State Industrial Prison Farms to receive prisoners sentenced to county jails for not less than 30 days. Most of our county jails are not and cannot be equipped to develop a satisfactory rehabilitation program. Yet many county jail inmates can be improved under proper treatment. A prison farm satisfies more problems in providing work, exercise, health, and general rehabilitation than any other form of penal institution.

G. Post-Institutional Supervision. The period immediately following release is most critical for the ex-convict. It is the period of readjustment when he most needs, and receives least assistance. Usually he can get no employment, if he honestly states who he is and where he has been. The first thing he does is to deny his identity, to assume a name. He endeavors, to lay the foundation of good conduct by telling falsehoods. For these reasons the man just out of prison needs sympathetic and wise guidance as he never needed it before. Little provision is made for such guidance.

A woman jailed seventeen times in 1930 is a mathematical problem as to the cost of a bad sort of "protecting society," and is a spectacular comment on her "preparation for release."

1. The State Parole System. Under the present system, every inmate upon release from a penitentiary receives new clothing and ten dollars. This amount is too small unless the prisoner returns home and his home is not too far from the prison. Jails do less or even nothing for the released.

Recently a State system of parole supervision has been organized with a superintendent in the Department of Justice. At present actual supervision covers only six counties in the Philadelphia district. For the rest of the counties, parole supervision amounts to little more than form filing. Not enough money is available to permit the parole officer from the institution to undertake actual field supervision.

It follows that no friendly contacts and no preventive supervision can be established. Parole violation is discovered only when someone reports such violation to authorities.

2. County Parole System. Few county institutions provide supervision for their released prisoners. Occasionally, county probation officers charged with the oversight of juveniles on probation, do supervise some of the ex-inmates of county jails. State institutions also, at times, call upon these county officers for supervision of their cases. Many counties have no probation officers. There is urgent need for more and well qualified probation and parole officers.

Because of the importance of supervision to society and to the released prisoner, and in the absence of a State-wide county parole system, the State Bureau of employment should be enlisted to find jobs, and outside agencies, "Service Clubs" and others should be enlisted in the work of supervision. These agencies should act as a contact between the inmate and his family during his imprisonment and definitely prepare a home for the reception of the prisoner when released and help to secure employment when discharged. If these "Volunteer" services are not acceptable, then it will be necessary for each institution to employ certificated social case-workers who shall hold together family interests, make contacts with outside agencies, and help to bridge the difficult period of adjustment when the "released" reenters society.

H. Codification of Penal Laws. The Commission finds such a large number and variety of laws and regulations for the management of penal institutions and the custody and treatment of prisoners that a State wide program is easily discounted by a local condition. It would be of great advantage if all laws concerning prisoners and prisons were codified.

I. Excessive Variation in Sentencing. The Commission finds that the length of sentences imposed by different judges for similar offenses differs too greatly and should be given serious consideration.

## APPENDIX TO THE

1. The Sentencing Board. While the Commission is not wholly in agreement on this matter it may be that the allocating of the sentencing power to a special group, created to perform that particular function would bring relief to the courts, and based upon full information concerning the prisoner more equitable sentences would be imposed. The Commission holds it advisable to call attention to this important subject for serious consideration and further study.

## The County Jail Problem

A. Importance of the Problem. Because the protection of society and the general good of the whole State is bound up, not only with State Institutions, but with the whole Penal institutional problem and because jails and other institutions of counties and communities are feeders to State-owned institutions, it is highly necessary that State-set minimum standards should be made mandatory in every Penal institution in the Commonwealth. Until very recently, nowhere was there a good word to be said for jails and even now only a very few. In a progressive penal set-up, the jail will be little more than a clearing house.

On the day of the last State inspection in 1930, the jail population of the various districts was as follows:

District 1. Philadelphia County .....	2254
2. Allegheny County (Jail only) .....	613
3. Delaware .....	251
Bucks .....	49
Montgomery .....	200
Chester .....	109
Island .....	120
.....	799
4. Berks .....	172
Lehigh .....	112
Northampton .....	141
Carbon .....	10
Monmouth .....	12
5. Luzerne .....	152
Lancaster .....	163
Wayne .....	11
Susquehanna .....	17
Washington .....	7
Pike .....	1
.....	389
6. Dauphin .....	160
Lebanon .....	250
York .....	123
Adams .....	1
Cumberland .....	20
Franklin .....	70
Ferry .....	11
Juniata .....	12
.....	632
7. Lycoming .....	45
Snyder .....	2
.....	3
Potter .....	10
Clinton .....	20
Sullivan .....	3
Center .....	30
Cameron .....	5
Northumberland .....	61
.....	279
8. Columbia .....	36
Union .....	1
McKean .....	39
York .....	10
9. Cambria .....	150
Clearfield .....	31
Indiana .....	10

Somerset .....	32
Bedford .....	14
Fulton .....	3

Armstrong .....	39
.....	573

10. Venango .....	49
Lawrence .....	68
Clarion .....	12
Jefferson .....	10
Mercer .....	86
Crawford .....	20
Erie .....	151
Warren .....	12
Forest .....	2
.....	409

The total number of inmates for the county jails was at that time 6930. Considering the larger turnover of the county jail, (15,989 cases during 1930), it is evident that they play a far more important part in the penal system of the State than the State institutions themselves. Nevertheless, they are much more poorly conducted than the latter. The last 1930 rating of the State inspectors shows the following:

In 66 county jails, in a possible score of 1000 points, 47 jails rated under 600 and the lowest rated 230.

23 counties rated zero for employment of inmates except for domestic work.

49 counties rated zero for recreation including libraries.

63 rated zero in educational program.

49 rated zero for shops and farm work.

70 have no exercise grounds.

39 are without adequate provisions for security.

In security, over half rate the highest mark. Over half rate lowest in segregation, discipline and religious and moral instruction.

In the light of these findings, it is absolutely necessary that State minimum standards be set up and enforced by law.

B. Physical and Hygienic Conditions. A few new jails are of the most approved type. Some old ones are fine examples of what can be done. From the physical side, many jails are so poorly constructed that they present definite fire hazards, although everywhere fire precautions have been taken.

1. Sanitary Conditions. Sanitary conditions are bad in many jails. Basins and toilets are in poor condition. The county jail is at constant war with vermin. In some, the odor of disinfectant betrays the need of soap and water.

2. Food. Food is usually far below the standards of State institutions. Poor planning, poor buying, poor cooking, poor serving is the rule. A few exceptions occur. It suggests that one of the State inspectors should be a woman qualified to give technical housekeeping advice as well as to "rate" conditions.

3. Medical Treatment. Medical treatment and supervision in general are inadequate. There is no adequate segregation and treatment of the tubercular and the sick. Extra-mural facilities are available only for the acutely ill.

4. Exercise and Recreation. Except on prison farms, provision is seldom made for exercise or recreation for men, beyond walking up and down the corridors and small yards. Even less is available for women inmates.

C. Moral and Educational Conditions. With few exceptions, practically no attempt is made to improve jail inmates. Attempts at health education are made only in a few jails and consist of a few "setting-up exercises."

Idleness is the order of the day almost everywhere, partly due to inertia and precedent, partly to the indifference arising from the enormous increase of jail populations and partly due to the lack of market for prison-made goods.

The discipline in county jails is fair, considering the facilities provided, although occasionally it is repressive and severe.

There is no attempt to change the attitude of the inmates, nor to prepare them for release.

To relieve certain jail problems, it would be expedient to designate a wing in strategically located jails for special purposes and to transfer certain types of inmates to such jails. For example:

1. all sentenced women of the prison district,
2. all tubercular inmates of the district,
3. all first offenders of the district.

#### The Juvenile Delinquent

A. Importance of the Problem. Regardless of how complete and effective a program of rehabilitation may be developed in our penal and correctional institutions, its aim can be only to correct that which society failed to prevent and its activities can be only remedial. The majority of first offenders already have a history of delinquency, and are first offenders, not because they have broken the law for the first time, but because they have been convicted for the first time. Many first offenders are really recidivists. Many of them have a history of truancy, running away from home, petty stealing, and other anti-social activities anti-dating their first appearance in court. So that by the time of their commitment, bad behavior-patterns were well established. In a study made of 1490 reformatory boys, it was found that 60 per cent. had "been given a chance" more than once before being committed. Truant officers or the police knew them long as troublesome.

Society can often put its finger on its own sins of commission and omission, which set up situations that condition criminal behavior. Many juvenile delinquents come from broken homes; many are misfits in school; many have some physical handicap, and many others have been denied the material things that every child should have in a world of fair play. Some day it will be reckoned economical to spend money on a State-wide program of probation for the beginning delinquent, to set up schools, camps, health agencies, where misfits shall be evaluated, properly handled and suitably placed. Probation, now carried on in a few counties, is insufficient and sometimes lacks direction and co-ordination. In some places "Big Brother" and "Big Sister" groups and other agencies, function well. Schools for "misfits" are few.

The State has in the past not performed its duty, but is gradually becoming aware of its responsibilities. Appropriations, in many instances, have been made blindly and without a systematic program respecting the original purpose of juvenile institutions, namely, the reformation of those sent to such institutions. There can be no better investment than for the State to finance full facilities for all of its juveniles.

After a minor is committed, the State should not fail him again. During the years of exposure to the highly artificial environment of an institution, society must use every means possible to prepare him for readjustment. It would be extremely wasteful for the State to do less than the very best, and to follow any but the most progressive, most scientific methods in its treatment of the delinquent child. In its first contact, the State must compensate for the failure of society, to prevent delinquency.

B. The Present Status of Institutions of Juvenile Delinquents. The Commission finds that the most immediate need in all juvenile institutions is for more space. All are now housing more inmates than they have room to accommodate. This makes classification and a graded system of promotion very difficult.

Overcrowding has forced the use of double-decker beds and the placing of two inmates in one cell—a wholly undesirable condition. The overcrowding at Huntingdon has necessitated feeding many of the boys in their cells. The Superintendent and the Commission hold this practice to be highly undesirable. Relief should be immediate. This could be obtained by building an inexpensive cottage colony for the promising type and by removing the defective delinquents to suitable institutions.

The educational problem in county institutions is generally old-fashioned and inadequate. In State schools great improvement is noted. Vocational training is being modernized and extended. Huntingdon and Glen Mills are carrying a fine new program of correlation of trade with academic training. At Sleighton Farms also many of the latest methods of reconstructive education are carried out. But the Commission feels the need and urges the prompt introduction of routine, progressive, "Life Interests" training.

Because the primary function of juvenile institutions must be rehabilitation, they, more than other penal institutions,

have need for qualified attendants. Instead, the "driver" type of attendant is often found, although some splendid men and women are also at work.

The effectiveness of institutional training on the character and welfare of the juvenile delinquent finds its real test during his parole period. But at best, readjustment cannot be complete at the time of parole. The process goes on for some time after that. Hence, there is need for effective supervision during parole. At present supervision is practically non-existent. It consists primarily in giving the responsibilities it involves to the same relatives who failed to control the delinquent's behavior before he was committed. The parolee is returned to the same environment from which he came. Meanwhile institutional life may have done very little toward preparing him to resist old pitfalls. The wonder is that not more of them become repeaters.

The Commission cannot too vigorously urge that the standards of health and schooling, so rigorously set for children at large, while different in kind, shall at least with equal conscience, care, continuity and supervision, be offered to the child in every correctional institution in the State, from detention home to State reformatory.

#### The Need of Research

A. Present Status. Penology offers many opinions but relatively few principles based on scientific facts. In no field is reliable information more difficult to obtain than in this, yet, little attempt is made to do real research work. Experimentation in penology and criminology is practically unknown, in spite of the rare opportunities that are offered.

Commissions have come and gone, have investigated and reported and yet comparatively little has resulted from their labors. Interest soon wanes, while inertia persists to such an extent that even units organized for the purpose of research do not function. The Statistical Unit in the Department of Welfare cannot function to its fullest extent because of lack of sufficient personnel. The Bureau of Restorations is inadequately manned to carry out the large program of fact-finding to make its work more effective.

B. The Needs. To make research possible and findings available, there is need to align all agencies now collecting data into a properly manned Bureau of Research. The collection of facts and the prompt assembling of accurate data relative to crime and the criminal, is necessary if programs are to be developed and purposes defined on a scientific basis. To facilitate the collection of information, it should be made mandatory upon district attorneys, clerks of courts, justices of peace, aldermen, police magistrates, coroners, police officers, etc., to furnish the data.

To this end, simple but uniform record forms should be adopted.

Pure research in criminology could be advanced by promoting cooperation between penal and correctional institutions and State-aided universities and colleges. Students would find rare opportunities for useful research and internship.

#### A Penal Affairs Advisory Commission

The Commission has found in many places vigorous efforts to bring about this or that in penal affairs. Private organizations are making surveys and printing information. Committees are raising funds, extending membership, recommending buildings, advising practices and introducing and supporting measures in the Legislature, aimed to improve penal affairs. Their continuity of purpose and wisdom of programs have accomplished much in the creation of public interest and the correction of this or that featured evil.

The Commission believes, however, that though this uncorrelated activity of various groups, each working alone, has real use in itself, it is without the larger values that combined efforts could accomplish. Nor do special temporary commissions do very much more than present pictures already fairly familiar.

There is great need for the coordination of all interests and for making available to the Department of Welfare and the Bureau of Restoration all the information that concerted effort may bring. This piece-meal sniping at one bad condition does not solve the whole penal problem. It leads the Commission to believe that a permanent penal affairs advisory group should be created and should include a representative of each of the five major groups now working on penal affairs, three members at large, the Director of Bureau of Restoration and the Secretary of Welfare, ex-officio, and for the purpose of testing the usefulness of such a group, we deem it advisable to create a

Commission which will function in the next biennium, as herein set forth, which will report to the next Session of the Legislature in 1933.

## IV

## Recommendations

The present penal system of the State of Pennsylvania suffers from grave defects, the remedy of which would require very radical changes.

A. It is recommended that State Regional Prison Farms, be established, one in each prison district of the Commonwealth, to take care of the sentenced prisoners now in county jails. These prison farms to receive only those prisoners whose term is not less than thirty days.

B. We recommend that in addition to the present penal institutions, the establishment of a Psychopathic Hospital for the care and treatment of psychopathic cases that cannot be classified as "criminal insane;" persons sent to this hospital to be held for an indeterminate period and to be released only when the Board of Physicians certify him fit to return to society.

C. It is recommended that a comprehensive study be made of the variations in present methods of sentencing and of sentences, and full consideration be given to the possible establishment of a Sentencing Board, whose function shall be to relieve the courts of this particular duty, who with a complete record of the persons convicted and with such recommendations as the trial judge may deem proper, and after a proper study, shall be empowered to make suitable disposition of the case and to send the convicted offender to the proper institution.

D. Department of Correction. We recommend the establishment of a ranking Department of Correction, which shall include all State bodies that deal with the affairs of prisons and prisoners.

## Non-Institutional Recommendations

A. Staff and Appropriation for the Bureau of Restoration. It is recommended that the staff and the appropriation for the Bureau of Restoration, under the Department of Welfare, be increased so that it may function to the fullest extent of its powers and that its powers be augmented.

B. A Penal Affairs Advisory Commission. It is recommended that a Penal Affairs Advisory Commission be created to pool present activities of the various bodies interested in penal affairs, to make a continuous study, and to confer with and recommend to the Secretary of Welfare and the Director of the Bureau of Restoration on matters pertaining to prisons and prisoners.

It is recommended that such a Commission include a representative from each of the five State-wide organizations now doing work in penal affairs.

The Pennsylvania Prison Society.

The Committee on Penal Affairs of the Public Charities Association.

The Association of Directors of the Poor, Charities and Correction of the State of Pennsylvania.

The Division of Correction and Restoration of the State Federation of Pennsylvania Women.

The County Prison Officials Association.

Three citizens of the Commonwealth, who, by reason of outstanding interest in penal affairs would be appointed by the Governor.

The Director of the Bureau of Restoration, ex-officio.

The Secretary of the Department of Welfare, ex-officio.

It is recommended that this Commission elect a chairman and secretary and meet to consider a program and plans in keeping with its important and comprehensive program and plans, and that it give immediate consideration the recommendations of this report.

It is recommended that the unexpended balances of moneys, heretofore appropriated to the present Commission on Penal Institutions, be reappropriated to the above Commission for the biennium for the work of the Commission in making investigations and inspections and for clerical and other assistance. The members of the Commission shall serve without compensation but the expense incurred by the individual members, not affiliated with the Department of Welfare, in attending meetings, inspection and investigating penal and correctional institutions, shall be paid on warrant duly signed by the chairman and drawn on the Department of Revenue.

C. The Socio-Educational Director. It is recommended that a qualified specialist as Socio-Educational Director shall im-

mediately be added to the staff of the Bureau of Restoration. It shall be the duty of such Director to plan and organize a State-wide program of education for all penal and correctional institutions and that a cooperative relationship be established between his office and the Department of Education through the Division of Special Education, Adult Education, Vocational Education, etc.

D. The Health Director. It is recommended that a Director of Health be added to the staff of the Bureau of Restoration whose duty shall be to formulate and introduce a state-wide program for the physical care of the inmates of penal and correctional institutions, and that a cooperative relationship be established between his office and the State Department of Health and other health agencies.

E. The State Board of Parole and Probation. It is recommended that the State create a State Board of Parole in the Department of Welfare whose duty it shall be to supervise effectively those released from State institutions and from District Prison Farms.

F. Criminal Research. It is recommended that facilities for research be increased by reorganization of the agencies conducting such work into a Bureau of Research; that contacts be established between universities and colleges of the State and penal and correctional institutions and that funds be appropriated for research projects.

## Recommendations Relative to the Building Program

A. Relief of Over-Crowding and Facilitation of Classification. It is recommended that building projects should be considered from the angle of State-wide development of a balanced program to relieve over-crowding and to classify for rehabilitation, rather than from the unrelated need of each separate institution.

1. Cumberland Valley Hospital for Male Defective Delinquents. The Commission very urgently recommends that the construction of the proposed Cumberland Valley Hospital for Male Defective Delinquents be hastened with all possible speed to answer to the very urgent need.

2. Eastern Penitentiary and Graterford. It is recommended that Graterford be held as one unit in a scheme of classification, and that the future development and usefulness of the Eastern Penitentiary and Graterford be given serious study.

3. Western Penitentiary and Rockview. It is unqualifiedly recommended that these two institutions be continued in their present relationship, and that further housing facilities be provided at Rockview by one additional cell-block similar to the newest unit there; it is further recommended that Rockview with its seven thousand acres of land be developed to its full usefulness.

4. Huntingdon Reformatory. It is recommended that the Reformatory be enlarged by providing a cottage colony outside the walls at a sufficient distance from the town, or in movable camps. Such a colony should be the highest stage in a graded system of promotion and classification.

5. Muncy. It is recommended that Muncy be immediately enlarged by the building of additional cottages of an economical type, so as to accommodate all sentenced women prisoners, except those defective delinquents who should be provided for at the institution at Laurelton, and that all present legal restrictions as to age, etc., be removed.

It is recommended that housing facilities take precedence over other building projects to afford the opportunities of this fine institution to a greater number, and to reduce the large present per capita cost, and that thereafter the requests for a cannery, tailoring shop and loom room be granted, and that the building program include a discharge cottage.

6. Laurelton. It is recommended, because of the great relief that would come to all women's penal institutions in the State, that Laurelton be enlarged to accommodate all defective delinquent women.

7. Morganza. It is recommended that a girls' division, at some distance from the present school, or a new school for girls, be constructed to relieve the over-crowded housing and cramped development at Morganza. It is recommended that the present institution be continued as a school for boys only.

8. Farview Hospital for Criminal Insane. It is recommended that sufficient housing be provided at Farview to accommodate all the criminal insane of the State.

It is recommended that the accommodations for the medical staff be improved.

## Auxiliary Methods for the Relief of Over-Crowding

A. To aid in the relief of over-crowding it is recommended:

1. That there be a more judicious use of probation under better qualified and a greater number of probation officers;
2. That delinquency of juveniles be checked by
  - a. Early classification by schools, health agencies, juvenile courts, etc., to determine the kind of treatment needed;
  - b. Early placement of the unfit before he becomes delinquent;
  - c. Close co-operation of the juvenile and other courts with the State mental health agencies, etc.
3. That recidivism be lessened by
  - a. Proper rehabilitation program within institutions aiming to change the attitudes and build up work habits of the inmates;
  - b. Proper re-introduction of the released convict into society;
  - c. Greater use of State Employment Bureaus and private agencies to place the released on jobs;
  - d. Proper parole supervision after release.

#### Miscellaneous Recommendations

A. A Market for Prison Products. To insure a market for prison products, it is recommended that it be made mandatory upon each State and State-aided institution to purchase from the other State and State-aided institutions, commodities manufactured by these and needed by the purchasing institution.

It is recommended that after the various needs of the institutions are itemized, the practicability of producing a given commodity in one institution be considered, along with the possibility of installing equipment for the production of commodities not now produced by any institution but needed by many.

It is recommended further that prison equipment be standardized in like institutions.

B. Minimum Standards. It is recommended that the State shall set and require minimum standards for county jails, reformatories and all other penal and correctional institutions.

It is recommended that one of the State inspectors in the Bureau of Restoration be a woman with technical housekeeping training.

It is recommended that the power to enforce its standards be given to the Department of Welfare.

C. Training School for Prison Attendants and Other Officers. It is recommended that a training school for prison attendants and probation and parole officers be established, through the co-operation of the penal and correctional institutions with the State and State-aided universities and colleges.

It is recommended that as soon as practicable every attendant in penal and correctional institutions be required to show a certificate of fitness as to physique, character and technical training.

It is recommended that both men and women now employed as attendants be given opportunity, in rotation, to take three months' training after the above mentioned school shall have been established.

#### Recommendations for Rehabilitation

A. Physical Rehabilitation. It is recommended that the laws of the Commonwealth relating to health be brought to the attention of all in charge of State and county institutions, and to the governing bodies, and that power be given to the Department of Welfare to enforce the laws.

It is recommended that more widespread attention be given to the treatment and segregation of the tubercular and sick in penal institutions; that a block in jails be designated as prison health wards and that prisoners be transferred for special treatment.

It is recommended that more emphasis be put upon preventive and curative medicine and health activities in penal and correctional institutions.

B. Social Rehabilitation. In order to obtain the maximum returns for money expended, it is recommended that the whole educational program of penal and correctional institutions be placed under the direction of a Socio-Educational Director so that it shall be unified and organized according to the best scientific developments in the education of delinquents; and that such program utilize every available force that will contribute to rehabilitation.

It is recommended that greater attention be given to the classification of inmates in order that the policies and programs may be more readily carried out.

C. Industrial Rehabilitation. In order to fix desirable habits and to give marketable skills it is recommended that an

intensive program of industrial education be worked out in all penal and correctional institutions so that idleness and its demoralizing effects may not defeat the purpose of rehabilitation; and that each inmate be taught a trade within the limits of his abilities to master.

It is recommended that wage scales in prisons be equably adjusted and that no discrimination be made.

It is recommended that persistent and sincere attempts be made to secure a State-use market for prison-made commodities.

#### Concerning the Codification of Laws

It is recommended that the Laws of the Commonwealth of Pennsylvania affecting prisons be codified in order that conflicting and obsolete material be discovered and said laws be revised to fit present needs, and the progress of the Commonwealth.

It is recommended that provision for such codification be made through the Legislative Reference Bureau.

WILLIAM C. ALEXANDER,  
Chairman.

FANNIE SAX LONG,  
Vice Chairman.

WILLIAM E. WRIGHT,  
STANLEY P. ASHE.

#### PETITION TO PENNSYLVANIA LEGISLATURE FOR UNEMPLOYMENT INDEMNITY

Whereas, hundreds of thousands of Pennsylvania workers are unemployed because of conditions over which they have no control, and in consequence are unable to provide the necessities of life for themselves and their dependents; and

Whereas, the most just and efficient method of immediately relieving this deplorable condition, is by the payment of Unemployment Indemnity from a fund to be raised one-half by collection from the employers of the state and one-half by appropriation of the Commonwealth itself; the Commonwealth's share to be raised by income taxes on incomes of \$5,000 and over; and

Whereas, House Bills Nos. 30 and 34, introduced by Darlington Hoopes, Socialist Representative from Berks County, provide for the accumulation of such a fund and the payment of indemnity to unemployed workers, now therefore

We, the undersigned citizens of the State of Pennsylvania hereby urgently requests the Senate and House of Representatives of Pennsylvania to act favorably upon the said House Bills Nos. 30 and 34, so that the dire privation of our unemployed workers may be promptly relieved.

#### RESOLUTION FROM PHILADELPHIA CITY COUNCIL REQUESTING THE LEGISLATURE TO PASS HOUSE BILL NO. 427 OVER THE VETO OF THE GOVERNOR.

Clerk's Office, City Council,  
Room No. 492, City Hall,  
Philadelphia, May 9, 1931.

To the Members of the General Assembly of the State of Pennsylvania:

This is to certify that the following is a true and correct copy of the original Resolution passed by City Council and approved by the Mayor on the ninth day of May, 1931.

Resolution requesting the members of the House of Representatives and the Senate of the General Assembly of Pennsylvania to pass over the veto of the Governor, House Bill No. 427, authorizing an increase in the emergency borrowing capacity of the City of Philadelphia to eight million (\$8,000,000) dollars, and directing the presentation of this resolution to the Mayor for his approval or disapproval.

Whereas, The House of Representatives and the Senate of the General Assembly of Pennsylvania by unanimous vote passed House Bill No. 427, authorizing an increase in the emergency borrowing capacity of the City of Philadelphia to eight million (\$8,000,000) dollars and the Governor of Pennsylvania has since vetoed the said Act;

And Whereas, The said Act was introduced in the Legislature after a series of conferences between the Governor of

Pennsylvania, municipal officials, civic leaders and those directly interested in the Committee for Unemployment Relief, known as the Lloyd Committee;

And Whereas, City Council by resolution passed March 26, 1931 (certified copy of which was presented to the Governor of Pennsylvania), pledged the City of Philadelphia and the Council of such City to appropriate out of any money borrowed under authority of the said Act, in the event it became a law, such sum or sums of money, not exceeding in the aggregate three million (3,000,000) dollars for the relief of the unemployed in Philadelphia as may be requested by the Executive Committee of the Committee for Unemployment Relief;

And Whereas, The remaining sum of three million (3,000,000) dollars authorized by said Act was to be used exclusively toward the payment of the wages of police and firemen for the present year;

And Whereas, This desired increase in the emergency borrowing capacity of the City of Philadelphia for the year 1931 only, is occasioned by reason of the economic conditions which unfortunately prevented many taxpayers meeting their obligations to the City, aggregating nineteen million (19,000,000) dollars, of which sum approximately eleven million (11,000,000) dollars represents unpaid taxes during the year 1930;

And Whereas, The municipal Budget for the present year was cut to the bone, as it was deemed in the interest of the taxpayer to keep the rate of taxes at the lowest possible level consistent with requirements and municipal needs;

And Whereas, The granting of the right to the City of Philadelphia to borrow this additional sum will have no direct bearing on the tax rate for the year 1932; therefore

Resolved, By the Council of the City of Philadelphia, That the members of the House of Representatives and the Senate of the General Assembly of Pennsylvania be and are hereby requested to pass over the veto of the Governor, House Bill No. 427, authorizing an increase in the emergency borrowing capacity of the City of Philadelphia to eight million (8,000,000) dollars.

Resolved, That a copy of this resolution, when approved by the Mayor, be forwarded to the members of the House of Representatives and the Senate of the General Assembly of Pennsylvania.

Resolved, That the Clerk of Council be directed to present this resolution to the Mayor for his approval or disapproval.

Attest:

DAVID W. HARRIS,  
Clerk of City Council.

Office of the Mayor, Philadelphia.

I am adding my signature to the above resolution, because I know the absolute necessity of this legislation in behalf of the City over which I have the honor to preside at this time. \$3,000,000 will in no way alleviate a most unfortunate situation. On the other hand, \$6,000,000 is absolutely needed to save Philadelphia from a very great trouble.

One-half of this amount would be applied to the maintenance of that great army of unemployed that must be helped to save it from starvation, and the other half will pay the salaries of a great group of public officials who are just as deserving—the police and firemen—who guard the safety of our citizens and protect their property.

I am signing this as a friend of Governor Pinchot, to save him from the almost unanimous disapproval that would follow sustaining his veto. There is not the slightest criticism in my mind as to the Governor's action when I approve this resolution. Those who would attribute to him any other motive than one inspired through misinformation, do not represent either City Council or this administration.

The Governor is thoroughly mistaken in his attitude toward this legislation. It was drafted by the most eminent lawyers of our City, brought into the service of the Lloyd Committee for the relief of the Unemployed at the instance of our leading bankers and business men, taken to Harrisburg by the Chairman of the Finance Commission created by me—composed of the most representative citizens of our City and headed by Edward Hopkinson, Jr.

Therefore, the Governor's well-known aversion to the Philadelphia Republican Organization has led him into the mistake of associating this legislation with that organization and the members of Council of our City. This legislation is entirely disassociated with any political agencies. The Governor charged Council with not creating a sufficiently large budget

to provide for the expense of running Philadelphia during the current year. It must be remembered that had Council done that in making the budget, there would have immediately been a rise in the tax rate which we are now trying to avoid for next year.

The Governor again has been mistaken in a statement that more money could be saved for our payrolls by the elimination of useless places. We have pared our personnel to the very lowest possible number.

The Finance Commission which I appointed, composed of independent and high-minded business men, studied this situation for months. The Subcommittee on Disbursements sat with my Directors, the President of Council and the Chairman of the Finance Committee all through our budget hearings. We increased the number of working hours for the City employees, decreased their number as well as their remuneration, and presented to Council a budget that represents the last cent in saving.

We, therefore, have a present situation which can be solved alone by the Legislature of Pennsylvania.

I respectfully submit that the tax rate is a question for the people of Philadelphia to decide. I believe Council should have written a twelve months' budget last December. I repeatedly said so in messages, but that body was moved to protect the taxpayers of Philadelphia by taking the chance of the people being able to pay their taxes. That situation has not yet been established.

The resolution recites the facts in respect to the effect of this legislation on next year's tax rate. The Governor in no way will be responsible for any possible effect of this legislation. That is clearly established in the public mind. Therefore, my signature is attached to this resolution as an act of friendship to the Governor, as much as in behalf of the helpless poor of our City and our faithful police and firemen.

HARRY A. MACKEY,  
Mayor.

#### RESOLUTION FROM PHILADELPHIA CITY COUNCIL REQUESTING THE PASSAGE OF HOUSE BILLS NOS. 1800-1801-1802-1803-1804-1805-1806.

Clerk's Office, City Council,  
Room No. 492, City Hall,  
Philadelphia, May 15, 1931.

To the Members of the General Assembly of the State of Pennsylvania:

This is to certify that the following is a true and correct copy of the original Resolution passed by the City Council on the fourteenth day of May, 1931.

Resolution Directing the Legislative Committee of City Council to call to the attention of the members of the House of Representatives and of the Senate of the Commonwealth of Pennsylvania, that the Council of the City of Philadelphia recommends and requests the passage of House Bills Nos. 1800-01-02-03-04-05-06.

Whereas, The amount of outstanding writs of mandamus against the City of Philadelphia threatens to interfere with the financial program of the City;

And Whereas, Twenty thousand (20,000) dollars has been appropriated for the purpose of investigating and presenting a remedy for this situation;

And Whereas, A Commission appointed by the Mayor has visited a number of the principal cities of the United States to ascertain the methods of land condemnation employed therein;

And Whereas, The Commission has as its report presented seven bills which have been introduced in the Legislature and are now before certain Committees thereof;

And Whereas, This pending legislation would be of benefit both to the City of Philadelphia and to the citizens whose land it is necessary to take, injure or destroy through the creation of public improvements; therefore

Resolved, By the Council of the City of Philadelphia, That the Legislative Committee of City Council be instructed to communicate with members of the House of Representatives and the Senate of the Commonwealth of Pennsylvania, enclosing a copy of this resolution and advising them that this Council deems the passage of House Bills Nos. 1800-01-02-03-04-05-06, all relating to methods and procedure in the con-

demnation of land for certain public uses, beneficial to the best interests of the citizens of Philadelphia.

Attest:

DAVID W. HARRIS,  
Clerk of City Council.

**PRELIMINARY REPORT OF THE PENNSYLVANIA COMMISSION FOR THE BI-CENTENNIAL CELEBRATION OF THE BIRTH OF GEORGE WASHINGTON**

To the General Assembly, Commonwealth of Pennsylvania,  
Session of 1931:

A joint resolution of the Congress of the United States for the purpose of commemorating the 200th anniversary of the birth of George Washington, was approved December 2, 1924.

In pursuance of such action on the part of Congress, and conforming with the desires expressed therein, that the States and their political subdivisions co-operate with the Federal Government, a joint resolution of the General Assembly of the State of Pennsylvania was approved May 6, 1925, and the following commission was appointed:

Mrs. J. Willis Martin, Hon. Allen W. Hagenbach, Hon. Charles C. Henderson, Hon. S. Everett Sproul, Hon. Samuel W. Salus, Hon. Thaddeus S. Krause, Hon. George T. Weingartner, Hon. Charles W. Sones, Hon. Augustus F. Daix, Hon. Francis H. S. Ede, Hon. Edwin E. Emhardt, Hon. William C. Alexander, Hon. W. Albertson Haines, and Hon. Aaron B. Hess.

The first meeting for the formation and organization of the Pennsylvania Commission for the celebration of the 200th anniversary of the birth of George Washington convened in the office of his Excellency, Hon. John S. Fisher, at Harrisburg, Pa., on April 15, 1930, at 2:00 P. M.

The propriety and necessity of their being organized having been suggested by his Excellency John S. Fisher, and that a chairman and secretary be nominated, the Hon. Thaddeus Stevens Krause, Philadelphia, was nominated for chairman and Hon. S. Everett Sproul, Chester, was nominated for secretary.

Upon motion made and carried, Senator Krause was unanimously elected chairman of the Commission, and Mr. Sproul, secretary.

Hon. Allen W. Hagenbach, Allentown, Pa., was nominated and unanimously elected vice-chairman.

The first meeting of the Pennsylvania Commission, after its organization was held on February 19, 1931, at Philadelphia, Penna.

The chairman presented to the meeting the program of events as suggested and outlined by the Federal Commission. This program was discussed, and after consideration, was adopted, with some modification; the celebration days of April 19th (Patriot's Day) and February 20th, were eliminated. The program is as follows:

Feb. 21. Commemoration services in all the churches in memory of George Washington.

Feb. 22. General display of flags and decorations. Special newspaper features, school exercises, assemblies with patriotic addresses made by speakers selected by the county committee who are most likely to give the best eulogy of George Washington; pageants, plays and music. Public meetings with appropriate programs so timed as to receive broadcasting of address by the President of the United States. At the close of the President's address, singing of "America" led by the Marine Band, broadcasting from Washington.

April 19. Patriot's Day. Anniversary of the Battle of Lexington. Special exercises everywhere under the auspices of patriotic organizations.

May 30. Memorial Day. In addition to the regular memorial exercises, special attention should be given to George Washington and his fellow soldiers of the Revolution. This can be done by an appropriate address and the placing of flowers before an arch, portrait, or other material memento of George Washington.

June 14. Flag Day. The flag should be flown everywhere and exercises should be held and addresses made in its honor. Newspapers and other means available should be used in requesting citizens to display the flag.

July 4. A public reading of the Declaration of Independence and explanatory addresses thereon. Parade with floats depicting especially the life of George Washington. The Governor of the State will be asked to broadcast a speech on this day.

Sept. 5. Labor Day. In exercises customary for this day, tribute should be paid to George Washington and referred to as the liberator and laborer for the good of mankind.

Sept. 17. Constitution Day. Special meetings and programs under the direction of the Bar Association in every county of the State of Pennsylvania, devoted to serious consideration of the United States Constitution and the part which George Washington played in its preparation, adoption and ratification, especially as regards the type of government he and his collaborators intended it should be.

Nov. 11. Armistice Day. The leadership of the celebration is usually held under the auspices of the American Legion and other veteran groups of the World War. Other military organizations could be asked to participate in parades with floats depicting the military phase of George Washington's life; pageants, cantatas and plays could be held in schools and other meetings of fraternal organizations.

Nov. 24. Thanksgiving Day. In the customary Thanksgiving services as held in the various churches, reference should be made to George Washington's character and the efforts he put forth towards the establishing of liberty, security and happiness. Concluding remarks giving thanks for the life and services of George Washington.

A suggestion was also made and accepted that particular attention be given to Valley Forge, Washington's Crossing and the Battle of Brandywine. The celebration at the site of the Battle of Brandywine to be held on the anniversary date of said battle.

A subsequent meeting of the Commission was held in Philadelphia on April 17, 1931. The elimination of Patriot's Day was reconsidered and thereupon made a part of the program.

The beautification of entrances to cities and towns by the planting of trees and shrubbery was suggested and considered. Upon motion made, it was carried that this idea be adopted and included in the State program, and Arbor Day was designated as the time for this work.

The Commission has communicated with the civic organizations of the sixty-seven counties, and a goodly number have already formed committees and have, for many months, been functioning and arranging for a year of State-wide celebration along the lines of the program adopted by your Commission.

It is the belief that by September 1, 1931, all of the sixty-seven counties will have been thoroughly organized.

In conforming with the resolution of the General Assembly, this preliminary report is respectfully submitted

THAD. S. KRAUSE,  
Chairman.

S. E. SPROUL,  
Secretary.

COMMONWEALTH OF PENNSYLVANIA

APPENDIX TO THE

# Legislative Journal.

Session 1931

129th of the General Assembly

HOUSE OF REPRESENTATIVES

## Proceedings of and the Testimony Taken Before the Committee of the House Appointed Under the Provisions of House Resolution No. 10.

COMMITTEE OF INVESTIGATION ON  
RESOLUTION NO. 10.

Pursuant to the call of the Honorable D. Glenn Moore, the Committee met in the hall of the House of Representatives on Thursday, March 5, 1931, at 1.00 o'clock, P. M.  
There were present:

Messrs. D. Glenn Moore, Chairman  
Bart Richards  
Martin Memolo  
Louis W. Hagmaier  
Ellwood J. Turner  
Frank L. Bowers  
Chester H. Rhodes  
Harry J. Crawford  
Father James R. Cox  
Harold Evans, Esq.  
John J. Walker, Esq.

**THE CHAIRMAN:** This hearing this afternoon is held in pursuance of Resolution No. 10, passed in the House of Representatives on February 17. It is not the desire nor the intention of the Chairman of this Committee to burden the record with a speech. I am going to ask Mr. Harold Evans, counsel of the Committee, to state briefly the purpose and the scope of the hearing contemplated.

**MR. EVANS:** On behalf of the Committee, I would merely like to say that it is the purpose of this Committee to go into all of the facts pertaining to the regulation of public service utilities in the Commonwealth of Pennsylvania, and the activities of public utility companies, with the sole view of bringing out the actual facts.

The Committee has limitations, both in time and in the facilities at its disposal, but so far as it is possible, it is the desire to hear all who desire to be heard, no matter on what side of the problem they may be.

As the Chairman has said, this hearing today has been scheduled at the request of the citizens of Lackawanna and Luzerne Counties, to hear their feelings and views of the situation in regard to the water rates in their locality.

All the members of the Committee are present at this hearing, and two of the three representatives appointed by the Governor are present at this hearing. The third representative appointed by the Governor, Mr. Morris L. Cooke, is out of town and will not be able to take part in the hearings until the week of March 15, but that I assure you, shows no lack of interest on his part in this investigation.

I am not sure whether Father Curran has yet come into the room or not, but it had been our intention to hear from him first, as he has been one of the outstanding citizens of Wilkes-Barre who has had this matter under consideration.

Father Curran, we will be very glad to hear from you at this time.

FATHER JOHN JOSEPH CURRAN sworn

BY MR. EVANS:

**Q.** Father Curran, I understand you have a statement which you desire to make to the committee in regard to the situation in Lackawanna and Luzerne Counties in regard to the water rates there. The Committee will be very glad to hear what you have to say.

**A.** Now then, Mr. Chairman, and ladies and gentlemen all, I would first like to make a correction of previous misstatements made in the newspapers on the 26th of February last. The first error which appeared in the newspapers was that I had made a request to appear before the Senate Committee, which of course, is not true. I did not make such a request, but I was requested to appear, and was very glad to have the opportunity.

Now, again there was another mistake in regard to my address which was misquoted, I live at 134 South Washington Street, Wilkes-Barre, they had another number. Then there was another serious mistake in regard to what I said about Mr. Downs. I stated that in 1918 Mr. Downs was delegated by the Public Service Commission, as I understand, to go to Wilkes-Barre, the Wyoming Valley and the Lackawanna Valley and make an appraisement of the valuation of the water properties. Now, I understand from good authority that the company itself, the old company had valued the water works property at about \$13,000,000 in 1918—

**Q.** When you say old company, you mean the Spring Brook Water Company?

**A.** The Spring Brook Water Company. Then Mr. Downs presumably made that survey and took the appraisement of the water properties in the two counties, and I understand that on his return he presented the valuation appraisal to the Public Service Commission, and stated that in his opinion the valuation amounted to \$16,000,000, that is \$3,000,000 more than the company itself had appraised the property. I further understand—make that 13. At the last hearing it was \$30,000,000, it is \$13,000,000, not \$30,000,000. Now, I understand that at the first session afterwards of the Public Service Commission Mr. Downs made that report, the property was worth \$16,000,000 in his opinion, and the report as I understand was accepted by the Public Service Commission, but at another session later they added \$1,000,000 more to the 16, making \$17,000,000, without any provocation whatsoever. Now then, I stated in my testimony on the 26th of February—

**MR. TURNER:** May I ask you, to desist for a moment, Father Curran, to ask Mr. Evans to inform Mr. Curran not to

refer to the testimony before the Senate Committee, that is not a part of our record, nor are we members familiar with what transpired before the Senate Committee.

THE WITNESS: This was simply a correction of the newspaper accounts.

MR. TURNER: We are not concerned, as I see it, in determining what the newspaper report of Father Curran's statement was.

THE WITNESS: Now, there appeared in the Wilkes-Barre Times-Leader, dated December 29, 1927, an advertisement as follows: Neither the Spring Brook Water Supply Company nor the Pennsylvania Water Service Company, which now controls it, have taken any steps to increase the rate. That advertisement was printed on December 29, 1927. Now then, on the first day of January following, that was only about four days after the 27th of December, there was printed a list, rather a schedule of new rates printed by the Spring Brook Water Service Company—that was four days after this statement was made—that they had not taken any steps to raise—increase the rates. Now, four days afterward here is what was printed, but not published. The Spring Brook Water Supply Company and subsidiary companies filed with the Public Service Commission of Pennsylvania a new tariff, P. S. C. Pa. No. 17, superseding P. S. C. Pa. No. 16, to become effective January 1, 1928. That was four days after this had appeared in the papers. Now, the tariff filed with the Public Service Commission contains increased rates for all flat rate and metered water service, the new rates are uniform in all the territory. Now, remember this was a schedule printed by the Spring Brook Water Service Company four days after this statement was publicly made by way of advertisement in the Times-Leader on December 29, 1927.

BY MR. EVANS:

Q. Father Curran, the paper from which you have just been reading is a photostatic copy of the original?

A. Of the original—

Q. Original paper of the company?

A. Of the original. The original can be had if you desire it.

Q. Was that notice which you have just read ever issued to the consumers?

A. Never. This notice that was printed and dated January 1st, was not published, nor distributed among the consumers, but it was on the second day of May next, four long months intervening, before this schedule was published, and distributed among the consumers. Now the question is, what happened after this statement was made that the company had taken no steps to increase the rates, on the twenty-ninth of December and the first of January, what happened in the meantime? I would say that the company woke up to their error, because the second schedule or the new schedule printed on the first of January, would contradict this statement advertised in the Wilkes-Barre paper on the twenty-seventh of the previous month, and they saw that nobody with its eyes open could detect their deception and they therefore did not publish the new schedule on the second day of May, 1928. Now, I would say also that Mr. Downs stated before the Public Service Commission at the opening, I think it was, of the session, that the water rates were too high under the old company even, when he was questioned at a later session of the Public Service Commission for trial, or investigation, he denied that he said so; and on another occasion he did not deny it, but that his memory could not go back that far, and he did not know whether he said it or not, whether the schedule of the water rate bureau was too low or whether they were too high, back in 1918.

Q. Father Curran, just remember that the Committee is not as familiar with the situation as you are.

May I just ask you a few questions, which perhaps will clarify the situation? The Company filed a new schedule of rates that was effective July 1, 1928, did they not?

A. Yes, it was effective in July.

Q. And there was a complaint filed against those rates?

A. Yes sir.

Q. In which the city of Wilkes-Barre and the city of Scranton and a great number of complainants joined?

A. That is correct.

Q. The company then asked to be allowed to temporary increase its rates and the Commission—is that correct?

A. Correct.

Q. And the Commission, on December 21, 1928, issued an order approving the temporary increase in rates?

A. As far as I know the date is right; yes.

Q. And that order was made retroactive to July 1, 1928?

A. Yes.

Q. And those rates have been in effect ever since?

A. The rates were the temporary rates agreed upon by the authorities of the various municipalities. They have been in force since.

Q. They were slightly changed from this rate schedule as filed, were they not?

A. Well, maybe slightly because in the final decision made by the Public Service Commission there was a difference of two per cent from the valuation of the appraisal of the water works; so it may be that the company will eventually reduce the rates by two per cent.

Q. And now, the Mr. Downs that you have referred to is an engineer of the Engineering Bureau of the Public Service Commission, is he not?

A. Correct; he was at that time.

Q. Yes, he was at that time, and when you have referred to the sessions, I suppose that you were referring to the hearings before the Public Service Commission involving these complaints?

A. Correct.

BY MR. RHODES:

Q. May I ask who inserted that advertisement of December 27? By whom was it signed?

A. It was signed by the Spring Brook Company.

BY MR. EVANS:

Q. No. I don't think that is the one Mr. Rhodes referred to. The one from which you have been reading, Father Curran, who signed that?

A. It was signed by the Spring Brook Water Supply Company; I think Mr. Isaac S. Walker, vice-president and general manager.

BY MR. RHODES:

Q. Is that the same company that filed the schedule?

A. Correct.

BY MR. MEMOLO:

Q. Four days later?

A. Four days later. Now, in another advertisement appearing in the Wilkes-Barre Record of May 2—

BY MR. EVANS:

Q. In 1928?

A. 1928; this statement occurs:

"The purchase prices were fixed on the frank understanding that the well-known rules of law which call for a fair return upon actual value of property devoted to public use, justified and required a substantial revision of water rates which had not been materially changed for upwards of thirty years. It is well known that during this period the cost of living has practically doubled and the wage standard trebled."

That was the ad that appeared in that newspaper, the Wilkes-Barre Record, on May 2nd.

Q. What is the purchase there referred to?

A. The purchase of the waterworks; of course, the old company.

Q. Was it the purchase of the Spring Brook Water Company and the Scranton Gas and Water Company?

A. This is . . . yes; I would say so, but I would put it this way; I think so, because of the figures that are quoted below.

Q. I think it would be helpful if you would just read the whole advertisement, at least the first two or three paragraphs of that to the Committee, so that they will get the whole picture.

A. Very well, then, continuing with the same paragraph—

Q. Can't you begin with the first paragraph?

A. Very well.

"The new owners of the water properties of the Scranton-Wilkes-Barre District desire to maintain with their consumers the friendly relations which have existed for so many years between the public and the local interests owning the Spring Brook Water Supply Company and the Scranton Gas and Water Company. The bringing together into common ownership of properties serving contiguous communities naturally calls for some adjustment and equalization of rates, and

the company proposes to put such rates into effect on July 1st by the filing of revised tariffs on May 29th. This notice is given in order that the public may understand exactly what is being done and why.

"The present owners have acquired these two great properties at a cost in excess of \$52,000,000. Nearly the whole of this sum has been paid over to citizens of these communities, and this capital, therefore, is released for home investment and development."

Now, then follows the paragraph which I quoted. Do you wish me to read that again?

Q. Yes, if you will.

A. Very well.

"The purchase prices were fixed on the frank understanding that the well-known rules of law which call for a fair return upon actual value of property devoted to public use, justified and required a substantial revision of water rates which had not been materially changed for upwards of thirty years. It is well known that during this period the cost of living has practically doubled and the wage standard trebled."

"The present owners made this large outlay (\$52,000,000) only after a most careful inspection and appraisal of these properties, carried on by a corps of forty men over a period of several months, supplemented by real estate valuations of well informed local people, who were entirely independent of this organization. The study resulted in the valuation of these properties, with no allowance for water rights, at \$62,000,000. The current net revenue is producing a return of less than 5 per cent upon the cost of these properties, before any allowance for depreciation, and only 4 per cent upon their value as fixed by our engineers. It will be admitted by all fair-minded persons that this is inadequate.

"This management wishes to deal fairly with the communities that it serves, and recognizes that as water is the prime necessity of the life and health of the community, the rates should be kept as low as consistent with efficient operation and with a fair return on investment. The new schedule of rates, therefore, has been adjusted to produce a net revenue of only 6 per cent upon fair value instead of 7 per cent to which the company is legally entitled.

"Under the new schedule, the average monthly bill will be \$2.12 made up of a service charge of \$.667 and a consumption charge of \$1.455. This is an increase of 36 cents per month per family, or at the rate of slightly more than one cent a day.

"In Wilkes-Barre and neighboring communities, where domestic service is not metered, the increase will be slightly larger, but the rates can be brought to the same level by consumers who elect to install meters.

"Industrial rates in the Scranton district at present cover nine different divisions, the first being for monthly consumptions of less than 250,000 gallons, and the last two for monthly consumptions of over 24,000,000 gallons and over 64,000,000 gallons. There are but two customers in the highest division and but five in the next highest.

"In the Spring Brook district, there are but seven divisions starting with a quarterly consumption of 12,000 gallons, and ending with a quarterly consumption of 600,000 gallons."

BY MR. TURNER:

Q. What is the date of that advertisement?

MR. EVANS: May 24, 1928.

THE WITNESS: Now, in commenting upon the pretended rate schedule as quoted in one of those paragraphs that the raise in the price of water under the new schedule of rates would not average much more than one penny a day, as I understand it, that covers both the Luzerne and Lackawanna county valleys.

To show you what a terrible deception that is, one penny a day, I will quote for you the inflated rates of our charitable institutions in the city of Wilkes-Barre alone.

The old rates to the General Hospital of the city of Wilkes-Barre amounted to \$1,562.64; and new rate, \$4,285.53.

BY MR. EVANS:

Q. For what period of time are they?

A. One year.

Q. One year?

A. They say there that the average amount or advance would amount to one penny a day, and here is a difference for one institution alone of \$1,562.64, and \$4,285.53.

Now, the Mercy Hospital paid under the old rate \$831.40 per year, under the new inflated rate, \$2,930 per year.

The Homeopathic Hospital under the old rate paid \$306.99; under the new rate, according to the new schedule, \$1,800—almost six times the amount.

The Y. M. C. A. boys' department under the old rate paid \$250 per year; under the new \$1,308 per year.

The Y. M. C. A. men's department under the old rate paid \$316.20 per year; \$1,435.08 under the new.

The Wilkes-Barre schools all had been paying \$6,068.40, were taxed the amount of \$14,336.84 under the new rate.

Now, these should be sufficient—these quotations should be sufficient to give you an idea as to the deception manifested in those advertisements, which I just read for you.

Then, under the old company the city of Wilkes-Barre paid for their water plugs at the rate of \$20; now, under the new rate and new company, the city must pay at the rate of \$55 per year.

Q. For each plug?

A. For each plug, each fire plug. It was raised from \$20 to \$55.

BY MR. HAGMAIER:

Q. Have you at hand what the rates are in the average family?

A. The average family, I would say, according to the flat rate, about fifty cents—or fifty per cent. May I call on one of my—

BY MR. EVANS:

Q. We will get that later.

A. Yes; I think fifty per cent. And now, while there are many angles from which this examination of the Public Service Commission may be viewed, I would suggest this, although it would take time and money too, that you gentlemen should ascertain from the records and minutes of the Public Service Commission during the trial, which lasted nearly two years—obtain the cost of the engineering, the accounting of the various phases of the properties, the legal reports, and all of the minutes of the Commission dealing with the water case. If you could look that up, trace it up, you would come to the conclusion, I am sure, that the testimony rendered from the consumer's side of the case was altogether ignored in the trial of the people before the Public Service Commission. The evidence and proofs brought forth during that long trial and the testimony rendered by our representatives were altogether ignored, and the testimony produced by the representatives of the water company alone taken into consideration.

BY MR. TURNER:

Q. Upon what do you base that conclusion?

A. I base that conclusion upon the fact that—take, for instance the engineers, the Lantz boys, the Lantz brothers, John and William Lantz, worked for years, I suppose, as engineers for the Spring Brook Water Company, the old company; worked for that company for years, and finally quit it, for what reason I don't know; they were the expert engineers in appraising the valuation of the Spring Brook Water Service Company, the valuation of their property. And, now, they claimed and told me repeatedly that their appraisal and the appraisal of the real estate men, who knew the values of properties and buildings in our community, said that their appraisal was very liberal, that their allowances were very liberal to the company, and that, according to the testimony rendered by them, they feel that they were altogether ignored, that is the reason why I would have you gentlemen, if you possibly can, trace up the evidence of both sides of the case; the water company's side and the consumers' side; if so you would conclude or deduce the fact that the real evidence, the testimony given by our representatives was ignored, and only the testimony given by the other side taken into consideration.

BY MR. EVANS:

Q. Has the Commission rendered a final decision in the case?

A. Rendered the final decision. The water company claimed the valuation as something over \$44,000,000. In the final decision of the Public Service Commission they reduced that valuation quoted by the water company by two per cent only, which is practically the same.

BY MR. TURNER:

Q. Pardon me, at what was the valuation put by the Lantz brothers?

A. It was put by the Lantz brothers at \$11,000,000, and the company, as far as I know and understand, \$23,800,000 for the property which was valued by our engineers and real estate experts at \$11,000,000.

Q. How do you explain the statement that they say they paid forty some millions?

A. Well, that was for the Scranton Gas and Water Company and the Spring Brook Water Service Company, the two areas taken into concern. For ours they paid \$23,800,000 and for the balance of the forty-four to the Scranton side. Of course, they purchased the gas works up there. I have the impression there has been some misunderstanding. That the Lantz Brothers, as I understand, fixed the valuation of the property at somewhere around \$25,800,000, the whole property, yes.

Q. Do you include in that the Scranton property?

A. Yes.

Q. And the company's highest appraisal was something over fifty-seven million.

A. Yes.

Q. The final was fifty-two million.

A. I am not so familiar with the Scranton side of the case as with the other. That is true. I have the same evidence here in one of my manuscripts. Now in the case of the Public Service Commission of course we cannot swear as to whether they entered upon an agreement or an understanding as quoted here with the Spring Brook Water Service Company or not. But there can be no other inference than they did enter upon an understanding with this water company prior to the water company's taking over the Spring Brook Water Company properties. And the inference stands to reason from this point of view.

MR. EVANS: In other words, Mr. Curran, if I understand what you mean, the Federal Water Service Company was buying out the Spring Brook and the Scranton Gas and Water Service Company and on the basis of the earnings of these companies an investment of fifty-two million dollars, or whatever the figure was, would not show a return on the investment that was attractive.

A. Without inflating the rates to consumers.

MR. EVANS: But you say it was understood, you mean there must have been some understanding that the rates would be increased?

A. That they would be increased, the rates, and I conclude that such an understanding was reached between the Public Service Commission of Pennsylvania and the Federal Water Power of the United States of America. That is my answer.

MR. TURNER: You say that is your personal opinion.

A. It is my personal opinion and impression.

Q. You understand that any agreements between the seller and the buyer would have nothing to do with the Public Service Commission and the rates?

A. No, but in the first place I understand that the public utility must obtain from the Public Service Commission permission to raise the rates of the utility and in this case they must have had permission from the Public Service Commission to raise or inflate the rates to the extent they did, so that in time they would get back twenty-four or fifty-seven millions as the case may be, property.

Q. That is your opinion?

A. That is my understanding and my impression.

MR. EVANS: The actual value placed on the property by the Public Service Commission in its decision was \$43,650,000, was it not?

A. Yes.

Q. Do you happen to know what the percentage of increase in rates was that the Commission allowed? My impression is that it was something like forty or forty-one per cent of an increase, something like that?

A. That is the question you asked me before. I claim it is fifty per cent, between forty and fifty per cent, that is on the basis of the flat rate.

Q. I meant taking the total rate.

A. I think it would average at least one hundred per cent. You will get that testimony later. Now if you wish I will add this: I don't know whether it is in order or not, but an item that appeared in the Scranton Times Tuesday, March 3rd—

this is a news item—in regard to the sale of some stock, and I guess that would not be pertinent. Very well.

MR. EVANS: I would like to ask you what the attitude of the community is towards the decision of the Public Service Commission?

A. Fine. Fine. In answer to that request I will say this: We went to the Public Service Commission or rather the Spring Brook Water Service Company advertised their rates and distributed the new rate schedule among the consumers of the Wyoming Valley and the people got up in arms I might say then and swore that they would not pay a cent over and above the old schedule, the water rates charged by the old company, and I say for one, and my companions of the Water League up there advised the water consumers of Wyoming Valley and for that matter of the Lackawanna Valley, not to pay a cent more to the new company than they had been paying to the old company and the consumers obeyed orders and did not pay a cent. While the company sent out its workmen and shut off the water, I think they shut off the water on 548 or 550 hydrants and pipes leading in to private homes and public buildings, and so forth, nearly 550 shut-offs were made by the company, there were certain vigilantes who turned the water on instantaneously when these men shut it off, and the people united in the determination not to pay a cent more for the water consumed to the new company than they had been paying to the old company and it struck terror into the hearts and minds of the Spring Brook Water Service Company and they came to see us. They came and met me in my own home with a delegation from the Water League of Wyoming Valley, and they entered upon an agreement with us that they would not raise the water prices above the level of the old prices until such time as the Public Service Commission would make its final decision, and further, that if the case be appealed to the Superior Court the collection on the basis of the new rates would be postponed until the Superior Court would make its final decision. So our people are united today as much as they were at the beginning, and more so. They are determined no matter what the consequences they shall not pay a cent more for the water consumed to the new Spring Brook Water Service Company than they had paid to the old Spring Brook Water Company regardless of the consequences, and I want to tell you that there is danger ahead for this water company, and if this water company would dare to shut off the water and go into the homes and other institutions in the Valley, there will be trouble.

Yes further, here is another point which to me is absolutely unjust whether or not the State permits it, perhaps it does, that the water companies charge for two months rental for water consumption while the water is not being consumed. They charge two months in advance; for instance, the water consumer on the first of January up to the first of April gets a bill. If that bill for the three months be not paid by the thirty-first day of January, the water consumer is charged ten per cent. penalty so that he has a three months bill although only one month water allowance has been consumed, the three months bill is charged and if not paid at least by the last of January a penalty is put on the consumer.

MR. RICHARDS: Are you paying the old rates or the new rates now?

A. We are paying the old rates.

BY MR. TURNER:

Q. May I ask counsel, Mr. Evans, whether it is not the law of Pennsylvania where they publish the rates and make an application to the Public Service Commission, then they put these rates into effect?

MR. EVANS: The law, Mr. Turner, I think is where a rate or charge is changed and complaint is filed, that rate becomes effective and the burden then is on the company to justify the rate and while the case is going on the new rate is collected by the company.

MR. TURNER: That is the law of Pennsylvania?

MR. EVANS: Yes, sir.

MR. TURNER: Then do I understand you Father Curran to say you advised these people notwithstanding that was the law of Pennsylvania to pay the old rate only?

A. Yes, sir, and refuse, and that is absolutely true because it is an unjust law.

MR. TURNER: That may be but it is the law of Pennsylvania.

A. It is, but it is a law made for the monopolists and the public utilities and is against the interests and good of the common people and for that reason I say "No."

Q. That may be, but it is the law in Pennsylvania.

A. That may be the law, but the law is wrong. The law is not just. It is unjust to the rank and file of the citizens of the State of Pennsylvania.

Q. That is a question to be determined by the Legislature and not by individuals.

A. Well, unless the individuals get together and protect themselves, what is going to happen to our State and our Nation?

Q. Revolution?

A. A revolution is bound to come if there is not a change in politics and honesty in business. These utility corporations, the monopolies, or trusts, great combination of wealth, predatory wealth, they are planting the seeds today for a revolutionary harvest tomorrow, unless there is some change made.

Another thing. I want to say, Mr. Chairman, that I have stood for, am standing for, and will ever stand for, the state and for the nation and for the preservation of the laws and our Constitution, for the well being of the State and Nation and the people at large, for the high, low and middle classes, rich or poor, but I shall stand for honesty in every case for my fellow citizens in the country and I will not stand for dishonesty, and will not stand for any group of men in this country to plant the seeds of bolshevism, communism, or draw the dollar out of the pockets of the poor working man, or as it were to gouge and gobble up every dollar that is on the face of our blessed Nation. I won't stand for that, law or no law. And now, if we had not had a battle of Lexington a battle of Concord, a battle of Bunker Hill, a siege of York town we would not have a United States of America.

BY MR. EVANS:

Q. Father Curran, in order to clear up this point in regard to the payment of rates, am I correct in understanding that the present arrangement between the company and its consumers is that the consumer may either pay the old rate, and if the decision of the Commission is upheld by the courts, will then be charged the difference plus a penalty of 10%?

A. Retroactive plus a penalty of 10%, retroactive.

Q. Or, if the consumer desires, he can pay the new rate, and the company then agrees if the decision is against the company, they will refund the excess with interest at 6%, is that correct?

A. That is correct.

Q. I just wanted to get that clear. Now, Father Curran, Mr. Arthur Hull is here, sitting as counsel for the Public Service Commission, and he has asked me to ask you this question: Is it not a fact that an appeal has been taken by the Scranton Spring-Brook Water Service Company, as well as by certain municipalities to the Superior Court of Pennsylvania?

A. Correct.

Q. Have these appeals not been consolidated for hearing before the Superior Court and listed for argument on March 15, 1931, at Pittsburgh?

A. I so understand it.

BY FATHER COX:

Q. When you protested these rates did the water company show an arbitrary attitude or one of conciliation or otherwise?

A. Absolutely otherwise.

Q. Always feeling that they were protected by the Public Service Commission, feeling that they will make you do what they want you to do?

A. I suppose that was their intention.

Q. Did they ever show such a thing as a civic conscience?

A. No. Another thing that to me is proof of dishonesty and chicanery, I really did have some respect and regard for the president of the Federal Water Power Company—

MR. EVANS: Federal Water Service Company?

A. I did have some respect for him, but there was one of the representatives, one of the highest men of the company, Mr. Green, who came to our town perhaps two and a half months or so ago, and requested that the representatives of the municipality should meet the representatives of the Federal Water Power Corporation, so that between the two representations an amicable agreement or conciliation might be made, before we go any further in these suits that we have entered.

Mr. Green said to myself, "We are spending a great deal of money, and it seems to me," he said, "that it is useless. You are spending a great deal of money from your side, and we consider it as useless. Therefore, why not get together and thresh out our difficulties and come to an amicable agreement, or to a compromise." I said, "Mr. Green, there is no compromise excepting that you, the company, go back to the old schedule of rates, or the schedules charged by the old water company. That is the only conciliation, the only compromise, that I would allow from our side." He said, "That is no compromise." "Yes," I said, "from our point of view it is a compromise, because the old rates are too high, and were too high, and therefore to settle upon the basis of the old rate to me is a real genuine compromise." At any rate, he went home to New York City, and on a certain occasion we were notified that the president of the company with others was coming to a meeting there in Wilkes-Barre, and wanted a meeting of the representatives of our league, of some of our best citizens of the city, to consider the proposition of a compromise. When I said—I was appointed chairman of the meeting, and again I said, "There is no compromise, but one, that is to go back to the old rates, the rates charged by the old company. That is the only compromise." And the president said that was impossible, and he also said that he didn't know what this meeting was about, he didn't know why he was called to Wilkes-Barre, he was ignorant, after his own vice-president made the arrangements for that meeting with the members of the Chamber of Commerce and other men, and the Water League of Wilkes-Barre, after his own vice-president, I think he is, Mr. Green, made the arrangements for this meeting, the president did not know anything about it. He did not know what brought him to Wilkes-Barre. He was told to come to Wilkes-Barre by his representative there, but he didn't know what the meeting was about when he got there, after his own vice-president made arrangements for the meeting, so that from then on I have considered them dishonest, and I would say they were public liars, that it all,

BY MR. EVANS:

Q. Father Curran, how long have you been a resident of Wilkes-Barre?

A. Over 35 years.

Q. Is this situation that now exists in regard to this situation something that is new in your experience?

A. Oh, absolutely new, because we never had any difficulty with the water rates heretofore, nobody complained, although everybody admits now, and those particularly on the inside that work for the water company, all admit that the old water rates were too high in comparison with the income of the company, and in comparison with the water rates charged elsewhere in the State and outside.

Q. Have you got any suggestions at all as to how the situation could be remedied up there?

A. Up there, yes, I have. If these men are honest, of course, the situation could be temporarily arranged. If the representatives of the water company are honest and if they have sense enough to realize that it would pay them to compromise with us and say they were going back to the old rates, throw oil on the seething waters of Wyoming Valley, but at the same time, would not enter into the fight, because we are going to present a bill here to both houses of the Legislature demanding the power of authority of the Legislature to take over the waterworks, the water properties to municipal ownership. We are going to do that.

BY MR. BOWERS:

Q. Father Curran, how long have the old rates been in existence?

A. I think from 1896 to 1928, I think so.

BY MR. HAGMAIER:

Q. Do I understand you rightly to say that they made you pay two months water bills in advance for water you have not received?

A. Correct, that is true. There was a priest come down with me, Monsignor Covalesski, and he handed me his bills for 1927, 1928, 1929 and 1930, showing the contradiction of the advertisement, which I read, that the raise in rates, would not average more than a penny a day. Monsignor Covalesski showed me, with this report he gave out to his congregation, the annual report, that in 1927 his water bill was \$91.80; 1928

the water bill was \$203.94; 1929 his water bill was \$359.84 and in 1930 \$309.07. There was a little drop in 1930, and I think that was because Monsignor Covalesski has moved out of his residence, the parochial residence, torn it down and is building a new residence, and I suppose the lack of consumption in the old homestead reduced the rates, you know, for the year.

BY MR. CRAWFORD:

Q. Is that a metered rate?

A. No, a flat rate.

BY MR. BOWERS:

Q. After the new company took over the old company did they make any improvement and do anything that might give the consumers better service?

A. No, not anything to mention. No, practically none; not that I know; not that anybody else knows. Of course, we all have to make improvement around our homes once in a while, but I mean substantially, no improvements as far as I know.

BY MR. TURNER:

Q. Were the old rates based on a tap charge, based on so many spigots, and so forth, and were these new bills based on meters?

A. No, the rates are based on flat rates, in our water area, the Wyoming Valley, all the private consumers.

Q. The bills that you read to us of these institutions, they charged there a flat rate?

A. No, they were all on meter rates.

BY MR. EVANS:

Q. Both under the old rates and the new they are metered, are they not?

A. Yes. Further than that I could quote you an instance of people who told me—and the thing has been advertised in the newspapers, that the company advised some private water consumers and other public water consumers to put in meters and those that obeyed the orders, having put in the meters, they were sorry because the water rent went way up to the sky.

BY MR. BOWERS:

Q. What is your meter rate?

A. I really cannot tell you.

BY MR. EVANS:

We will have another witness to give that more in detail.

The WITNESS. Now, here is a case in question, that you can hardly believe it. I spoke to a gentleman there, a prominent one, in our town, and he told me after he put in the meter, I was in the office one day, and he said to me this: I used to pay only \$36.00 a year on the flat rate in my own office and institution and he said I was advised to put in a meter, and what do you suppose they charge me now at the meter rate per year. I said, "I don't know." He said, "One thousand dollars." From \$36.00 to \$1,000.00. I could give you the name, but I don't wish to. From \$36.00 to \$1,000.00, from the flat rate to the meter rate.

BY MR. CRAWFORD:

Q. What kind of an institution did he have?

A. Institution? Well, I don't want to give him away now. He had an institution wherein, I think, there must have been some thirty or forty employes anyhow; thirty or forty, I cannot whisper it to you, but I want to—

BY MR. EVANS:

Q. Is there anything else Father Curran, that you wish to say?

A. No. I think now the other stages, material to be placed in evidence, will cover all of the questions, you know, which you wish to discuss, but I wish to repeat myself again, that if you gentlemen examine the record of the Public Service Commission of the trial between the Water Company and the water consumers before the Public Service Commission, if you could examine those records, you would come to the same conclusion that I have come to; that the decision was one-sided, all together in favor of the Water Company as against the water consumers. If you have time, I think it would pay you and it would pay us; I think so.

Now, I thank you, gentlemen, and as I said to the Senate Committee on the 26th of last month, I never have opposed any man or party or company of men in getting what was duly and honestly coming to them. I will stand by the rich as I would by the poor, when the rich are honest and the poor dishonest. That has been my record for forty years, and thanks be to God I haven't changed it, and if the company came into our valley and continued to charge the people for water consumption on the basis of the old rates, there wouldn't have been a word said, and they would have obtained the good will of the water consumers. As stated in the advertisement by Mr. Chenery, that the old company has the good will of both valleys, it would have retained that good will if they had continued the service at the low cost accorded by the old company, that good will would have existed between the consumers and the company, but unfortunately they simply wish to act the hog, and they are paying for their own blunders, that is all, and if they go back to the old rates, we will do all we can. We promised that in our agreement, that the members of the Water League of the Wyoming Valley will do all in their power to have the people pay up under the old rates, but they wish to hog it, and now I think they are very sorry.

Q. We are obliged to you, Father. And thank you very much.

A. I hope God will bless you all, and that everything will come out well. Now, I hope that the State of Pennsylvania and the people in the State of Pennsylvania will be benefited by this trial.

Q. We all hope so, Father.

A. Good-bye and good luck.

The CHAIRMAN. Before we call the next witness, the Chair wishes to make a brief request, with which I think you all will agree. I have known for a great many years Father Curran, and I love him. I have served on a Board of a State organization along with him. I appreciate the applause, Father, but I hope that hereafter, the next witness, in order to save time only, that we will not have any applause, because we have a crowded afternoon, and we wish to get through. I thank you.

JOHN LIPPKO sworn.

BY MR. EVANS:

Q. Where do you reside?

A. I reside in the section of Parsons, in the city of Wilkes-Barre.

Q. Are you connected with the Municipal Water League of Wilkes-Barre, are you not?

A. Yes; I am the manager of the office.

Q. Where is the office located? When was it formed?

A. Our organization was organized on June 13 in the year 1929, but it was some time in July, I think, about the 3rd of July, before we had an office.

Q. This was after the new rates in this section were effective, was it?

A. The rates were effective January 1, 1929.

Q. And what was the purpose of organizing the league?

A. To take care of the people and see that they get justice in this fight and to promote municipal ownership in the Wyoming Valley.

Q. Municipal ownership of the waterworks?

A. Yes.

Q. How many members has the league?

A. The league has approximately something like nineteen thousand members.

Q. As manager, have you had occasion to check the bills of the consumers of the Scranton Spring Brook Water Service Company?

A. Yes; I have, and I have checked in the neighborhood of about sixty-five per cent of the bills in the Wyoming Valley.

Q. Will you tell us, briefly, how the old rates were determined prior to the increase; that is I mean, for instance, with the domestic consumers, did they have a flat rate or a metered rate?

A. The domestic consumers had a flat rate, but it was divided into three sections in the Spring Brook territory.

Q. In other words, three territorial sections?

A. Yes.

Q. What was the domestic rate for the first hydrant in the old Spring Brook territory of Wilkes-Barre?

- A. In the Wilkes-Barre section it was \$8 per year.  
 Q. And what was it in the Nanticoke section?  
 A. \$6 per year.  
 Q. And what was it in the Plymouth section?  
 A. \$7.20.  
 Q. And now, under the new schedule of rates, what is the flat rate for the first hydrant?  
 A. \$10 over the whole territory.  
 Q. What proportion of the consumers of the Spring Brook territory, the domestic consumers, are on the flat rate?  
 A. I should say about in the neighborhood of ninety per cent of the flat rate schedule.  
 Q. How often are these flat rates charged to the consumers?  
 A. One every quarter, January, April, July, and October.  
 Q. The new rates became effective on July 1, 1928, did they not?  
 A. They were effective and collectible on July 1, 1929—or were effective about July 1, 1928.  
 Q. That was under the order of the Commission?  
 A. Yes; a temporary order that was.

BY MR. TURNER:

- Q. Mr. Evans, will you pardon the interrogation, when you say \$6 and \$7.20 and \$8, do you mean the annual rate?  
 A. That was an annual rate.

BY MR. EVANS:

- Q. Now, turning to the meter service, has that been a substantial increase also from the old rates?  
 A. It has been increased in the neighborhood of 100% to as high as 500% in some instances.

BY MR. TURNER:

- Q. I don't like to interrupt your examination, but I am afraid I am missing these questions. When you say increased from 100% to 500%, do you mean in the rates, or in the bills?  
 A. In the bills.

BY MR. EVANS:

- Q. Now, after the new rates went into effect, you had complaints, I understand, from members of the League in regard to their bills?

A. I believe on the 6th day of July, we started to get complaints in the office, complaints or suits filed by the company against some people.

- Q. And did you as a result of any complaints investigate the bills as presented?

A. The water company would not co-operate with us in the beginning of our fight, but after the old rate agreement they co-operated with our office.

- Q. What did you find was the cost of the increase in the bills when you investigated them?

A. Some of the increases were due to additional fixtures, which after inspection by the water company officials were found not to be there.

- Q. In other words, now, let me get that clear, as I understand the flat rate was a charge of so much a year for different fixtures?

A. Yes.

- Q. As, for instance, I think you said in the Wilkes-Barre territory their charge was \$8 for the first hydrant, and then I suppose there was a charge for a bath tub.

A. And a toilet.

- Q. Toilets, wash basins, tubs, and so on?

A. That is right.

- Q. You say that some of the increases were charged for additional fixtures?

A. Yes; additional faucets, or additional toilets or something like that.

- Q. Did you have a considerable number of those inspected by the company, to see whether the additional fixtures were there?

A. Some of the adjustments were made over the telephone, and the water company acknowledged that they would take care of the matter and send an inspector within the next two or three days. After they sent an inspector, in about seventy-five per cent of the cases they found that these fixtures were not there, and they were taken as far back as July, 1928, where they were charged from. Some of the adjustments ran in the neighborhood of twelve or fourteen dollars on the bill with a penalty that may have amounted to about \$16.

- Q. In addition to the increased rates, you have the problem of the increased number of fixtures, which in some cases; at least were not justified?

A. That is true. Our agreement was entered into December 13, in the year 1930—1928—and the water company, the people came to our office to have their bills checked up; some of them are still coming in to have the bills checked up, but they have not all turned up yet, and I don't think the whole territory has been covered. There may be cases that are still out that have overcharges on them yet.

- Q. Let us take the case of the small domestic consumer who has a hydrant, bath, toilet and wash basins and tubs; taking the city of Wilkes-Barre District, what would have been his annual bill for the small installation?

A. It would be \$21 under the old rate and \$26 under the new rate.

- Q. 26 or 26 and something?

A. \$26.50; that's right.

- Q. \$26.50?

A. \$26.50.

- Q. That is an increase of \$5.50 a year?

A. Yes.

- Q. And what percentage of increase would that be?

A. That would be about 26 and some tenths percent.

- Q. In the Wilkes-Barre District?

A. That's right.

- Q. Now, in the Nanticoke District, what would have been the old bill, the annual bill for that consumer then?

A. \$19 against 26 under the new rate.

- Q. \$26.50?

A. \$26.50 under the new rate.

- Q. That is an increase of \$7.50?

A. That's right.

- Q. And that is an increase of \$7.50; and approximately what percentage of increase is that?

A. It would be about forty per cent.

- Q. And that shows a difference of \$20.20 as compared with \$26.50 the fixed charges today against those in Nanticoke?

A. Yes, sir.

- Q. Have you checked any bills on metered consumption?

A. Yes, I have, I have checked a few hundred I think.

- Q. Are all commercial consumers on a metered rate?

A. I should think about half the consumers were under the flat rate service until this company got in and they put them on metered service.

- Q. We are dealing with commercial and industrial consumers as distinguished from domestic consumers?

A. Some were and some were not.

- Q. Under the new rates they all have to be?

A. They all have to be, that is right.

- Q. I show you two photostatic sheets headed Dutchess Underwear Corporation, 476 Jefferson Avenue, New York, located at Old Forge; what are they?

A. They are copies of the originals of the ledger of the water company.

- Q. Covering?

A. Covering the account of the Dutchess Underwear Corporation located at Old Forge.

- Q. It is in the Wilkes-Barre district?

A. No, in the Spring Brook district.

- Q. I notice on the bottom of this sheet there is in handwriting "O. K." Hooper. What does that mean?

A. That is the O. K. of the manager of the water company in Wilkes-Barre.

- Q. In other words, Mr. Hooper has O.K.ed the correctness of these accounts?

A. That is right.

MR. EVANS: I think these should be offered as Exhibit No. 1 before the committee.

(Ledger sheet identified as Exhibit No. 1 by the official reporter.)

BY MR. EVANS:

- Q. Mr. Lippko, this sheet is divided into columns, and as I understand it covers the bills of the Dutchess Underwear Corporation, first for a four-inch meter?

A. That is right; and also an eight-inch fire hydrant.

- Q. And the second sheet covers the eight-inch meter which I understand is the fire service?

A. That is right.

Q. Taking up first the four-inch meter, the bills apparently run from July 24th, 1928, to June 17th, 1930?

A. That is right.

Q. At the old rate for the consumption indicated during that period that would have been how much?

A. \$474.88.

Q. And that is composed of a service charge of \$300.00?

A. Yes, sir.

Q. And a consumption charge of \$174.88?

A. Yes, sir.

Q. What does the charge for the same consumption under the new rate amount to?

A. Under the new rate the charge for that consumption plus penalties would be \$936.70.

Q. And that is composed of a service charge of \$600.00, and a consumption charge of \$336.70; is that right?

A. Yes, sir.

Q. Now turning to the second sheet covering the eight-inch meter, what was the old charge for this fire protection service?

A. Before I go into that, Mr. Evans,—I think the old service rate was something in the neighborhood of a hundred dollars, which was not on the schedule. That was a special price given to the Dutchess Underwear Corporation by the old company but upon investigation by myself and Mr. Evans of the water company they decided to set a rate near the amount which the Public Service Commission allowed on this old tariff, which was \$16.88 instead of \$32.00 under the new rate.

Q. That is the monthly service charge?

A. Yes, sir.

Q. On that basis of charge under the old rate it would have amounted to how much?

A. \$317.46.

Q. And this covers the consumption from October 2, 1928, to June 17, 1930?

A. Yes, sir.

K. What is the charge under the new rate?

A. \$684.81.

Q. That is how much of an increase over the old rate?

A. An increase of \$367.35.

Q. Now have you, Mr. Lippko, gotten from the water company the charges for this particular consumer down to the last meter reading in February?

A. Yes sir, I have.

Q. What does that charge for the four-inch meter amount to?

A. The charge for the four-inch meter amount to \$1371.01.

Q. That is under the new rate?

A. Yes sir.

Q. What would it amount to under the old rate?

A. \$763.48.

Q. Now how about the eight-inch meter? What would the charge have amounted to at the old rate down to the current reading?

A. To the current reading it would have been \$917.38 under the new rate.

Q. What would it have been under the old rate?

A. \$400.81.

Q. Now if you combine the two bills and bring them up to date what would have been the total charge under the new rate for both the four-inch and the eight-inch meter?

A. \$2,288.39.

Q. As compared with what amount as charged under the old rate?

A. \$1,008.74.

Q. And what is the percentage of that increase?

A. The percentage over the old rate is 126.87 per cent.

Q. Roughly, it is 127 per cent.

A. 127, yes sir.

Q. Have you anything else that you wish to say in regard to the increase in bills or other matters?

MR. LIPPKO: No, I think I have taken up everything, Mr. Evans, on the whole subject of these bills.

Q. What have you to say in regard to the general attitude of the community in this situation?

A. They are very much incensed over the increase. It seems some were paying for water consumption and they had additional fixtures put in their homes under the old company which they were not charged for, and with that increase being put on by the new company on the bills along with the in-

crease on the new rate this ten per cent penalty, it seems to be a great deal to them.

MR. TURNER: Do I understand that Mr. Lippko says there were consumers that had fixtures they were not paying for?

A. Some of the consumers had fixtures put in in January, 1928, and the old company was not as strict as the new company, which gave this new company a very big increase on the fixtures along with the increase in the new rate.

MR. MEMOLO: This Duchess Underwear Company, how many employees do they have?

A. I don't know.

Q. You don't know the average number of employees then, either?

A. No I do not.

MR. RHODES: What is the nature of the business?

A. I think they are in the underwear manufacturing business.

Q. Is it knitting or weaving?

A. A knitting mill, I believe.

MR. TURNER: Can you tell me under the old rate on the valuation the company had what return it showed?

A. That I have not figured out myself.

Q. Is there anybody here that has that?

MR. EVANS: We will have that tomorrow. We are taking up the rate increase today and will take up the valuation tomorrow.

FATHER JAMES R. COX: How are you able to organize these people so well?

A. We have meetings arranged in different districts and we have people to speak to them and we have different committees who go out and solicit membership, and in that way we increase our membership.

Q. There must have been real opposition right along then.

A. There was.

Q. From the very beginning?

A. Yes sir.

Q. They realized the injustice?

A. Yes sir.

BY MR. RHODES:

Q. Does each member pay some dues?

A. They pay a membership fee of one dollar or more per year.

BY MR. EVANS:

Q. There was a similar organization in Plymouth Township that covered the opposition to the electric rates?

A. I don't know that.

Q. What membership do you have?

A. I judge 19,000 and up.

BY MR. TURNER:

Q. How many consumers have you that take service from this company?

A. All of them.

Q. How many people are there in Scranton and Wilkes-Barre district?

A. 650,000.

Q. You have 19,000 in your group?

A. That is right.

Q. Are there any mercantile or manufacturing or industrials in your association?

A. Not that I know of.

Q. They are all small home owners?

A. That is right.

Q. Have you made any comparison of the rates you pay with what is paid in other districts of the State?

A. I believe Mr. Geiser can give you that. I don't have any data on that at all.

JOSEPH GEISER (Sworn)

BY MR. EVANS:

Q. Where do you live, Mr. Geiser?

A. Wilkes-Barre, 206 Hazel Avenue.

Q. You have been a resident of Wilkes-Barre some time?

A. All my lifetime.

Q. Were you at any time connected with the Spring Brook Water Company?

A. Yes Sir.

Q. In what capacity?

A. Secretary to the general manager.

Q. And you were in that capacity familiar at all times with these rates and bills of consumers?

A. Yes.

MR. TURNER: May we ask between what periods he was secretary?

THE WITNESS: From January 1, 1898 till 1900.

BY MR. EVANS:

Q. Now, Mr. Ceiser, can you tell us very briefly of the consolidations that have taken place among water companies up there within the last five years; are you familiar with that situation?

A. Within the last five years? Yes, they have consolidated the Spring Brook and its subsidiary, the North Mountain, with the Scranton Gas and Water Company, the Consolidated Water Company, the Hyde Park Gas Company and the Olyphant Water Company.

Q. And was the first consolidation that in which the Spring Brook Water Service Company was concerned, was that the first one that took place?

A. That is the one that took place in the last five years.

Q. And then subsequently the Scranton Gas and Electric was consolidated with that into the Scranton Spring Brook, is that correct?

A. Yes that is correct.

Q. Can you state approximately when this last consolidation took place?

A. They took charge of the property on the first day of October, 1927.

Q. That is, the consolidation between the Scranton and the Spring Brook.

A. Yes.

Q. I show you a photostatic copy of a printed notice headed, "Notice to the consumers of the Scranton Spring Brook Water Supply Company," and ask you what that is a photostat of?

A. This is a photostatic copy of the original rate schedule as contemplated by the new consolidation, which was not put into effect.

Q. You heard Father Curran's testimony?

A. Yes.

Q. Is his the paper that he referred to as having been printed and later destroyed?

A. This is the paper.

Q. And you have the original from which this photostat was taken, have you?

A. I have the original.

Q. This notice to the consumers provides for the following consumption charges: For the first 25,000 gallons, 30 cents per thousand gallons per month; for the next 225,000 gallons, 15 cents per thousand gallons per month; for the next 2,500,000 gallons, 10 cents per thousand gallons per month; all over 2,500,000 gallons, 8 cents per thousand gallons per month. Were those the rates that were actually put into effect on July 1, 1928?

A. No sir.

Q. I show you a printed sheet headed, "Notice to the consumers of the Scranton Spring Brook Water Service Company," and ask you what that paper is?

A. This is the one that was put into effect on the first day of January, 1928.

Q. And when was that notice sent out to the consumers, as far as you remember?

A. This was sent out to the consumers I think in June, 1928.

Q. June, 1928. And the consumption rate provided in this notice, which I understand is the actual rate that was made effective—that is correct, is it not?

A. That is correct.

Q. Provides for the first 25,000 gallons, 30 cents per thousand gallons per month, for the next 225,000 gallons, 20 cents per thousand gallons per month; for the next 2,250,000 gallons, 15 cents per thousand gallons per month, and all over 2,250,000 gallons, 5 cents per thousand gallons per month?

A. That is correct.

Q. In other words, the actual rate for large consumers, all over 2,500,000 gallons per month was under the new rates five cents per thousand gallons as against eight cents per thousand gallons shown in the notice which was not issued, and correspondingly the rates of the smaller consumers have been increased, the rate which was not issued provided for a charge of 15 cents per thousand gallons per month for any consumption between 25,000 and 225,000, and the actual charge put into effect was 20 cents for those consumers.

A. Correct.

Q. Have you checked the actual bills of consumers in the district to see what the effect of the increase has been.

A. I have.

Q. I show you a typewritten sheet covering tabulations of a number of bills, and ask you whether that was prepared by you or under your direction?

A. This was prepared by me.

Q. And that covers tabulations of some thirty-five bills, does it not?

A. Fifty.

Q. I think it is only thirty-five.

A. Whatever is on there; I didn't count them myself.

Q. I think it is thirty-five.

A. That is correct, thirty-five.

Q. And in taking those bills, the first one is the bill for A. Tissot.

A. Correct.

Q. 224 Danna Street. The first column shows the amount of \$18.00, what does that mean?

A. That means the old rate to the old company.

Q. The next column shows \$23.50, what does that exemplify?

A. That means the increased fixtures charged at the old rate.

Q. Increased fixtures charged the old rates. The next column shows \$39.00.

A. That is the bill sent out by the company.

Q. Under the new rates.

A. Under the new rates.

Q. And similarly for each of these bills. What is the total of these thirty-five bills at the old rates without any charge for increased fixtures.

A. \$774.00.

Q. And what is the total of these bills at the old rate including increased fixtures.

A. \$1185.00.

Q. And what is the total at the new rate including increased fixtures.

A. \$1640.66.

Q. What is the percentage of increase this new rate is over the old?

A. 107.2. Now, for the information of the Committee, probably it is good for you to get this, Attorney John R. Geyer, fighting the rate case, for six months attempted to get at the hidden revenue of this company. They promised to allow a certified accountant, J. F. W. Heinbokel, of Scranton—they promised to let him go into the company's office and make an investigation as to the hidden revenue and every time Mr. Heinbokel came they refused him admittance. For six months the attorney was unable to get at this hidden revenue, so he sent for me one day to come to Harrisburg, and he asked me if I could get the hidden revenue. I said, Yes, I have a house full of bills that the people have brought to me." When these bills were first mailed, they were mailed at the beginning of February, about the tenth day of February, and prior to that there were no bills made out, so that when these bills were mailed out, and the amounts were so enormous the people brought them to me and asked me to check them up and the result was that a lot of these bills remained in my possession. Some of them have no increase whatsoever, were paying the old company more than they were entitled to pay, but didn't know the difference, so I told him I would tabulate these, and I tabulated them and brought him down four copies, just like this one here, and when I brought them I brought the bills with me to show that the bills were absolutely in accord with the copy here. He said, "That is what I want. That is the most important part in the testimony." He said, "This shows you the actual increase, the hidden revenue and everything." "Absolutely," I said to him. This was put up in front of the Public Service Commission and we almost got into fight, me and the attorney for the water company. He put his fist under my nose, and he said, this is not going out over the air, nor does it go into the papers. I got mad myself, I put my fist under his nose and said that it was going over the air and that I was going to put it into the press myself, which I did, but nevertheless it was stricken out of the record by the Public Service Commission. You won't find it there.

BY MR. TURNER:

Q. Was it offered in evidence?

A. This was offered in evidence and taken off afterwards. This shows that the increase here is 59.3 per cent over the old rate without increasing the rates whatsoever.

BY MR. EVANS:

Q. Just for the increased fixtures?

A. Just for the increased fixtures. After making a thorough investigation—you will find in the record of J. F. W. Heinbockel's testimony, that his investigation showed that they received 43.2 per cent, without an increase of rates. That is the reason this was compiled.

BY MR. TURNER:

Q. Were those fixtures in these dwelling houses, or were they not?

A. They were in, that is, I didn't make an investigation, I took this in accordance with the bills and what they told me, asked them whether they had these fixtures, and if they had, I charged them accordingly with the old rate.

BY MR. EVANS:

Q. In other words, Mr. Geiser, if the company had left in effect the old rates but had charged for the additional fixtures which had been overlooked perhaps by the old company, they would have gotten an increase in rates on this basis of 53%?

A. Correct.

BY MR. CRAWFORD:

Q. Figuring there as you did on the increased fixtures, would you call that an increase in the rates?

A. Well—

Q. Or did the company just get what was coming to them at the old rate?

A. Well, they are fixtures that this company charged for in the schedule that the old company never listed or never charged for, such as a steam boiler. The old company never charged for any steam boiler.

BY MR. TURNER:

Q. Was it in their schedule of rates?

A. Not when I was with the company, but I understand that it was put in later on, but they never charged for that.

BY MR. CRAWFORD:

Q. I understood from your statement there that they charged up for stuff not on the books, is that correct?

A. Correct.

Q. Would that be an increase in the rate, or the company just getting what was coming to them under the new rate?

A. An increase in revenue.

I have here also a letter. Now, this was written to a gentleman in Wilkes-Barre. Sometime in May he addressed a letter to the Public Service Commission, and this is the reply from the secretary.

Dear Sir:

"The rate charges for service have no relation to, nor will be controlled by the purchase price of stock, nor can such purchase price of stock have any legal effect upon the rate charges.

Rates are based upon actual value of property, and not upon any inflated prices which a holding company may pay to secure stock control.

Our jurisdiction is in no way influenced by a charge of stock ownership, and such a change therefore does not require a commission approval.

Yours, John G. Hopwood.  
Scry., P. S. C."

I think it is the 8th day of May. It was published on the 13th day of May.

Q. 1927?

A. 1927.

Q. And what change of stock ownership was then being made or contemplated in connection with the situation?

A. At that time the Federal Water Service Company had been going around Luzerne and Lackawanna counties purchasing stock in the old company.

Q. That is, the stock of the Spring Brook Water Company?

A. The Spring Brook Water Company. They called on a gentleman in Wyoming who had purchased, about nine years prior to that time a block of stock in the Spring Brook Water Supply Company, for which he paid \$7,500. The gentleman came over there and wanted to buy that stock, and he refused to sell, stating that that stock was a very good investment; it was paying 7½ per cent on his money, and he refused to

sell, because he couldn't invest his money in any other proposition better than he had it already invested in. So he left, and came back again; he came there about four or five times. So, at last this gentleman said, "Now, you might just as well sell your stock to us, because we are going to get the controlling interest in this company, and you will be out of luck, because," he said, "the Public Service Commission has guaranteed an increase of rates before we purchase any stock in this company."

BY MR. RHOADES:

Q. Do you know the name of the man who made that statement of the Public Service Commission, who guaranteed an increase in rates?

A. I was informed the other day his name was Ripley. Personally I didn't meet him.

BY MR. EVANS:

Q. Ripley, did you say?

A. Mr. Ripley.

BY MR. RHOADES:

Q. And what is the name of the man to whom the statement was made?

A. James Egan of Wyoming, and a relative of his told me this, and I wasn't satisfied. So, I sent some friends of my own over there to make this investigation and find out whether it was true, and they reported back that those statements were made.

Q. And that was before the purchase by this outfit?

A. Yes.

BY MR. EVANS:

Q. What was the name of the owner of that stock, James Egan?

A. James Egan of Wyoming.

Q. How is that spelled?

A. E-g-a-n.

BY MR. TURNER:

Q. What is his address?

A. Wyoming, Luzerne County

BY MR. RHOADES:

Q. He is not here today?

A. No; the gentleman is very old, but I have a friend of mine who made this investigation, who will verify that statement.

Q. Did he sell it or keep it?

A. He sold. He got \$15,000 for his \$7,500 worth of stock.

BY MR. CRAWFORD:

Q. Do you know the name of the man who made the statement that the Public Service Commission guaranteed it?

A. No; I couldn't tell you.

Q. Mr. Egan knows it?

A. No, I don't think he does. I don't think he mentioned his name. He simply stated that they had a guarantee that they would get an increase in rates.

Q. Do you know the gentleman to whom he was talking?

A. No; outside of the fact that he had his name on a paper or something like that.

BY MR. EVANS:

Q. Perhaps I misunderstood you. I understand you to say that the man's name was Ripley?

A. Ripley, I understand. Someone told me a week ago he was the gentleman who made that statement. Who he is, I don't know. I never met the gentleman.

BY MR. RHOADES:

Q. Is he connected with the Federal Water Supply Company?

A. That I can't tell you. There was another fellow that made another statement; I have forgotten it; but I am not going to say anything, I looked for him last week, but I couldn't find him, I wanted him to come down here and state it himself.

BY MR. EVANS:

Q. As I understand it, this man whose name you say is Ripley was an agent of the concern that was trying to buy Mr. Egan's stock?

A. That's it.

Q. And in the course of the conversation he made this statement that you have referred to?

A. In the course of the conversation; yes.

MR. EVANS: I just wanted to be sure I was correct.

BY MR. TURNER:

Q. When was this transaction, approximately?

A. That was in 1927.

MR. RHODES: I think a man of that kind ought to be brought here.

The WITNESS: Well, we can probably find out where he lives. We will make an investigation and bring him for you.

Now, those are some of the things that Father Curran didn't touch on. I brought them along with me.

BY MR. EVANS:

Q. Proceed.

A. Those are some of the firms that have sent them to me.

Q. You have here certain bills—

A. Yes.

Q. —of industrial concerns in the community who have sent for you in connection with their water charges?

A. Correct; and they stated to me that unless we would lick this company they will be compelled to pull up stakes and get out of the community, because they couldn't stand the increases.

Q. "Company" referring to the Scranton Spring Brook Water Company, I presume?

A. That's it. They referred to the Scranton Spring Brook Water Company, yes.

Now, here is one concern that worked full time; the Fromberg Silk Company of Pringle (that is over at Kingston). In December, 1927, their bill run—for the last three months, rather in 1927 the bill averaged \$19.22 per month working full time. Now, from December to March, 1928, the average was \$20.51.

Q. This is in 1928?

A. This is in 1928, the first three months; and from March until July, 1928, the average per month was \$20.40.

Now, from July until October, the average was \$20.37, but under the new rate, which wasn't put into effect at the time, the average would have been \$49 per month from \$20.37; and then from October to December 22nd, which is another three months, 1928, the average was \$24.10 under the old rate, and under the new rate \$55.63 per month.

BY THE CHAIRMAN:

Q. Repeat those figures, if you please?

A. Under the old rate \$24.10 per month; under the new rate \$55.63 per month.

BY MR. RICHARDS:

Q. Is that an entirely new rate or does that include fixtures not charged for?

A. That is a meter bill.

Q. That is a meter bill?

A. Yes. This is a small silk throwing concern in Kingston.

Q. How many employees do they have, approximately?

A. Well, I don't know. I would judge probably about 200. Now, for March—

BY MR. CRAWFORD:

Q. Is that mostly made up by the increase in the price of water for—

A. The increase in the price of water. You will notice that the monthly bills run practically always alike, and the rest is the increase in the price of water. Now during that time they were working full time. When I went over and got this they were working about one-half time, and the last bill that I got from them they were working half time, and the new rate only; I haven't got the old rates; \$58 per month. Otherwise it would run about \$116 per month if they worked full.

BY MR. HAGMAIER:

Q. \$58, on half time?

A. Yes.

Q. They had better work at full time at \$58.

A. But, you see, that is where they went up again. And, here we have Edward Johnson, 103 Gillingham Street.

BY MR. EVANS:

Q. That is in Wilkes-Barre?

A. That is in Wilkes-Barre.

Q. Is that an industrial consumer?

A. It is a small machine shop employing fifteen men altogether. They have a sprinkler in there, for which they were paying \$18.75 a quarter or \$75. a year, and they raised his sprinkler from \$75. to \$325 a year or \$81.25 a quarter, against \$18.75. Now, this man took my advice and refused to pay the bills when I advised the people they refuse to pay after they started coming out about the tenth of February, 1929, and they attempted to come out there and shut off this man's sprinkler system, and when they came there he came outside—he happened to be home—"What are you going to do?" "We are going to shut up this sprinkler system." "No, you aint." "Oh, yes we are." He says "you are not going to shut it off." "Why aint we?" "Because there are fifteen men inside who are raring to go. And now, you just attempt to shut it off." Several weeks after that one of the officials of the company came to this gentleman, Mr. Johnson, and made a settlement with him at the rate of \$100 a year against \$325, their schedule. And that is the one that Father Curran spoke about.

BY MR. HAGMAIER:

Q. I would like to ask you right on that point, have they made the same kind of agreement with other people for a reduction of the bill without the consent of the Commission?

A. I have heard, but I can't give you the names of any, they have made the same kind of agreement.

BY MR. RICHARDS:

Q. You say that this man's name is Johnson, with whom they made the adjustment of the bill?

A. He told me himself that they made it \$100.

Q. The rate schedule—

A. The rate schedule calls for \$325, and the old one \$75.

BY MR. CRAWFORD:

Q. Is that the approved rate by the Commission?

A. The approved rate by the Commission is \$325.

BY MR. RICHARDS:

Q. Did Mr. Johnson appear here today?

A. No.

Q. Where does he live?

A. He lives in the southern end of the city. I think he lives on South Franklin Street.

BY MR. EVANS:

Q. Wilkes-Barre?

A. Wilkes-Barre.

BY MR. RICHARDS:

Q. What is his name?

A. Edward J. Johnson. You can reach him at 103 Gillingham Street. That is where he has his machine shop.

Now, this is one that the Reverend spoke to you about. Here is the actual bill (indicating). The old rate that they had to pay was \$36 on the flat, and they were induced to put in a meter, stating that they would get their water rent for less money, and at the meter rates the water rent runs for one month \$81.38, or an average of \$975.56 a year.

Q. Is that a manufactory?

A. No, a small place in Hanover Township where they make sausages. Two men are working there. Now this is another silk mill (indicating, paper) where Johnson is. This silk mill is in the rear of Johnson's machine shop on Gillingham Street. They have motors in there also. The old rate for September, 1928, figured out \$17.00 and on the new rate \$39.00. The bills for November, 1928, from October to November figured \$11.96 for the old rate and at the new rate \$25.64. Then we have here one for January from the 12th of December, 1928, to January 2nd. They have it down, \$3.73, but they have the new rate down here for \$18.86. Then we have one for May, 1929, here under the new rate only \$21.96, and the next month it is \$24.16, the next month it is \$26.16. This is a small throwing plant where Johnson has his machine shop, in the same building.

BY MR. RICHARDS:

Q. What do you mean by throwing plant?

A. A silk throwing plant. Here we have some individual families. Here is a widow, Sophia Sovitsky, 350 Main Street, Wilkes-Barre. These are actual bills and the bills call for 0. show the charges for seven tenants, and the bills call for \$60.73. Under their rate schedule as filed the bills should be \$35.49, an overcharge of \$25.24.

BY THE CHAIRMAN:

Q. An overcharge?

A. Yes sir,

BY MR. BOWERS:

Q. How long do they cover?

A. Three months.

BY MR. RICHARDS:

Q. There would be no back charge in that?

A. That is for the actual three months there. Here is a gentleman, retired, now he has six tenants and for three months these bills call for \$90.57.

Q. On buildings?

A. Six small dwellings, they got it \$48.99 an overcharge of \$41.58.

BY MR. BOWERS:

Q. Are these on meter or flat rate?

A. Flat rate. This man here settled, they settled with him and he paid \$132.50, and they had him charged \$452.75.

BY MR. TURNER:

Q. Was the \$452 charge according to their rates?

A. Some of them are and some are considerably overcharged.

BY MR. RICHARDS:

Q. Will you let me see that specific bill that you speak of?

A. That includes all the dwellings.

BY MR. EVANS:

Q. Was that overcharge due to charging for fixtures that were in there?

A. That I cannot tell you, what the overcharge was for. I figure the overcharge to the consumers of the Spring Brook Valley territory on this list you have here, I went over them very carefully afterwards, and I find the difference between the new rate and the actual amount of the bills runs over two million dollars for the quarter.

BY MR. CRAWFORD:

Q. If that was due to an error, was the error corrected when found?

A. If you went there and fought strong enough it would be corrected.

BY MR. EVANS:

Q. When you say that it amounted to two million dollars, do you mean that you applied that same per cent of errors to all the consumers?

A. Yes, sir, in that division. Here are some that have been paid and the rest have not been collected. This is a widow lady living in Nanticoke. She should have paid \$13.00 under the old rate but paid \$27.75.

BY MR. BOWERS:

Q. What is this discrepancy due to?

A. Errors in their bills.

Q. Are they clerical errors?

A. Whether they are clerical errors or Deliberately made I don't know, but every bill seems to have an error and the error is always in favor of the company.

BY MR. TURNER:

Q. How did you figure the error?

A. I took the fixtures into consideration and the number of people in the home and figured out the bill in accordance with the rates.

BY MR. RICHARDS:

Q. On the old rate or the new rate?

A. Some are figured on the old rate and some on the new rate. Here is a widow lady—

MR. EVANS:

Q. When you rechecked these bills you have used the rate which was applicable at the time of that bill?

A. Yes sir. This one was figured on the old rate and here is one which was figured on the new rate.

BY MR. CRAWFORD:

Q. What is that error?

A. It shows here.

BY MR. BOWERS:

Q. Could those errors be due to the figuring you did. Is it a difference in the figures you used and the ones they used or where is the error? What did you base the error on?

A. Why, they charged this lady \$2.50 a quarter for a hydrant at the new rate, \$10.00 a year, and they have charged her \$2.00 for six months in addition where they should have charged her \$1.00 for that period. They were retroactive.

BY MR. EVANS:

Q. That is up to January 1st, that is from January 1st to April 1st, 1929?

A. Yes.

Q. This is during the period that the retroactive order of the Commission was effective?

A. Yes sir. We have here a \$2.00 extra which was put on her for which they claim they found an extra fixture. The extra fixture could be nothing but a toilet, and for this period it would amount to \$1.00 and they charged her \$2.00. On the next bill is the same thing. On the next bill they charged \$2.50 and it should have been \$1.50.

Q. Did you take any of these complaints up with the company to see what the explanation was?

A. No sir, those were paid before my attention was called to it. The next one is for \$2.50 and should have been \$1.50, the next one is the same way. Now this one here is figured entirely on the new rate and is paid for and receipted for and everything.

Q. Whose bill is this?

A. Mrs. Catherine Franks.

Q. What is the address?

A. This is a double block which she owns. She lives at 220 Hazel avenue, which is her home. She has a barber shop in front in the home run by her son, and she has a double block of 431 and 433 South Main street, Wilkes-Barre.

Q. What are the dates of those bills?

A. These bills are January 1st, 1929, to April 1st, 1929. Now figuring this in accordance with the rate schedule allowed by the Public Service Commission the 21st day of December, 1928, and in accordance with the schedule printed here and allowed by the Commission, this lady should have paid \$34.86 but she actually paid \$44.34.

BY MR. RICHARDS:

Q. On what rate, Mr. Geiser?

A. The flat rate. Those are the conditions that we find all through the Wyoming Valley.

Q. Let me see that one with the six dwellings? (Paper handed to Mr. Richards by the witness.)

BY MR. HAGMAIER:

Q. What excuse do they make when they settle with you, or do they make any?

A. Since we organized and have been fighting them so vehemently, they don't make any excuse; they adjust anything we complain about except in the Pittston division. In that division they pay no attention to anyone that goes in there unless they see a Water League button on his lapel, and if they see that they will settle immediately.

BY MR. MOORE:

Q. If it is a fair question to ask, do they disregard the printed and allowed schedule in making those settlements?

A. Oh no. A settlement is generally made at the present time on the old rate because we have an agreement signed on the seventeenth day of December, 1928, in which they agree to accept the old rate until after a decision is handed down by the highest courts in the State of Pennsylvania.

Q. If I get you right—there were some that were settled then for less

A. Yes sir. This Mr. Johnson they settled with him and agreed to take \$100.00; which was agreeable to him.

BY MR. EVANS:

Q. Was that on the old rate?

A. No, the old rate was \$75.00 and the new rate allowed by the Commission is \$325.00 which he refused to pay and then they agreed to accept \$100.00.

BY MR. HAGMAIER:

Q. Did they give him a receipt for \$100.00?

A. In full for \$100.00.

BY MR. TURNER:

Q. Were complaints made to the Public Service Commission about those overcharges?

A. Yes sir, I did myself.

Q. Were they verbal or written?

A. Verbal, right in the hearing.

BY MR. MOORE:

Q. Was any complaint made of these settlements under the schedule?

A. No sir, I don't think that it was.

BY MR. EVANS:

Q. Have you any idea at all as to how many citizens of the community have come down to the hearing here today?

A. Close to two thousand.

Q. How many bus loads came down this morning?

A. Thirty-five or thirty-six.

Q. Are these people paying their own expenses down?

A. They are paying their own expenses.

BY MR. MEMOLO:

Q. Mr. Geiser, when they asked for a certificate from the Public Service Commission—when they asked for a certificate of public convenience, they certified here in Section 4 that the purchase of the franchise of the Scranton Company, the Scranton Spring Brook Water Service Company, will permit unification of the operations of the company and result in economical and simplified operation of property, will avoid the burden of making numerous separate reports and returns, particularly in relation to Federal and State taxation, will benefit the service now being rendered to the public, and will permit of a more economical basis for financing the existing indebtedness of the companies, upon refunding thereof, and future capital requirements for additions, extensions and improvements to and in the properties of the company. Now, I believe when this certificate was asked for, didn't the people up there in that territory feel that in making this merger they were going to get a reduction in rates instead of an increase, on the basis of this section here?
